

Subject Index

Acetyltrimethylsilane

Biocatalytic synthesis of (–)-1-trimethylsilylethanol by asymmetric reduction of acetyltrimethylsilane with a new isolate *Rhodotorula* sp. AS2.2241 83

Acylamino acid-releasing enzyme

Cloning, purification and properties of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 1

Adsorption

Characterisation of Accurel MP1004 polypropylene powder and its use as a support for lipase immobilisation 75

Aeropyrum pernix K1

Cloning, purification and properties of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 1

Amidase

Biocatalytic hydrolysis of cyanohydrins: an efficient approach to enantiopure α -hydroxy carboxylic acids 89

Aqueous/organic solvent biphasic

Biocatalytic synthesis of (–)-1-trimethylsilylethanol by asymmetric reduction of acetyltrimethylsilane with a new isolate *Rhodotorula* sp. AS2.2241 83

Asymmetric reduction

Biocatalytic synthesis of (–)-1-trimethylsilylethanol by asymmetric reduction of acetyltrimethylsilane with a new isolate *Rhodotorula* sp. AS2.2241 83

Biotransformation

Biocatalytic hydrolysis of cyanohydrins: an efficient approach to enantiopure α -hydroxy carboxylic acids 89

Candida rugosa

2-Propanol treatment of *Candida rugosa* lipase and its hydrolytic activity 67

Catalytic antibody

Key residue responsible for catalytic activities in the antibodies elicited against *N*-methyl mesoporphyrin 99

Catalytic domain

Comparison of domains function between cellobiohydrolase I and endoglucanase I from *Trichoderma pseudokoningii* S-38 by limited proteolysis 27

Cellobiohydrolase I

Comparison of domains function between cellobiohydrolase I and endoglucanase I from *Trichoderma pseudokoningii* S-38 by limited proteolysis 27

Cellulose-binding domain

Comparison of domains function between cellobiohydrolase I

and endoglucanase I from *Trichoderma pseudokoningii* S-38 by limited proteolysis 27

Cloning

Cloning, purification and properties of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 1

Cofactor regeneration

Practical applications of hydrogenase I from *Pyrococcus furiosus* for NADPH generation and regeneration 39

Condensation

Equilibrium constant for the lipase-catalyzed synthesis of fatty acid butyl ester in various organic solvents 61

Cyanohydrin hydrolysis

Biocatalytic hydrolysis of cyanohydrins: an efficient approach to enantiopure α -hydroxy carboxylic acids 89

Dekera sp

Microbiological enantioselective reduction of ethyl acetoacetate 121

Dihydrogen

Practical applications of hydrogenase I from *Pyrococcus furiosus* for NADPH generation and regeneration 39

Dynamic kinetic resolution

Dynamic kinetic resolution of (*R*, *S*)-naproxen 2,2,2-trifluoroethyl ester via lipase-catalyzed hydrolysis in micro-aqueous iso-octane 111

Enantioselective

Microbiological enantioselective reduction of ethyl acetoacetate 121

Enantioselective hydrolysis

2-Propanol treatment of *Candida rugosa* lipase and its hydrolytic activity 67

Enantioselective reduction

Practical applications of hydrogenase I from *Pyrococcus furiosus* for NADPH generation and regeneration 39

Enantioseparation

Kinetic resolution of chiral alcohols in bifunctional membrane exhibiting enzyme activity and enantioselective permeation 17

Endoglucanase I

Comparison of domains function between cellobiohydrolase I and endoglucanase I from *Trichoderma pseudokoningii* S-38 by limited proteolysis 27

Equilibrium constant

Equilibrium constant for the lipase-catalyzed synthesis of fatty acid butyl ester in various organic solvents 61

