

Subject Index

- Activator
Effect of quaternary ammonium salts on the hydrolysis of *N*-glutaryl-L-phenylalanine catalysed by α -chymotrypsin 101
- Activity
Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129
- Acyl-CoA oxidase
Genetic engineering of the β -oxidation pathway in the yeast *Yarrowia lipolytica* to increase the production of aroma compounds 75
Acyl-CoA oxidase, a key step for lipid accumulation in the yeast *Yarrowia lipolytica* 81
- Affinity beads
Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
- Affinity tag
Use of a novel affinity tag selected with a bacterial random peptide library for improving activity retention of glutathione *S*-transferase adsorbed on a polystyrene surface 207
- Alcohol dehydrogenase
Enzymatic recycling of NADPH at high temperature utilizing a thermostable glucose-6-phosphate dehydrogenase from *Bacillus stearothermophilus* 1
- Alcohol oxidase
Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Alcoholysis
Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
- Almond glycosidases
In situ proton NMR of glycosidase catalyzed hydrolysis and reverse hydrolysis 55
- 4-Aminoantipyrine
Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129
- Ammonium salts
Effect of quaternary ammonium salts on the hydrolysis of *N*-glutaryl-L-phenylalanine catalysed by α -chymotrypsin 101
- Antibody
A practical kinetic model for efficient isolation of useful antibodies from phage display libraries 191
- Antibody single domains
Stabilization of antibody V_H-domains by proteolytic selection 173
- Antibody variable region
Stabilization of antibody V_H-domains by proteolytic selection 173
- Antigen binding
Stabilization of antibody V_H-domains by proteolytic selection 173
- Aptamer
DNA as a 'Nanomaterial' 155
- Artificial protein
Combinatorics of peptide sextets encoded by a single microgene 215
- Aspartic proteinase
Reverse hydrolysis by cardosin A: specificity considerations 33
- Association rate constant
A practical kinetic model for efficient isolation of useful antibodies from phage display libraries 191
- Baeyer–Villiger oxidation
Biotransformation of cyclohexanone using immobilized *Geotrichum candidum* NCYC49. Factors affecting the selectivity of the process 25
- Biotransformation
Enzymatic recycling of NADPH at high temperature utilizing a thermostable glucose-6-phosphate dehydrogenase from *Bacillus stearothermophilus* 1
- C60
A screening of phage displayed peptides for the recognition of fullerene (C60) 185
- Candida antarctica* lipase B
Dependency of water concentration on ethanolysis of trioleoylglycerol by lipases 19
- Candida rugosa* lipase
Monoclonal antibodies against *Candida rugosa* lipase 71
- Cardosin A
Reverse hydrolysis by cardosin A: specificity considerations 33
- Catalase
Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
- Catalytic antibodies
Comparison of two forms of catalytic antibody displayed on yeast-cell surface 241
Isolation of novel catalytic antibody clones from combinatorial library displayed on yeast-cell surface 247
- Cationic additives
Effect of quaternary ammonium salts on the hydrolysis of *N*-glutaryl-L-phenylalanine catalysed by α -chymotrypsin 101
- Cell surface
Future direction of molecular display by yeast-cell surface engineering 139
- Cell surface engineering
Future direction of molecular display by yeast-cell surface engineering 139
Surface display of a glucose binding protein 201
- Cell surface protein display
Surface display of a glucose binding protein 201
- Cell-surface engineering
Construction of combinatorial library of starch-binding domain of *Rhizopus oryzae* glucoamylase and screening of clones with enhanced activity by yeast display method 229
- Chitin-oligomer
A chitin-oligomer binding peptide obtained by screening of a phage display random peptide library and its affinity modulation corresponding to oxidation–reduction state 181
- Colorimetric system
Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129

- Combinatorial bioengineering
MolCraft: a hierarchical approach to the synthesis of artificial proteins 145
- Combinatorial library
 Molecular engineering of *Rhizopus oryzae* lipase using a combinatorial protein library constructed on the yeast cell surface 235
 Isolation of novel catalytic antibody clones from combinatorial library displayed on yeast-cell surface 247
