

Subject index

Acetone

Acetone transformation over PtSn/H[Al]ZSM5 catalysts (Morales, R. (203) 277)

Active catalyst

Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)

Active metal sites

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Alkenes

On the kinetics of epoxidation of olefins by *cis* and *trans*-[RuCl₂(dppb)(2,2'-bipy)] complexes (Bogado, A.L. (203) 129)

Alkyl xanthogenates

Interactions of cobalt tetrasulfophthalocyanine with alkyl xanthogenates: evidence for hydrophobic effects in the Merox process (Tyapochkin, E.M. (203) 37)

Aluminophosphate

In situ X-ray absorption spectroscopic study on the reducibility of cobalt-containing aluminophosphate molecular sieves (Lee, J.-F. (203) 165)

Aqueous solution

Oxidation of veratryl alcohol by molecular oxygen in aqueous solution catalyzed by cobalt salen-type complexes: the effect of reaction conditions (Kervinen, K. (203) 9)

Atacamite

The role of copper chloride hydroxides in the oxidative carbonylation of methanol for dimethyl carbonate synthesis (Han, M.S. (203) 137)

Benzaldehyde

Support effect in hydrogenation of methyl benzoate over supported manganese oxide catalysts (Chen, A. (203) 299)

Benzene

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Bifunctional monometallic and bimetallic catalysts

Acetone transformation over PtSn/H[Al]ZSM5 catalysts (Morales, R. (203) 277)

Biphasic catalysis

Epoxidation of α,β -unsaturated carbonyl compounds in ionic liquid/water biphasic system under mild conditions (Wang, B. (203) 29)

Bromoarenes

Simple method for enhancement of the ligand-free palladium catalyst activity in the Heck reaction with non-activated bromoarenes (Schmidt, A.F. (203) 75)

n-Bromobutane

Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)

Butadiene

Effects of the method of preparing titanium pyrophosphate catalyst on the structure and catalytic activity in oxidative dehydrogenation of *n*-butane (Marcu, I.-C. (203) 241)

Butene

Effects of the method of preparing titanium pyrophosphate catalyst on the structure and catalytic activity in oxidative dehydrogenation of *n*-butane (Marcu, I.-C. (203) 241)

n-Butane

Effects of the method of preparing titanium pyrophosphate catalyst on the structure and catalytic activity in oxidative dehydrogenation of *n*-butane (Marcu, I.-C. (203) 241)

C–N coupling reactions

Metallation of functional resins with copper acetate: control of metal speciation and catalytic activity in C–N coupling reactions (Biffis, A. (203) 213)

Carbene transfer

Octacarbonyl dicobalt-catalyzed selective transformation of ethyl diazoacetate into organic products containing the ethoxycarbonyl carbene building block (Tuba, R. (203) 59)

Carbon monoxide

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Reduction of SO₂ by CO and COS over La₂O₂S—a mechanistic study (Lau, N.T. (203) 221)

Carbonyl sulfide

Reduction of SO₂ by CO and COS over La₂O₂S—a mechanistic study (Lau, N.T. (203) 221)

Carboxylic acid

A study on the addition of some carboxylic acids to epichlorohydrin in the presence of salen chromium(III) complexes (Bukowska, A. (203) 95)

Catalysis by halide cluster

Catalytic dehydrohalogenation of alkyl halides by Nb, Mo, Ta, and W halide clusters with an octahedral metal framework and by a Re chloride cluster with a triangular metal framework (Kamiguchi, S. (203) 153)

Catalysis polymerization

A new catalyst of 12-molybdophosphoric acid for cationic polymerization of styrene: activity and mechanism studies (Chen, D. (203) 307)

Catalysis

Novel terpyridine-manganese(II) complexes and their potential to activate hydrogen peroxide (Wieprecht, T. (203) 113)

Catalytic hydroxylation

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Catalytic oxidation

Oxidation of veratryl alcohol by molecular oxygen in aqueous solution catalyzed by cobalt salen-type complexes: the effect of reaction conditions (Kervinen, K. (203) 9)

Chromotropism of Cr(salen) moiety in zeolite matrix: synthesis, characterization and catalytic activity study of Cr(salen)-NaY hybrid catalyst (Saha, P.K. (203) 173)

Cationic

A new catalyst of 12-molybdophosphoric acid for cationic polymerization of styrene: activity and mechanism studies (Chen, D. (203) 307)

Chemisorption

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Cinnamaldehyde

Selective hydrogenation of cinnamaldehyde over Pd/SiO₂ catalysts: selectivity promotion by alloyed Sn (Hammoudeh, A. (203) 231)

