

Subject index

Acid–base properties

Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)

Acidity

Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)

Supported sulfated zirconia catalysts and their properties (Prescott, H.A. (223) 67)

Activation energy

Esterification by solid acid catalysts—a comparison (Shanmugam, S. (223) 143)

Active carbon

Highly efficient Ag/C catalyst prepared by electro-chemical deposition method in controlling microorganisms in water (Siva Kumar, V. (223) 313)

Acylation

Alkylation and acylation of phenol with methyl acetate (Shanmugapriya, K. (223) 177)

Aerial oxidation

Synthesis, characterization and catalytic activity of mesoporous trivalent iron substituted aluminophosphates (Subrahmanyam, C. (223) 149)

Ag nano-particles

Highly efficient Ag/C catalyst prepared by electro-chemical deposition method in controlling microorganisms in water (Siva Kumar, V.S. (223) 313)

Al³⁺-montmorillonite

Synthesis of phenylacetates using aluminium-exchanged montmorillonite clay catalyst (Ravindra Reddy, C. (223) 117)

Alkane oxidation

Catalytic oxidation of alkanes and alkenes by polymer-anchored amino acid–ruthenium complexes (Valodkar, V.B. (223) 31)

Alkene epoxidation

Catalytic oxidation of alkanes and alkenes by polymer-anchored amino acid–ruthenium complexes (Valodkar, V.B. (223) 31)

Alkylamine

Mesolamellar vanadium phosphate phases obtained by intercalation of a long chain alkylamine into different catalytically important VPO host lattices (Dasgupta, S. (223) 167)

Alkylation

Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)

Alkylation of phenol

t-Butylation of phenol over mesoporous aluminophosphate and heteropolyacid supported aluminophosphate molecular sieves (Usha Nandhini, K. (223) 201)

Al-MCM-41

Synthesis of calixpyrroles and porphyrins over molecular sieve catalysts (Radha Kishan, M. (223) 263)

Al₂O₃

Role of acidic and basic sites of Al₂O₃ in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)

Aluminophosphates

Synthesis, characterization and catalytic activity of mesoporous trivalent iron substituted aluminophosphates (Subrahmanyam, C. (223) 149)

Amination

Synthesis of triaryl amines by copper-catalyzed amination of aryl halides (Patil, N.M. (223) 45)

Amino acid-supported Ru catalysts

Catalytic oxidation of alkanes and alkenes by polymer-anchored amino acid–ruthenium complexes (Valodkar, V.B. (223) 31)

Amoxidation

Cerium fluoride supported V₂O₅ catalysts: physico-chemical characterization and 3-picoline amoxidation activity (Narayana, K.V. (223) 321)

The influence of support on amoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)

Annular-flow reactor

Studies on the heterogeneous photocatalytic oxidation of 2,6-dinitrophenol in aqueous TiO₂ suspension (Swarnalatha, B. (223) 161)

Aromatics

Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)

Aromatization

Role of acidic and basic sites of Al₂O₃ in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)

Arylamines

Synthesis of triaryl amines by copper-catalyzed amination of aryl halides (Patil, N.M. (223) 45)

Asymmetric aziridination

Synthesis of aziridines using new catalytic systems with bromamine-T as the nitrene source (Chanda, B.M. (223) 57)

Aziridination

Synthesis of aziridines using new catalytic systems with bromamine-T as the nitrene source (Chanda, B.M. (223) 57)

Benzyl chloride

Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)

Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)

Benzyl-2-naphthyl ether

Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)

Bromamine-T

Synthesis of aziridines using new catalytic systems with bromamine-T as the nitrene source (Chanda, B.M. (223) 57)

Bronsted acid sites

t-Butylation of phenol over mesoporous aluminophosphate and heteropolyacid supported aluminophosphate molecular sieves (Usha Nandhini, K. (223) 201)

t-Butylation

t-Butylation of phenol over mesoporous aluminophosphate and heteropolyacid supported aluminophosphate molecular sieves (Usha Nandhini, K. (223) 201)

