

## Subject Index

- Activation  
Characterization of polymer–enzyme complex as a novel biocatalyst for nonaqueous enzymology 79
- Activation energy  
Kinetics of laccase-catalyzed oxidative polymerization of catechol 61
- Activity-growth  
Optimization of the organic solvent-stable asymmetric hydrogen transfer system of *Rhodococcus ruber* DSM 44541: an activity-growth study 1
- Acylation  
Preparation and properties of lipase immobilized on MCM-36 support 119
- Amidase  
Biocatalytic asymmetric hydrolysis of ( $\pm$ )- $\beta$ -hydroxy nitriles by *Rhodococcus* sp. CGMCC 0497 105
- Amino acid oxidation  
Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Anti-lipase agents  
Human digestive and metabolic lipases—a brief review 369
- Anti-obesity agents  
Human digestive and metabolic lipases—a brief review 369
- Aquifex aeolicus*  
A cycloamylose-forming hyperthermostable 4- $\alpha$ -glucanotransferase of *Aquifex aeolicus* expressed in *Escherichia coli* 45  
Characterization of a hyperthermostable glycogen phosphorylase from *Aquifex aeolicus* expressed in *Escherichia coli* 173
- Asymmetric synthesis  
(*R*)-Oxynitrilase-catalyzed synthesis of (*R*)-2-trimethylsilyl-2-hydroxyl-ethylcyanide 7
- Atherosclerosis  
Lipolytic enzymes in atherosclerosis as the potential target of inhibitors 363
- Bacillus*  
Use of methylumbeliferyl-derivative substrates for lipase activity characterization 339
- Baeyer–Villiger oxidations  
Monooxygenase-catalyzed Baeyer–Villiger oxidations: CHMO versus CPMO 211
- Biocatalysis  
Bio-imprinting of lipases with fatty acids 193  
Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Application of lipase catalysis in organic solvents for selective protection–deprotection of bioactive compounds 271
- Bioconversion  
Stereoselective oxidoreductase type bioconversions of exogenous substrates by cell suspension cultures of bryophytes 71
- Bio-imprinting  
Bio-imprinting of lipases with fatty acids 193
- Biotransformation  
Biotransformation of cinobufagin by cell suspension cultures of *Catharanthus roseus* and *Platycodon grandiflorum* 89  
Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Biotypes  
Lipase inhibitors for the treatment of acne 377
- Bryophytes  
Stereoselective oxidoreductase type bioconversions of exogenous substrates by cell suspension cultures of bryophytes 71
- Bufadienolide  
Biotransformation of cinobufagin by cell suspension cultures of *Catharanthus roseus* and *Platycodon grandiflorum* 89
- Burkholderia glumae*  
Role of the calcium ion and the disulfide bond in the *Burkholderia glumae* lipase 329
- C3 chiral synthon  
Unexpected enantioselectivity and activity of penicillin acylase in the resolution of methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate 55
- Calcium  
Role of the calcium ion and the disulfide bond in the *Burkholderia glumae* lipase 329
- Candida*  
Microbial lipases as virulence factors 347
- Candida albicans*  
Phospholipases as a factor of pathogenicity in microorganisms 357
- Candida cylindracea* lipase  
Studies on the enzymatic kinetic resolution of  $\beta$ -hydroxy ketones 151
- Candida rugosa*  
Total synthesis of (–)-(8*R*, 10*S*)- and (+)-(8*S*, 10*R*)-8-hydroxy-polyoda-13,17,21-triene based on enzymatic resolution 161
- Catechol  
Kinetics of laccase-catalyzed oxidative polymerization of catechol 61