Citral hydrogenation

Effect of Fe/Ir ratio on the surface and catalytic properties in citral hydrogenation on Fe-Ir/TiO₂ catalysts (Reyes, P. (203) 203)

Co-SAPO-18

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Cobalt complexes

Oxidation of veratryl alcohol by molecular oxygen in aqueous solution catalyzed by cobalt salen-type complexes: the effect of reaction conditions (Kervinen, K. (203) 9)

Cobalt tetrasulfophthalocyanine

Interactions of cobalt tetrasulfophthalocyanine with alkyl xanthogenates: evidence for hydrophobic effects in the Merox process (Tyapochkin, E.M. (203) 37)

Cobalt

In situ X-ray absorption spectroscopic study on the reducibility of cobalt-containing aluminophosphate molecular sieves (Lee, J.-F. (203) 165)

Copper acetate

Metallation of functional resins with copper acetate: control of metal speciation and catalytic activity in C–N coupling reactions (Biffis, A. (203) 213)

Copper chloride hydroxides (Cu₂(OH)₃Cl)

The role of copper chloride hydroxides in the oxidative carbonylation of methanol for dimethyl carbonate synthesis (Han, M.S. (203) 137)

Cr(III)salen

Chromotropism of Cr(salen) moiety in zeolite matrix: synthesis, characterization and catalytic activity study of Cr(salen)-NaY hybrid catalyst (Saha, P.K. (203) 173)

Cr/Al₂O₃

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Cr/SiO₂

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Cu-SAPO-18

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Cyclohexane

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Cyclohexanol

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Cyclohexene

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation–cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

Cyclotrimerization

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation–cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

Dehydrohalogenation of halogenated alkanes

Catalytic dehydrohalogenation of alkyl halides by Nb, Mo, Ta, and W halide clusters with an octahedral metal framework and by a Re chloride cluster with a triangular metal framework (Kamiguchi, S. (203) 153)

Di-*n*-butyl sulfide

Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)

Dimeric

Enantioselective epoxidation of non-functionalised alkenes catalysed by dimeric homochiral Mn(III) Salen complex using oxone as oxidant (Kureshy, R.I. (203) 69)

Dimethyl carbonate (DMC)

The role of copper chloride hydroxides in the oxidative carbonylation of methanol for dimethyl carbonate synthesis (Han, M.S. (203) 137)

Diphenyl carbonate

Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd-carbene complexes (Okuyama, K.-i. (203) 21)

DRIFTS

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

DRS

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Enantioselective epoxidation

Enantioselective epoxidation of non-functionalised alkenes catalysed by dimeric homochiral Mn(III) Salen complex using oxone as oxidant (Kureshy, R.I. (203) 69)

Epoxidation

Epoxidation of α,β -unsaturated carbonyl compounds in ionic liquid/water biphasic system under mild conditions (Wang, B. (203) 29)

On the kinetics of epoxidation of olefins by *cis* and *trans*-[RuCl₂(dppb)(2,2'-bipy)] complexes (Bogado, A.L. (203) 129)

Olefin epoxidation catalyzed by an air stable-supported titanium catalyst (Sensarma, S. (203) 145)

Ethene-norbornene copolymers

Ethene-norbornene copolymerizations using two different homogeneous metallocene catalyst systems and investigations of the copolymer microstructure (Wendt, R.A. (203) 101)

Fe-Ir/TiO₂ catalysts

Effect of Fe/Ir ratio on the surface and catalytic properties in citral hydrogenation on Fe-Ir/TiO₂ catalysts (Reyes, P. (203) 203)

Fe/Ir atomic ratio

Effect of Fe/Ir ratio on the surface and catalytic properties in citral hydrogenation on Fe-Ir/TiO₂ catalysts (Reyes, P. (203) 203)

FT-IR

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

FTIR spectroscopy

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Furfural (FFR)

Liquid phase hydrogenation of furfural to furfuryl alcohol over the Fe-promoted Ni-B amorphous alloy catalysts (Li, H. (203) 267)

Furfuryl alcohol (FFA)

Liquid phase hydrogenation of furfural to furfuryl alcohol over the Fe-promoted Ni-B amorphous alloy catalysts (Li, H. (203) 267)

Gel-type (microporous) ion-exchangers

Metallation of functional resins with copper acetate: control of metal speciation and catalytic activity in C-N coupling reactions (Biffis, A. (203) 213)

Heck reaction

Simple method for enhancement of the ligand-free palladium catalyst activity in the Heck reaction with non-activated bromoarenes (Schmidt, A.F. (203) 75)

