

## Subject Index

### *Absidia cylindrospora*

Lactones 20 [1]: Biohydroxylation of saturated bicyclic  $\gamma$ -lactones with the substituted cyclohexane system 13

### 2-Acetamido-2-deoxy-D-glucopyranose

Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259

### *N*-Acetylhexosamines

Regioselective enzymatic acylation of *N*-acetylhexosamines 219

### $\beta$ -*N*-Acetylhexosaminidase

$\beta$ -*N*-Acetylhexosaminidase-catalysed synthesis of non-reducing oligosaccharides 233

Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259

### Activation

Sugar ester synthesis by a mycelium-bound *Mucor circinelloides* lipase in a micro-reactor equipped with water activity sensor 155

### Acylation

Acylation of natural flavonoids using lipase of candida antarctica as biocatalyst 63

### Additive

Influence of the alkyl-substituted silane precursor on sol–gel encapsulated lipase activity 69

### Aerogel

Influence of the sol–gel chemistry on the activity of a lipase encapsulated in a silica aerogel 133

### Alcohols

Asymmetric synthesis of arylselenoalcohols by means of the reduction of organoseleno acetophenones by whole fungal cells 47

### Alkyl-glycoside

Fungus  $\beta$ -glycosidases: immobilization and use in alkyl- $\beta$ -glycoside synthesis 89

### Amidase

Nitrile biotransformation by *Aspergillus niger* 227

Control of the nitrile-hydrolyzing enzyme activity in *Rhodococcus rhodochromus* IFO 15564: preferential action of nitrile hydratase and amidase depending on the reaction condition factors and its application to the one-pot preparation of amides from aldehydes 249

### $\beta$ -Amino acids

Biotransformation of  $\beta$ -amino nitriles: the role of the *N*-protecting group 115

### Amino acids

Peptide deformylase as biocatalyst for the synthesis of enantiomerically pure amino acid derivatives 265

### $\beta$ -Amino nitriles

Biotransformation of  $\beta$ -amino nitriles: the role of the *N*-protecting group 115

### $\alpha$ -Aminonitriles

Peptide deformylase as biocatalyst for the synthesis of enantiomerically pure amino acid derivatives 265

### Androstane

Lipase-catalysed deacetylation of androstane and pregnane derivatives: influence of ring D substitution 149

### Androstenedione

Optimization of androstenedione production in an organic–aqueous two-liquid phase system 19

### *Aspergillus flavofurcatis*

$\beta$ -*N*-Acetylhexosaminidase-catalysed synthesis of non-reducing oligosaccharides 233

### *Aspergillus niger*

Characterization of an enriched lipoxygenase extract from *Aspergillus niger* in terms of specificity and nature of flavor precursors production 201

Nitrile biotransformation by *Aspergillus niger* 227

### *Aspergillus terreus*

Deracemization of aryl ethanols and reduction of acetophenones by whole fungal cells of *Aspergillus terreus* CCT 4083, *A. terreus* CCT 3320 and *Rhizopus oryzae* CCT 4964 55

### Bacteria

Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173

### Baker's yeast

Preparation of an (–)-ephedrine intermediate through asymmetric reduction of 1-phenyl-1,2-propanedione by anaerobically pre-treated baker's yeast 37

Baker's yeast mediated asymmetric reduction of cinnamaldehyde derivatives 41

### Basidiomycetes

Regioselective enzymatic acylation of polyhydroxylated sesquiterpenoids 95

### Benzimidazole

Benzimidazole as deazapurine analogue for microbial transglycosylation 3

### Biocatalysis

Kinetic and modelling studies on the lipase catalysed enantioselective esterification of ( $\pm$ )-perillyl alcohol 9

### Bioconversion

Organic phase effect in the biphasic bioconversion of substituted naphthalenes by engineered *E. coli* containing *P. fluorescens* N3 dioxygenase 181

### Biooxidation–reduction

Microbial deracemisation of aromatic  $\beta$ -hydroxy acid esters 25

### Biosurfactant

Fungus  $\beta$ -glycosidases: immobilization and use in alkyl- $\beta$ -glycoside synthesis 89

### Biotransformations

Lactones 20 [1]: Biohydroxylation of saturated bicyclic  $\gamma$ -lactones with the substituted cyclohexane system 13

Optimization of androstenedione production in an organic–aqueous two-liquid phase system 19

Microbial deracemisation of aromatic  $\beta$ -hydroxy acid esters 25

Application of bacteria and fungi as biocatalysts for the preparation of optically active hydroxyphosphonates 99

Biotransformation of  $\beta$ -amino nitriles: the role of the *N*-protecting group 115