- Catharanthus roseus*  
 Biotransformation of cinobufagin by cell suspension cultures of *Catharanthus roseus* and *Platycodon grandiflorum* 89
- Cell cultures  
 Stereoselective oxidoreductase type bioconversions of exogenous substrates by cell suspension cultures of bryophytes 71
- Characterization  
 Purification and properties of thermostable lipase from a thermophilic *Bacillus stearothermophilus* MC 7 307
- Cheese making  
 Proteolytic and milk clotting activities in extracts obtained from the crustaceans *Munida* 145
- $\alpha$ -Chymotrypsin  
 Characterization of polymer–enzyme complex as a novel biocatalyst for nonaqueous enzymology 79
- Cinobufagin  
 Biotransformation of cinobufagin by cell suspension cultures of *Catharanthus roseus* and *Platycodon grandiflorum* 89
- Cold-active enzymes  
 Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113
- Cold-adapted enzymes  
 Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113
- Conduritol  
 Application of lipase catalysis in organic solvents for selective protection–deprotection of bioactive compounds 271
- Conversion  
 Identification, molecular cloning and expression of a new esterase from *Pseudomonas* sp. KCTC 10122BP with enantioselectivity towards racemic ketoprofen ethyl ester 29
- Crustaceans  
 Proteolytic and milk clotting activities in extracts obtained from the crustaceans *Munida* 145
- Cutinase  
 Improving cutinase stability in aqueous solution and in reverse micelles by media engineering 299
- Cyanohydrin  
 (*R*)-Oxynitrilase-catalyzed synthesis of (*R*)-2-trimethylsilyl-2-hydroxyl-ethylcyanide 7
- Cycloamylose  
 A cycloamylose-forming hyperthermostable 4- $\alpha$ -glucanotransferase of *Aquifex aeolicus* expressed in *Escherichia coli* 45
- Cyclohexanone monooxygenase  
 Monooxygenase-catalyzed Baeyer–Villiger oxidations: CHMO versus CPMO 211
- Cyclopentanone monooxygenase  
 Monooxygenase-catalyzed Baeyer–Villiger oxidations: CHMO versus CPMO 211
- Deoxysugars  
 Lipase action on some non-triglyceride substrates 279
- Dioxalane  
 Unexpected enantioselectivity and activity of penicillin acylase in the resolution of methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate 55
- Disulfide bond  
 Role of the calcium ion and the disulfide bond in the *Burkholderia glumae* lipase 329
- E. coli*  
 Use of methylumbelliferyl-derivative substrates for lipase activity characterization 339
- Electron-transfer  
 Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135
- Enantioselective  
 Identification, molecular cloning and expression of a new esterase from *Pseudomonas* sp. KCTC 10122BP with enantioselectivity towards racemic ketoprofen ethyl ester 29
- Enantioselective acetylation  
 Total synthesis of (–)-(8*R*, 10*S*)- and (+)-(8*S*, 10*R*)-8-hydroxypolypoda-13,17,21-triene based on enzymatic resolution 161
- Enantioselective kinetic resolution  
 Unexpected enantioselectivity and activity of penicillin acylase in the resolution of methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate 55
- Enantioselectivity  
 Studies on the enzymatic kinetic resolution of  $\beta$ -hydroxy ketones 151  
 Transition-state models are useful for versatile biocatalysts: kinetics and thermodynamics of enantioselective acylations of secondary alcohols catalyzed by lipase and subtilisin 181
- Enoate reductase  
 Stereoselective oxidoreductase type bioconversions of exogenous substrates by cell suspension cultures of bryophytes 71
- Enzymatic polymerization  
 Kinetics of laccase-catalyzed oxidative polymerization of catechol 61
- Enzymatic resolution  
 Total synthesis of (–)-(8*R*, 10*S*)- and (+)-(8*S*, 10*R*)-8-hydroxypolypoda-13,17,21-triene based on enzymatic resolution 161
- Enzyme catalysis  
 Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Enzyme immobilization  
 Preparation and properties of lipase immobilized on MCM-36 support 119
- Enzyme modification  
 Characterization of polymer–enzyme complex as a novel biocatalyst for nonaqueous enzymology 79
- Enzymes  
 Proteolytic and milk clotting activities in extracts obtained from the crustaceans *Munida* 145
- Erythromycin  
 Lipase inhibitors for the treatment of acne 377
- Esterase  
 Increased stability of an esterase from *Bacillus stearothermophilus* in ionic liquids as compared to organic solvents 21

