

Subject Index

Acylation

Immobilization of lipase on a new inorganic ceramics support, toyonite, and the reactivity and enantioselectivity of the immobilized lipase 269

N-Acyldiazine

Lipase catalysed synthesis of diacyl hydrazines: an indirect method for kinetic resolution of chiral acids 183

Alcohol oxidation

Chloroperoxidase-catalysed oxidation of alcohols to aldehydes 163

Alcoholysis

Kinetic resolution of a diltiazem intermediate by lipase-catalyzed enantioselective alcoholysis 251

D-Amino acid oxidase

Chemical modification of tryptophan residues of D-amino acid oxidase from *Rhodotorula gracilis* 65

1-Amino-2-indanol

Chemoenzymatic synthesis of (1*S*,2*R*)-1-amino-2-indanol, a key intermediate of HIV protease inhibitor, indinavir 157

Apoenzyme reactivation

Properties of a cobalt-reactivated form of yeast alcohol dehydrogenase 283

Bacterial hemoglobin

Vitreoscilla hemoglobin enhances the first step in 2,4-dinitrotoluene degradation in vitro and at low aeration in vivo 75

Baeyer–Villiger oxidation

Microbiological transformations 44. Optimisation of a new Baeyer–Villigerase activity: application to the stereospecific oxidation of 3-phenylcyclobutanone 209

Beauveria spp.

The biocatalytic reactions of *Beauveria* spp. 1

Binding

Molecular (or bio-) imprinting of bovine serum albumin 97

Biocatalysis

Customizing lipases for biocatalysis: a survey of chemical, physical and molecular biological approaches 113

Biocatalytic reactions

The biocatalytic reactions of *Beauveria* spp. 1

Bioreactors

Modulation of immobilized enzyme activity by altering the hydrophobicity of nylon-grafted membranes Part 1. Isothermal conditions 219

Biotransformation

Chemoenzymatic synthesis of (1*S*,2*R*)-1-amino-2-indanol, a key intermediate of HIV protease inhibitor, indinavir 157

Immobilization of lipase on a new inorganic ceramics support, toyonite, and the reactivity and enantioselectivity of the immobilized lipase 269

Bjerkandera adusta

Reaction of manganese-dependent peroxidase from *Bjerkandera adusta* in aqueous organic media 173

Bovine serum albumin

Molecular (or bio-) imprinting of bovine serum albumin 97

γ -Butyrolactone

Microbiological transformations 44. Optimisation of a new Baeyer–Villigerase activity: application to the stereospecific oxidation of 3-phenylcyclobutanone 209

Candida antarctica lipase

Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49

Lipase catalyzed reactions of aliphatic and arylaliphatic carbonic acid esters 201

Carbon tetrachloride

Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275

Catalysis

Molecular (or bio-) imprinting of bovine serum albumin 97

Catalytic residue

Arg-94 is crucial to the catalysis of 3-isopropylmalate dehydrogenase from *Thermus thermophilus* HB8 149

Cefazolin

Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275

Chiral synthesis

Artificial substrates for undecaprenyl diphosphate synthase from *Micrococcus luteus* B-P 26 33

Chloroperoxidase

Epoxidation of indene by chloroperoxidase 107

Chloroperoxidase-catalysed oxidation of alcohols to aldehydes 163

Conformational memory

Molecular (or bio-) imprinting of bovine serum albumin 97

Cytochrome *c*

Modified cytochrome *c*/H₂O₂ system: spectroscopic EPR investigation of the biocatalytic behaviour 39

N,N'-Diacylhydrazine

Lipase catalysed synthesis of diacyl hydrazines: an indirect method for kinetic resolution of chiral acids 183