Butylation

Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)

- Ca and Mg salt supports
Catalytic activity of Fe, Co and Fe/Co supported on Ca and Mg oxides, hydroxides and carbonates in the synthesis of carbon nanotubes (Kathyayini, H. (223) 129)
- Calix(4)pyrroles
Synthesis of calixpyrroles and porphyrins over molecular sieve catalysts (Radha Kishan, M. (223) 263)
- Carbamates
Carbamate synthesis via transfunctionalization of substituted ureas and carbonates (Shivarkar, A.B. (223) 85)
- Carbonates
Carbamate synthesis via transfunctionalization of substituted ureas and carbonates (Shivarkar, A.B. (223) 85)
- Catalytic activity
Catalytic oxidation of alkanes and alkenes by polymer-anchored amino acid-ruthenium complexes (Valodkar, V.B. (223) 31)
Role of substitution in catalytic activity of La–Th–V–O mixed oxides for the reaction of methanol (Pai, M.R. (223) 275)
- Catalytic transfer hydrogenation
Liquid phase catalytic transfer hydrogenation of aromatic nitro compounds on $\text{La}_{1-x}\text{Sr}_x\text{FeO}_3$ perovskites prepared by microwave irradiation (Kulkarni, A.S. (223) 107)
- CCl_2F_2
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl_2F_2 (Padmasri, A.H. (223) 329)
- CCVD
Catalytic activity of Fe, Co and Fe/Co supported on Ca and Mg oxides, hydroxides and carbonates in the synthesis of carbon nanotubes (Kathyayini, H. (223) 129)
- CeVO_4
Cerium fluoride supported V_2O_5 catalysts: physico-chemical characterization and 3-picoline ammoxidation activity (Narayana, K.V. (223) 321)
- CFC-12
Effect of tungsten addition to Pd/ZrO₂ system in the hydrodechlorination activity of CCl_2F_2 (Krishna Murthy, J. (223) 347)
- CH_2F_2
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl_2F_2 (Padmasri, A.H. (223) 329)
- Chlorobenzene
A highly active low Pd content catalyst synthesized by deposition-precipitation method for hydrodechlorination of chlorobenzene (Gopinath, R. (223) 289)
- CMA-HT
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl_2F_2 (Padmasri, A.H. (223) 329)
- CMC-HT
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl_2F_2 (Padmasri, A.H. (223) 329)
- Co precipitation
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
- CO_2 pulse chemisorption
Role of acidic and basic sites of Al_2O_3 in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- Co(III) catalyst
Epoxidation of α -pinene catalysed by tetrameric cobalt(III) complexes (Chakrabarty, R. (223) 39)
- Copper catalyst
Synthesis of triarylaminines by copper-catalyzed amination of aryl halides (Patil, N.M. (223) 45)
- Coprecipitation
 WO_3/ZrO_2 : a potential catalyst for the acetylation of anisole (Sakthivel, R. (223) 137)
- p*-Cresyl phenylacetate
Synthesis of phenylacetates using aluminium-exchanged montmorillonite clay catalyst (Ravindra Reddy, C. (223) 117)
- Crystallinity
Environmentally benign route for isomerization of safrole—hydrotalcite as solid base catalyst (Kishore, D. (223) 225)
- Cu exchanged zeolites
Electron spin resonance spectroscopy of Cu(I)–NO complexes in copper exchanged zeolites (Umamaheswari, V. (223) 123)
- Cu(I)–NO complexes
Electron spin resonance spectroscopy of Cu(I)–NO complexes in copper exchanged zeolites (Umamaheswari, V. (223) 123)
- Cubane complex
Epoxidation of α -pinene catalysed by tetrameric cobalt(III) complexes (Chakrabarty, R. (223) 39)
- Cyclohexane
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
Synthesis, characterization and catalytic activity of mesoporous trivalent iron substituted aluminophosphates (Subrahmanyam, C. (223) 149)
- Cyclohexanol
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
- Cyclohexanol oxidation
Redox properties of bis(8-hydroxyquinoline)manganese(II) encapsulated in various zeolites (Ganesan, R. (223) 21)
- Cyclohexanone
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Cyclohexyl acetate
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
- Cytochrome-*c*
Redox properties of bis(8-hydroxyquinoline)manganese(II) encapsulated in various zeolites (Ganesan, R. (223) 21)
- Decomposition
Role of acidic and basic sites of Al_2O_3 in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- Dehydrogenation
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
- Deposition-precipitation
A highly active low Pd content catalyst synthesized by deposition-precipitation method for hydrodechlorination of chlorobenzene (Gopinath, R. (223) 289)
- DFT
Redox properties of bis(8-hydroxyquinoline)manganese(II) encapsulated in various zeolites (Ganesan, R. (223) 21)
- Dimethyl ether
Role of substitution in catalytic activity of La–Th–V–O mixed oxides for the reaction of methanol (Pai, M.R. (223) 275)
- 3,5-Dimethyl phenol
Role of acidic and basic sites of Al_2O_3 in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- 2,6-Dimethylphenol
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)

