

## Subject index

- Abzymes  
Enzymes and abzymes relationships 39
- Acetonitrile  
*N*-acetyl-L-arginine ethyl ester synthesis catalysed by bovine trypsin in organic media 565
- Acetylglutamate synthetase  
Alteration in arginine activation of *N*-acetylglutamate synthetase in vitro by disulfide or thiol compounds 191
- Acidolysis  
Enzymatic synthesis of structured lipids 129
- Actinomadura*  
Bioconversion of compactin to pravastatin by *Actinomadura* sp. ATCC 55678 151
- Actinomycete  
Stereocontrolled reduction of  $\alpha$ -keto esters with thermophilic actinomycete, *Streptomyces thermocyaneoviolaceus* IFO 14271 429
- Activated charcoal  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Activation  
Double effect of organic amines (activation and inhibition) on the phosphotriesterase 571
- Active site  
Double effect of organic amines (activation and inhibition) on the phosphotriesterase 571
- Activity  
Enhancing effect of Tween-80 on lipase performance in enantioselective hydrolysis of ketoprofen ester 523
- Acylation  
Enzymatic synthesis of the acrylic esters: a comparative study 551  
Lipase-catalyzed enantioselective acetylation of 2-acyloxypropane-1,3-diols. Influence of the acyl moiety on the selectivity 583
- Adenine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Adenosine deaminase  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Adenosylcobalamin  
The structure and the mechanism of action of coenzyme B<sub>12</sub>-dependent diol dehydratases 87
- Alcohol oxidase multiplicity  
Alcohol oxidase of the methylotrophic yeasts: new findings 295
- Alignment  
Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- Alkaline phosphatase  
Unnatural amino acids in enzymes and proteins 47  
Enzymatic activity of an extremely halophilic phosphatase from the Archaea *Halobacterium salinarum* in reversed micelles 555
- (*R*)- $\alpha$ -methyl- $\beta$ -propiothiolactone  
Lipase-catalyzed reaction in the packed-bed reactor with continuous extraction column to overcome a product inhibition 597
- Amine  
Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Amine dehydrogenase  
Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Amino acid  
Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Amino alcohol  
Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Ampicillin synthesis  
Penicillin acylase-catalyzed synthesis of ampicillin in “aqueous solution–precipitate” systems. High substrate concentration and supersaturation effect 509
- $\alpha$ -Amylase  
Oligosaccharide synthesis by reversed catalysis using  $\alpha$ -amylase from *Bacillus licheniformis* 273
- Amyloglucosidase  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Amylosucrase  
Glucansucrases: molecular engineering and oligosaccharide synthesis 117

- Analogue incorporation  
 Unnatural amino acids in enzymes and proteins 47
- Analogue resistance  
 Unnatural amino acids in enzymes and proteins 47
- Antibiotics  
 Biomolecular engineering: a new frontier in biotechnology 23  
 Chloroperoxidase-catalyzed chlorination of didechloroaglucovancomycin and vancomycin 545
- Antibodies  
 Biomolecular engineering: a new frontier in biotechnology 23
- Anti-idiotypic antibodies  
 Enzymes and abzymes relationships 39
- Apoenzyme  
 Apoenzyme from *Cryptococcus humicola* UJ1 D-aspartate oxidase 183
- Apoprotein  
 Apoenzyme from *Cryptococcus humicola* UJ1 D-aspartate oxidase 183
- Apoptosis-like cell death  
 Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Aqueous solution–precipitate  
 Penicillin acylase-catalyzed synthesis of ampicillin in “aqueous solution–precipitate” systems. High substrate concentration and supersaturation effect 509
- Archaea  
 Enzymatic activity of an extremely halophilic phosphatase from the Archaea *Halobacterium salinarum* in reversed micelles 555
- Arginine  
 Alteration in arginine activation of *N*-acetylglutamate synthetase in vitro by disulfide or thiol compounds 191
- Ashbya gossypii*  
 Role of a peroxisomal NADP-specific isocitrate dehydrogenase in the metabolism of the riboflavin overproducer *Ashbya gossypii* 335
- D-Aspartate oxidase  
 Apoenzyme from *Cryptococcus humicola* UJ1 D-aspartate oxidase 183
- Aspartate transcarbamylase  
 Unnatural amino acids in enzymes and proteins 47
- Automatic reactor  
 Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
- Bacillus cereus* oligo-1,6-glucosidase  
 Thermodynamic analysis of *Bacillus cereus* oligo-1,6-glucosidase and its cumulatively proline-introduced mutant proteins by differential scanning calorimetry 257
- Bacillus circulans*  
 Characterization of a new thermostable esterase from the moderate thermophilic bacterium *Bacillus circulans* 395  
 A highly selective synthesis of *N*-acetyllactosamine catalyzed by immobilised  $\beta$ -galactosidase from *Bacillus circulans* 403