- Identification, molecular cloning and expression of a new esterase from *Pseudomonas* sp. KCTC 10122BP with enantioselectivity towards racemic ketoprofen ethyl ester 29
- Use of methylumbelliferyl-derivative substrates for lipase activity characterization 339
- Fermentation**
- Optimization of the organic solvent-stable asymmetric hydrogen transfer system of *Rhodococcus ruber* DSM 44541: an activity-growth study 1
- Fibrates**
- Human digestive and metabolic lipases—a brief review 369
- Flavonoid**
- Application of lipase catalysis in organic solvents for selective protection–deprotection of bioactive compounds 271
- Fluorescence anisotropy**
- Effects of a fungal lipase on membrane organization evaluated by fluorescence polarization 315
- Gastric lipase**
- Inhibition of digestive lipases by 2-oxo amide triacylglycerol analogues 255
- 4- $\alpha$ -Glucanotransferase**
- A cycloamylose-forming hyperthermostable 4- $\alpha$ -glucanotransferase of *Aquifex aeolicus* expressed in *Escherichia coli* 45
- Glycogen phosphorylase**
- Characterization of a hyperthermostable glycogen phosphorylase from *Aquifex aeolicus* expressed in *Escherichia coli* 173
- H-atom abstraction**
- Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135
- Hemiacetal decyclization**
- Lipase action on some non-triglyceride substrates 279
- Heparin**
- Human digestive and metabolic lipases—a brief review 369
- Heptaprenyl diphosphate synthase**
- Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97
- Heteropolyanion**
- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion  $[\text{SiW}_{11}\text{VO}_{40}]^{5-}$  13
- Hexaprenyl diphosphate synthase**
- Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97
- Homologs of isopentenyl diphosphate**
- Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97
- Homology modeling**
- Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113
- Human pathogen**
- Microbial lipases as virulence factors 347
- Hydrocarbons oxidation**
- Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135
- Hydrolysis**
- Activity and stability of *Chromobacterium viscosum* lipase in modified AOT reverse micelles 203
- $\beta$ -Hydroxy ketones**
- Studies on the enzymatic kinetic resolution of  $\beta$ -hydroxy ketones 151
- $\beta$ -Hydroxy nitriles**
- Biocatalytic asymmetric hydrolysis of ( $\pm$ )- $\beta$ -hydroxy nitriles by *Rhodococcus* sp. CGMCC 0497 105
- 1-Hydroxybenzotriazole**
- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion  $[\text{SiW}_{11}\text{VO}_{40}]^{5-}$  13
- Hyperthermophile**
- Characterization of a hyperthermostable glycogen phosphorylase from *Aquifex aeolicus* expressed in *Escherichia coli* 173
- Hyperthermostable**
- A cycloamylose-forming hyperthermostable 4- $\alpha$ -glucanotransferase of *Aquifex aeolicus* expressed in *Escherichia coli* 45
- Immobilization**
- Increased stability of an esterase from *Bacillus stearothermophilus* in ionic liquids as compared to organic solvents 21
  - Bio-imprinting of lipases with fatty acids 193
  - Purification and properties of thermostable lipase from a thermophilic *Bacillus stearothermophilus* MC 7 307
- Infections**
- Phospholipases as a factor of pathogenicity in microorganisms 357
- Inhibition**
- Inhibition of digestive lipases by 2-oxo amide triacylglycerol analogues 255
- Inhibitors**
- Lipolytic enzymes in atherosclerosis as the potential target of inhibitors 363
- Interfacial activation**
- Effects of a fungal lipase on membrane organization evaluated by fluorescence polarization 315
- Ionic liquid**
- Increased stability of an esterase from *Bacillus stearothermophilus* in ionic liquids as compared to organic solvents 21
- Jumi-haidoku-to**
- Lipase inhibitors for the treatment of acne 377
- Ketoprofen**
- Identification, molecular cloning and expression of a new esterase from *Pseudomonas* sp. KCTC 10122BP with enantioselectivity towards racemic ketoprofen ethyl ester 29

## Kinetic resolution

- Biocatalytic asymmetric hydrolysis of ( $\pm$ )- $\beta$ -hydroxy nitriles by *Rhodococcus* sp. CGMCC 0497 105
- Studies on the enzymatic kinetic resolution of  $\beta$ -hydroxy ketones 151

## Laccase

- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion [SiW<sub>11</sub>VO<sub>40</sub>]<sup>5-</sup> 13
- Kinetics of laccase-catalyzed oxidative polymerization of catechol 61
- Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135

## Lignin

- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion [SiW<sub>11</sub>VO<sub>40</sub>]<sup>5-</sup> 13

## Lignin degradation

- Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135

## Lignin model compounds

- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion [SiW<sub>11</sub>VO<sub>40</sub>]<sup>5-</sup> 13

## Lipase

- Preparation and properties of lipase immobilized on MCM-36 support 119
- Total synthesis of (–)-(8*R*, 10*S*)- and (+)-(8*S*, 10*R*)-8-hydroxy-polyoda-13,17,21-triene based on enzymatic resolution 161
- Transition-state models are useful for versatile biocatalysts: kinetics and thermodynamics of enantioselective acylations of secondary alcohols catalyzed by lipase and subtilisin 181
- Bio-imprinting of lipases with fatty acids 193
- Application of lipase catalysis in organic solvents for selective protection–deprotection of bioactive compounds 271
- Role of the calcium ion and the disulfide bond in the *Burkholderia glumae* lipase 329
- Use of methylumbeliferyl-derivative substrates for lipase activity characterization 339
- Microbial lipases as virulence factors 347
- Human digestive and metabolic lipases—a brief review 369

