

## Subject index

### Acid catalysis

Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)

### Acids

Brönsted acidic ionic liquids: A green, efficient and reusable catalyst system and reaction medium for Fischer esterification (Joseph, T. (234) 107)

### Active site

Effect of Ce on NO direct decomposition in the absence/presence of O<sub>2</sub> over La<sub>1-x</sub>Ce<sub>x</sub>SrNiO<sub>4</sub> (0 ≤ x ≤ 0.3) (Zhu, J. (234) 99)

### Alcohol and reaction medium

Brönsted acidic ionic liquids: A green, efficient and reusable catalyst system and reaction medium for Fischer esterification (Joseph, T. (234) 107)

### Alcohols

Metal nitrates catalysed *O*-glucosylation using acetyl glucal in organic solvents and ionic liquids: A comparative investigation (Naik, P.U. (234) 35)

### Aldol

A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)

### APHA color number

Oligomer model to explain the coloration of TEA and discoloration catalytic treatment (Longuet, C. (234) 59)

### Asymmetric catalysis

Chiral-at-metal ruthenium(II) complexes as catalysts in the asymmetric cyclopropanation reaction (Lasa, M. (234) 129)

### Basic catalysis

Allylic alcohol synthesis by gas-phase hydrogen transfer reduction of unsaturated ketones (Di Cosimo, J.I. (234) 111)

### Benzimidazole ligands

In situ generated 1-alkylbenzimidazole–palladium catalyst for the Suzuki coupling of aryl chlorides (Özdemir, İ. (234) 181)

### Biphasic catalysis

Rhodium-catalyzed hydroformylation of 1-octene in micro-emulsions and micellar media (Miyagawa, C.C. (234) 9)

### Bleaching kinetics

Mechanism of bleaching by peroxides. Part 6. Kinetics of the peroxide bleaching of methyl orange catalysed by MoO<sub>4</sub><sup>2-</sup> and WO<sub>4</sub><sup>2-</sup> at pH 10 (Gould, D.M. (234) 145)

### C–C coupling

In situ generated 1-alkylbenzimidazole–palladium catalyst for the Suzuki coupling of aryl chlorides (Özdemir, İ. (234) 181)

### Calcination temperature

Fe modified CuMnZrO<sub>2</sub> catalysts for higher alcohols synthesis from syngas: Effect of calcination temperature (Xu, R. (234) 75)

### Catalysis

A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)

### Catalyst preparation

Effect of the preparation of supported gold particles on the catalytic activity in CO oxidation reaction (Dobrosz, I. (234) 187)

### Catalyst, cobalt

Fischer–Tropsch synthesis: The formation of branched hydrocarbons in the Fe and Co catalyzed reaction (Shi, B. (234) 85)

### Catalyst, iron

Fischer–Tropsch synthesis: The formation of branched hydrocarbons in the Fe and Co catalyzed reaction (Shi, B. (234) 85)

### Catalysts

Oxidation of 2-mercaptoethanol catalyzed by cobalt(II) phthalocyaninetetrasulfonate supported on poly-*N*-alkyl-4-vinyl pyridinium/montmorillonite intercalates (Hassanein, M. (234) 45)

Vapor phase oxidation of 4-fluorotoluene over vanadia–titania catalyst (Maurya, S.K. (234) 51)

### Catalytic hydrogenation

Oligomer model to explain the coloration of TEA and discoloration catalytic treatment (Longuet, C. (234) 59)

### Ce

Effect of Ce on NO direct decomposition in the absence/presence of O<sub>2</sub> over La<sub>1-x</sub>Ce<sub>x</sub>SrNiO<sub>4</sub> (0 ≤ x ≤ 0.3) (Zhu, J. (234) 99)

### Chemoselectivity

Allylic alcohol synthesis by gas-phase hydrogen transfer reduction of unsaturated ketones (Di Cosimo, J.I. (234) 111)

### *cis*-Selectivity

Chiral-at-metal ruthenium(II) complexes as catalysts in the asymmetric cyclopropanation reaction (Lasa, M. (234) 129)