- Biphasic system  
Organic phase effect in the biphasic bioconversion of substituted naphthalenes by engineered *E. coli* containing *P. fluorescens* N3 dioxxygenase 181
- Candida antarctica*  
Acylation of natural flavonoids using lipase of candida antarctica as biocatalyst 63
- Candida parapsilosis*  
Microbial deracemisation of aromatic  $\beta$ -hydroxy acid esters 25
- Chemo-enzymatic synthesis  
Application of bacteria and fungi as biocatalysts for the preparation of optically active hydroxyphosphonates 99
- Chiral secondary alcohols  
Deracemization of aryl ethanol and reduction of acetophenones by whole fungal cells of *Aspergillus terreus* CCT 4083, *A. terreus* CCT 3320 and *Rhizopus oryzae* CCT 4964 55
- Corn steep liquor supernatant (CLS)  
Process development of methylenedioxyphenyl-acetone chiral bioreduction 195
- Deacetylation  
Enzymatic alcoholysis of 3',5'-di-*O*-acetyl-2'-deoxynucleosides 129
- $\gamma$ -Decalactone  
Impact of surfactants on the biotransformation of methyl ricinoleate into  $\gamma$ -decalactone by *Yarrowia lipolytica* 31
- Deracemisation  
Microbial deracemisation of aromatic  $\beta$ -hydroxy acid esters 25
- Deracemization  
Deracemization of aryl ethanol and reduction of acetophenones by whole fungal cells of *Aspergillus terreus* CCT 4083, *A. terreus* CCT 3320 and *Rhizopus oryzae* CCT 4964 55
- N,N'*-Diacetylchitobiose  
Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259
- DMSO  
Regioselective enzymatic acylation of *N*-acetylhexosamines 219
- Drug metabolism  
Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173
- Emulsion  
Impact of surfactants on the biotransformation of methyl ricinoleate into  $\gamma$ -decalactone by *Yarrowia lipolytica* 31
- Enantioface-differentiating hydrolysis  
Asymmetric transformation of enol acetates with esterases from *Marchantia polymorpha* 123
- Enantioselectivity  
Kinetic and modelling studies on the lipase catalysed enantioselective esterification of ( $\pm$ )-perillyl alcohol 9  
Application of bacteria and fungi as biocatalysts for the preparation of optically active hydroxyphosphonates 99
- Enol acetate  
Asymmetric transformation of enol acetates with esterases from *Marchantia polymorpha* 123
- Entrapped lipase  
Influence of the alkyl-substituted silane precursor on sol-gel encapsulated lipase activity 69
- Enzymatic  
Acylation of natural flavonoids using lipase of candida antarctica as biocatalyst 63
- Enzymatic acylation  
Regioselective enzymatic acylation of polyhydroxylated sesquiterpenoids 95  
Regioselective enzymatic acylation of *N*-acetylhexosamines 219
- Enzymatic alcoholysis  
Enzymatic alcoholysis of 3',5'-di-*O*-acetyl-2'-deoxynucleosides 129
- Enzymatic synthesis  
Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259
- Enzymatic transglycosylation  
 $\beta$ -*N*-Acetylhexosaminidase-catalysed synthesis of non-reducing oligosaccharides 233
- Enzyme inhibition  
Control of the nitrile-hydrolyzing enzyme activity in *Rhodococcus rhodochrous* IFO 15564: preferential action of nitrile hydratase and amidase depending on the reaction condition factors and its application to the one-pot preparation of amides from aldehydes 249
- Enzyme kinetics  
A study in UF-membrane reactor on activity and stability of nitrile hydratase from *Microbacterium imperiale* CBS 498-74 resting cells for propionamide production 105
- Ephedrine analogs  
Preparation of an (–)-ephedrine intermediate through asymmetric reduction of 1-phenyl-1,2-propanedione by anaerobically pre-treated baker's yeast 37
- Esterase  
Asymmetric transformation of enol acetates with esterases from *Marchantia polymorpha* 123
- Fatty acids  
Acylation of natural flavonoids using lipase of candida antarctica as biocatalyst 63
- Filamentous fungi  
Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259
- Flavonoids  
Acylation of natural flavonoids using lipase of candida antarctica as biocatalyst 63
- Flavor  
Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- Flavor precursors  
Characterization of an enriched lipoxygenase extract from *Aspergillus niger* in terms of specificity and nature of flavor precursors production 201
- Flow calorimetry  
Investigation of kinetics of immobilized liver esterase by flow calorimetry 81
- Fragrance  
Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- Fungi  
Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173
- Fusarium culmorum*  
Lactones 20 [1]: Biohydroxylation of saturated bicyclic  $\gamma$ -lactones with the substituted cyclohexane system 13
- Genetic algorithm  
Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- $\beta$ -glucosidase  
Fungus  $\beta$ -glycosidases: immobilization and use in alkyl- $\beta$ -glycoside synthesis 89
- Glucoside  
Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173