## Lipase activity

- Activity and stability of *Chromobacterium viscosum* lipase in modified AOT reverse micelles 203

## Lipase-catalyzed reactions

- Lipase action on some non-triglyceride substrates 279

## Lipase-triggered cascade-reactions

- Lipase action on some non-triglyceride substrates 279

## Lipid vesicles

- Effects of a fungal lipase on membrane organization evaluated by fluorescence polarization 315

## Lipids

- Microbial lipases as virulence factors 347

## Lipolytic enzymes

- Lipolytic enzymes in atherosclerosis as the potential target of inhibitors 363

## MCM-36

- Preparation and properties of lipase immobilized on MCM-36 support 119

## MCM-22 zeolite

- Preparation and properties of lipase immobilized on MCM-36 support 119

## Mechanism

- Transition-state models are useful for versatile biocatalysts: kinetics and thermodynamics of enantioselective acylations of secondary alcohols catalyzed by lipase and subtilisin 181

## Mediators

- Free radical versus electron-transfer routes of oxidation of hydrocarbons by laccase/mediator systems. Catalytic or stoichiometric procedures 135

## Medium-prenylchain elongating enzyme

- Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97

## Methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate

- Unexpected enantioselectivity and activity of penicillin acylase in the resolution of methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate 55

## Milk clotting activity

- Proteolytic and milk clotting activities in extracts obtained from the crustaceans *Munida* 145

## Monolayers

- Effects of a fungal lipase on membrane organization evaluated by fluorescence polarization 315

## MUF-butylate

- Use of methylumbeliferyl-derivative substrates for lipase activity characterization 339

## MUF-oleate

- Use of methylumbeliferyl-derivative substrates for lipase activity characterization 339

## Nitrile hydratase

- Biocatalytic asymmetric hydrolysis of ( $\pm$ )- $\beta$ -hydroxy nitriles by *Rhodococcus* sp. CGMCC 0497 105

## Organic solvent

- Characterization of polymer–enzyme complex as a novel biocatalyst for nonaqueous enzymology 79
- Bio-imprinting of lipases with fatty acids 193

## Organosilicon

- (*R*)-Oxynitrilase-catalyzed synthesis of (*R*)-2-trimethylsilyl-2-hydroxyl-ethylcyanide 7

## Oxidation

- Degradation of biphenyl lignin model compounds by laccase of *Trametes versicolor* in the presence of 1-hydroxybenzotriazole and heteropolyanion [SiW<sub>11</sub>VO<sub>40</sub>]<sup>5-</sup> 13

## Oxidoreductase

- Stereoselective oxidoreductase type bioconversions of exogenous substrates by cell suspension cultures of bryophytes 71