Heterocyclic carbene

Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd-carbene complexes (Okuyama, K.-i. (203) 21)

Heteropolyacid

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation-cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

Hybrid catalyst

[Rh(cod)Cl]₂ complex immobilized on mesoporous molecular sieves MCM-41-a new hybrid catalyst for polymerization of phenylacetylene (Balcar, H. (203) 287)

Hydrodehalogenation by rhenium

Catalytic dehydrohalogenation of alkyl halides by Nb, Mo, Ta, and W halide clusters with an octahedral metal framework and by a Re chloride cluster with a triangular metal framework (Kamiguchi, S. (203) 153)

Hydroformylation

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation-cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

Hydrogen peroxide

Novel terpyridine-manganese(II) complexes and their potential to activate hydrogen peroxide (Wieprecht, T. (203) 113)

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Hydrogenation

Liquid phase hydrogenation of furfural to furfuryl alcohol over the Fe-promoted Ni-B amorphous alloy catalysts (Li, H. (203) 267)

Support effect in hydrogenation of methyl benzoate over supported manganese oxide catalysts (Chen, A. (203) 299)

Hydrophobic interactions

Interactions of cobalt tetrasulfophthalocyanine with alkyl xanthogenates: evidence for hydrophobic effects in the Mercox process (Tyapochkin, E.M. (203) 37)

Immobilization

Chromotropism of Cr(salen) moiety in zeolite matrix: synthesis, characterization and catalytic activity study of Cr(salen)-NaY hybrid catalyst (Saha, P.K. (203) 173)

Iodosylbenzene

On the kinetics of epoxidation of olefins by *cis* and *trans*-[RuCl₂(dppb)(2,2'-bipy)] complexes (Bogado, A.L. (203) 129)

Ionic liquid

Epoxidation of α,β -unsaturated carbonyl compounds in ionic liquid/water biphasic system under mild conditions (Wang, B. (203) 29)

Iron

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and

- comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)
- Kinetic model**
Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)
- Lanthanum oxysulfide**
Reduction of SO₂ by CO and COS over La₂O₂S—a mechanistic study (Lau, N.T. (203) 221)
- Lewis acid sites**
Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)
- Manganese oxide catalyst**
Support effect in hydrogenation of methyl benzoate over supported manganese oxide catalysts (Chen, A. (203) 299)
- Mass transfer**
Epoxidation of α,β -unsaturated carbonyl compounds in ionic liquid/water biphasic system under mild conditions (Wang, B. (203) 29)
- MCM-41**
[Rh(cod)Cl]₂ complex immobilized on mesoporous molecular sieves MCM-41—a new hybrid catalyst for polymerization of phenylacetylene (Balcar, H. (203) 287)
- Merox process**
Interactions of cobalt tetrasulfophthalocyanine with alkyl xanthogenates: evidence for hydrophobic effects in the Merox process (Tyapochkin, E.M. (203) 37)
- Metal–support interactions**
Effect of Fe/Ir ratio on the surface and catalytic properties in citral hydrogenation on Fe-Ir/TiO₂ catalysts (Reyes, P. (203) 203)
- Metallocene catalysts**
Ethene–norbornene copolymerizations using two different homogeneous metallocene catalyst systems and investigations of the copolymer microstructure (Wendt, R.A. (203) 101)
- Methyl benzoate**
Support effect in hydrogenation of methyl benzoate over supported manganese oxide catalysts (Chen, A. (203) 299)
- Methyl isobutyl ketone**
Acetone transformation over PtSn/H[Al]ZSM5 catalysts (Morales, R. (203) 277)
- Michaelis–Menten mechanism**
On the kinetics of epoxidation of olefins by *cis* and *trans*-[RuCl₂(dppb)(2,2'-bipy)] complexes (Bogado, A.L. (203) 129)
- Microstructure**
Ethene–norbornene copolymerizations using two different homogeneous metallocene catalyst systems and investigations of the copolymer microstructure (Wendt, R.A. (203) 101)
- Mn(III) Salen**
Enantioselective epoxidation of non-functionalised alkenes catalysed by dimeric homochiral Mn(III) Salen complex using oxone as oxidant (Kureshy, R.I. (203) 69)
- Molecular sieve**
In situ X-ray absorption spectroscopic study on the reducibility of cobalt-containing aluminophosphate molecular sieves (Lee, J.-F. (203) 165)
- 12-Molybdophosphoric acid**
A new catalyst of 12-molybdophosphoric acid for cationic polymerization of styrene: activity and mechanism studies (Chen, D. (203) 307)
- Morin**
Novel terpyridine-manganese(II) complexes and their potential to activate hydrogen peroxide (Wieprecht, T. (203) 113)
- NaY**
Chromotropism of Cr(salen) moiety in zeolite matrix: synthesis, characterization and catalytic activity study of Cr(salen)-NaY hybrid catalyst (Saha, P.K. (203) 173)
- Ni-Fe-B amorphous catalyst**
Liquid phase hydrogenation of furfural to furfuryl alcohol over the Fe-promoted Ni-B amorphous alloy catalysts (Li, H. (203) 267)
- Niobium halide**
Catalytic dehydrohalogenation of alkyl halides by Nb, Mo, Ta, and W halide clusters with an octahedral metal framework and by a Re chloride cluster with a triangular metal framework (Kamiguchi, S. (203) 153)
- Nitric oxide**
Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)
- NMR**
Ethene–norbornene copolymerizations using two different homogeneous metallocene catalyst systems and investigations of the copolymer microstructure (Wendt, R.A. (203) 101)
- Non-functionalised alkene**
Enantioselective epoxidation of non-functionalised alkenes catalysed by dimeric homochiral Mn(III) Salen complex using oxone as oxidant (Kureshy, R.I. (203) 69)
- Norbornene triblocks**
Ethene–norbornene copolymerizations using two different homogeneous metallocene catalyst systems and investigations of the copolymer microstructure (Wendt, R.A. (203) 101)
- Octacarbonyl dicobalt**
Octacarbonyl dicobalt-catalyzed selective transformation of ethyl diazoacetate into organic products containing the ethoxycarbonyl carbene building block (Tuba, R. (203) 59)
- Olefins**
Olefin epoxidation catalyzed by an air stable-supported titanium catalyst (Sensarma, S. (203) 145)
- Oxidation**
Novel terpyridine-manganese(II) complexes and their potential to activate hydrogen peroxide (Wieprecht, T. (203) 113)
- Oxidative carbonylation of methanol**
The role of copper chloride hydroxides in the oxidative carbonylation of methanol for dimethyl carbonate synthesis (Han, M.S. (203) 137)