 Construction of ethanol-tolerant yeast strains with combinatorial library-selected peptides 253
- Combinatorial mutagenesis
 Construction of combinatorial library of starch-binding domain of *Rhizopus oryzae* glucoamylase and screening of clones with enhanced activity by yeast display method 229
- Combinatorial polypeptide polymer
 Combinatorics of peptide sextets encoded by a single microgene 215
- Combinatorial protein library
 Rapid screening for affinity-improved scFvs by means of single-molecule-PCR-linked in vitro expression 223
- Combinatorial screening
 Development of a herbicide biosensor using a peptide receptor screened from a combinatorial library 265
- Complementarity determining region
 Rapid screening for affinity-improved scFvs by means of single-molecule-PCR-linked in vitro expression 223
- Controlled pore glass
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- DCMU
 Development of a herbicide biosensor using a peptide receptor screened from a combinatorial library 265
- γ -Decalactone
 Genetic engineering of the β -oxidation pathway in the yeast *Yarrowia lipolytica* to increase the production of aroma compounds 75
- DNA architecture
 DNA as a 'Nanomaterial' 155
- cDNA cloning
 cDNA cloning and functional characterization of flavonol 3-*O*-glucoside-6''-*O*-malonyltransferases from flowers of *Verbena hybrida* and *Lamium purpureum* 87
- DNA computer
 DNA as a 'Nanomaterial' 155
- DNA device
 DNA as a 'Nanomaterial' 155
- DNA machine
 DNA as a 'Nanomaterial' 155
- DNA wire
 DNA as a 'Nanomaterial' 155
- DNAzyme
 DNA as a 'Nanomaterial' 155
- E. coli* surface protein display
 Surface display of a glucose binding protein 201
- Enantioselectivity
 Immobilised lipase-catalysed resolution of (*R,S*)-1-phenylethanol in recirculated packed bed reactor 111
- Enhanced green fluorescence protein
 Construction of system for localization of target protein in yeast periplasm using invertase 259
- Enzymatic peptide synthesis
 Reverse hydrolysis by cardosin A: specificity considerations 33
- Enzyme immobilization
 Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
 A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and polypeptide 95
- Enzymes
 Effect of quaternary ammonium salts on the hydrolysis of *N*-glutaryl-L-phenylalanine catalysed by α -chymotrypsin 101
- Ethanol tolerance
 Construction of ethanol-tolerant yeast strains with combinatorial library-selected peptides 253
- Ethanolysis
 Dependency of water concentration on ethanolysis of trioleoylglycerol by lipases 19
- Evolutionary molecular engineering
MolCraft: a hierarchical approach to the synthesis of artificial proteins 145
- Fab fragment
 Comparison of two forms of catalytic antibody displayed on yeast-cell surface 241
- Flavonol 3-*O*-glucoside-6''-*O*-malonyltransferase
 cDNA cloning and functional characterization of flavonol 3-*O*-glucoside-6''-*O*-malonyltransferases from flowers of *Verbena hybrida* and *Lamium purpureum* 87
- Flow injection analysis
 Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
 Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129
- Fullerene
 A screening of phage displayed peptides for the recognition of fullerene (C60) 185
- Functional motifs
MolCraft: a hierarchical approach to the synthesis of artificial proteins 145
- Fusion protein
 Construction of system for localization of target protein in yeast periplasm using invertase 259
- Geotrichum candidum*
 Biotransformation of cyclohexanone using immobilized *Geotrichum candidum* NCYC49. Factors affecting the selectivity of the process 25
- Glucoamylase
 Construction of combinatorial library of starch-binding domain of *Rhizopus oryzae* glucoamylase and screening of clones with enhanced activity by yeast display method 229
- Glucose binding assay
 Surface display of a glucose binding protein 201
- Glucose binding protein
 Surface display of a glucose binding protein 201
- Glucose-6-phosphate dehydrogenase
 Enzymatic recycling of NADPH at high temperature utilizing a thermostable glucose-6-phosphate dehydrogenase from *Bacillus stearothermophilus* 1
- β -Glucosidase
 Influence of water-miscible solvents on hydrolytic activity of crude almond β -glucosidase 15
- Glutaraldehyde
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Glutathione *S*-transferase