- 2-Oxo amides  
 Inhibition of digestive lipases by 2-oxo amide triacylglycerol analogues 255
- (*R*)-Oxynitrilase  
 (*R*)-Oxynitrilase-catalyzed synthesis of (*R*)-2-trimethylsilyl-2-hydroxyl-ethylcyanide 7
- Pancreatic lipase  
 Inhibition of digestive lipases by 2-oxo amide triacylglycerol analogues 255
- PEG 400  
 Activity and stability of *Chromobacterium viscosum* lipase in modified AOT reverse micelles 203
- Penicillin acylase  
 Unexpected enantioselectivity and activity of penicillin acylase in the resolution of methyl 2,2-dimethyl-1,3-dioxane-4-carboxylate 55
- Phospholipases  
 Phospholipases as a factor of pathogenicity in microorganisms 357
- Phthalic anhydride-modified horseradish peroxidase  
 Treatment of aqueous chlorophenol by phthalic anhydride-modified horseradish peroxidase 37
- Platycodon grandiflorum*  
 Biotransformation of cinobufagin by cell suspension cultures of *Catharanthus roseus* and *Platycodon grandiflorum* 89
- Polymer–enzyme complex  
 Characterization of polymer–enzyme complex as a novel biocatalyst for nonaqueous enzymology 79
- Prenyltransferase  
 Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97
- Propionibacterium acnes* lipase  
 Lipase inhibitors for the treatment of acne 377
- Prostanoids  
 Lipase action on some non-triglyceride substrates 279
- Protease  
 Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113  
 Proteolytic and milk clotting activities in extracts obtained from the crustaceans *Munida* 145
- Protein stability  
 Improving cutinase stability in aqueous solution and in reverse micelles by media engineering 299
- Pseudomonas*  
 Identification, molecular cloning and expression of a new esterase from *Pseudomonas* sp. KCTC 10122BP with enantioselectivity towards racemic ketoprofen ethyl ester 29
- Pseudomonas aeruginosa*  
 Role of the calcium ion and the disulfide bond in the *Burkholderia glumae* lipase 329
- Psychrophile  
 Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113
- Purification  
 Purification and properties of thermostable lipase from a thermophilic *Bacillus stearothermophilus* MC 7 307
- Removal of chlorophenols  
 Treatment of aqueous chlorophenol by phthalic anhydride-modified horseradish peroxidase 37
- Reverse micelles  
 Improving cutinase stability in aqueous solution and in reverse micelles by media engineering 299
- Reverse micelles and lipase deactivation  
 Activity and stability of *Chromobacterium viscosum* lipase in modified AOT reverse micelles 203
- Rhodococcus*  
 Biocatalytic asymmetric hydrolysis of ( $\pm$ )- $\beta$ -hydroxy nitriles by *Rhodococcus* sp. CGMCC 0497 105
- Rhodococcus erythropolis*  
 Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Rhodococcus ruber*  
 Optimization of the organic solvent-stable asymmetric hydrogen transfer system of *Rhodococcus ruber* DSM 44541: an activity-growth study 1
- Saccharomyces*  
 Use of methylumbelliferyl-derivative substrates for lipase activity characterization 339
- sec*-Alcohol dehydrogenase  
 Optimization of the organic solvent-stable asymmetric hydrogen transfer system of *Rhodococcus ruber* DSM 44541: an activity-growth study 1
- Serotypes  
 Lipase inhibitors for the treatment of acne 377
- Stability  
 Increased stability of an esterase from *Bacillus stearothermophilus* in ionic liquids as compared to organic solvents 21
- Substrate specificity  
 Substrate specificities of medium-prenylchain elongating enzymes, hexaprenyl- and heptaprenyl diphosphate synthases 97
- Subtilisin  
 Transition-state models are useful for versatile biocatalysts: kinetics and thermodynamics of enantioselective acylations of secondary alcohols catalyzed by lipase and subtilisin 181
- Sulfoxide  
 Biotransformation of sulfides by *Rhodococcus erythropolis* 219
- Synthetic inhibitors  
 Inhibition of digestive lipases by 2-oxo amide triacylglycerol analogues 255
- Tetracyclines  
 Lipase inhibitors for the treatment of acne 377
- Thermomyces lanuginosa* lipase  
 Effects of a fungal lipase on membrane organization evaluated by fluorescence polarization 315

Thermophilic *Bacillus*

Purification and properties of thermostable lipase from a thermophilic *Bacillus stearothermophilus* MC 7 307

## Thermostability

Improvement of thermostability of cold-active serine alkaline protease from the psychrotrophic bacterium *Shewanella* sp. strain Ac10 by rational mutagenesis 113

## Thermostable enzyme

Characterization of a hyperthermostable glycogen phosphorylase from *Aquifex aeolicus* expressed in *Escherichia coli* 173

## Thermostable lipase

Purification and properties of thermostable lipase from a thermophilic *Bacillus stearothermophilus* MC 7 307

## Total synthesis

Total synthesis of (-)-(8*R*, 10*S*)- and (+)-(8*S*, 10*R*)-8-hydroxypoda-13,17,21-triene based on enzymatic resolution 161

## Trehalose

Improving cutinase stability in aqueous solution and in reverse micelles by media engineering 299

*(R)*-2-Trimethylsilyl-2-hydroxyl-ethylcyanide

*(R)*-Oxynitrilase-catalyzed synthesis of *(R)*-2-trimethylsilyl-2-hydroxyl-ethylcyanide 7

## Virulence factors

Microbial lipases as virulence factors 347

## Wastewater treatment

Kinetics of laccase-catalyzed oxidative polymerization of catechol 61

## Water activity

Increased stability of an esterase from *Bacillus stearothermophilus* in ionic liquids as compared to organic solvents 21
