

Subject index

Acetaldehyde

Preparation of carbon/TiO₂ microsphere composites from cellulose/TiO₂ microsphere composites and their evaluation (Nagaoka, S. (177) 255)

Acetone

Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)

Acetone transformation over Pt/H[Al]ZSM5 and Pt/H[Ga]ZSM5 catalysts. Evidences of a Pt–Ga interaction (Melo, L. (177) 281)

Acrolein

Oxygen exchange at Mo/V mixed oxides. A transient and ¹⁸O isotope study under technical conditions (Krauß, K. (177) 237)

Activity

Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Acylation anisole

On the acylation reactions of anisole using α,β -unsaturated organic acids as acylating agents and solid acids as catalysts: a mechanistic overview (Castro, C. (177) 273)

Acylation with organic acids

On the acylation reactions of anisole using α,β -unsaturated organic acids as acylating agents and solid acids as catalysts: a mechanistic overview (Castro, C. (177) 273)

ALCVD

Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)

Alkene

Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Alkyne

Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Asymmetric catalysis

Polymeric metal complex catalyzed enantioselective epoxidation of olefins (Dhal, P.K. (177) 71)

Beckmann rearrangement

Beckmann rearrangement of cyclohexanone oxime over mesoporous Si-MCM-41 and Al-MCM-41 molecular sieves (Chaudhari, K. (177) 247)

Bifunctional catalysts

Acetone transformation over Pt/H[Al]ZSM5 and Pt/H[Ga]ZSM5 catalysts. Evidences of a Pt–Ga interaction (Melo, L. (177) 281)

But-2-enal

Effect of thiophene modification on supported metal catalysts for the hydrogenation of but-2-enal (Bailie, J.E. (177) 209)

Caprolactam

Beckmann rearrangement of cyclohexanone oxime over mesoporous Si-MCM-41 and Al-MCM-41 molecular sieves (Chaudhari, K. (177) 247)

Carbon/TiO₂ hybrid

Preparation of carbon/TiO₂ microsphere composites from cellulose/TiO₂ microsphere composites and their evaluation (Nagaoka, S. (177) 255)

Catalysis

Improvement of active site accessibility of resin catalysts by polymer/carrier composites: development and characterisation of monolithic catalytic chromatographic reactors (Kunz, U. (177) 21)

Catalytic oxidation

Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)

Cellulose

Preparation of carbon/TiO₂ microsphere composites from cellulose/TiO₂ microsphere composites and their evaluation (Nagaoka, S. (177) 255)

Chelate resin

Effect of additional metal ions on catalyses of polymer-stabilized metal nanoclusters (Toshima, N. (177) 139)

Chemical tethering

Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)

Chromatography

Improvement of active site accessibility of resin catalysts by polymer/carrier composites: development and characterisation of monolithic catalytic chromatographic reactors (Kunz, U. (177) 21)

Cinchonidine

Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)