- Bacillus licheniformis*  
 Short chain flavour ester synthesis by a new esterase from *Bacillus licheniformis* 377
- Bacteria  
 Stereocontrolled reduction of  $\alpha$ -keto esters with thermophilic actinomycete, *Streptomyces thermocyanoeviolaceus* IFO 14271 429
- Bacterial expression  
 Enzymatic and structural aspects on glutamate decarboxylase 67
- Base-off analogue of coenzyme B<sub>12</sub>  
 Elucidation of the coenzyme binding mode of further B<sub>12</sub>-dependent enzymes using a base-off analogue of coenzyme B<sub>12</sub> 345
- Biocatalysis  
 Characterization of a new thermostable esterase from the moderate thermophilic bacterium *Bacillus circulans* 395
- Biocatalysts  
 Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
- Bioconversion  
 Bioconversion of compactin to pravastatin by *Actinomadura* sp. ATCC 55678 151
- Bioinformatics  
 Biomolecular engineering: a new frontier in biotechnology 23
- Biomolecular engineering  
 Biomolecular engineering: a new frontier in biotechnology 23
- Bioprocess engineering  
 Biomolecular engineering: a new frontier in biotechnology 23
- Biosensor  
 Enzyme sensors for environmental analysis 177
- Biotechnology  
 Biomolecular engineering: a new frontier in biotechnology 23
- Biotransformation  
 Regioselective oxidation of terfenadine with *Cunninghamella blakesleeana* 313
- Biotransformations  
 Chloroperoxidase-catalyzed chlorination of didechloroaglucovancomycin and vancomycin 545
- Bovine trypsin  
*N*-acetyl-L-arginine ethyl ester synthesis catalysed by bovine trypsin in organic media 565
- Candida rugosa* lipase  
 Enhancing effect of Tween-80 on lipase performance in enantioselective hydrolysis of ketoprofen ester 523
- Candida rugosa* lipase  
 Enantio-reversal in *Candida rugosa* lipase-catalyzed esterification of 3-hydroxybutyric acid 531
- Carbamoyl-phosphate synthetase I  
 Alteration in arginine activation of *N*-acetylglutamate synthetase in vitro by disulfide or thiol compounds 191
- Carbon monoxide  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Carboxyl ester hydrolase  
 Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
- Carboxymethylcellulose  
 Preparation and functional properties of trypsin modified by carboxymethylcellulose 483

- Catalytic antibodies  
Enzymes and abzymes relationships 39
- Catalytic residue  
Identification of active site carboxylic residues in *Trichoderma reesei* endoglucanase Cel12A by site-directed mutagenesis 249
- Cell physiology  
Microbial cellular biology and current problems of metabolic engineering 5
- Cellulase  
Identification of active site carboxylic residues in *Trichoderma reesei* endoglucanase Cel12A by site-directed mutagenesis 249
- Cephalexin  
Immobilization of penicillin G acylase onto chemically grafted nylon particles 445
- Characterization  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Charge transfer complex  
Xanthone derivatives as inhibitors for monoamine oxidase 291
- Chemical grafting  
Immobilization of penicillin G acylase onto chemically grafted nylon particles 445
- Chloroperoxidase  
Chloroperoxidase-catalyzed chlorination of didechloroaglucovancomycin and vancomycin 545
- Claw setting  
What evidences were elucidated about photoreactive nitrile hydratase? 81
- CLEC  
Influence of lid conformation on lipase enantioselectivity 385
- CMP-NeuAc synthetase  
Cloning and overexpression of a cytidine 5'-monophosphate *N*-acetylneuraminic acid synthetase from *Escherichia coli* 199
- Coenzyme B<sub>12</sub>  
The structure and the mechanism of action of coenzyme B<sub>12</sub>-dependent diol dehydratases 87
- Co-expression  
Effect of the truncation of the C-terminal region of Kex2 endoprotease on processing of the recombinant *Rhizopus oryzae* lipase precursor in the co-expression system in yeast 233
- Co-metabolism  
Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Compactin  
Bioconversion of compactin to pravastatin by *Actinomadura* sp. ATCC 55678 151
- Condensation  
Synthesis of lauroyl saccharides through lipase-catalyzed condensation in microaqueous water-miscible solvents 241
- Coniferyl alcohol  
Oxidation of isoeugenol and coniferyl alcohol catalyzed by laccases isolated from *Rhus vernicifera* Stokes and *Pycnoporus coccineus* 605
- Continuous fermentation  
Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325
- CTAB  
Enzymatic activity of an extremely halophilic phosphatase from the Archaea *Halobacterium salinarum* in reversed micelles 555
- Cultured cells  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Cunninghamella blakesleeana*  
Regioselective oxidation of terfenadine with *Cunninghamella blakesleeana* 313
- Cytochrome *c*  
Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Database  
Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- 2'-Deoxyadenosine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- 2'-Deoxyguanosine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- 2'-deoxyribonucleoside-5'-triphosphate  
Recombinant *Lactobacillus leichmannii* ribonucleoside-triphosphate reductase as biocatalyst in the preparative synthesis of 2'-deoxyribonucleoside-5'-triphosphates 215
- 2'-Deoxyuridine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Detoxification  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Dextranucrase  
Glucanucrases: molecular engineering and oligosaccharide synthesis 117
- Dextrin  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Diabetes  
Enzymatic and structural aspects on glutamate decarboxylase 67
- 2,6-Diaminopurine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- 2,6-Diaminopurine-2'-deoxyriboside  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Differential scanning calorimetry  
Thermodynamic analysis of *Bacillus cereus* oligo-1,6-glucosidase and its cumulatively proline-introduced mutant proteins by differential scanning calorimetry 257
- 1,3-Dihydroxy-6-alkoxyxanthenes  
Xanthone derivatives as inhibitors for monoamine oxidase 291
- Diltiazem  
Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141

- Diol dehydratase  
The structure and the mechanism of action of coenzyme B<sub>12</sub>-dependent diol dehydratases 87
- $\alpha,\alpha$ -Disubstituted carboxylic acid  
Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
- DNA fragmentation  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- E. coli*  
Cloning and overexpression of a cytidine 5'-monophosphate *N*-acetylneuraminic acid synthetase from *Escherichia coli* 199
- Enantio-reversal  
Enantio-reversal in *Candida rugosa* lipase-catalyzed esterification of 3-hydroxybutyric acid 531
- Enantioselection  
Lipase-catalyzed enantioselective acetylation of 2-acyloxypropane-1,3-diols. Influence of the acyl moiety on the selectivity 583
- Enantioselectivity  
Computer-aided molecular modeling of the enantioselectivity of *Pseudomonas cepacia* lipase toward  $\gamma$ - and  $\delta$ -lactones 223  
Influence of lid conformation on lipase enantioselectivity 385  
Enhancing effect of Tween-80 on lipase performance in enantioselective hydrolysis of ketoprofen ester 523
- Endoglucanase  
Identification of active site carboxylic residues in *Trichoderma reesei* endoglucanase Cel12A by site-directed mutagenesis 249
- Enterobacter aerogenes*  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Enzymatic catalysis  
Enzymatic oxidation of alkenes 435
- Enzymatic chlorination  
Chloroperoxidase-catalyzed chlorination of didechloroagluconamycin and vancomycin 545
- Enzymatic resolution  
Diversity of microbial threonine aldolases and their application 107  
Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141  
Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
- Enzymatic synthesis  
Recombinant *Lactobacillus leichmannii* ribonucleoside-triphosphate reductase as biocatalyst in the preparative synthesis of 2'-deoxyribonucleoside-5'-triphosphates 215  
Oligosaccharide synthesis by reversed catalysis using  $\alpha$ -amylase from *Bacillus licheniformis* 273  
One-pot syntheses of the sex pheromone homologs of a codling moth, *Laspeyresia promonella* L. 517  
Enzymatic synthesis of the acrylic esters: a comparative study 551
- Enzyme  
Enzyme sensors for environmental analysis 177
- Enzyme-catalyzed oxidation  
Oxidation of isoeugenol and coniferyl alcohol catalyzed by laccases isolated from *Rhus vernicifera* Stokes and *Pycnoporus coccineus* 605
- Enzyme immobilization  
Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Enzyme purification  
Asymmetric reduction of  $\alpha$ -keto esters with thermophilic actinomycete: purification and characterization of  $\alpha$ -keto ester reductase from *Streptomyces thermocyaneoviolaceus* IFO 14271 419
- Enzyme reaction  
Use of *Mucor miehei* lipase in the preparation of long chain 3-*O*-acylcatechins 577
- Enzyme reversal  
Oligosaccharide synthesis by reversed catalysis using  $\alpha$ -amylase from *Bacillus licheniformis* 273
- Enzymes  
Biomolecular engineering: a new frontier in biotechnology 23
- Enzymes and enzyme reactions  
Lipase-catalyzed enantioselective acetylation of 2-acyloxypropane-1,3-diols. Influence of the acyl moiety on the selectivity 583
- Enzyme stability  
Preparation and functional properties of trypsin modified by carboxymethylcellulose 483
- Enzyme synthesis  
Color mutants of *Monascus* sp. KB9 and their comparative glucoamylases on rice solid culture 263
- Esterase  
Short chain flavour ester synthesis by a new esterase from *Bacillus licheniformis* 377  
Characterization of a new thermostable esterase from the moderate thermophilic bacterium *Bacillus circulans* 395
- Esterification  
Enzymatic synthesis of structured lipids 129
- Esters  