 Use of a novel affinity tag selected with a bacterial random peptide library for improving activity retention of glutathione *S*-transferase adsorbed on a polystyrene surface 207
- Hansenula polymorpha*
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Herbicide
 Development of a herbicide biosensor using a peptide receptor screened from a combinatorial library 265

- High-throughput screening
 Rapid screening for affinity-improved scFvs by means of single-molecule-PCR-linked in vitro expression 223
- Histidine
 Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
- Horseradish peroxidase
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
 Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
 Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129
- Hydrolysis
 Influence of water-miscible solvents on hydrolytic activity of crude almond β -glucosidase 15
 Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
 Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isooctane 65
- Hydroxy acids
 Genetic engineering of the β -oxidation pathway in the yeast *Yarrowia lipolytica* to increase the production of aroma compounds 75
- IgG₁ isotype
 Monoclonal antibodies against *Candida rugosa* lipase 71
- IMAC
 Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
- Immobilisation
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Immobilised bioreactors
 Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
- Immobilised enzyme reactors
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Immobilised lipase
 Immobilised lipase-catalysed resolution of (*R,S*)-1-phenylethanol in recirculated packed bed reactor 111
- In situ proton NMR
 In situ proton NMR of glycosidase catalyzed hydrolysis and reverse hydrolysis 55
- In vitro coupled transcription/translation
 Rapid screening for affinity-improved scFvs by means of single-molecule-PCR-linked in vitro expression 223
- In vitro evolution
MolCraft: a hierarchical approach to the synthesis of artificial proteins 145
 Combinatorics of peptide sextets encoded by a single microgene 215
- Invertase
 Construction of system for localization of target protein in yeast periplasm using invertase 259
- Ionic liquids
 Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
- Ketone monooxygenation
 Biotransformation of cyclohexanone using immobilized *Geotrichum candidum* NCYC49. Factors affecting the selectivity of the process 25
- Kinetic model
 A practical kinetic model for efficient isolation of useful antibodies from phage display libraries 191
- Kinetic resolution
 Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isooctane 65
- Immobilised lipase-catalysed resolution of (*R,S*)-1-phenylethanol in recirculated packed bed reactor 111
- Kinetics
 In situ proton NMR of glycosidase catalyzed hydrolysis and reverse hydrolysis 55
 Effect of quaternary ammonium salts on the hydrolysis of *N*-glutaryl-L-phenylalanine catalysed by α -chymotrypsin 101
- γ -Lactone
 Acyl-CoA oxidase, a key step for lipid accumulation in the yeast *Yarrowia lipolytica* 81
- Lamium purpureum*
 cDNA cloning and functional characterization of flavonol 3-*O*-glucoside-6''-*O*-malonyltransferases from flowers of *Verbena hybrida* and *Lamium purpureum* 87
- LAMP
 Combinatorics of peptide sextets encoded by a single microgene 215
- Lipase
 Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
 Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isooctane 65
 A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and poly-peptide 95
 Molecular engineering of *Rhizopus oryzae* lipase using a combinatorial protein library constructed on the yeast cell surface 235
- Lipid accumulation
 Acyl-CoA oxidase, a key step for lipid accumulation in the yeast *Yarrowia lipolytica* 81
- Magnetic support
 Novel metal-chelate affinity sorbents for reversible use in catalase adsorption 7
- Mass transfer limitations
 Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
- Microbial lipase
 Monoclonal antibodies against *Candida rugosa* lipase 71
- Microgene polymerization
 Combinatorics of peptide sextets encoded by a single microgene 215
- Molecular breeding
 Construction of ethanol-tolerant yeast strains with combinatorial library-selected peptides 253
- Molecular display
 Future direction of molecular display by yeast-cell surface engineering 139
