### Vol. 254, Nos. 1–2

Preface	
B. Marciniec (Poznan, Poland) . . . . .	1
<b>Organic Synthesis by Metathesis</b>	
Ring closing metathesis employing organometallic substrates and the templated synthesis of macrocycles	
P.A. Chase, M. Lutz, A.L. Spek, G.P.M. van Klink and G. van Koten (Utrecht, The Netherlands) . . . . .	2
Generation of <i>trans</i> -spanning diphosphine ligands via alkene metathesis: Synthesis, structure, and dynamic behavior of a missing link in a series of square-planar platinum complexes	
N. Lewanzik, T. Oeser, J. Blümel (Heidelberg, Germany) and J.A. Gladysz (Erlangen, Germany) . . . . .	20
Metal carbenes in enyne metathesis: Synthetic and mechanistic studies	
S.T. Diver (USA) . . . . .	29
Application of ring closing metathesis in efficient synthesis of macrocyclic crown compounds	
Y.A. Ibrahim (Safat, Kuwait) . . . . .	43
Olefin metathesis and isomerization: From undesired side reactions to useful synthetic methodology	
B. Schmidt (Golm, Germany) . . . . .	53
Highly stereoselective synthesis of <i>E</i> -4-chlorostilbene and its derivatives via tandem cross-metathesis (or silylative coupling) and Hiyama coupling	
W. Prukata, M. Majchrzak, C. Pietraszuk and B. Marciniec (Poznań, Poland) . . . . .	58
ROM–RCM of azabicycloheptene derivatives—Study of products distribution by the substituent on alkyne	
M. Mori (Hokkaido, Japan), H. Wakamatsu (Sendai, Japan), Y. Sato (Sapporo, Japan) and R. Fujita (Sendai, Japan) . . . . .	64
Alkene- and alkyne-bridged mimics of nisin as potential peptide-based antibiotics	
N. Ghalit, D.T.S. Rijkers and R.M.J. Liskamp (Utrecht, The Netherlands) . . . . .	68
Exploiting catalyst characteristics: A protocol for increasing diastereoselectivity in a double ring-closing metathesis reaction	
D.J. Wallace (Herts, UK) . . . . .	78
Alkoxy group facilitated ring closing metathesis (RCM) of acyclic 1,6-dienes. Facile synthesis of non-racemic highly substituted cyclopentenols	
S. Banerjee, A. Nayek, S. Sinha, T. Bhaumik and S. Ghosh (Kolkata, India) . . . . .	85
Unsymmetrical maleates from stereoselective decomposition of diazoesters using Grubbs' 2nd-generation Ru carbene catalyst	
D.M. Hodgson and D. Angrish (Oxford, UK) . . . . .	93
<b>Catalysis and Reaction Mechanisms</b>	
Alkyne metathesis catalysts: Scope and future	
A. Mortreux and O. Coutelier (Villeneuve d'Ascq, France) . . . . .	96
Ruthenium aryloxide catalysts: Synthesis and applications in ring-closing metathesis	
J.C. Conrad, J.L. Snelgrove, M.D. Eelman, S. Hall and D.E. Fogg (Ottawa, Canada) . . . . .	105
The utility of Hoveyda-type catalysts in ADMET chemistry: Sterics versus electronics	
F.C. Courchay, J.C. Sworen, A. Coronado and K.B. Wagener (Gainesville, FL, USA) . . . . .	111
New tunable catalysts for olefin metathesis: Controlling the initiation through electronic factors	
Ł. Gułajski, A. Michrowska, R. Bujok and K. Grela (Warsaw, Poland) . . . . .	118
Nitrogen ligand-containing Rh catalysts for the polymerization of substituted acetylenes	
I. Saeed, M. Shiotsuki and T. Masuda (Kyoto, Japan) . . . . .	124
Preparation and characterization of iminopyrrolyl hafnium complexes as catalyst precursors for $\alpha$ -olefin polymerization	
H. Tsurugi, Y. Matsuo and K. Mashima (Osaka, Japan) . . . . .	131
Supporting ruthenium initiator on PolyHIPE	
S. Cetinkaya (Kirikkale, Turkey and Durham, UK), E. Khosravi and R. Thompson (Durham, UK) . . . . .	138
Experimental and DFT investigation of the 1-octene metathesis reaction mechanism with the Grubbs 1 pre-catalyst	
M. Jordaán, P. van Helden, C.G.C.E. van Sittert and H.C.M. Vosloo (Potchefstroom, South Africa) . . . . .	145
Recent mechanistic developments in atom transfer radical polymerization	
W.A. Braunecker and K. Matyjaszewski (Pennsylvania, USA) . . . . .	155
In situ NMR investigations into the ADMET-reaction of 1,4-diheptyloxy-2,5-divinylbenzene via a Schrock-type molybdenum alkylidene complex	
R.M. Peetz, V. Sinnwell and E. Thorn-Csányi (Hamburg, Germany) . . . . .	165

Photosensitive polynorbornene containing the benzyl thiocyanate group—Synthesis and patterning A. Lex, G. Trimmel, W. Kern and F. Stelzer (Graz, Austria) . . . . .	174
Qualitative FT-Raman investigation of the ring opening metathesis polymerization of dicyclopentadiene D. Schaubroeck, S. Brughmans, C. Vercaemst, J. Schaubroeck and F. Verpoort (Ghent, Belgium) . . . . .	180
Synthesis and characterization of Ge- and Sn-containing ADMET polymers K. Solmaz, A. Cemil, D. Bülent and Y. İmamoglu (Ankara, Turkey) . . . . .	186
Effect of phenoxy ligands on catalytic properties of titanium half-sandwich complexes/MAO systems D. Jamanek, K. Niciński, R. Kazimierzczuk, T. Woźniewski, Z. Wieczorek and W. Skupiński (Warszawa, Poland) . . . . .	192
Effect of aryloxy ligand in 1-hexene, styrene polymerization catalyzed by nonbridged half-titanocenes of the type, Cp'TiCl <sub>2</sub> (OAr) (Cp' = C <sub>5</sub> Me <sub>5</sub> , 'BuC <sub>5</sub> H <sub>4</sub> ). Structural analyses for Cp <sup>o</sup> TiCl <sub>2</sub> (O-2,6-'Bu <sub>2</sub> C <sub>6</sub> H <sub>3</sub> ) and Cp <sup>o</sup> TiCl <sub>2</sub> (O-2,6-'Pr <sub>2</sub> -4-'BuC <sub>6</sub> H <sub>2</sub> ) K. Nomura, A. Tanaka and S. Katao (Nara, Japan) . . . . .	197
Volume contents . . . . .	206