Use of *Mucor miehei* lipase in the preparation of long chain 3-*O*-acylcatechins 577
- Ester synthesis  
Short chain flavour ester synthesis by a new esterase from *Bacillus licheniformis* 377
- Ethane  
Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Ethanolamine ammonia lyase (*Salmonella typhimurium*)  
Elucidation of the coenzyme binding mode of further B<sub>12</sub>-dependent enzymes using a base-off analogue of coenzyme B<sub>12</sub> 345
- Eupergit® C  
Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
- Extractive process  
Lipase-catalyzed reaction in the packed-bed reactor with continuous extraction column to overcome a product inhibition 597

- Farnesyl diphosphate synthase  
Overexpression, purification, and characterization of selenomethionyl farnesyl diphosphate synthase of *Bacillus stearothermophilus* 623
- Flavonoids  
Use of *Mucor miehei* lipase in the preparation of long chain 3-*O*-acylcatechins 577
- Flavoprotein  
Apoenzyme from *Cryptococcus humicola* UJ1 D-aspartate oxidase 183
- Flavors  
Short chain flavour ester synthesis by a new esterase from *Bacillus licheniformis* 377
- Fluoroacetate dehalogenase  
Bacterial 2-haloacid dehalogenases: structures and reaction mechanisms 57
- 4-Fluorophenylalanine  
Unnatural amino acids in enzymes and proteins 47
- Flux analysis  
Microbial cellular biology and current problems of metabolic engineering 5
- Free-energy diagram  
Influence of lid conformation on lipase enantioselectivity 385
- GABA  
Enzymatic and structural aspects on glutamate decarboxylase 67
- $\beta$ -Galactosidase  
A highly selective synthesis of *N*-acetylglucosamine catalyzed by immobilised  $\beta$ -galactosidase from *Bacillus circulans* 403
- Genomics  
Biomolecular engineering: a new frontier in biotechnology 23
- Glucoamylase  
Color mutants of *Monascus* sp. KB9 and their comparative glucoamylases on rice solid culture 263
- Glucose  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Glucose dehydrogenase  
NAD(P)<sup>+</sup>-glucose dehydrogenase from *Haloferax mediterranei*: kinetic mechanism and metal content 409
- $\alpha$ -Glucosidase  
Heterooligosaccharide synthesis catalyzed by  $\alpha$ -glucosidase from *Bacillus stearothermophilus* 617
- Glucosylation  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Glucosyltransferases  
Glucansucrases: molecular engineering and oligosaccharide synthesis 117
- Glutamate decarboxylase  
Enzymatic and structural aspects on glutamate decarboxylase 67
- Glutamate mutase (*Clostridium cochlearium*)  
Elucidation of the coenzyme binding mode of further B<sub>12</sub>-dependent enzymes using a base-off analogue of coenzyme B<sub>12</sub> 345
- Glutathione transferase  
Unnatural amino acids in enzymes and proteins 47
- Guanine  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- DL-2-Haloacid dehalogenase  
Bacterial 2-haloacid dehalogenases: structures and reaction mechanisms 57
- L-2-Haloacid dehalogenase  
Bacterial 2-haloacid dehalogenases: structures and reaction mechanisms 57
- 2-Haloalkanoic acid  
Bacterial 2-haloacid dehalogenases: structures and reaction mechanisms 57
- Haloferax mediterranei*  
NAD(P)<sup>+</sup>-glucose dehydrogenase from *Haloferax mediterranei*: kinetic mechanism and metal content 409
- Halophilic  
NAD(P)<sup>+</sup>-glucose dehydrogenase from *Haloferax mediterranei*: kinetic mechanism and metal content 409
- Halophilic enzyme  
Enzymatic activity of an extremely halophilic phosphatase from the Archaea *Halobacterium salinarum* in reversed micelles 555
- Heterooligosaccharide synthesis  
Heterooligosaccharide synthesis catalyzed by  $\alpha$ -glucosidase from *Bacillus stearothermophilus* 617
- His-tag  
Purification and characterization of Q $\beta$  replicase with a His-tag 351
- Hollow fiber type membrane reactor  
Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141
- Homologs of isopentenyl diphosphate  
One-pot syntheses of the sex pheromone homologs of a codling moth, *Laspeyresia promonella* L. 517
- Hydration water molecule  
What evidences were elucidated about photoreactive nitrile hydratase? 81
- $\beta$ -Hydroxy- $\alpha$ -amino acid  
Diversity of microbial threonine aldolases and their application 107
- 2-Hydroxyalkanoic acid  
Bacterial 2-haloacid dehalogenases: structures and reaction mechanisms 57
- 3-Hydroxybutyric acid  
Enantio-reversal in *Candida rugosa* lipase-catalyzed esterification of 3-hydroxybutyric acid 531
- Hydroxycoumarin  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Immobilisation  
A highly selective synthesis of *N*-acetylglucosamine catalyzed by immobilised  $\beta$ -galactosidase from *Bacillus circulans* 403
- Immobilization  
Enzyme sensors for environmental analysis 177  
Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325