- Diphenylmethane**
Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)
- Dispersed uranium oxide**
The selective adsorption/reaction of methanol over nanosize uranium oxide crystallites dispersed in MCM-48: FT-IR and TPD studies (Kumar, D. (223) 251)
- Dispersion**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- 2,6-DNP**
Studies on the heterogeneous photocatalytic oxidation of 2,6-dinitrophenol in aqueous TiO₂ suspension (Swarnalatha, B. (223) 161)
- Electro-chemical deposition**
Highly efficient Ag/C catalyst prepared by electro-chemical deposition method in controlling microorganisms in water (Siva Kumar, V.S. (223) 313)
- Encapsulation**
Redox properties of bis(8-hydroxyquinoline)manganese(II) encapsulated in various zeolites (Ganesan, R. (223) 21)
- ESR spectroscopy**
Electron spin resonance spectroscopy of Cu(I)-NO complexes in copper exchanged zeolites (Umamaheswari, V. (223) 123)
- Esterification**
Esterification by solid acid catalysts—a comparison (Shanmugam, S. (223) 143)
Selective synthesis of phenyl salicylate (salol) by esterification reaction over solid acid catalysts (Kuriakose, G. (223) 155)
Synthesis of phenylacetates using aluminium-exchanged montmorillonite clay catalyst (Ravindra Reddy, C. (223) 117)
- Ethane**
Oxidative conversion of ethane to ethylene over supported SrO-promoted Er₂O₃ catalyst (Mulla, S.A.R. (223) 259)
- Ethylene**
Oxidative conversion of ethane to ethylene over supported SrO-promoted Er₂O₃ catalyst (Mulla, S.A.R. (223) 259)
- Fe/Co catalysts**
Catalytic activity of Fe, Co and Fe/Co supported on Ca and Mg oxides, hydroxides and carbonates in the synthesis of carbon nanotubes (Kathyayini, H. (223) 129)
- Ferrier rearrangement**
Synthesis of 2,3-unsaturated glycopyranosides by Ferrier rearrangement in FeCl₃ based ionic liquid (Tilve, R.D. (223) 237)
- Fluorotetrasilicic mica**
Noble metals intercalated/supported mica catalyst – synthesis and characterization (Sivakumar, T. (223) 185)
- Friedel–Crafts benzylation**
Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)
- Gallium oxide**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- HCFC-22**
Effect of tungsten addition to Pd/ZrO₂ system in the hydrodechlorination activity of CCl₂F₂ (Krishna Murthy, J. (223) 347)
- Heteropolyacid H₃PW₁₂O₄₀**
t-Butylation of phenol over mesoporous aluminophosphate and heteropolyacid supported aluminophosphate molecular sieves (Usha Nandhini, K. (223) 201)
- Heteropolyacids**
Esterification by solid acid catalysts—a comparison (Shanmugam, S. (223) 143)
Synthesis of lower olefins from methanol and subsequent conversion of ethylene to higher olefins via oligomerisation (Dutta, P. (223) 231)
- Hydrodechlorination**
A highly active low Pd content catalyst synthesized by deposition-precipitation method for hydrodechlorination of chlorobenzene (Gopinath, R. (223) 289)
Characterization and catalytic properties of niobia supported nickel catalysts in the hydrodechlorination of 1,2,4-trichlorobenzene (Chary, K.V.R. (223) 353)
Effect of tungsten addition to Pd/ZrO₂ system in the hydrodechlorination activity of CCl₂F₂ (Krishna Murthy, J. (223) 347)
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl₂F₂ (Padmasri, A.H. (223) 329)
- Hydrogenation of nitroaromatics**
Hydrogenation of nitroarenes using polybenzimidazole-supported rhodium catalyst (Mary Magdalene, R. (223) 17)
- Hydrotalcite**
Environmentally benign route for isomerization of safrole—hydrotalcite as solid base catalyst (Kishore, D. (223) 225)
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl₂F₂ (Padmasri, A.H. (223) 329)
- Immobilized lipases**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Impregnation**
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
- In situ FT-IR**
The selective adsorption/reaction of methanol over nanosize uranium oxide crystallites dispersed in MCM-48: FT-IR and TPD studies (Kumar, D. (223) 251)
- Indium oxide**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Intensification of rates**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Intercalation**
Mesolamellar vanadium phosphate phases obtained by intercalation of a long chain alkylamine into different catalytically important VPO host lattices (Dasgupta, S. (223) 167)
Noble metals intercalated/supported mica catalyst – synthesis and characterization (Sivakumar, T. (223) 185)
- Ion exchange**
Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)
- Ionic liquids**
Sulfonylation reactions of aromatics using FeCl₃-based ionic liquids (Alexander, M.V. (223) 75)
- Iron(III)**
Synthesis of aziridines using new catalytic systems with bromamine-T as the nitrene source (Chanda, B.M. (223) 57)
- Isomerization**
Environmentally benign route for isomerization of safrole—hydrotalcite as solid base catalyst (Kishore, D. (223) 225)
- Isophorone**
Role of acidic and basic sites of Al₂O₃ in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)