Oxidative carbonylation

Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–carbene complexes (Okuyama, K.-i. (203) 21)

Oxidative dehydrogenation

Effects of the method of preparing titanium pyrophosphate catalyst on the structure and catalytic activity in oxidative dehydrogenation of *n*-butane (Marcu, I.-C. (203) 241)

Oxiranes

A study on the addition of some carboxylic acids to epichlorohydrin in the presence of salen chromium(III) complexes (Bukowska, A. (203) 95)

Oxone

Enantioselective epoxidation of non-functionalised alkenes catalyzed by dimeric homochiral Mn(III) Salen complex using oxone as oxidant (Kureshy, R.I. (203) 69)

Oxygen

Oxidation of veratryl alcohol by molecular oxygen in aqueous solution catalyzed by cobalt salen-type complexes: the effect of reaction conditions (Kervinen, K. (203) 9)

Palladium

Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–carbene complexes (Okuyama, K.-i. (203) 21)

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Paratacamite

The role of copper chloride hydroxides in the oxidative carbonylation of methanol for dimethyl carbonate synthesis (Han, M.S. (203) 137)

Pd

Selective hydrogenation of cinnamaldehyde over Pd/SiO₂ catalysts: selectivity promotion by alloyed Sn (Hammoudeh, A. (203) 231)

Phase transfer catalysis

Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)

Phenol

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

Phenylacetylene polymerization

[Rh(cod)Cl]₂ complex immobilized on mesoporous molecular sieves MCM-41-a new hybrid catalyst for polymerization of phenylacetylene (Balcar, H. (203) 287)

Phosphine-free condition

Simple method for enhancement of the ligand-free palladium catalyst activity in the Heck reaction with non-activated bromoarenes (Schmidt, A.F. (203) 75)

Polyacetylenes

[Rh(cod)Cl]₂ complex immobilized on mesoporous molecular sieves MCM-41-a new hybrid catalyst for polymerization of phenylacetylene (Balcar, H. (203) 287)

Polycarbonate

Oxidative carbonylation of phenol to diphenyl carbonate catalyzed by Pd–carbene complexes (Okuyama, K.-i. (203) 21)

Polymer-supported catalysts

Metallation of functional resins with copper acetate: control of metal speciation and catalytic activity in C–N coupling reactions (Biffis, A. (203) 213)

PtSn/H[Al]ZSM5

Acetone transformation over PtSn/H[Al]ZSM5 catalysts (Morales, R. (203) 277)