- Hydrolysis of lactose in whey permeate by immobilized  $\beta$ -galactosidase from *Kluyveromyces fragilis* 631
- Immobilized enzymes
- Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
  - Immobilization of penicillin G acylase onto chemically grafted nylon particles 445
- Industrial performance
- Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
- Isocitrate dehydrogenase
- Role of a peroxisomal NADP-specific isocitrate dehydrogenase in the metabolism of the riboflavin overproducer *Ashbya gossypii* 335
- Isoeugenol
- Oxidation of isoeugenol and coniferyl alcohol catalyzed by laccases isolated from *Rhus vernicifera* Stokes and *Pycnoporus coccineus* 605
- Isoprenoid
- Overexpression, purification, and characterization of selenomethionyl farnesyl diphosphate synthase of *Bacillus stearothermophilus* 623
- Keto ester
- Stereocontrolled reduction of  $\alpha$ -keto esters with thermophilic actinomycete, *Streptomyces thermocyaneoviolaceus* IFO 14271 429
- $\alpha$ -Keto ester
- Asymmetric reduction of  $\alpha$ -keto esters with thermophilic actinomycete: purification and characterization of  $\alpha$ -keto ester reductase from *Streptomyces thermocyaneoviolaceus* IFO 14271 419
- Ketoprofen
- Enhancing effect of Tween-80 on lipase performance in enantioselective hydrolysis of ketoprofen ester 523
- Kex2 endoprotease
- Effect of the truncation of the C-terminal region of Kex2 endoprotease on processing of the recombinant *Rhizopus oryzae* lipase precursor in the co-expression system in yeast 233
- Kinetic mechanism
- NAD(P)<sup>+</sup>-glucose dehydrogenase from *Haloflex mediterranei*: kinetic mechanism and metal content 409
- Kinetic resolution
- Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
  - Lipase-catalyzed reaction in the packed-bed reactor with continuous extraction column to overcome a product inhibition 597
- Laccase–mediator system (LMS)
- Enzymatic oxidation of alkenes 435
- $\beta$ -Lactamase
- Unnatural amino acids in enzymes and proteins 47
- Lactobacillus leichmannii*
- Recombinant *Lactobacillus leichmannii* ribonucleoside-triphosphate reductase as biocatalyst in the preparative synthesis of 2'-deoxyribonucleoside-5'-triphosphates 215
- Lactococcus lactis*
- Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325
- Lactolysis
- Hydrolysis of lactose in whey permeate by immobilized  $\beta$ -galactosidase from *Kluyveromyces fragilis* 631
- $\delta$ -Lactone
- Computer-aided molecular modeling of the enantioselectivity of *Pseudomonas cepacia* lipase toward  $\gamma$ - and  $\delta$ -lactones 223
- $\gamma$ -Lactone
- Computer-aided molecular modeling of the enantioselectivity of *Pseudomonas cepacia* lipase toward  $\gamma$ - and  $\delta$ -lactones 223
- Lantibiotic
- Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325
- Lid conformation
- Influence of lid conformation on lipase enantioselectivity 385
- Lipase
- Enzymatic synthesis of structured lipids 129
  - Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141
  - Synthesis of lauroyl saccharides through lipase-catalyzed condensation in microaqueous water-miscible solvents 241
  - Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
  - Influence of lid conformation on lipase enantioselectivity 385
  - Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
  - Enzymatic synthesis of the acrylic esters: a comparative study 551
  - Lipase-catalyzed reaction in the packed-bed reactor with continuous extraction column to overcome a product inhibition 597
- Lipase PS-C
- Mild and efficient enzymatic oximolysis by supported *Pseudomonas cepacia* lipases 535
- Lipase PS-D
- Mild and efficient enzymatic oximolysis by supported *Pseudomonas cepacia* lipases 535
- MAO inhibitor
- Xanthone derivatives as inhibitors for monoamine oxidase 291
- MCM-48
- Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Mediated oxidation
- Enzymatic oxidation of alkenes 435
- Medium chain zinc-containing dehydrogenases
- NAD(P)<sup>+</sup>-glucose dehydrogenase from *Haloflex mediterranei*: kinetic mechanism and metal content 409
- mEH
- The anomalous course of the microsomal transformation of the *exo*-2,3-epoxides of norbornene and norbornadiene. The possible involvement of a general acid activation during the enzymatic hydrolysis of these oxides 539
- Membrane reactor
- Regioselective oxidation of terfenadine with *Cunninghamella blakesleeana* 313

- Mesoporous molecular sieves  
 Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Metabolic engineering  
 Microbial cellular biology and current problems of metabolic engineering 5  
 Biomolecular engineering: a new frontier in biotechnology 23
- Metabolic limitation  
 Microbial cellular biology and current problems of metabolic engineering 5
- Metabolism  
 Enzymes and abzymes relationships 39