- Dibenzyl carbonate
Lipase catalyzed reactions of aliphatic and arylaliphatic carbonic acid esters 201
- Dibutyl carbonate
Lipase catalyzed reactions of aliphatic and arylaliphatic carbonic acid esters 201
- Differential scanning calorimetry
Investigation of frozen protease-catalyzed peptide synthesis systems — a differential scanning calorimetry and electron microscopy approach 91
- Diltiazem
Kinetic resolution of a diltiazem intermediate by lipase-catalyzed enantioselective alcoholysis 251
- 2,4-Dinitrotoluene degradation
Vitreoscilla hemoglobin enhances the first step in 2,4-dinitrotoluene degradation in vitro and at low aeration in vivo 75
- 1-Dodecanol
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- Dodecyl dodecanoate
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- Electron microscopy
Investigation of frozen protease-catalyzed peptide synthesis systems — a differential scanning calorimetry and electron microscopy approach 91
- Enantioselective hydrolysis
Chemoenzymatic synthesis of (1*S*,2*R*)-1-amino-2-indanol, a key intermediate of HIV protease inhibitor, indinavir 157
Enzymatic resolution of 2-phenyl-1-propanol by enantioselective hydrolysis of its ester having a bulky group in an acyl moiety 245
- Enantioselective reduction
Chemoenzymatic synthesis of (1*S*,2*R*)-1-amino-2-indanol, a key intermediate of HIV protease inhibitor, indinavir 157
- Enantioselectivity
Enzymatic resolution of 2-phenyl-1-propanol by enantioselective hydrolysis of its ester having a bulky group in an acyl moiety 245
- Enzymatic esterification
Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49
- Enzymatic resolution
Enzymatic resolution of 2-phenyl-1-propanol by enantioselective hydrolysis of its ester having a bulky group in an acyl moiety 245
- Enzyme modification
Chemical modification of tryptophan residues of D-amino acid oxidase from *Rhodotorula gracilis* 65
- Epoxidation
Epoxidation of indene by chloroperoxidase 107
- EPR
Modified cytochrome *c*/H₂O₂ system: spectroscopic EPR investigation of the biocatalytic behaviour 39
- Equilibrium constants
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- Essential residues
Chemical modification of tryptophan residues of D-amino acid oxidase from *Rhodotorula gracilis* 65
- Ethyl acetate
Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275
- Fatty acids
A simple process for increasing the specific activity of porcine pancreatic lipase by supercritical carbon dioxide treatment 57
- Fluorescence
A simple process for increasing the specific activity of porcine pancreatic lipase by supercritical carbon dioxide treatment 57
- Frozen aqueous system
Investigation of frozen protease-catalyzed peptide synthesis systems — a differential scanning calorimetry and electron microscopy approach 91
- β-Galactosidase
Modulation of immobilized enzyme activity by altering the hydrophobicity of nylon-grafted membranes Part 1. Isothermal conditions 219
- Genetic engineering
Customizing lipases for biocatalysis: a survey of chemical, physical and molecular biological approaches 113
- Glycerol
Synthesis of optically active α-monobenzoyl glycerol by asymmetric transesterification of glycerol 193
- Grafted membranes
Modulation of immobilized enzyme activity by altering the hydrophobicity of nylon-grafted membranes Part 1. Isothermal conditions 219
- Hemoprotein
Modified cytochrome *c*/H₂O₂ system: spectroscopic EPR investigation of the biocatalytic behaviour 39
- Homologs of isopentenyl diphosphate
Artificial substrates for undecaprenyl diphosphate synthase from *Micrococcus luteus* B-P 26 33
- Hydrazide
Lipase catalysed synthesis of diacyl hydrazines: an indirect method for kinetic resolution of chiral acids 183
- Ibuprofen
Lipase catalysed synthesis of diacyl hydrazines: an indirect method for kinetic resolution of chiral acids 183
- Immobilization
Catalytic activity of Teflon particle-immobilized protease in aqueous solution 259
Immobilization of lipase on a new inorganic ceramics support, toyonite, and the reactivity and enantioselectivity of the immobilized lipase 269
- Immobilized enzymes
Modulation of immobilized enzyme activity by altering the hydrophobicity of nylon-grafted membranes Part 1. Isothermal conditions 219
- Indene
Epoxidation of indene by chloroperoxidase 107

- Inorganic support
Immobilization of lipase on a new inorganic ceramics support, toyonite, and the reactivity and enantioselectivity of the immobilized lipase 269
- 3-Isopropylmalate dehydrogenase
Arg-94 is crucial to the catalysis of 3-isopropylmalate dehydrogenase from *Thermus thermophilus* HB8 149
- Ketoprofen
Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49
- Laccase
Polyoxometalates as promoters of laccase-assisted reactions 293
- Lactose hydrolysis
Modulation of immobilized enzyme activity by altering the hydrophobicity of nylon-grafted membranes Part 1. Isothermal conditions 219
- Lignin-degrading enzyme
Reaction of manganese-dependent peroxidase from *Bjerkandera adusta* in aqueous organic media 173
- Lipase
A simple process for increasing the specific activity of porcine pancreatic lipase by supercritical carbon dioxide treatment 57
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
Lipase catalysed synthesis of diacyl hydrazines: an indirect method for kinetic resolution of chiral acids 183
Synthesis of optically active α -monobenzoyl glycerol by asymmetric transesterification of glycerol 193
Immobilization of lipase on a new inorganic ceramics support, toyonite, and the reactivity and enantioselectivity of the immobilized lipase 269
- Lipases
Customizing lipases for biocatalysis: a survey of chemical, physical and molecular biological approaches 113
Kinetic resolution of a diltiazem intermediate by lipase-catalyzed enantioselective alcoholysis 251
- Manganese-dependent peroxidase
Reaction of manganese-dependent peroxidase from *Bjerkandera adusta* in aqueous organic media 173
- (–)-Menthol
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- (–)-Menthyl dodecanoate
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- Microbiological asymmetry
Microbiological transformations 44. Optimisation of a new Baeyer–Villigerase activity: application to the stereospecific oxidation of 3-phenylcyclobutanone 209
- Modified Y-ADH
Properties of a cobalt-reactivated form of yeast alcohol dehydrogenase 283
- Molecular imprinting
Molecular (or bio-) imprinting of bovine serum albumin 97
- α -Monobenzoyl glycerol
Synthesis of optically active α -monobenzoyl glycerol by asymmetric transesterification of glycerol 193
- Non-aqueous
Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49
- Novozym 435
Lipase catalyzed reactions of aliphatic and arylaliphatic carbonic acid esters 201
- Optically active
Synthesis of optically active α -monobenzoyl glycerol by asymmetric transesterification of glycerol 193
- Organic solvents
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
Molecular (or bio-) imprinting of bovine serum albumin 97
Reaction of manganese-dependent peroxidase from *Bjerkandera adusta* in aqueous organic media 173
Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275
- Partition coefficients
Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83
- Penicillin acylase
Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275
- Peptide synthesis
Investigation of frozen protease-catalyzed peptide synthesis systems — a differential scanning calorimetry and electron microscopy approach 91
Catalytic activity of Teflon particle-immobilized protease in aqueous solution 259
- Peroxidase activity
Modified cytochrome *c*/H₂O₂ system: spectroscopic EPR investigation of the biocatalytic behaviour 39
- 2-Phenyl-1-propanol
Enzymatic resolution of 2-phenyl-1-propanol by enantioselective hydrolysis of its ester having a bulky group in an acyl moiety 245
- Polyoxometalates
Polyoxometalates as promoters of laccase-assisted reactions 293
- Porcine liver acetone powder
Kinetic resolution of a diltiazem intermediate by lipase-catalyzed enantioselective alcoholysis 251
- Prenyltransferase
Artificial substrates for undecaprenyl diphosphate synthase from *Micrococcus luteus* B-P 26 33
- Preparative biotransformations
The biocatalytic reactions of *Beauveria* spp. 1
- Promoters
Polyoxometalates as promoters of laccase-assisted reactions 293