- β -Keto esters**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Kinetics**
Heterogeneous photocatalytic mineralisation of phenols in aqueous solutions (Lathasree, S. (223) 101)
- Lanthanum oxide**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Lewis acidic iron (III) chloride based ionic liquid**
Synthesis of 2,3-unsaturated glycopyranosides by Ferrier rearrangement in FeCl₃ based ionic liquid (Tilve, R.D. (223) 237)
- Light naphtha**
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
- Lipase catalysis**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Liquid-liquid-liquid PTC**
Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)
- LPG**
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
- LRS**
Characterization and reactivity of molybdenum oxide catalysts supported on Nb₂O₅-TiO₂ (Chary, K.V.R. (223) 363)
- Macrocyclization**
Synthesis of calixpyrroles and porphyrins over molecular sieve catalysts (Radha Kishan, M. (223) 263)
- Manganese(II)**
Synthesis of aziridines using new catalytic systems with bromamine-T as the nitrene source (Chanda, B.M. (223) 57)
- MCM-48**
The selective adsorption/reaction of methanol over nanosize uranium oxide crystallites dispersed in MCM-48: FT-IR and TPD studies (Kumar, D. (223) 251)
- MCM**
Synthesis, characterization and catalytic activity of mesoporous trivalent iron substituted aluminophosphates (Subrahmanyam, C. (223) 149)
- Mesolamellar**
Mesolamellar vanadium phosphate phases obtained by intercalation of a long chain alkylamine into different catalytically important VPO host lattices (Dasgupta, S. (223) 167)
- Mesoporous**
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
- Mesoporous aluminophosphate (AIPO)**
t-Butylation of phenol over mesoporous aluminophosphate and heteropolyacid supported aluminophosphate molecular sieves (Usha Nandhini, K. (223) 201)
- Mesoporous solids**
Synthesis, characterization and catalytic activity of mesoporous trivalent iron substituted aluminophosphates (Subrahmanyam, C. (223) 149)
- Metal-support interaction**
A highly active low Pd content catalyst synthesized by deposition-precipitation method for hydrodechlorination of chlorobenzene (Gopinath, R. (223) 289)
- Methane combustion**
Thermally stable ruthenium-based catalyst for methane combustion (Labhsetwar, N.K. (223) 217)
- Methanol**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
Synthesis of lower olefins from methanol and subsequent conversion of ethylene to higher olefins via oligomerisation (Dutta, P. (223) 231)
- Methanol adsorption**
The selective adsorption/reaction of methanol over nanosize uranium oxide crystallites dispersed in MCM-48: FT-IR and TPD studies (Kumar, D. (223) 251)
- Methyl acetate**
Alkylation and acylation of phenol with methyl acetate (Shanmugapriya, K. (223) 177)
- Methyl acetoacetate**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Methylation**
Alkylation and acylation of phenol with methyl acetate (Shanmugapriya, K. (223) 177)
- MgO**
Role of hydrotalcite precursors as supports for Pd catalysts in hydrodechlorination of CCl₂F₂ (Padmasri, A.H. (223) 329)
- Microorganisms**
Highly efficient Ag/C catalyst prepared by electro-chemical deposition method in controlling microorganisms in water (Siva Kumar, V.S. (223) 313)
- Microwave catalysis**
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Microwave irradiation and Nitroarenes.**
Liquid phase catalytic transfer hydrogenation of aromatic nitro compounds on La_{1-x}Sr_xFeO₃ perovskites prepared by microwave irradiation (Kulkarni, A.S. (223) 107)
- Microwaves**
Sulfonylation reactions of aromatics using FeCl₃-based ionic liquids (Alexander, M.V. (223) 75)
- Mixed oxides**
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Mo/Nb₂O₅-TiO₂ catalysts**
Characterization and reactivity of molybdenum oxide catalysts supported on Nb₂O₅-TiO₂ (Chary, K.V.R. (223) 363)
- Modified clay**
The influence of support on ammoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)
- Monocrotophos**
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by TiO₂/H β (Shankar, M.V. (223) 195)
- Mordenite zeolite**
Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)
- Multifunctional methacrylate**
Esterification by solid acid catalysts—a comparison (Shanmugam, S. (223) 143)
- Multiphase reactions**
Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)
- MWCT**
Catalytic activity of Fe, Co and Fe/Co supported on Ca and Mg oxides, hydroxides and carbonates in the synthesis of carbon nanotubes (Kathyayini, H. (223) 129)
- Nano-crystalline**
Synthesis and characterization of nano-crystalline sulfated zirconia by sol-gel method (Mishra, M.K. (223) 61)