- Methane monooxygenase  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Methanol  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Methanotrophs  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- 2-Methyleneglutarate mutase (*Clostridium barkeri*)  
 Elucidation of the coenzyme binding mode of further B<sub>12</sub>-dependent enzymes using a base-off analogue of coenzyme B<sub>12</sub> 345
- Methylococcus thermophilus*  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Methylomonas rubra*  
 Role of monooxygenase reaction during assimilation of non-growth substrates by methanotrophs 305
- Methylotrophic yeasts  
 Alcohol oxidase of the methylotrophic yeasts: new findings 295
- Microaqueous solvent  
 Synthesis of lauroyl saccharides through lipase-catalyzed condensation in microaqueous water-miscible solvents 241
- Micro-crystalline  
 Regioselective oxidation of terfenadine with *Cunninghamella blakesleeana* 313
- Microsomal biotransformation  
 The anomalous course of the microsomal transformation of the *exo*-2,3-epoxides of norbornene and norbornadiene. The possible involvement of a general acid activation during the enzymatic hydrolysis of these oxides 539
- Moderate thermophile  
 Characterization of a new thermostable esterase from the moderate thermophilic bacterium *Bacillus circulans* 395
- Modified enzyme  
 Preparation and functional properties of trypsin modified by carboxymethylcellulose 483
- Modified FAD  
 Alcohol oxidase of the methylotrophic yeasts: new findings 295
- Molecular mechanism  
 Double effect of organic amines (activation and inhibition) on the phosphotriesterase 571
- Molecular modeling  
 Computer-aided molecular modeling of the enantioselectivity of *Pseudomonas cepacia* lipase toward  $\gamma$ - and  $\delta$ -lactones 223
- Monascus* spp. color mutants  
 Color mutants of *Monascus* sp. KB9 and their comparative glucoamylases on rice solid culture 263
- Mutant  
 Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- N*-acetyllactosamine  
 A highly selective synthesis of *N*-acetyllactosamine catalyzed by immobilised  $\beta$ -galactosidase from *Bacillus circulans* 403
- N*-acetyl-L-arginine ethyl ester synthesis  
*N*-acetyl-L-arginine ethyl ester synthesis catalysed by bovine trypsin in organic media 565
- NAD<sup>+</sup>-dependent  
 Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Nb-TMS4  
 Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Network rigidity  
 Microbial cellular biology and current problems of metabolic engineering 5
- Neurotransmitter  
 Enzymatic and structural aspects on glutamate decarboxylase 67
- Nicotiana tabacum*  
 Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Nisin Z  
 Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325
- Nitrile hydratase  
 What evidences were elucidated about photoreactive nitrile hydratase? 81
- Non-conventional media  
 Short chain flavour ester synthesis by a new esterase from *Bacillus licheniformis* 377
- Non-heme iron  
 What evidences were elucidated about photoreactive nitrile hydratase? 81
- Nucleophilic alcohols  
 Enantio-reversal in *Candida rugosa* lipase-catalyzed esterification of 3-hydroxybutyric acid 531
- Nucleoside phosphorylase  
 A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Nylon  
 Immobilization of penicillin G acylase onto chemically grafted nylon particles 445
- Oligosaccharides  
 Glucansucrases: molecular engineering and oligosaccharide synthesis 117
- Oligosaccharide synthesis  
 Oligosaccharide synthesis by reversed catalysis using  $\alpha$ -amylase from *Bacillus licheniformis* 273
- Operational stability  
 Eupergit<sup>®</sup> C, a carrier for immobilization of enzymes of industrial potential 157

- Optically active compound  
Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141
- Optimization  
*N*-acetyl-L-arginine ethyl ester synthesis catalysed by bovine trypsin in organic media 565
- Organic solvents  
Oligosaccharide synthesis by reversed catalysis using  $\alpha$ -amylase from *Bacillus licheniformis* 273
- Other carriers  
Eupergit® C, a carrier for immobilization of enzymes of industrial potential 157
- Overexpression  
Cloning and overexpression of a cytidine 5'-monophosphate *N*-acetylneuraminic acid synthetase from *Escherichia coli* 199
- Oxidation of alkenes  
Enzymatic oxidation of alkenes 435
- Oxime acrylate  
Enzymatic synthesis of the acrylic esters: a comparative study 551
- Oxime esters  
Mild and efficient enzymatic oximolysis by supported *Pseudomonas cepacia* lipases 535
- Oxyanion hole  
Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- Paraoxon  
Double effect of organic amines (activation and inhibition) on the phosphotriesterase 571
- (Co $\beta$ -5'-deoxyadenosin-5'-yl)-(p-cresyl)cobamide  
Elucidation of the coenzyme binding mode of further B<sub>12</sub>-dependent enzymes using a base-off analogue of coenzyme B<sub>12</sub> 345
- Penicillin acylase  
