

Subject Index

- Acidic D-amino acid oxidase
Microbial oxidases of acidic D-amino acids 93
- N-Acylamino acid racemase
Discovery and application of a new enzyme *N*-acylamino acid racemase 3
- N-acyl-D-amino acid
Comparative biochemistry of bacterial *N*-acyl-D-amino acid amidohydrolase 15
- Alanine racemase
Structure and function of psychrophilic alanine racemase 27
Purification and characterization of alanine racemase from hepatopancreas of black-tiger prawn, *Penaeus monodon* 137
Stereochemistry of the hydrogen abstraction from pyridoxamine phosphate catalyzed by alanine racemase of *Bacillus stearothermophilus* 145
- Alcaligenes*
Comparative biochemistry of bacterial *N*-acyl-D-amino acid amidohydrolase 15
- Amidohydrolase
Comparative biochemistry of bacterial *N*-acyl-D-amino acid amidohydrolase 15
- Amino acid
Enantiomeric resolution of amino acids by thin-layer chromatography 105
- Amphibians
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- Analysis
Enantiomeric resolution of amino acids by thin-layer chromatography 105
- Astrocytes
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- Avians
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- Bacillus psychrosaccharolyticus*
Structure and function of psychrophilic alanine racemase 27
- Bacillus sphaericus*
Cloning, sequencing, and expression of the *meso*-diaminopimelate dehydrogenase gene from *Bacillus sphaericus* 85
- Brain
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- Catalytic mechanism
Porcine kidney D-amino acid oxidase: the three-dimensional structure and its catalytic mechanism based on the enzyme–substrate complex model 43
- Characterization
Characterization of D-threonine dehydrogenase homologues of *Escherichia coli*, YbbQ and YhaE 77
- Chiral resolution
Discovery and application of a new enzyme *N*-acylamino acid racemase 3
- Cyclic imide
Cyclic ureide and imide metabolism in microorganisms producing a D-hydantoinase useful for D-amino acid production 61
- Cyclic ureide
Cyclic ureide and imide metabolism in microorganisms producing a D-hydantoinase useful for D-amino acid production 61
- D-Alanine
Purification and characterization of alanine racemase from hepatopancreas of black-tiger prawn, *Penaeus monodon* 137
- D-Amino acid
Discovery and application of a new enzyme *N*-acylamino acid racemase 3
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
D-Amino acid contents of mitochondria and some purple bacteria 109
- D-Amino acid oxidase
Porcine kidney D-amino acid oxidase: the three-dimensional structure and its catalytic mechanism based on the enzyme–substrate complex model 43
Remarkable decrease in D-amino acid oxidase activity in the kidney of both prone and resistant strains of senescence-accelerated mouse 115
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- D-Aminoacylase
Discovery and application of a new enzyme *N*-acylamino acid racemase 3
- D-Aspartate
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- D-Aspartate oxidase
Microbial oxidases of acidic D-amino acids 93

- D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- D-Aspartic acid octamer
Isolation of microorganisms which utilize acidic D-amino acid oligomers 53
- D-Carbamoylase
Separative preparation of the four stereoisomers of β -methylphenylalanine with *N*-carbamoyl amino acid amidohydro-lases 71
- Delftia acidovorans*
Isolation of microorganisms which utilize acidic D-amino acid oligomers 53
- D-Glutamate
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- D-Glutamate oxidase
Microbial oxidases of acidic D-amino acids 93
- D-Glutamic acid octamer
Isolation of microorganisms which utilize acidic D-amino acid oligomers 53
- Diaminopimelate dehydrogenase
Cloning, sequencing, and expression of the *meso*-diaminopime-late dehydrogenase gene from *Bacillus sphaericus* 85
- α,β -Diastereomeric amino acid
Separative preparation of the four stereoisomers of β -methylphenylalanine with *N*-carbamoyl amino acid amidohydro-lases 71
- Distribution
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- D-Serine
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- Enantiomer
Enantiomeric resolution of amino acids by thin-layer chromato-graphy 105
- Enzyme characterization
Comparative biochemistry of bacterial *N*-acyl-D-amino acid amidohydro-lase 15
- Escherichia coli*
Characterization of D-threonine dehydrogenase homologues of *Escherichia coli*, YbbQ and YhaE 77
D-Amino acid contents of mitochondria and some purple bac-teria 109
- Fishes
D-Aspartate oxidase and free acidic D-amino acids in lower vertebrates 121
- Flavoprotein
Microbial oxidases of acidic D-amino acids 93
- Half-amidase
Cyclic ureide and imide metabolism in microorganisms produ-cing a D-hydantoinase useful for D-amino acid production 61
- Hydantoinase
Cyclic ureide and imide metabolism in microorganisms producing a D-hydantoinase useful for D-amino acid produc-tion 61
- 3-Hydroxy acid dehydrogenase superfamily
Characterization of D-threonine dehydrogenase homologues of *Escherichia coli*, YbbQ and YhaE 77
- Imidase
Cyclic ureide and imide metabolism in microorganisms producing a D-hydantoinase useful for D-amino acid produc-tion 61
- Klebsiella ornithinolytica*
Isolation of microorganisms which utilize acidic D-amino acid oligomers 53
- L-Carbamoylase
Separative preparation of the four stereoisomers of β -methylphenylalanine with *N*-carbamoyl amino acid amidohydro-lases 71
- Manganese-dependent
Stereoselective and manganese-dependent sulfation and urinary excretion of D-form and L-form *meta*-tyrosine *O*-sulfate by Sprague-Dawley rats 131
- β -Methylphenylalanine
Separative preparation of the four stereoisomers of β -methylphenylalanine with *N*-carbamoyl amino acid amidohydro-lases 71
- Michaelis-complex model
Porcine kidney D-amino acid oxidase: the three-dimensional structure and its catalytic mechanism based on the enzyme-substrate complex model 43
- Mitochondria
D-Amino acid contents of mitochondria and some purple bac-teria 109
- NMDA receptor
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- Nucleotide sequence
Cloning, sequencing, and expression of the *meso*-diaminopime-late dehydrogenase gene from *Bacillus sphaericus* 85
- Osmoregulation
Purification and characterization of alanine racemase from hepatopancreas of black-tiger prawn, *Penaeus monodon* 137
- Paracoccus denitrificans*
D-Amino acid contents of mitochondria and some purple bac-teria 109
- Point mutation
Remarkable decrease in D-amino acid oxidase activity in the kidney of both prone and resistant strains of senescence-accel-erated mouse 115
- Prawn
Purification and characterization of alanine racemase from hepatopancreas of black-tiger prawn, *Penaeus monodon* 137