- Nanoparticles
Noble metals intercalated/supported mica catalyst – synthesis and characterization (Sivakumar, T. (223) 185)
- β -Naphthol
Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)
- NH₃ pulse chemisorption
Role of acidic and basic sites of Al₂O₃ in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- Nicotinonitrile
The influence of support on ammoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)
Cerium fluoride supported V₂O₅ catalysts: physico-chemical characterization and 3-picoline ammoxidation activity (Narayana, K.V. (223) 321)
- Niobia
Characterization and catalytic properties of niobia supported nickel catalysts in the hydrodechlorination of 1,2,4-trichlorobenzene (Chary, K.V.R. (223) 353)
- NO adsorption
Electron spin resonance spectroscopy of Cu(I)–NO complexes in copper exchanged zeolites (Umamaheswari, V. (223) 123)
- N₂O decomposition
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
- Nonstoichiometry
Role of substitution in catalytic activity of La–Th–V–O mixed oxides for the reaction of methanol (Pai, M.R. (223) 275)
- NTGG process
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
- Olefins
Synthesis of lower olefins from methanol and subsequent conversion of ethylene to higher olefins via oligomerisation (Dutta, P. (223) 231)
- Oligomerization
Synthesis of lower olefins from methanol and subsequent conversion of ethylene to higher olefins via oligomerisation (Dutta, P. (223) 231)
- Orientation
Mesolamellar vanadium phosphate phases obtained by intercalation of a long chain alkylamine into different catalytically important VPO host lattices (Dasgupta, S. (223) 167)
- Oxidation catalyst
Epoxidation of α -pinene catalysed by tetrameric cobalt(III) complexes (Chakrabarty, R. (223) 39)
- Oxidative dehydrogenation
Oxidative conversion of ethane to ethylene over supported SrO-promoted Er₂O₃ catalyst (Mulla, S.A.R. (223) 259)
- Oxides
Selective synthesis of phenyl salicylate (salol) by esterification reaction over solid acid catalysts (Kuriakose, G. (223) 155)
- para-t*-Butyltoluene
Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)
- para*-Selectivity
Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)
- Pd/ZrO₂
Effect of tungsten addition to Pd/ZrO₂ system in the hydrodechlorination activity of CCl₂F₂ (Krishna Murthy, J. (223) 347)
- Perovskite
Thermally stable ruthenium-based catalyst for methane combustion (Labhsetwar, N.K. (223) 217)
Liquid phase catalytic transfer hydrogenation of aromatic nitro compounds on La_{1-x}Sr_xFeO₃ perovskites prepared by microwave irradiation (Kulkarni, A.S. (223) 107)
- Pesticides
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by TiO₂/H β (Shankar, M.V. (223) 195)
- Phase transfer catalysis (PTC)
Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)
- Phenol
Alkylation and acylation of phenol with methyl acetate (Shanmugapriya, K. (223) 177)
Heterogeneous photocatalytic mineralisation of phenols in aqueous solutions (Lathasree, S. (223) 101)
- Photocatalytic degradation
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by TiO₂/H β (Shankar, M.V. (223) 195)
Heterogeneous photocatalytic mineralisation of phenols in aqueous solutions (Lathasree, S. (223) 101)
- Photocatalytic oxidation
Studies on the heterogeneous photocatalytic oxidation of 2,6-dinitrophenol in aqueous TiO₂ suspension (Swarnalatha, B. (223) 161)
- 3-Picoline
Cerium fluoride supported V₂O₅ catalysts: physico-chemical characterization and 3-picoline ammoxidation activity (Narayana, K.V. (223) 321)
The influence of support on ammoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)
- Pillared clays
Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)
- Pillaring solution modified K10
Comparative study of benzylation of benzene using benzyl chloride in the presence of pillared bentonite; ion-exchanged and pillaring solution impregnated montmorillonite K10 (Singh, D.U. (223) 111)
- α -Pinene epoxide
Epoxidation of α -pinene catalysed by tetrameric cobalt(III) complexes (Chakrabarty, R. (223) 39)
- Polybenzimidazole
Hydrogenation of nitroarenes using polybenzimidazole-supported rhodium catalyst (Mary Magdalene, R. (223) 17)
- Polymer-supported catalyst
Hydrogenation of nitroarenes using polybenzimidazole-supported rhodium catalyst (Mary Magdalene, R. (223) 17)
- Properties
Supported sulfated zirconia catalysts and their properties (Prescott, H.A. (223) 67)
- Raffinate
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
- Redox properties
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Regeneration of catalyst
Synthesis of phenylacetates using aluminium-exchanged montmorillonite clay catalyst (Ravindra Reddy, C. (223) 117)
- Relative photonic efficiency
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by TiO₂/H β (Shankar, M.V. (223) 195)
- Rhodium species
Hydrogenation of nitroarenes using polybenzimidazole-supported rhodium catalyst (Mary Magdalene, R. (223) 17)
- Ruthenium
Thermally stable ruthenium-based catalyst for methane combustion (Labhsetwar, N.K. (223) 217)