Penicillin acylase-catalyzed synthesis of ampicillin in “aqueous solution–precipitate” systems. High substrate concentration and supersaturation effect 509
- Penicillin G acylase  
Immobilization of penicillin G acylase onto chemically grafted nylon particles 445
- Peroxisome  
Role of a peroxisomal NADP-specific isocitrate dehydrogenase in the metabolism of the riboflavin overproducer *Ashbya gossypii* 335
- Phosphate sensor  
Enzyme sensors for environmental analysis 177
- Phosphotriesterase  
Double effect of organic amines (activation and inhibition) on the phosphotriesterase 571
- Photo-crosslinked resin gel beads  
Biosynthetic production of nisin Z by immobilized *Lactococcus lactis* IO-1 325
- Polysaccharides  
Glucansucrases: molecular engineering and oligosaccharide synthesis 117
- Post-translational modification  
What evidences were elucidated about photoreactive nitrile hydratase? 81
- Pravastatin  
Bioconversion of compactin to pravastatin by *Actinomadura* sp. ATCC 55678 151
- Prenyltransferase  
One-pot syntheses of the sex pheromone homologs of a codling moth, *Laspeyresia promonella* L. 517  
Overexpression, purification, and characterization of selenomethionyl farnesyl diphosphate synthase of *Bacillus stearothermophilus* 623
- Preparation  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Product inhibition  
Lipase-catalyzed reaction in the packed-bed reactor with continuous extraction column to overcome a product inhibition 597
- Proline-introduced  
Thermodynamic analysis of *Bacillus cereus* oligo-1,6-glucosidase and its cumulatively proline-introduced mutant proteins by differential scanning calorimetry 257
- Protein engineering  
Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- Proteomics  
Biomolecular engineering: a new frontier in biotechnology 23
- Pseudomonas cepacia* lipase  
Computer-aided molecular modeling of the enantioselectivity of *Pseudomonas cepacia* lipase toward  $\gamma$ - and  $\delta$ -lactones 223
- Purine-2'-deoxyribonucleoside  
A novel enzymatic method for the production of purine-2'-deoxyribonucleosides 207
- Q $\beta$  phage  
Purification and characterization of Q $\beta$  replicase with a His-tag 351
- Reaction mechanism  
The anomalous course of the microsomal transformation of the *exo*-2,3-epoxides of norbornene and norbornadiene. The possible involvement of a general acid activation during the enzymatic hydrolysis of these oxides 539
- Recyclability  
Mild and efficient enzymatic oximolysis by supported *Pseudomonas cepacia* lipases 535
- Regioselection  
Use of *Mucor miehei* lipase in the preparation of long chain 3-*O*-acylcatechins 577
- Reversed micelles  
Enzymatic activity of an extremely halophilic phosphatase from the Archaea *Halobacterium salinarum* in reversed micelles 555
- Reverse hydrolysis  
Heterooligosaccharide synthesis catalyzed by  $\alpha$ -glucosidase from *Bacillus stearothermophilus* 617
- Reversible inhibitor  
Xanthone derivatives as inhibitors for monoamine oxidase 291

- Rhizopus oryzae* lipase: Processing  
Effect of the truncation of the C-terminal region of Kex2 endoprotease on processing of the recombinant *Rhizopus oryzae* lipase precursor in the co-expression system in yeast 233
- Rhus* laccase  
Oxidation of isoeugenol and coniferyl alcohol catalyzed by laccases isolated from *Rhus vernicifera* Stokes and *Pycnoporus coccineus* 605
- Ribonucleotide reductase  
Recombinant *Lactobacillus leichmannii* ribonucleoside-triphosphate reductase as biocatalyst in the preparative synthesis of 2'-deoxyribonucleoside-5'-triphosphates 215
- RNA polymerase  
Purification and characterization of Q $\beta$  replicase with a His-tag 351
- Saccharide–fatty acid ester  
Synthesis of lauroyl saccharides through lipase-catalyzed condensation in microaqueous water-miscible solvents 241
- Sanzyme  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- SBA-15  
Cytochrome *c* immobilization into mesoporous molecular sieves 453
- Scopoletin  
Biotransformation of hydroxycoumarins by the cultured cells of *Nicotiana tabacum* 477
- Secretion  
Enzymatic resolution of diltiazem intermediate by *Serratia marcescens* lipase: molecular mechanism of lipase secretion and its industrial application 141
- Selenomethionyl recombinant enzyme  
Overexpression, purification, and characterization of selenomethionyl farnesyl diphosphate synthase of *Bacillus stearothermophilus* 623
- Simulation  
Eupergit<sup>®</sup> C, a carrier for immobilization of enzymes of industrial potential 157
- Site-directed mutagenesis  
Identification of active site carboxylic residues in *Trichoderma reesei* endoglucanase Cel12A by site-directed mutagenesis 249
- Solvent effect  
Mild and efficient enzymatic oximolysis by supported *Pseudomonas cepacia* lipases 535
- Starch  