- Esterase**
Cloning, purification and properties of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 1
- Galactose oxidase**
Oxidation of galactose and derivatives catalysed by galactose oxidase: structure and complete assignments of the NMR spectra of the main product 9
- Hansenula* sp**
Microbiological enantioselective reduction of ethyl acetate 121
- Hydrates of 6-oxogalactosides**
Oxidation of galactose and derivatives catalysed by galactose oxidase: structure and complete assignments of the NMR spectra of the main product 9
- Hydrolysis**
The characteristics of hydrolysis of triolein catalyzed by wheat germ lipase in water-in-oil microemulsions 53
Dynamic kinetic resolution of (*R*, *S*)-naproxen 2,2,2-trifluoroethyl ester via lipase-catalyzed hydrolysis in micro-aqueous isoctane 111
- α -Hydroxy carboxylic acids**
Biocatalytic hydrolysis of cyanohydrins: an efficient approach to enantiopure α -hydroxy carboxylic acids 89
- IR spectrum**
Equilibrium constant for the lipase-catalyzed synthesis of fatty acid butyl ester in various organic solvents 61
- Ketoesters**
Microbiological enantioselective reduction of ethyl acetate 121
- Kinetic resolution**
Kinetic resolution of chiral alcohols in bifunctional membrane exhibiting enzyme activity and enantioselective permeation 17
- Lipase**
Kinetic resolution of chiral alcohols in bifunctional membrane exhibiting enzyme activity and enantioselective permeation 17
Equilibrium constant for the lipase-catalyzed synthesis of fatty acid butyl ester in various organic solvents 61
Characterisation of Accurel MP1004 polypropylene powder and its use as a support for lipase immobilisation 75
Dynamic kinetic resolution of (*R*, *S*)-naproxen 2,2,2-trifluoroethyl ester via lipase-catalyzed hydrolysis in micro-aqueous isoctane 111
- Membrane reactor**
Kinetic resolution of chiral alcohols in bifunctional membrane exhibiting enzyme activity and enantioselective permeation 17
- Mesopores**
Characterisation of Accurel MP1004 polypropylene powder and its use as a support for lipase immobilisation 75
- Metalation**
Key residue responsible for catalytic activities in the antibodies elicited against *N*-methyl mesoporphyrin 99
- Molecularly imprinted polymer**
Kinetic resolution of chiral alcohols in bifunctional membrane exhibiting enzyme activity and enantioselective permeation 17
- NADPH**
Practical applications of hydrogenase I from *Pyrococcus furiosus* for NADPH generation and regeneration 39
- (*R*, *S*)-Naproxen ester**
Dynamic kinetic resolution of (*R*, *S*)-naproxen 2,2,2-trifluoroethyl ester via lipase-catalyzed hydrolysis in micro-aqueous isoctane 111
- Nitrile hydratase**
Biocatalytic hydrolysis of cyanohydrins: an efficient approach to enantiopure α -hydroxy carboxylic acids 89
- NMR parameters**
Oxidation of galactose and derivatives catalysed by galactose oxidase: structure and complete assignments of the NMR spectra of the main product 9
- Peroxidase**
Key residue responsible for catalytic activities in the antibodies elicited against *N*-methyl mesoporphyrin 99
- Polypropylene**
Characterisation of Accurel MP1004 polypropylene powder and its use as a support for lipase immobilisation 75
- Porphyrin**
Key residue responsible for catalytic activities in the antibodies elicited against *N*-methyl mesoporphyrin 99
- 2-Propanol treatment**
2-Propanol treatment of *Candida rugosa* lipase and its hydrolytic activity 67
- Pyrococcus furiosus* hydrogenase**
Practical applications of hydrogenase I from *Pyrococcus furiosus* for NADPH generation and regeneration 39
- Reaction medium**
Equilibrium constant for the lipase-catalyzed synthesis of fatty acid butyl ester in various organic solvents 61
- Recovered protein**
2-Propanol treatment of *Candida rugosa* lipase and its hydrolytic activity 67
- Reduction**
Microbiological enantioselective reduction of ethyl acetate 121
- Rhodotorula* sp**
Biocatalytic synthesis of (–)-1-trimethylsilylethanol by asymmetric reduction of acetyltrimethylsilane with a new isolate *Rhodotorula* sp. AS2.2241 83
- Specific activity**
2-Propanol treatment of *Candida rugosa* lipase and its hydrolytic activity 67
- (–)-1-Trimethylsilylethanol**
Biocatalytic synthesis of (–)-1-trimethylsilylethanol by

- asymmetric reduction of acetyltrimethylsilane with a new isolate
Rhodotorula sp. AS2.2241 83
- Triolein
 - The characteristics of hydrolysis of triolein catalyzed by wheat
germ lipase in water-in-oil microemulsions 53
- Water-in-oil microemulsion
 - The characteristics of hydrolysis of triolein catalyzed by wheat
germ lipase in water-in-oil microemulsions 53
- Wheat germ lipase
 - The characteristics of hydrolysis of triolein catalyzed by wheat
germ lipase in water-in-oil microemulsions 53