- Safrole
Environmentally benign route for isomerization of safrole—hydrotralcite as solid base catalyst (Kishore, D. (223) 225)
- Salol
Selective synthesis of phenyl salicylate (salol) by esterification reaction over solid acid catalysts (Kuriakose, G. (223) 155)
- Selective epoxidation
Epoxidation of α -pinene catalysed by tetrameric cobalt(III) complexes (Chakrabarty, R. (223) 39)
- Selective oxidation
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
- Selectivities
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)
- Selectivity engineering
Selectivity engineering in multiphase transfer catalysis in the preparation of aromatic ethers (Yadav, G.D. (223) 93)
- SMSI
Characterization and catalytic properties of niobia supported nickel catalysts in the hydrodechlorination of 1,2,4-trichlorobenzene (Chary, K.V.R. (223) 353)
- Sol-gel
Synthesis and characterization of nano-crystalline sulfated zirconia by sol-gel method (Mishra, M.K. (223) 61)
- Solid acids
Esterification by solid acid catalysts—a comparison (Shanmugam, S. (223) 143)
- Solid-solid wetting
Effect of method of preparation of copper – magnesium oxide catalyst on the dehydrogenation of cyclohexanol (Nagaraja, B.M. (223) 339)
- Spillover hydrogen
Characterization and catalytic properties of niobia supported nickel catalysts in the hydrodechlorination of 1,2,4-trichlorobenzene (Chary, K.V.R. (223) 353)
- SrO-promoted Er_2O_3
Oxidative conversion of ethane to ethylene over supported SrO-promoted Er_2O_3 catalyst (Mulla, S.A.R. (223) 259)
- Sulfated oxides and catalysts.
Selective synthesis of phenyl salicylate (salol) by esterification reaction over solid acid catalysts (Kuriakose, G. (223) 155)
- Sulfated zirconia
Synthesis and characterization of nano-crystalline sulfated zirconia by sol-gel method (Mishra, M.K. (223) 61)
- Sulfonylation
Sulfonylation reactions of aromatics using FeCl_3 -based ionic liquids (Alexander, M.V. (223) 75)
- Supported sulfated zirconia
Supported sulfated zirconia catalysts and their properties (Prescott, H.A. (223) 67)
- Supported TiO_2
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by $\text{TiO}_2/\text{H}\beta$ (Shankar, M.V. (223) 195)
- Surface acidity
 WO_3/ZrO_2 : a potential catalyst for the acetylation of anisole (Sakthivel, R. (223) 137)
- Surfactant
Noble metals intercalated/supported mica catalyst – synthesis and characterization (Sivakumar, T. (223) 185)
- Synergism
Synergism between microwave and enzyme catalysis in intensification of reactions and selectivities: transesterification of methyl acetoacetate with alcohols (Yadav, G.D. (223) 51)
- Thermal stability