- Primary structure
Comparative biochemistry of bacterial *N*-acyl-D-amino acid amidohydrolase 15
Cloning, sequencing, and expression of the *meso*-diaminopimelate dehydrogenase gene from *Bacillus sphaericus* 85
- α -Proteobacteria
Isolation of microorganisms which utilize acidic D-amino acid oligomers 53
- Pseudomonas aeruginosa*
D-Amino acid contents of mitochondria and some purple bacteria 109
- Pseudomonas fluorescens*
Structure and function of psychrophilic alanine racemase 27
- Psychrophilicity
Structure and function of psychrophilic alanine racemase 27
- Pyridoxal 5'-phosphate
Purification and characterization of alanine racemase from hepatopancreas of black-tiger prawn, *Penaeus monodon* 137
Stereochemistry of the hydrogen abstraction from pyridoxamine phosphate catalyzed by alanine racemase of *Bacillus stearothermophilus* 145
- Rat
Stereoselective and manganese-dependent sulfation and urinary excretion of D-form and L-form *meta*-tyrosine *O*-sulfate by Sprague–Dawley rats 131
- Reductive half-reaction
Porcine kidney D-amino acid oxidase: the three-dimensional structure and its catalytic mechanism based on the enzyme–substrate complex model 43
- Resolution
Enantiomeric resolution of amino acids by thin-layer chromatography 105
- Senescence-accelerated mouse
Remarkable decrease in D-amino acid oxidase activity in the kidney of both prone and resistant strains of senescence-accelerated mouse 115
- Stereochemistry
Stereochemistry of the hydrogen abstraction from pyridoxamine phosphate catalyzed by alanine racemase of *Bacillus stearothermophilus* 145
- Stereoselective
Stereoselective and manganese-dependent sulfation and urinary excretion of D-form and L-form *meta*-tyrosine *O*-sulfate by Sprague–Dawley rats 131
- Sulfation
Stereoselective and manganese-dependent sulfation and urinary excretion of D-form and L-form *meta*-tyrosine *O*-sulfate by Sprague–Dawley rats 131
- Symbiosis
D-Amino acid contents of mitochondria and some purple bacteria 109
- Thermolability
Structure and function of psychrophilic alanine racemase 27
- Thin-layer chromatography
Enantiomeric resolution of amino acids by thin-layer chromatography 105
- Three-dimensional structure
Porcine kidney D-amino acid oxidase: the three-dimensional structure and its catalytic mechanism based on the enzyme–substrate complex model 43
- Transamination
Stereochemistry of the hydrogen abstraction from pyridoxamine phosphate catalyzed by alanine racemase of *Bacillus stearothermophilus* 145
- Tyrosine *O*-sulfate
Stereoselective and manganese-dependent sulfation and urinary excretion of D-form and L-form *meta*-tyrosine *O*-sulfate by Sprague–Dawley rats 131
- Vertebrate
Distribution of D-amino-acid oxidase and D-serine in vertebrate brains 37
- YbbQ
Characterization of D-threonine dehydrogenase homologues of *Escherichia coli*, YbbQ and YhaE 77
- Yeast (*Cryptococcus humicola* and *Candida boidinii*)
Microbial oxidases of acidic D-amino acids 93
- YhaE
Characterization of D-threonine dehydrogenase homologues of *Escherichia coli*, YbbQ and YhaE 77