 Isolation of novel catalytic antibody clones from combinatorial library displayed on yeast-cell surface 247
- Molecular display: yeast-cell surface
 Construction of combinatorial library of starch-binding domain of *Rhizopus oryzae* glucoamylase and screening of clones with enhanced activity by yeast display method 229
- Molecular evolution
 Comparison of two forms of catalytic antibody displayed on yeast-cell surface 241
 Isolation of novel catalytic antibody clones from combinatorial library displayed on yeast-cell surface 247
- 2-Monoacylglycerol
 Dependency of water concentration on ethanolsis of trioleoylglycerol by lipases 19
- NADPH recycling
 Enzymatic recycling of NADPH at high temperature utilizing a thermostable glucose-6-phosphate dehydrogenase from *Bacillus stearothermophilus* 1

- On-rate selection
A practical kinetic model for efficient isolation of useful antibodies from phage display libraries 191
- Operational stability
Operation and performance of analytical packed-bed reactors with an immobilised alcohol oxidase 45
Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
- Organic solvent
Influence of water-miscible solvents on hydrolytic activity of crude almond β -glucosidase 15
- β -Oxidation
Genetic engineering of the β -oxidation pathway in the yeast *Yarrowia lipolytica* to increase the production of aroma compounds 75
Acyl-CoA oxidase, a key step for lipid accumulation in the yeast *Yarrowia lipolytica* 81
- Oxidation–reduction
A chitin-oligomer binding peptide obtained by screening of a phage display random peptide library and its affinity modulation corresponding to oxidation–reduction state 181
- Oxidised HRP
Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
- Peptide
A screening of phage displayed peptides for the recognition of fullerene (C60) 185
Construction of ethanol-tolerant yeast strains with combinatorial library-selected peptides 253
- Peptide library
A chitin-oligomer binding peptide obtained by screening of a phage display random peptide library and its affinity modulation corresponding to oxidation–reduction state 181
A screening of phage displayed peptides for the recognition of fullerene (C60) 185
Development of a herbicide biosensor using a peptide receptor screened from a combinatorial library 265
- Peptide synthesis
Reverse hydrolysis by cardosin A: specificity considerations 33
- Periplasm
Construction of system for localization of target protein in yeast periplasm using invertase 259
- Peroxidase
The plant vesicular transport engineering for production of useful recombinant proteins 167
- Phage display
Stabilization of antibody V_H-domains by proteolytic selection 173
A screening of phage displayed peptides for the recognition of fullerene (C60) 185
A practical kinetic model for efficient isolation of useful antibodies from phage display libraries 191
- Phenol-4-sulphonic acid
Assay of H₂O₂ by HRP catalysed co-oxidation of phenol-4-sulphonic acid and 4-aminoantipyrine: characterisation and optimisation 129
- Poly(γ -stearyl L-glutamate)
A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and poly-peptide 95
- Polypropylene microfiltration membrane
A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and poly-peptide 95
- Polystyrene surface
Use of a novel affinity tag selected with a bacterial random peptide library for improving activity retention of glutathione *S*-transferase adsorbed on a polystyrene surface 207
- Protein engineering
Future direction of molecular display by yeast-cell surface engineering 139
MolCraft: a hierarchical approach to the synthesis of artificial proteins 145
- Quercetin
cDNA cloning and functional characterization of flavonol 3-*O*-glucoside-6''-*O*-malonyltransferases from flowers of *Verbena hybrida* and *Lamium purpureum* 87
- (*R*)-2-hydroxy-4-phenylbutanoic acid
Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isoctane 65
- (*R*)-ethyl 2-hydroxy-4-phenylbutyrate
Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isoctane 65
- Random peptide library
Use of a novel affinity tag selected with a bacterial random peptide library for improving activity retention of glutathione *S*-transferase adsorbed on a polystyrene surface 207
- Recirculated packed bed reactor
Immobilised lipase-catalysed resolution of (*R,S*)-1-phenylethanol in recirculated packed bed reactor 111