### CO adsorption

A quantum-chemical study of CO adsorption on small Cu particles supported on reduced SiO<sub>2</sub> (Ferullo, R.M. (234) 121)

### CO oxidation

Effect of the preparation of supported gold particles on the catalytic activity in CO oxidation reaction (Dobrosz, I. (234) 187)

### Cobalt phthalocyanine

Oxidation of 2-mercaptoethanol catalyzed by cobalt(II) phthalocyaninetetrasulfonate supported on poly-*N*-alkyl-4-vinyl pyridinium/montmorillonite intercalates (Hassanein, M. (234) 45)

### Cobalt(II) phthalocyanine tetrasulfonate

Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol–water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)

### Cu/SiO<sub>2</sub>

A quantum-chemical study of CO adsorption on small Cu particles supported on reduced SiO<sub>2</sub> (Ferullo, R.M. (234) 121)

### Cyclodehydration

A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)

### Cyclopentene carbaldehydes

A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)

## Cyclopropanation

Chiral-at-metal ruthenium(II) complexes as catalysts in the asymmetric cyclopropanation reaction (Lasa, M. (234) 129)

## Density functional theory

A quantum-chemical study of CO adsorption on small Cu particles supported on reduced SiO<sub>2</sub> (Ferullo, R.M. (234) 121)

## 1,6-Dialdehydes

A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)

## Diastereoselective Epoxidation

Highly diastereoselective epoxidation of protected  $\alpha$ -amino alkenes catalyzed by ruthenium porphyrin/Cl<sub>2</sub>PyNO system (Sun, L. (234) 29)

## Dichloran

Photoinduced electron transfer reaction of few selected organic systems in presence of titanium dioxide (Muneer, M. (234) 151)

4,4'-Dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl

Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol-water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)

## Diperiodatonickelate(IV)

Kinetic, mechanistic and spectral investigations of ruthenium(III)-catalysed oxidation of 4-hydroxycoumarin by alkaline diperiodatonickelate(IV) (stopped flow technique) (Shettar, R.S. (234) 137)

## Direct decomposition

Effect of Ce on NO direct decomposition in the absence/presence of O<sub>2</sub> over La<sub>1-x</sub>Ce<sub>x</sub>SrNiO<sub>4</sub> (0 ≤ x ≤ 0.3) (Zhu, J. (234) 99)

## Discoloration

Oligomer model to explain the coloration of TEA and discoloration catalytic treatment (Longuet, C. (234) 59)

2,6-Di-*tert*-butylphenol

Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol-water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)

## Ethanolamines

Oligomer model to explain the coloration of TEA and discoloration catalytic treatment (Longuet, C. (234) 59)

## EXAFS

X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)

Fe-CuMnZrO<sub>2</sub>

Fe modified CuMnZrO<sub>2</sub> catalysts for higher alcohols synthesis from syngas: Effect of calcination temperature (Xu, R. (234) 75)

## Ferrier glucosylation

Metal nitrates catalysed *O*-glucosylation using acetyl glucal in organic solvents and ionic liquids: A comparative investigation (Naik, P.U. (234) 35)

## Fischer esterification

Brønsted acidic ionic liquids: A green, efficient and reusable catalyst system and reaction medium for Fischer esterification (Joseph, T. (234) 107)

## Fischer-Tropsch synthesis

Fischer-Tropsch synthesis: The formation of branched hydrocarbons in the Fe and Co catalyzed reaction (Shi, B. (234) 85)

## Fluorotoluene

Vapor phase oxidation of 4-fluorotoluene over vanadia-titania catalyst (Maurya, S.K. (234) 51)

## Gold catalysts

Effect of the preparation of supported gold particles on the catalytic activity in CO oxidation reaction (Dobrosz, I. (234) 187)

## Heterogeneous

Ligand modified real heterogeneous catalysts for fixed-bed hydroformylation of propylene (Yan, L. (234) 1)

## Heteropolyacids

Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)