- Cyclohexanone oxime
Beckmann rearrangement of cyclohexanone oxime over mesoporous Si-MCM-41 and Al-MCM-41 molecular sieves (Chaudhari, K. (177) 247)
- Dehydrogenation
Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)
- Diene
Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Dimerization
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Dispersed metals
Catalysis by metal nanoparticles supported on functional organic polymers (Králík, M. (177) 113)
- Dissolved copper(II) ions
Effect of copper(II) on the photocatalytic degradation of sucrose (Beydoun, D. (177) 265)
- Enantioselective
Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- Epoxidation
Polymeric metal complex catalyzed enantioselective epoxidation of olefins (Dhal, P.K. (177) 71)
- Etherification
Interaction between the reaction medium and an ion-exchange resin catalyst in the etherification of isoamylenes (Rihko-Struckmann, L.K. (177) 41)
- 2-Ethyl-9,10-antraquinone hydrogenation
2-Ethyl-9,10-antraquinone hydrogenation over Pd/polymers. Effect of polymers-Pd(II) chlorocomplexes interactions (Drelinkiewicz, A. (177) 149)
- Ethyl pyruvate
Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- Ethylene
Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
In situ UV-VIS studies on late-transition metal catalysts for ethylene polymerization (Luo, H.-K. (177) 195)
- Functional organic polymers
Catalysis by metal nanoparticles supported on functional organic polymers (Králík, M. (177) 113)
- Functional resins
Catalysis by metal nanoparticles supported on functional organic polymers (Králík, M. (177) 113)
- Grubbs' catalyst
Ring closing metathesis in water with or without surfactants in the presence of $\text{RuCl}_2(\text{PPh}_3)_2(\text{CHPh})$ (Davis, K. Joju (177) 173)
- Heterocyclic polyamides
Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Heterogenized catalysts
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Heteropolyacids acylation catalysts
On the acylation reactions of anisole using α,β -unsaturated organic acids as acylating agents and solid acids as catalysts: a mechanistic overview (Castro, C. (177) 273)
- Hf
Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
- Hydrogenation
Catalysis by metal nanoparticles supported on functional organic polymers (Králík, M. (177) 113)
2-Propen-1-ol hydrogenation and isomerisation on polymer-palladium complexes — effect of polymer matrix (Zharmagambetova, A.K. (177) 165)
Effect of thiophene modification on supported metal catalysts for the hydrogenation of but-2-enal (Bailie, J.E. (177) 209)
Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- Hydrosilylation
Polymethacrylate and polystyrene-based resin-supported Pt catalysts in room temperature, solvent-less, oct-1-ene hydrosilylations using trichlorosilane and methylchlorosilane (Drake, R. (177) 49)
Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- In situ UV-VIS
In situ UV-VIS studies on late-transition metal catalysts for ethylene polymerization (Luo, H.-K. (177) 195)
- Ion exchange resin
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Ion-exchange resin
Interaction between the reaction medium and an ion-exchange resin catalyst in the etherification of isoamylenes (Rihko-Struckmann, L.K. (177) 41)
- Ion-exchange
Catalysis by metal nanoparticles supported on functional organic polymers (Králík, M. (177) 113)
- Iron
In situ UV-VIS studies on late-transition metal catalysts for ethylene polymerization (Luo, H.-K. (177) 195)

- Isobutene**
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Isomerisation**
2-Propen-1-ol hydrogenation and isomerisation on polymer-palladium complexes — effect of polymer matrix (Zharmagambetova, A.K. (177) 165)
- Isooctane**
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Isotopic oxygen exchange**
Oxygen exchange at Mo/V mixed oxides. A transient and ^{18}O isotope study under technical conditions (Krauß, K. (177) 237)
- Kinetics**
Interaction between the reaction medium and an ion-exchange resin catalyst in the etherification of isoamylenes (Rihko-Struckmann, L.K. (177) 41)
- MCM-41**
Beckmann rearrangement of cyclohexanone oxime over mesoporous Si-MCM-41 and Al-MCM-41 molecular sieves (Chaudhari, K. (177) 247)
- Mesoporous materials**
Beckmann rearrangement of cyclohexanone oxime over mesoporous Si-MCM-41 and Al-MCM-41 molecular sieves (Chaudhari, K. (177) 247)
- Metal nanocluster catalyst**
Effect of additional metal ions on catalyses of polymer-stabilized metal nanoclusters (Toshima, N. (177) 139)
- Metal-complex catalysts**
Nafion: an excellent support for metal-complex catalysts (Seen, A.J. (177) 105)
- Metalocene**
Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
- Methacrolein**
Oxygen exchange at Mo/V mixed oxides. A transient and ^{18}O isotope study under technical conditions (Krauß, K. (177) 237)
- Methanol carbonylation**
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- 2-Methoxy-2-methylbutane**
Interaction between the reaction medium and an ion-exchange resin catalyst in the etherification of isoamylenes (Rihko-Struckmann, L.K. (177) 41)
- Methyl formate**
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Methyl-isobutyl ketone**
Acetone transformation over Pt/H[Al]ZSM5 and Pt/H[Ga]ZSM5 catalysts. Evidences of a Pt–Ga interaction (Melo, L. (177) 281)
- Methyldichlorosilane**
Polymethacrylate and polystyrene-based resin-supported Pt catalysts in room temperature, solvent-less, oct-1-ene hydrosilylations using trichlorosilane and methyldichlorosilane (Drake, R. (177) 49)
- Microporous structure**
Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Mixed metal oxides**
Oxygen exchange at Mo/V mixed oxides. A transient and ^{18}O isotope study under technical conditions (Krauß, K. (177) 237)
- Molecular accessibility**
Catalysis and polymer networks — the role of morphology and molecular accessibility (Corain, B. (177) 3)
- Monolithic column**
Improvement of active site accessibility of resin catalysts by polymer/carrier composites: development and characterisation of monolithic catalytic chromatographic reactors (Kunz, U. (177) 21)
- Multifunctional catalysis**
Catalysis by metal nanoparticles supported on functional organic polymers (Králik, M. (177) 113)
- Multifunctional reactor**
Improvement of active site accessibility of resin catalysts by polymer/carrier composites: development and characterisation of monolithic catalytic chromatographic reactors (Kunz, U. (177) 21)
- Nafion**
Nafion: an excellent support for metal-complex catalysts (Seen, A.J. (177) 105)
- Nickel catalyst**
Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)
- Nickel**
In situ UV–VIS studies on late-transition metal catalysts for ethylene polymerization (Luo, H.-K. (177) 195)
- Olefins**
Polymeric metal complex catalyzed enantioselective epoxidation of olefins (Dhal, P.K. (177) 71)
- Oligomerization**
Acidic and basic ion exchange resins for industrial applications (Di Girolamo, M. (177) 33)
- Organic cross-linked polymers**
Catalysis and polymer networks — the role of morphology and molecular accessibility (Corain, B. (177) 3)
- Oxidation kinetics**
Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)
- Oxidation**
Catalysis by metal nanoparticles supported on functional organic polymers (Králik, M. (177) 113)
- Oxygen exchange**
Oxygen exchange at Mo/V mixed oxides. A transient and ^{18}O isotope study under technical conditions (Krauß, K. (177) 237)

