Publisher's note

We are delighted to inform you about important developments that will be of significant benefit to the authors and readers of *JOURNAL OF MOLECULAR CATALYSIS A*.

JOURNAL OF MOLECULAR CATALYSIS A is included in a new initiative from Elsevier: 'Colourful e-Products'. Effective immediately, usable colour figures submitted with your accepted manuscript will be published in colour, without charge, in the electronic version in ScienceDirect, regardless of whether these illustrations are approved as colour versions for the printed version of the journal. This initiative provides a welcome step forward in addressing the effective presentation of scientific information in an increasingly electronic environment without significant increases in cost. Authors interested in taking advantage of this initiative should submit all colour art in an acceptable format (TIFF, EPS or MS Office files) and with correct resolution. In addition, for colour online and black & white in print, both colour and black & white artwork (file and/or hardcopy) must be provided by authors.

There is *no charge* to authors for participating in this initiative. Additional details about the requirements for electronic artwork can be found at <http://authors.elsevier.com/artwork>.

Articles can be viewed on-line at the ScienceDirect website: <http://www.sciencedirect.com>.

Elsevier now accepts electronic supplementary material to support and enhance the dissemination of your scientific research. Supplementary files offer authors the opportunity to publish supporting applications, movies, animation sequences, high-resolution images, background datasets, sound clips, and other visual aids or additional procedural details. Supplementary files supplied will be published online together with the electronic version of articles in Elsevier electronic products, including ScienceDirect. In order to ensure that your submitted material is directly usable, please provide the data in one of the recommended file formats. Authors should submit the material in electronic format together with the manuscript and also provide a brief descriptive caption for each file. For more detailed instructions please visit our Author Gateway at <http://authors.elsevier.com>.

Your feedback and comments are welcome.