- Glucosyl fluoride  
Cellobiose phosphorylase from *Cellulomonas uda*: gene cloning and expression in *Escherichia coli*, and application of the recombinant enzyme in a 'glycosynthase-type' reaction 241
- Glycobiotechnology  
Cellobiose phosphorylase from *Cellulomonas uda*: gene cloning and expression in *Escherichia coli*, and application of the recombinant enzyme in a 'glycosynthase-type' reaction 241
- Glycoside synthesis  
Cellobiose phosphorylase from *Cellulomonas uda*: gene cloning and expression in *Escherichia coli*, and application of the recombinant enzyme in a 'glycosynthase-type' reaction 241
- Glycosyltransferase  
Cellobiose phosphorylase from *Cellulomonas uda*: gene cloning and expression in *Escherichia coli*, and application of the recombinant enzyme in a 'glycosynthase-type' reaction 241
- High throughput screening  
Biocatalytic conversion of unnatural substrates by recombinant almond R-HNL isoenzyme 5 211
- HIV-protease inhibitors  
Baker's yeast mediated asymmetric reduction of cinnamaldehyde derivatives 41
- Hydroperoxides  
Characterization of an enriched lipoxygenase extract from *Aspergillus niger* in terms of specificity and nature of flavor precursors production 201
- $\beta$ -Hydroxy esters  
Microbial deracemisation of aromatic  $\beta$ -hydroxy acid esters 25
- Hydroxylation  
Lactones 20 [1]: Biohydroxylation of saturated bicyclic  $\gamma$ -lactones with the substituted cyclohexane system 13  
Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173
- Hydroxynitrile lyase  
Biocatalytic conversion of unnatural substrates by recombinant almond R-HNL isoenzyme 5 211
- (R)-1-hydroxy-1-phenyl-2-propanone  
Preparation of an (–)-ephedrine intermediate through asymmetric reduction of 1-phenyl-1,2-propanedione by anaerobically pre-treated baker's yeast 37
- Immobilization  
Fungus  $\beta$ -glycosidases: immobilization and use in alkyl- $\beta$ -glycoside synthesis 89  
Stabilization of an intracellular *Mucor circinelloides* lipase for application in non-aqueous media 163
- Immobilized enzyme  
Investigation of kinetics of immobilized liver esterase by flow calorimetry 81
- In vivo co-enzyme regeneration  
Process development of methylenedioxyphenyl-acetone chiral bioreduction 195
- Ketones  
Asymmetric synthesis of arylselenoalcohols by means of the reduction of organoseleno acetophenones by whole fungal cells 47
- Kinetics  
Investigation of kinetics of immobilized liver esterase by flow calorimetry 81
- Kluyveromyces*  
Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- Lactones  
Lactones 20 [1]: Biohydroxylation of saturated bicyclic  $\gamma$ -lactones with the substituted cyclohexane system 13
- Lipase  
Kinetic and modelling studies on the lipase catalysed enantioselective esterification of ( $\pm$ )-perillyl alcohol 9  
Influence of the alkyl-substituted silane precursor on sol-gel encapsulated lipase activity 69  
Regioselective enzymatic acylation of polyhydroxylated sesquiterpenoids 95  
Enzymatic alcoholysis of 3',5'-di-O-acetyl-2'-deoxynucleosides 129  
Influence of the sol-gel chemistry on the activity of a lipase encapsulated in a silica aerogel 133
- Lipase-catalysed deacetylation  
Lipase-catalysed deacetylation of androstane and pregnane derivatives: influence of ring D substitution 149
- Lipoxygenase  
Characterization of an enriched lipoxygenase extract from *Aspergillus niger* in terms of specificity and nature of flavor precursors production 201
- Mandelonitrile  
Biocatalytic conversion of unnatural substrates by recombinant almond R-HNL isoenzyme 5 211
- Marchantia polymorpha*  
Asymmetric transformation of enol acetates with esterases from *Marchantia polymorpha* 123
- Membrane-bound lipase  
Stabilization of an intracellular *Mucor circinelloides* lipase for application in non-aqueous media 163
- Microbacterium imperiale*  
A study in UF-membrane reactor on activity and stability of nitrile hydratase from *Microbacterium imperiale* CBS 498-74 resting cells for propionamide production 105
- Microbial reduction  
Asymmetric synthesis of arylselenoalcohols by means of the reduction of organoseleno acetophenones by whole fungal cells 47
- Microbial transglycosylation  
Benzimidazole as deazapurine analogue for microbial transglycosylation 3
- Molecular modelling  
Kinetic and modelling studies on the lipase catalysed enantioselective esterification of ( $\pm$ )-perillyl alcohol 9
- Mucor*  
Sugar ester synthesis by a mycelium-bound *Mucor circinelloides* lipase in a micro-reactor equipped with water activity sensor 155
- Mucor circinelloides*  
Stabilization of an intracellular *Mucor circinelloides* lipase for application in non-aqueous media 163
- Multi-functional sampler  
Process development of methylenedioxyphenyl-acetone chiral bioreduction 195
- Mycelium-bound lipase  
Sugar ester synthesis by a mycelium-bound *Mucor circinelloides* lipase in a micro-reactor equipped with water activity sensor 155
- Mycobacterium* sp. NRRL B-3805  
Optimization of androstenedione production in an organic-aqueous two-liquid phase system 19
- Naphthalene dioxygenase  
Organic phase effect in the biphasic bioconversion of substituted naphthalenes by engineered *E. coli* containing *P. fluorescens* N3 dioxygenase 181
- Nitrilase  
Nitrile biotransformation by *Aspergillus niger* 227
- Nitrile hydratase  
A study in UF-membrane reactor on activity and stability of nitrile hydratase from *Microbacterium imperiale* CBS 498-74 resting cells for propionamide production 105

