

Subject Index

Activity

Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177

Activity assay

A convenient activity assay for immobilized lipases 121

Adaptation to cold

Molecular adaptation to cold of an Antarctic bacterial lipase 29

Alcohol resolution

Enantioselectivity of lipases: effects of water activity 221

Alcoholysis

A convenient activity assay for immobilized lipases 121

Alkyl diacylglycerols

New fluorescent glycerolipids for a dual wavelength assay of lipase activity and stereoselectivity 127

Antarctic bacterium

Molecular adaptation to cold of an Antarctic bacterial lipase 29

Aspergillus oryzae

Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147

Aspergillus niger

Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147

Asymmetric acetylation

Chemoenzymatic synthesis of four diastereomers of (6-fluoro-2-chroman-2-yl)oxirane: An intermediate of a potent β -blocker 285

Asymmetric hydrolysis

Asymmetric resolution of diastereomeric 4-ethoxycarbonyl-5-pentyl- γ -butyrolactones by crude PLE-mediated hydrolysis 203
Chemoenzymatic synthesis of four diastereomers of (6-fluoro-2-chroman-2-yl)oxirane: An intermediate of a potent β -blocker 285

Asymmetric synthesis

Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259

β -blocker

Chemoenzymatic synthesis of four diastereomers of (6-fluoro-2-chroman-2-yl)oxirane: An intermediate of a potent β -blocker 285

Beauveria spp.

Biohydrolysis of substituted styrene oxides by *Beauveria densa* CMC 3240 253

Biocatalysis

Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311

Biomimetic coenzyme

Characterisation of the artificial coenzyme CL4 239

Biotransformation

Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213

Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311

Boric acid

Inhibition of chitosan-immobilized urease by boric acid as determined by integration methods 231

Butterfat

Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161

Candida

The evolution of a non universal codon as detected in *Candida rugosa* lipase 37

Candida antarctica lipase B

Regioselective acylation of polyhydroxylated natural compounds catalyzed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193

Candida cylindracea

Thermal stability and activity of *Candida cylindracea* lipase 43

Candida lipolytica

Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147

Candida rugosa

Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83

Capacity

Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177

Catalysis

Integration of reaction and separation with lipases: An overview 99

Characterisation

Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177

- Chiral alcohols
 Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
- Chiral diol
 Biohydrolysis of substituted styrene oxides by *Beauveria densa* CMC 3240 253
- Chiral epoxide
 Biohydrolysis of substituted styrene oxides by *Beauveria densa* CMC 3240 253
- Chitosan membrane
 Inhibition of chitosan-immobilized urease by boric acid as determined by integration methods 231
- Coenzyme analogue
 Characterisation of the artificial coenzyme CL4 239
- Conformation
 Improving lipase activity in solvent-free media by interfacial activation-based molecular bioimprinting 111
- Controlled wateractivity (a_w)
 A convenient activity assay for immobilized lipases 121
- Crown ether
 Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
- Crystal structure comparison
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Dextranase isoforms
 Immobilisation and kinetics of *Penicillium notatum* dextranase on controlled porous glass 271
- Dextran hydrolysis
 Immobilisation and kinetics of *Penicillium notatum* dextranase on controlled porous glass 271
- Differential scanning calorimetry
 Thermal stability and activity of *Candida cylindracea* lipase 43
- 3D structural model
 Bacterial lipases for biotechnological applications 3
- Enantioselective esterification
 Enantioselectivity of lipases: effects of water activity 221
- Enantioselectivity
 A structure-based rationalization of the enantiopreference of subtilisin toward secondary alcohols and isosteric primary amines 65
- Enantioselectivity model
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Enzyme
 Integration of reaction and separation with lipases: An overview 99
- Epoxidation
 Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311
- Epoxide hydrolase
 Biohydrolysis of substituted styrene oxides by *Beauveria densa* CMC 3240 253
- Esterase
 Asymmetric resolution of diastereomeric 4-ethoxycarbonyl-5-pentyl- γ -butyrolactones by crude PLE-mediated hydrolysis 203
 New *Pseudomonas* esterases by genetic engineering 25
- Esterification
 Enzymatic synthesis of fatty esters by alkylated lipase 171
 The (phospho)lipase from *Staphylococcus hyicus*: Expression in *Escherichia coli*, large-scale purification and application in esterification reactions 13
- Ester residue alignments
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Ester synthesis
 Methods for the immobilization of lipases and their use for ester synthesis 303
- Evolution
 The evolution of a non universal codon as detected in *Candida rugosa* lipase 37
- Fatty acid
 Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
- Flavonoid glycosides
 Regioselective acylation of polyhydroxylated natural compounds catalyzed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193
- Fluorine compounds
 Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
- Gas chromatography
 A convenient activity assay for immobilized lipases 121
- Genetic code
 The evolution of a non universal codon as detected in *Candida rugosa* lipase 37
- Hansenula anomala*
 Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147
- Hollow fiber reactor
 Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
- Horse liver alcohol dehydrogenase
 Characterisation of the artificial coenzyme CL4 239
- α / β -Hydrolase
 A structure-based rationalization of the enantiopreference of subtilisin toward secondary alcohols and isosteric primary amines 65
- Hydrolysis
 New *Pseudomonas* esterases by genetic engineering 25
- Hydrophobic
 Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177
- Hydroxylation
 Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311