Environmentally benign route for isomerization of safrole—hydrotralcite as solid base catalyst (Kishore, D. (223) 225)
- Thorium vanadate
Role of substitution in catalytic activity of La–Th–V–O mixed oxides for the reaction of methanol (Pai, M.R. (223) 275)
- TiO_2 photocatalyst
Enhanced photocatalytic activity for the destruction of monocrotophos pesticide by $\text{TiO}_2/\text{H}\beta$ (Shankar, M.V. (223) 195)
- Titanium dioxide
Studies on the heterogeneous photocatalytic oxidation of 2,6-dinitrophenol in aqueous TiO_2 suspension (Swarnalatha, B. (223) 161)
- Titanium oxide
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- Toluene
Regio selective butylation of toluene on mordenite catalysts: influence of acidity (Sebastian, C.P. (223) 305)
- Toluene ammoxidation
Characterization and reactivity of molybdenum oxide catalysts supported on $\text{Nb}_2\text{O}_5\text{--TiO}_2$ (Chary, K.V.R. (223) 363)
- TPD
The selective adsorption/reaction of methanol over nanosize uranium oxide crystallites dispersed in MCM-48: FT-IR and TPD studies (Kumar, D. (223) 251)
- TPD of CO_2
Role of acidic and basic sites of Al_2O_3 in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- TPD of NH_3
Role of acidic and basic sites of Al_2O_3 in predicting the reaction pathway of isophorone transformation (Siva Kumar, V. (223) 283)
- TPR
Characterization and reactivity of molybdenum oxide catalysts supported on $\text{Nb}_2\text{O}_5\text{--TiO}_2$ (Chary, K.V.R. (223) 363)
- Transfunctionalization
Carbamate synthesis via transfunctionalization of substituted ureas and carbonates (Shivarkar, A.B. (223) 85)
- Triphenylamine
Synthesis of triarylamines by copper-catalyzed amination of aryl halides (Patil, N.M. (223) 45)
- Tungstated zirconia
 WO_3/ZrO_2 : a potential catalyst for the acetylation of anisole (Sakthivel, R. (223) 137)
- Ultraviolet light
Heterogeneous photocatalytic mineralisation of phenols in aqueous solutions (Lathasree, S. (223) 101)
- 2,3-Unsaturated glycopyranosides
Synthesis of 2,3-unsaturated glycopyranosides by Ferrier rearrangement in FeCl_3 based ionic liquid (Tilve, R.D. (223) 237)
- Ureas
Carbamate synthesis via transfunctionalization of substituted ureas and carbonates (Shivarkar, A.B. (223) 85)
- Vanadium phosphates
Mesolamellar vanadium phosphate phases obtained by intercalation of a long chain alkylamine into different catalytically important VPO host lattices (Dasgupta, S. (223) 167)
- VMCM-41
Mesoporous VMCM-41: highly efficient and remarkable catalyst for selective oxidation of cyclohexane to cyclohexanol (Dapurkar, S.E. (223) 241)
- VMPO
The influence of support on ammoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)