Protease

Investigation of frozen protease-catalyzed peptide synthesis systems — a differential scanning calorimetry and electron microscopy approach 91

Catalytic activity of Teflon particle-immobilized protease in aqueous solution 259

Protein reactive groups

A simple process for increasing the specific activity of porcine pancreatic lipase by supercritical carbon dioxide treatment 57

Proteins

Molecular (or bio-) imprinting of bovine serum albumin 97

Radical oxidation

Reaction of manganese-dependent peroxidase from *Bjerkandera adusta* in aqueous organic media 173

Resolution

Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49

Lipase catalyzed reactions of aliphatic and arylaliphatic carbonic acid esters 201

Kinetic resolution of a diltiazem intermediate by lipase-catalyzed enantioselective alcoholysis 251

Rhizopus oryzae

Chemoenzymatic synthesis of (1*S*,2*R*)-1-amino-2-indanol, a key intermediate of HIV protease inhibitor, indinavir 157

Rhodotorula gracilis

Chemical modification of tryptophan residues of D-amino acid oxidase from *Rhodotorula gracilis* 65

Screening

Synthesis of optically active α -monobenzoyl glycerol by asymmetric transesterification of glycerol 193

Site-directed mutagenesis

Arg-94 is crucial to the catalysis of 3-isopropylmalate dehydrogenase from *Thermus thermophilus* HB8 149

Solubility

Thermodynamics of the lipase-catalyzed transesterification of (–)-menthol and dodecyl dodecanoate in organic solvents 83

Solvent

Enantioselective esterification of racemic ketoprofen in non-aqueous solvent under reduced pressure 49

Spin trapping

Modified cytochrome *c*/H₂O₂ system: spectroscopic EPR investigation of the biocatalytic behaviour 39

Substrate specificity

Artificial substrates for undecaprenyl diphosphate synthase from *Micrococcus luteus* B-P 26 33

Supercritical carbon dioxide

A simple process for increasing the specific activity of porcine pancreatic lipase by supercritical carbon dioxide treatment 57

Teflon

Catalytic activity of Teflon particle-immobilized protease in aqueous solution 259

Thermus thermophilus HB-8

Arg-94 is crucial to the catalysis of 3-isopropylmalate dehydrogenase from *Thermus thermophilus* HB8 149

Transesterification

Synthesis of optically active α -monobenzoyl glycerol by asymmetric transesterification of glycerol 193

Tryptophan

Chemical modification of tryptophan residues of D-amino acid oxidase from *Rhodotorula gracilis* 65

Two-phase system

Chloroperoxidase-catalysed oxidation of alcohols to aldehydes 163

Penicillin acylase-catalyzed synthesis of cefazolin in water-solvent mixtures: enhancement effect of ethyl acetate and carbon tetrachloride on the synthetic yield 275

Undecaprenyl diphosphate synthase

Artificial substrates for undecaprenyl diphosphate synthase from *Micrococcus luteus* B-P 26 33

Vitreoscilla hemoglobin

Vitreoscilla hemoglobin enhances the first step in 2,4-dinitrotoluene degradation in vitro and at low aeration in vivo 75

Whole cells

Microbiological transformations 44. Optimisation of a new Baeyer–Villigerase activity: application to the stereospecific oxidation of 3-phenylcyclobutanone 209

Zinc–cobalt substitution

Properties of a cobalt-reactivated form of yeast alcohol dehydrogenase 283