## Higher alcohols

Fe modified CuMnZrO<sub>2</sub> catalysts for higher alcohols synthesis from syngas: Effect of calcination temperature (Xu, R. (234) 75)

## Higher olefins

Rhodium-catalyzed hydroformylation of 1-octene in micro-emulsions and micellar media (Miyagawa, C.C. (234) 9)

## Hydrocarbons, branched

Fischer-Tropsch synthesis: The formation of branched hydrocarbons in the Fe and Co catalyzed reaction (Shi, B. (234) 85)

## Hydrodenitrogenation

X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)

## Hydrodesulfurization

X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)

## Hydroformylation

Ligand modified real heterogeneous catalysts for fixed-bed hydroformylation of propylene (Yan, L. (234) 1)

Rhodium-catalyzed hydroformylation of 1-octene in micro-emulsions and micellar media (Miyagawa, C.C. (234) 9)

## Hydrogen peroxide

Mechanism of bleaching by peroxides. Part 6. Kinetics of the peroxide bleaching of methyl orange catalysed by MoO<sub>4</sub><sup>2-</sup> and WO<sub>4</sub><sup>2-</sup> at pH 10 (Gould, D.M. (234) 145)

## Hydrogen transfer

Allylic alcohol synthesis by gas-phase hydrogen transfer reduction of unsaturated ketones (Di Cosimo, J.I. (234) 111)

## Hydrotalcite

Effect of the preparation of supported gold particles on the catalytic activity in CO oxidation reaction (Dobrosz, I. (234) 187)

## 7-Hydroxy-4-methyl coumarin

Photoinduced electron transfer reaction of few selected organic systems in presence of titanium dioxide (Muneer, M. (234) 151)

## 4-Hydroxycoumarin

Kinetic, mechanistic and spectral investigations of ruthenium(III)-catalysed oxidation of 4-hydroxycoumarin by alkaline diperiodatonickelate(IV) (stopped flow technique) (Shettar, R.S. (234) 137)

## Ionic liquid

Brønsted acidic ionic liquids: A green, efficient and reusable catalyst system and reaction medium for Fischer esterification (Joseph, T. (234) 107)

## Ionic liquids

Metal nitrates catalysed *O*-glucosylation using acetyl glucal in organic solvents and ionic liquids: A comparative investigation (Naik, P.U. (234) 35)

## Isoparaffins

Fischer-Tropsch synthesis: The formation of branched hydrocarbons in the Fe and Co catalyzed reaction (Shi, B. (234) 85)

## Kinetics

Kinetic, mechanistic and spectral investigations of ruthenium(III)-catalysed oxidation of 4-hydroxycoumarin by alkaline diperiodatonickelate(IV) (stopped flow technique) (Shettar, R.S. (234) 137)

## Lactones

Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)