- V_2O_5
Stabilization of nanosized titania-anatase for high temperature catalytic applications (Reddy, B.M. (223) 295)
- V_2O_5/CeF_3 catalysts
Cerium fluoride supported V_2O_5 catalysts: physico-chemical characterization and 3-picoline ammoxidation activity (Narayana, K.V. (223) 321)
- WO_3
Effect of tungsten addition to Pd/ZrO₂ system in the hydrodechlorination activity of CCl₂F₂ (Krishna Murthy, J. (223) 347)
- XRD
Characterization and reactivity of molybdenum oxide catalysts supported on Nb₂O₅-TiO₂ (Chary, K.V.R. (223) 363)
- Zeolite
Selective synthesis of phenyl salicylate (salol) by esterification reaction over solid acid catalysts (Kuriakose, G. (223) 155)
Alkylation and acylation of phenol with methyl acetate (Shanmugapriya, K. (223) 177)
- Synthesis of calixpyrroles and porphyrins over molecular sieve catalysts (Radha Kishan, M. (223) 263)
- Zeozymes
Redox properties of bis(8-hydroxyquinoline)manganese(II) encapsulated in various zeolites (Ganesan, R. (223) 21)
- Zinc oxide
Heterogeneous photocatalytic mineralisation of phenols in aqueous solutions (Lathasree, S. (223) 101)
- Zirconia supported palladium catalysts
A highly active low Pd content catalyst synthesized by deposition-precipitation method for hydrodechlorination of chlorobenzene (Gopinath, R. (223) 289)
- Zn-Al-Si
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
- ZSM-5
Cracking and aromatization properties of some metal modified ZSM-5 catalysts for light alkane conversions (Viswanadham, N. (223) 269)
Synthesis of lower olefins from methanol and subsequent conversion of ethylene to higher olefins via oligomerisation (Dutta, P. (223) 231)
The influence of support on ammoxidation of 3-picoline over vanadia catalyst (Roy, S.K. (223) 211)