Preparation and characterization of amyloglucosidase adsorbed on activated charcoal 471
- Stereocontrolled reduction  
Stereocontrolled reduction of  $\alpha$ -keto esters with thermophilic actinomycete, *Streptomyces thermocyaneoviolaceus* IFO 14271 429
- Stereoselective reduction  
Asymmetric reduction of  $\alpha$ -keto esters with thermophilic actinomycete: purification and characterization of  $\alpha$ -keto ester reductase from *Streptomyces thermocyaneoviolaceus* IFO 14271 419
- Stereoselective synthesis  
Diversity of microbial threonine aldolases and their application 107
- Streptomyces  
Asymmetric reduction of  $\alpha$ -keto esters with thermophilic actinomycete: purification and characterization of  $\alpha$ -keto ester reductase from *Streptomyces thermocyaneoviolaceus* IFO 14271 419
- Streptomyces virginiae*  
Determining a novel NAD<sup>+</sup>-dependent amine dehydrogenase with a broad substrate range from *Streptomyces virginiae* IFO 12827: purification and characterization 281
- Structure and mechanism  
The structure and the mechanism of action of coenzyme B<sub>12</sub>-dependent diol dehydratases 87
- Structure–function organization  
Alcohol oxidase of the methylotrophic yeasts: new findings 295
- Substituent effects  
Lipase-catalyzed enantioselective acetylation of 2-acyloxypropane-1,3-diols. Influence of the acyl moiety on the selectivity 583
- Substrate specificity  
One-pot syntheses of the sex pheromone homologs of a codling moth, *Laspeyresia promonella* L. 517
- Superposition  
Lipase engineering database Understanding and exploiting sequence–structure–function relationships 491
- Supersaturation  
Penicillin acylase-catalyzed synthesis of ampicillin in “aqueous solution–precipitate” systems. High substrate concentration and supersaturation effect 509
- Terfenadine  
Regioselective oxidation of terfenadine with *Cunninghamella blakesleeana* 313
- tert*-alcohol  
Biocatalytic resolution of sterically hindered alcohols, carboxylic acids and esters containing fully substituted chiral centers by hydrolytic enzymes 357
- Therapeutic peptides  
Biomolecular engineering: a new frontier in biotechnology 23
- Thermophile  
Stereocontrolled reduction of  $\alpha$ -keto esters with thermophilic actinomycete, *Streptomyces thermocyaneoviolaceus* IFO 14271 429
- Thermophilic actinomycete  
Asymmetric reduction of  $\alpha$ -keto esters with thermophilic actinomycete: purification and characterization of  $\alpha$ -keto ester reductase from *Streptomyces thermocyaneoviolaceus* IFO 14271 419
- Thermostable  
Characterization of a new thermostable esterase from the moderate thermophilic bacterium *Bacillus circulans* 395
- Thermostable farnesyl diphosphate synthase  
One-pot syntheses of the sex pheromone homologs of a codling moth, *Laspeyresia promonella* L. 517
- Thiol/disulfide interchange  
Alteration in arginine activation of *N*-acetylglutamate synthetase in vitro by disulfide or thiol compounds 191

- Threonine aldolase  
Diversity of microbial threonine aldolases and their application 107
- T4 lysozyme  
Unnatural amino acids in enzymes and proteins 47
- Transesterification  
Enzymatic synthesis of structured lipids 129  
Enzymatic synthesis of the acrylic esters: a comparative study 551
- Transmembrane domain  
Effect of the truncation of the C-terminal region of Kex2 endoprotease on processing of the recombinant *Rhizopus oryzae* lipase precursor in the co-expression system in yeast 233
- Triacylglycerols  
Enzymatic synthesis of structured lipids 129
- Trichoderma reesei*  
Identification of active site carboxylic residues in *Trichoderma reesei* endoglucanase Cel12A by site-directed mutagenesis 249
- Trypsin  
Preparation and functional properties of trypsin modified by carboxymethylcellulose 483
- Tween-80  
Enhancing effect of Tween-80 on lipase performance in enantioselective hydrolysis of ketoprofen ester 523
- Unnatural amino acids  
Unnatural amino acids in enzymes and proteins 47
- Urea synthesis  
Alteration in arginine activation of *N*-acetylglutamate synthetase in vitro by disulfide or thiol compounds 191
- Vaccines  
Biomolecular engineering: a new frontier in biotechnology 23
- Vancomycin  
Chloroperoxidase-catalyzed chlorination of didechloroagluconamycin and vancomycin 545
- Whey permeate  
Hydrolysis of lactose in whey permeate by immobilized  $\beta$ -galactosidase from *Kluyveromyces fragilis* 631
- Xanthonones  
Xanthone derivatives as inhibitors for monoamine oxidase 291
- Yeast  
Effect of the truncation of the C-terminal region of Kex2 endoprotease on processing of the recombinant *Rhizopus oryzae* lipase precursor in the co-expression system in yeast 233
- Yeast growth  
Unnatural amino acids in enzymes and proteins 47
- Yeast lactase  
Hydrolysis of lactose in whey permeate by immobilized  $\beta$ -galactosidase from *Kluyveromyces fragilis* 631