- MALDI-TOF mass spectrometry**  
Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)
- Metal nitrates**  
Metal nitrates catalysed *O*-glucosylation using acetyl glucal in organic solvents and ionic liquids: A comparative investigation (Naik, P.U. (234) 35)
- Metal-support interaction**  
A quantum-chemical study of CO adsorption on small Cu particles supported on reduced SiO<sub>2</sub> (Ferullo, R.M. (234) 121)
- Methyl orange**  
Mechanism of bleaching by peroxides. Part 6. Kinetics of the peroxide bleaching of methyl orange catalysed by MoO<sub>4</sub><sup>2-</sup> and WO<sub>4</sub><sup>2-</sup> at pH 10 (Gould, D.M. (234) 145)
- MgO**  
Wadsworth–Emmons reactions catalyzed by nanocrystalline MgO (Choudary, B.M. (234) 25)
- Micro-emulsion**  
Rhodium-catalyzed hydroformylation of 1-octene in micro-emulsions and micellar media (Miyagawa, C.C. (234) 9)
- Molybdate**  
Mechanism of bleaching by peroxides. Part 6. Kinetics of the peroxide bleaching of methyl orange catalysed by MoO<sub>4</sub><sup>2-</sup> and WO<sub>4</sub><sup>2-</sup> at pH 10 (Gould, D.M. (234) 145)
- Montmorillonite**  
Oxidation of 2-mercaptoethanol catalyzed by cobalt(II) phthalocyaninetetrasulfonate supported on poly-*N*-alkyl-4-vinyl pyridinium/montmorillonite intercalates (Hassanein, M. (234) 45)
- Muconaldehyde**  
A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)
- Nanocrystalline**  
Wadsworth–Emmons reactions catalyzed by nanocrystalline MgO (Choudary, B.M. (234) 25)
- 2-Napthoic acid**  
Photoinduced electron transfer reaction of few selected organic systems in presence of titanium dioxide (Muneer, M. (234) 151)
- Nitrogen oxide**  
Effect of Ce on NO direct decomposition in the absence/presence of O<sub>2</sub> over La<sub>1-x</sub>Ce<sub>x</sub>SrNiO<sub>4</sub> (0 ≤ *x* ≤ 0.3) (Zhu, J. (234) 99)
- Oligomers**  
Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)
- Oxidation**  
Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol–water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)  
Vapor phase oxidation of 4-fluorotoluene over vanadia–titania catalyst (Maurya, S.K. (234) 51)  
Kinetic, mechanistic and spectral investigations of ruthenium(III)-catalysed oxidation of 4-hydroxycoumarin by alkaline diperiodatonic-*elate*(IV) (stopped flow technique) (Shettar, R.S. (234) 137)
- Oxygen forbearance**  
Effect of Ce on NO direct decomposition in the absence/presence of O<sub>2</sub> over La<sub>1-x</sub>Ce<sub>x</sub>SrNiO<sub>4</sub> (0 ≤ *x* ≤ 0.3) (Zhu, J. (234) 99)
- Ozonides**  
A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)
- Ozonolysis**  
A study on the intramolecular catalytic aldol cyclodehydration of 3,4-disubstituted 1,6-dialdehydes (Kurteva, V.B. (234) 159)
- Palladium**  
In situ generated 1-alkylbenzimidazole–palladium catalyst for the Suzuki coupling of aryl chlorides (Özdemir, İ. (234) 181)
- Phosphine ligands**  
Ligand modified real heterogeneous catalysts for fixed-bed hydroformylation of propylene (Yan, L. (234) 1)
- Phosphonate**  
Wadsworth–Emmons reactions catalyzed by nanocrystalline MgO (Choudary, B.M. (234) 25)
- Photocatalysis**  
Photoinduced electron transfer reaction of few selected organic systems in presence of titanium dioxide (Muneer, M. (234) 151)
- Polymeric-support**  
Oxidation of 2-mercaptoethanol catalyzed by cobalt(II) phthalocyaninetetrasulfonate supported on poly-*N*-alkyl-4-vinyl pyridinium/montmorillonite intercalates (Hassanein, M. (234) 45)
- Promoters**  
X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)
- Propylene**  
Ligand modified real heterogeneous catalysts for fixed-bed hydroformylation of propylene (Yan, L. (234) 1)
- Protected  $\alpha$ -amino alkenes**  
Highly diastereoselective epoxidation of protected  $\alpha$ -amino alkenes catalyzed by ruthenium porphyrin/Cl<sub>2</sub>PyNO system (Sun, L. (234) 29)
- Reduction**  
Allylic alcohol synthesis by gas-phase hydrogen transfer reduction of unsaturated ketones (Di Cosimo, J.I. (234) 111)
- Rh/SiO<sub>2</sub>**  
Ligand modified real heterogeneous catalysts for fixed-bed hydroformylation of propylene (Yan, L. (234) 1)
- Rhodium catalyst**  
Rhodium-catalyzed hydroformylation of 1-octene in micro-emulsions and micellar media (Miyagawa, C.C. (234) 9)
- Ruthenium complexes**  
Chiral-at-metal ruthenium(II) complexes as catalysts in the asymmetric cyclopropanation reaction (Lasa, M. (234) 129)
- Ruthenium porphyrin carbonyl**  
Highly diastereoselective epoxidation of protected  $\alpha$ -amino alkenes catalyzed by ruthenium porphyrin/Cl<sub>2</sub>PyNO system (Sun, L. (234) 29)
- Ruthenium(III)**  
Kinetic, mechanistic and spectral investigations of ruthenium(III)-catalysed oxidation of 4-hydroxycoumarin by alkaline diperiodatonic-*elate*(IV) (stopped flow technique) (Shettar, R.S. (234) 137)
- Small Cu particles**  
A quantum-chemical study of CO adsorption on small Cu particles supported on reduced SiO<sub>2</sub> (Ferullo, R.M. (234) 121)
- Stereogenic metal**  
Chiral-at-metal ruthenium(II) complexes as catalysts in the asymmetric cyclopropanation reaction (Lasa, M. (234) 129)
- Structure**  
Fe modified CuMnZrO<sub>2</sub> catalysts for higher alcohols synthesis from syngas: Effect of calcination temperature (Xu, R. (234) 75)
- Supported metals**  
Oligomer model to explain the coloration of TEA and discoloration catalytic treatment (Longuet, C. (234) 59)
- Surface Structure**  
X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)
- Suzuki reaction**  
In situ generated 1-alkylbenzimidazole–palladium catalyst for the Suzuki coupling of aryl chlorides (Özdemir, İ. (234) 181)