- Biotransformation of  $\beta$ -amino nitriles: the role of the *N*-protecting group 115
- Nitrile biotransformation by *Aspergillus niger* 227
- Control of the nitrile-hydrolyzing enzyme activity in *Rhodococcus rhodochrous* IFO 15564: preferential action of nitrile hydratase and amidase depending on the reaction condition factors and its application to the one-pot preparation of amides from aldehydes 249
- Nitrile-converting enzymes
- Nitrile biotransformation by *Aspergillus niger* 227
- Non-reducing saccharides
- $\beta$ -*N*-Acetylhexosaminidase-catalysed synthesis of non-reducing oligo-saccharides 233
- Nucleoside analogues
- Benzimidazole as deazapurine analogue for microbial transglycosylation 3
- Nucleosides
- Enzymatic alcoholysis of 3',5'-di-*O*-acetyl-2'-deoxynucleosides 129
- One-pot synthesis of amides
- Control of the nitrile-hydrolyzing enzyme activity in *Rhodococcus rhodochrous* IFO 15564: preferential action of nitrile hydratase and amidase depending on the reaction condition factors and its application to the one-pot preparation of amides from aldehydes 249
- Optically active ketone
- Asymmetric transformation of enol acetates with esterases from *Marchantia polymorpha* 123
- Organic-aqueous phase system
- Optimization of androstenedione production in an organic-aqueous two-liquid phase system 19
- Organophosphorus compounds
- Application of bacteria and fungi as biocatalysts for the preparation of optically active hydroxyphosphonates 99
- Peptide deformylase
- Peptide deformylase as biocatalyst for the synthesis of enantiomerically pure amino acid derivatives 265
- Peptide synthesis
- Peptide deformylase as biocatalyst for the synthesis of enantiomerically pure amino acid derivatives 265
- 2-Phenylethanol
- Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- Pichia*
- Biocatalytic conversion of unnatural substrates by recombinant almond *R*-HNL isoenzyme 5 211
- Pig liver carboxyl esterase
- Investigation of kinetics of immobilized liver esterase by flow calorimetry 81
- Polyunsaturated fatty acids
- Characterization of an enriched lipoxygenase extract from *Aspergillus niger* in terms of specificity and nature of flavor precursors production 201
- Pregnane
- Lipase-catalysed deacetylation of androstane and pregnane derivatives: influence of ring D substitution 149
- Propionitrile biotransformation
- A study in UF-membrane reactor on activity and stability of nitrile hydratase from *Microbacterium imperiale* CBS 498-74 resting cells for propionamide production 105
- Protecting groups
- Biotransformation of  $\beta$ -amino nitriles: the role of the *N*-protecting group 115
- Reaction-diffusion system
- Investigation of kinetics of immobilized liver esterase by flow calorimetry 81
- Reduction
- Deracemization of aryl ethanol and reduction of acetophenones by whole fungal cells of *Aspergillus terreus* CCT 4083, *A. terreus* CCT 3320 and *Rhizopus oryzae* CCT 4964 55
- Regioselectivity
- Preparation of an (–)-ephedrine intermediate through asymmetric reduction of 1-phenyl-1,2-propanedione by anaerobically pre-treated baker's yeast 37
- Regioselective enzymatic acylation of polyhydroxylated sesquiterpenoids 95
- Enzymatic alcoholysis of 3',5'-di-*O*-acetyl-2'-deoxynucleosides 129
- Regioselective enzymatic acylation of *N*-acetylhexosamines 219
- Regioselectivity of glycosylation
- $\beta$ -*N*-Acetylhexosaminidase-catalysed synthesis of non-reducing oligo-saccharides 233
- Resolution reactions
- Peptide deformylase as biocatalyst for the synthesis of enantiomerically pure amino acid derivatives 265
- Reverse hydrolysis
- Enzymatic synthesis of *N*-acetylglucosaminobioses by reverse hydrolysis: characterisation and application of the library of fungal  $\beta$ -*N*-acetylhexosaminidases 259
- Rhizopus oryzae*
- Deracemization of aryl ethanol and reduction of acetophenones by whole fungal cells of *Aspergillus terreus* CCT 4083, *A. terreus* CCT 3320 and *Rhizopus oryzae* CCT 4964 55
- Rhodococcus rhodochrous* IFO 15564
- Control of the nitrile-hydrolyzing enzyme activity in *Rhodococcus rhodochrous* IFO 15564: preferential action of nitrile hydratase and amidase depending on the reaction condition factors and its application to the one-pot preparation of amides from aldehydes 249
- Saccharides esters
- Sugar ester synthesis by a mycelium-bound *Mucor circinelloides* lipase in a micro-reactor equipped with water activity sensor 155
- Selenino
- Asymmetric synthesis of arylselenoalcohols by means of the reduction of organoseleno acetophenones by whole fungal cells 47
- Sesquiterpenes
- Regioselective enzymatic acylation of polyhydroxylated sesquiterpenoids 95
- Silane
- Influence of the alkyl-substituted silane precursor on sol-gel encapsulated lipase activity 69
- Silica
- Influence of the sol-gel chemistry on the activity of a lipase encapsulated in a silica aerogel 133
- Sitosterol side-chain cleavage
- Optimization of androstenedione production in an organic-aqueous two-liquid phase system 19
- Sol-gel
- Influence of the alkyl-substituted silane precursor on sol-gel encapsulated lipase activity 69
- Sol-gel chemistry
- Influence of the sol-gel chemistry on the activity of a lipase encapsulated in a silica aerogel 133
- Stereoselective bioreduction
- Process development of methylenedioxyphenyl-acetone chiral bioreduction 195
- Substituted naphthalenes
- Organic phase effect in the biphasic bioconversion of substituted naphthalenes by engineered *E. coli* containing *P. fluorescens* N3 dioxygenase 181
- $\alpha$ -Substituted-3-phenyl-1-propanol
- Baker's yeast mediated asymmetric reduction of cinnamaldehyde derivatives 41