- Palladium catalysts
 2-Ethyl-9,10-anthraquinone hydrogenation over Pd/polymers. Effect of polymers–Pd(II) chlorocomplexes interactions (Drelinkiewicz, A. (177) 149)
- Periodic density functional theory
 Periodic density functional study of superacidity of sulfated zirconia (Kanougi, T. (177) 289)
- Photoassisted catalysis
 Preparation of carbon/TiO₂ microsphere composites from cellulose/TiO₂ microsphere composites and their evaluation (Nagaoka, S. (177) 255)
- Photocatalytic reaction
 Effect of copper(II) on the photocatalytic degradation of sucrose (Beydoun, D. (177) 265)
- Physicochemical parameters
 Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Platinum-alumina
 Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- Poly(4-vinylpyridine)
 2-Ethyl-9,10-anthraquinone hydrogenation over Pd/polymers. Effect of polymers–Pd(II) chlorocomplexes interactions (Drelinkiewicz, A. (177) 149)
- Poly(acrylic acid)
 Effect of additional metal ions on catalyses of polymer-stabilized metal nanoclusters (Toshima, N. (177) 139)
- Polyaniline
 2-Ethyl-9,10-anthraquinone hydrogenation over Pd/polymers. Effect of polymers–Pd(II) chlorocomplexes interactions (Drelinkiewicz, A. (177) 149)
- Polymer catalyst
 Effect of additional metal ions on catalyses of polymer-stabilized metal nanoclusters (Toshima, N. (177) 139)
- Polymer networks
 Catalysis and polymer networks — the role of morphology and molecular accessibility (Corain, B. (177) 3)
- Polymer-immobilized metal ions
 Effect of additional metal ions on catalyses of polymer-stabilized metal nanoclusters (Toshima, N. (177) 139)
- Polymer-palladium catalysts
 2-Propen-1-ol hydrogenation and isomerisation on polymer-palladium complexes — effect of polymer matrix (Zharmagambetova, A.K. (177) 165)
- Polymer/carrier composite
 Improvement of active site accessibility of resin catalysts by polymer/carrier composites: development and characterisation of monolithic catalytic chromatographic reactors (Kunz, U. (177) 21)
- Polymeric
 Polymeric metal complex catalyzed enantioselective epoxidation of olefins (Dhal, P.K. (177) 71)
- Polymerization
 Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
- In situ UV–VIS studies on late-transition metal catalysts for ethylene polymerization (Luo, H.-K. (177) 195)
- Prehydrogenation
 Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- Pretreatment
 Heterogeneous asymmetric reactions. Part 25. On the pretreatment and prehydrogenation of Pt-alumina catalyst in the hydrogenation of ethyl pyruvate (Bartók, M. (177) 299)
- 2-propanol
 Kinetic study on the selective catalytic oxidation of 2-propanol to acetone over nickel foils (Ali, A.H. (177) 215)
- 2-Propen-1-ol
 2-Propen-1-ol hydrogenation and isomerisation on polymer-palladium complexes — effect of polymer matrix (Zharmagambetova, A.K. (177) 165)
- Pt/H[Al]ZSM5
 Acetone transformation over Pt/H[Al]ZSM5 and Pt/H[Ga]ZSM5 catalysts. Evidences of a Pt–Ga interaction (Melo, L. (177) 281)
- Pt/H[Ga]ZSM5
 Acetone transformation over Pt/H[Al]ZSM5 and Pt/H[Ga]ZSM5 catalysts. Evidences of a Pt–Ga interaction (Melo, L. (177) 281)
- Reaction mechanism
 Effect of copper(II) on the photocatalytic degradation of sucrose (Beydoun, D. (177) 265)
- Regioselectivity
 Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Rhodium(I)
 Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)
- Ring closing metathesis
 Ring closing metathesis in water with or without surfactants in the presence of RuCl₂(PPh₃)₂(CHPh) (Davis, K. Joju (177) 173)
- Silica
 Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
- Solubility parameter
 Interaction between the reaction medium and an ion-exchange resin catalyst in the etherification of isoamylenes (Rihko-Struckmann, L.K. (177) 41)
- Stereoselectivity
 Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Structure-activity/selectivity correlation

Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Sulfated zirconia

Periodic density functional study of superacidity of sulfated zirconia (Kanougi, T. (177) 289)

Superacidity

Periodic density functional study of superacidity of sulfated zirconia (Kanougi, T. (177) 289)

Supported catalysts

Nafion: an excellent support for metal-complex catalysts (Seen, A.J. (177) 105)

Supported catalysts

Rhodium(I) complex catalysts immobilized on polyamides having a pyridine moiety. Effect of the polymer structure (Michalska, Z.M. (177) 89)

Supported reagents

Polymeric metal complex catalyzed enantioselective epoxidation of olefins (Dhal, P.K. (177) 71)

Surfactants

Ring closing metathesis in water with or without surfactants in the presence of $\text{RuCl}_2(\text{PPh}_3)_2(\text{CHPh})$ (Davis, K. Joju (177) 173)

Thiophene

Effect of thiophene modification on supported metal catalysts for the hydrogenation of but-2-enal (Bailie, J.E. (177) 209)

Ti

Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)

 TiO_2 suspensions

Effect of copper(II) on the photocatalytic degradation of sucrose (Beydoun, D. (177) 265)

Titanium dioxide

Preparation of carbon/ TiO_2 microsphere composites from cellulose/ TiO_2 microsphere composites and their evaluation (Nagaoka, S. (177) 255)

Transition metal complexes

Effect of copper(II) on the photocatalytic degradation of sucrose (Beydoun, D. (177) 265)

Trichlorosilane

Polymethacrylate and polystyrene-based resin-supported Pt catalysts in room temperature, solvent-less, oct-1-ene hydrosilylations using trichlorosilane and methylchlorosilane (Drake, R. (177) 49)

Water

Ring closing metathesis in water with or without surfactants in the presence of $\text{RuCl}_2(\text{PPh}_3)_2(\text{CHPh})$ (Davis, K. Joju (177) 173)

Zr

Immobilization of metal chloride complexes of titanium, zirconium, and hafnium on a cyclopentadienyl surface of silica for ethylene polymerization (Uusitalo, A.-M. (177) 179)