*Tert*-butylhydroperoxide

Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol–water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)

3,3',5,5'-Tetra-*tert*-butyl-4,4'-diphenoquinone

Oxidation of 2,6-di-*tert*-butylphenol with *tert*-butylhydroperoxide catalyzed by cobalt(II) phthalocyanine tetrasulfonate in a methanol–water mixture and formation of an unusual product 4,4'-dihydroxy-3,3',5,5'-tetra-*tert*-butylbiphenyl (Türk, H. (234) 19)

## Thiol oxidation

Oxidation of 2-mercaptoethanol catalyzed by cobalt(II) phthalocyaninetetrasulfonate supported on poly-*N*-alkyl-4-vinyl pyridinium/montmorillonite intercalates (Hassanein, M. (234) 45)

## Titanium dioxide

Photoinduced electron transfer reaction of few selected organic systems in presence of titanium dioxide (Muneer, M. (234) 151)

3,4,6-Tri-*O*-acetyl-D-glucal

Metal nitrates catalysed *O*-glucosylation using acetyl glucal in organic solvents and ionic liquids: A comparative investigation (Naik, P.U. (234) 35)

## Tungstate

Mechanism of bleaching by peroxides. Part 6. Kinetics of the peroxide bleaching of methyl orange catalysed by  $\text{MoO}_4^{2-}$  and  $\text{WO}_4^{2-}$  at pH 10 (Gould, D.M. (234) 145)

 $\alpha,\beta$ -Unsaturated ketone

Allylic alcohol synthesis by gas-phase hydrogen transfer reduction of unsaturated ketones (Di Cosimo, J.I. (234) 111)

## Vanadia–titania

Vapor phase oxidation of 4-fluorotoluene over vanadia–titania catalyst (Maurya, S.K. (234) 51)

## Vanadyl sulfate

Oligomerization of  $\epsilon$ -caprolactone and  $\delta$ -valerolactone using heteropolyacid initiators and vanadium or molybdenum complexes (Mahha, Y. (234) 63)

## Vapor phase

Vapor phase oxidation of 4-fluorotoluene over vanadia–titania catalyst (Maurya, S.K. (234) 51)

## Wadsworth–Emmons

Wadsworth–Emmons reactions catalyzed by nanocrystalline MgO (Choudary, B.M. (234) 25)

## XANES

X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)

## XPS

X-ray absorption near edge structure and X-ray photo electron spectroscopy analyses of NiMo/Al<sub>2</sub>O<sub>3</sub> catalysts containing boron and phosphorus (Ferdous, D. (234) 169)