Reduction mechanism

Reduction of SO₂ by CO and COS over La₂O₂S—a mechanistic study (Lau, N.T. (203) 221)

Rhenium chloride

Catalytic dehydrohalogenation of alkyl halides by Nb, Mo, Ta, and W halide clusters with an octahedral metal framework and by a Re chloride cluster with a triangular metal framework (Kamiguchi, S. (203) 153)

Rhodium complexes

[Rh(cod)Cl]₂ complex immobilized on mesoporous molecular sieves MCM-41-a new hybrid catalyst for polymerization of phenylacetylene (Balcar, H. (203) 287)

Rhodium

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation–cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

Ring opening

A study on the addition of some carboxylic acids to epichlorohydrin in the presence of salen chromium(III) complexes (Bukowska, A. (203) 95)

Ruthenium complexes

On the kinetics of epoxidation of olefins by *cis* and *trans*-[RuCl₂(dppb)(2,2'-bipy)] complexes (Bogado, A.L. (203) 129)

Salen chromium(III) complexes

A study on the addition of some carboxylic acids to epichlorohydrin in the presence of salen chromium(III) complexes (Bukowska, A. (203) 95)

SCR

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)

Selective hydrogenation

Selective hydrogenation of cinnamaldehyde over Pd/SiO₂ catalysts: selectivity promotion by alloyed Sn (Hammoudeh, A. (203) 231)

Selectivity promotion

Selective hydrogenation of cinnamaldehyde over Pd/SiO₂ catalysts: selectivity promotion by alloyed Sn (Hammoudeh, A. (203) 231)

Silica

Olefin epoxidation catalyzed by an air stable-supported titanium catalyst (Sensarma, S. (203) 145)

Sn

Selective hydrogenation of cinnamaldehyde over Pd/SiO₂ catalysts: selectivity promotion by alloyed Sn (Hammoudeh, A. (203) 231)

Sodium sulfide

Phase transfer catalytic reaction of *n*-bromobutane and sodium sulfide in a two-phase solution and its kinetics (Wang, M.-L. (203) 79)

Styrene

A new catalyst of 12-molybdophosphoric acid for cationic polymerization of styrene: activity and mechanism studies (Chen, D. (203) 307)

Sulfur dioxide

Reduction of SO₂ by CO and COS over La₂O₂S—a mechanistic study (Lau, N.T. (203) 221)

Support effect

Support effect in hydrogenation of methyl benzoate over supported manganese oxide catalysts (Chen, A. (203) 299)

Supported catalysts

Olefin epoxidation catalyzed by an air stable-supported titanium catalyst (Sensarma, S. (203) 145)

Temperature-programmed reduction

In situ X-ray absorption spectroscopic study on the reducibility of cobalt-containing aluminophosphate molecular sieves (Lee, J.-F. (203) 165)

Terpyridines

Novel terpyridine-manganese(II) complexes and their potential to activate hydrogen peroxide (Wieprecht, T. (203) 113)

Thiol auto-oxidation

Interactions of cobalt tetrasulfophthalocyanine with alkyl xanthogenates: evidence for hydrophobic effects in the Mercox process (Tyapochkin, E.M. (203) 37)

Titanium phosphate

Effects of the method of preparing titanium pyrophosphate catalyst on the structure and catalytic activity in oxidative dehydrogenation of *n*-butane (Marcu, I.-C. (203) 241)

TPR

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Trioxane

Rh₆(CO)₁₆-H₃PW₁₂O₄₀-catalyzed one pot hydroformylation-cyclotrimerization of cyclohexene and cyclopentene into 2,4,6-trisubstituted-1,3,5-trioxanes (El Ali, B. (203) 53)

 α,β -Unsaturated carbonyl compound

Epoxidation of α,β -unsaturated carbonyl compounds in ionic liquid/water biphasic system under mild conditions (Wang, B. (203) 29)

Vanadium

Catalytic hydroxylation of benzene and cyclohexane using in situ generated hydrogen peroxide: new mechanistic insights and comparison with hydrogen peroxide added directly (Remias, J.E. (203) 179)

X-ray absorption spectroscopy

In situ X-ray absorption spectroscopic study on the reducibility of cobalt-containing aluminophosphate molecular sieves (Lee, J.-F. (203) 165)

XRD

Characterization of chromium species in catalysts for dehydrogenation and polymerization (Gaspar, A.B. (203) 251)

Zn-SAPO-18

Interaction of probe molecules with active sites on cobalt, copper and zinc-exchanged SAPO-18 solid acid catalysts (Kladis, C. (203) 193)