- Regioselectivity
Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
- Reverse hydrolysis
In situ proton NMR of glycosidase catalyzed hydrolysis and reverse hydrolysis 55
- Rhizopus oryzae*
Molecular engineering of *Rhizopus oryzae* lipase using a combinatorial protein library constructed on the yeast cell surface 235
- Saccharomyces cerevisiae*
Molecular engineering of *Rhizopus oryzae* lipase using a combinatorial protein library constructed on the yeast cell surface 235
Construction of system for localization of target protein in yeast periplasm using invertase 259
- Secretory production of enzymes and antibodies
The plant vesicular transport engineering for production of useful recombinant proteins 167
- Signal peptide
The plant vesicular transport engineering for production of useful recombinant proteins 167
- Single-molecule PCR
Rapid screening for affinity-improved scFvs by means of single-molecule-PCR-linked in vitro expression 223
- Site-specific adsorption
Use of a novel affinity tag selected with a bacterial random peptide library for improving activity retention of glutathione *S*-transferase adsorbed on a polystyrene surface 207
- Sodium periodate
Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
- Starch-binding domain (SBD)
Construction of combinatorial library of starch-binding domain of *Rhizopus oryzae* glucoamylase and screening of clones with enhanced activity by yeast display method 229
- Storage stability
Operational stability of immobilised horseradish peroxidase in mini-packed bed bioreactors 121
- Sugar-containing polymer
A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and poly-peptide 95

- Surface display
Comparison of two forms of catalytic antibody displayed on yeast-cell surface 241
- Surface modification
A comparative study on lipase immobilized polypropylene microfiltration membranes modified by sugar-containing polymer and polypeptide 95
- Surface plasmon resonance
Development of a herbicide biosensor using a peptide receptor screened from a combinatorial library 265
- Thermodynamic equilibrium
In situ proton NMR of glycosidase catalyzed hydrolysis and reverse hydrolysis 55
- Thermostability
Stabilization of antibody V_H-domains by proteolytic selection 173
- Thermostable
Enzymatic recycling of NADPH at high temperature utilizing a thermostable glucose-6-phosphate dehydrogenase from *Bacillus stearothermophilus* 1
- Transesterification
Kinetic resolution of (*R,S*)-ethyl 2-hydroxyl-4-phenylbutyrate via lipase-catalyzed hydrolysis and transesterification in isooctane 65
- Transgenic plants
The plant vesicular transport engineering for production of useful recombinant proteins 167
- 3,4,6-Tri-*O*-acetyl-D-glucal
Influence of ionic liquids on the rates and regioselectivity of lipase-mediated biotransformations on 3,4,6-tri-*O*-acetyl-D-glucal 39
- Triolein
Dependency of water concentration on ethanolysis of trioleoylglycerol by lipases 19
- Two-phase systems
Reverse hydrolysis by cardosin A: specificity considerations 33
- Verbena hybrida*
cDNA cloning and functional characterization of flavonol 3-*O*-glucoside-6''-*O*-malonyltransferases from flowers of *Verbena hybrida* and *Lamium purpureum* 87
- Vesicular transport system
The plant vesicular transport engineering for production of useful recombinant proteins 167
- Water concentration
Dependency of water concentration on ethanolysis of trioleoylglycerol by lipases 19
- Whole cell immobilization
Biotransformation of cyclohexanone using immobilized *Geotrichum candidum* NCYC49. Factors affecting the selectivity of the process 25
- Whole-cell biocatalyst
Molecular engineering of *Rhizopus oryzae* lipase using a combinatorial protein library constructed on the yeast cell surface 235
- Yarrowia lipolytica*
Acyl-CoA oxidase, a key step for lipid accumulation in the yeast *Yarrowia lipolytica* 81
- Yeast
Future direction of molecular display by yeast-cell surface engineering 139
Construction of ethanol-tolerant yeast strains with combinatorial library-selected peptides 253
- Yeast-cell surface
Comparison of two forms of catalytic antibody displayed on yeast-cell surface 241
- Yeast-cell surface engineering
Isolation of novel catalytic antibody clones from combinatorial library displayed on yeast-cell surface 247