- Immobilisation
 Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177
 Immobilisation and kinetics of *Penicillium notatum* dextranase on controlled porous glass 271
- Immobilization
 Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
- Immobilized lipase
 A convenient activity assay for immobilized lipases 121
- Immobilized urease
 Inhibition of chitosan-immobilized urease by boric acid as determined by integration methods 231
- Inactivation
 A convenient activity assay for immobilized lipases 121
- Industrial use
 Aspects in lipase screening 139
- Inhibition
 Inhibition of chitosan-immobilized urease by boric acid as determined by integration methods 231
- Integration
 Integration of reaction and separation with lipases: An overview 99
- Interesterification
 A convenient activity assay for immobilized lipases 121
 Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
- Interfacial activation
 Improving lipase activity in solvent-free media by interfacial activation-based molecular bioimprinting 111
- Kinetic integration methods
 Inhibition of chitosan-immobilized urease by boric acid as determined by integration methods 231
- Kinetic properties
 Immobilisation and kinetics of *Penicillium notatum* dextranase on controlled porous glass 271
- Kinetic resolution
 Bacterial lipases for biotechnological applications 3
- Laccase
 Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- γ -Lactones
 Asymmetric resolution of diastereomeric 4-ethoxycarbonyl-5-pentyl- γ -butyrolactones by crude PLE-mediated hydrolysis 203
- Lentinus edodes*
 Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- Lipase
 A structure-based rationalization of the enantioselectivity of subtilisin toward secondary alcohols and isosteric primary amines 65
 Asymmetric resolution of diastereomeric 4-ethoxycarbonyl-5-pentyl- γ -butyrolactones by crude PLE-mediated hydrolysis 203
 Bacterial lipases for biotechnological applications 3
 Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177
 Chemoenzymatic synthesis of four diastereomers of (6-fluoro-2-chromanyl)oxirane: An intermediate of a potent β -blocker 285
 Comparative studies on the sugar esters synthesis catalysed by *Candida antarctica* and *Candida rugosa* lipases in hexane 189
 Improving lipase activity in solvent-free media by interfacial activation-based molecular bioimprinting 111
 Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
 Molecular adaptation to cold of an Antarctic bacterial lipase 29
 Molecular evolution of the pancreatic lipase and two related enzymes towards different substrate selectivities 55
 Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
 Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
 The evolution of a non universal codon as detected in *Candida rugosa* lipase 37
 Thermal stability and activity of *Candida cylindracea* lipase 43
- Lipase deactivation
 Molecular reasons for lipase-sensitivity against acetaldehyde 131
- Lipase immobilization
 Methods for the immobilization of lipases and their use for ester synthesis 303
- Lipases
 Aspects in lipase screening 139
 Enantioselectivity of lipases: effects of water activity 221
 Some characteristics of lipases from thermophilic fungi isolated from palm oil mill effluent 153
- Lysine residue accessibility
 Molecular reasons for lipase-sensitivity against acetaldehyde 131
- Microbial lipases
 Computer-aided modelling of stereoselective triglyceride hydrolysis catalyzed by *Rhizopus oryzae* lipase 73
- Modelling
 Computer-aided modelling of stereoselective triglyceride hydrolysis catalyzed by *Rhizopus oryzae* lipase 73
- Models
 A structure-based rationalization of the enantioselectivity of subtilisin toward secondary alcohols and isosteric primary amines 65
- Molecular dynamics
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Molecular mechanics
 Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83

- Molecular modeling
Molecular adaptation to cold of an Antarctic bacterial lipase 29
- Monooxygenase
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Monte-Carlo minimization
Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Mortierella isabellina* ATCC 42613
Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311
- Mucor javanicus*
Lipase-catalyzed modification of butterfat via acidolysis with oleic acid 161
- Mutagenesis
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Nonaqueous media
Improving lipase activity in solvent-free media by interfacial activation-based molecular bioimprinting 111
- Novozym 435
Regioselective acylation of polyhydroxylated natural compounds catalyzed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193
- Organic solvents
Regioselective acylation of polyhydroxylated natural compounds catalyzed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193
- Overexpression
Bacterial lipases for biotechnological applications 3
The (phospho)lipase from *Staphylococcus hyicus*: Expression in *Escherichia coli*, large-scale purification and application in esterification reactions 13
- Oxidoreductase
Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- P450_{cam}
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Pancreatic lipase gene family
Molecular evolution of the pancreatic lipase and two related enzymes towards different substrate selectivities 55
- Perylene glycerolipids
New fluorescent glycerolipids for a dual wavelength assay of lipase activity and stereoselectivity 127
- Phospholipase
Molecular evolution of the pancreatic lipase and two related enzymes towards different substrate selectivities 55
- pK_a-value
Molecular reasons for lipase-sensitivity against acetaldehyde 131
- Primary amines
A structure-based rationalization of the enantiopreference of subtilisin toward secondary alcohols and isosteric primary amines 65
- Protein engineering
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Pseudomonas aeruginosa*
Bacterial lipases for biotechnological applications 3
- Pseudomonas cepacia*
Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Pseudomonas fluorescens*
Methods for the immobilization of lipases and their use for ester synthesis 303
- Pseudomonas marginata*
New *Pseudomonas* esterases by genetic engineering 25
- Psychrophile
Molecular adaptation to cold of an Antarctic bacterial lipase 29
- Pummerer's ketone
Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- Purification
The (phospho)lipase from *Staphylococcus hyicus*: Expression in *Escherichia coli*, large-scale purification and application in esterification reactions 13
- Pyrene glycerolipids
New fluorescent glycerolipids for a dual wavelength assay of lipase activity and stereoselectivity 127
- Reductive alkylation
Enzymatic synthesis of fatty esters by alkylated lipase 171
- Regioselectivity
A structure-based rationalization of the enantiopreference of subtilisin toward secondary alcohols and isosteric primary amines 65
Regioselective acylation of polyhydroxylated natural compounds catalyzed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193
- Regulation of enzymatic reactivity
Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
- Resonance energy transfer
New fluorescent glycerolipids for a dual wavelength assay of lipase activity and stereoselectivity 127
- Rhizopus nigricans*
Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147
- Rhizopus oryzae*
Some characteristics of lipases from thermophilic fungi isolated from palm oil mill effluent 153
- Rhizopus oryzae* lipase
Computer-aided modelling of stereoselective triglyceride hydrolysis catalyzed by *Rhizopus oryzae* lipase 73
- R. rhizopodiformis*
Some characteristics of lipases from thermophilic fungi isolated from palm oil mill effluent 153
- Schiff base
Molecular reasons for lipase-sensitivity against acetaldehyde 131

- Screening
Aspects in lipase screening 139
Screening of yeast and fungal strains for lipolytic potential and determination of some biochemical properties of microbial lipases 147
- Secondary alcohols
A structure-based rationalization of the enantioselectivity of subtilisin toward secondary alcohols and isosteric primary amines 65
New *Pseudomonas* esterases by genetic engineering 25
- Selective hydroxylation
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Selectivity
Enzymatic synthesis of fatty esters by alkylated lipase 171
- Separation
Integration of reaction and separation with lipases: An overview 99
- Serratia marcescens*
Bacterial lipases for biotechnological applications 3
- Solvent-free
Improving lipase activity in solvent-free media by interfacial activation-based molecular bioimprinting 111
- Stability
Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177
Enzymatic synthesis of fatty esters by alkylated lipase 171
- Stannyl compounds
Synthesis of chiral building blocks for organic synthesis via lipase-catalyzed reaction: New method of enhancing enzymatic reaction enantioselectivity 259
- Staphylococcus hyicus* (phospho)lipase
The (phospho)lipase from *Staphylococcus hyicus*: Expression in *Escherichia coli*, large-scale purification and application in esterification reactions 13
- Stereoselective hydrolysis
Computer-aided modelling of stereoselective triglyceride hydrolysis catalysed by *Rhizopus oryzae* lipase 73
- Stereoselectivity
New *Pseudomonas* esterases by genetic engineering 25
- Substrate orientations
Selectivity of lipases: Conformational analysis of suggested intermediates in ester hydrolysis of chiral primary and secondary alcohols 83
- Substrate selectivity
Molecular evolution of the pancreatic lipase and two related enzymes towards different substrate selectivities 55
- Subtilase
A structure-based rationalization of the enantioselectivity of subtilisin toward secondary alcohols and isosteric primary amines 65
- Subtilisin
A structure-based rationalization of the enantioselectivity of subtilisin toward secondary alcohols and isosteric primary amines 65
- Sugar acylation
Regioselective acylation of polyhydroxylated natural compounds catalysed by *Candida antarctica* lipase B (Novozym 435) in organic solvents 193
- Sugar–fatty acid esters
Comparative studies on the sugar esters synthesis catalysed by *Candida antarctica* and *Candida rugosa* lipases in hexane 189
- Sulfoxidation
Side chain oxidation of aromatic compounds by fungi. 7. A rationale for sulfoxidation, benzylic hydroxylation, and olefin oxidation by *Mortierella isabellina* 311
- Support
Characterisation of the equilibrium behaviour of lipase PS (from *Pseudomonas*) and lipolase 100L (from *Humicola*) onto Accurel EP100 177
- Thermal analysis
Thermal stability and activity of *Candida cylindracea* lipase 43
- Thermophilic fungi
Some characteristics of lipases from thermophilic fungi isolated from palm oil mill effluent 153
- Tyrosol
Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- Unnatural substrates
Selective aliphatic and aromatic carbon–hydrogen bond activation catalysed by mutants of cytochrome P450_{cam} 293
- Waste olive waters
Biotransformation of tyrosol by whole-cell and cell-free preparation of *Lentinus edodes* 213
- Water activity
Comparative studies on the sugar esters synthesis catalysed by *Candida antarctica* and *Candida rugosa* lipases in hexane 189
Enantioselectivity of lipases: effects of water activity 221