- Subtilisin  
  Regioselective enzymatic acylation of *N*-acetylhexosamines 219
- Surfactants  
  Impact of surfactants on the biotransformation of methyl ricinoleate into  $\gamma$ -decalactone by *Yarrowia lipolytica* 31
- UF-membrane reactor  
  A study in UF-membrane reactor on activity and stability of nitrile hydratase from *Microbacterium imperiale* CBS 498-74 resting cells for propionamide production 105
- Unnatural substrate  
  Biocatalytic conversion of unnatural substrates by recombinant almond *R*-HNL isoenzyme 5 211
- Water activity  
  Sugar ester synthesis by a mycelium-bound *Mucor circinelloides* lipase in a micro-reactor equipped with water activity sensor 155
- Whole cell biocatalyst  
  Organic phase effect in the biphasic bioconversion of substituted naphthalenes by engineered *E. coli* containing *P. fluorescens* N3 dioxygenase 181
- Whole cells  
  Benzimidazole as deazapurine analogue for microbial transglycosylation 3
- Whole fungal cells  
  Asymmetric synthesis of arylselenoalcohols by means of the reduction of organoseleno acetophenones by whole fungal cells 47
- Whole-cell biocatalysis  
  Application of bacteria and fungi as biocatalysts for the preparation of optically active hydroxyphosphonates 99  
  Microbial models of animal drug metabolism. Part 5. Microbial preparation of human hydroxylated metabolites of irbesartan 173
- $\beta$ -xylosidase  
  Fungus  $\beta$ -glycosidases: immobilization and use in alkyl- $\beta$ -glycoside synthesis 89
- Yeast  
  Medium optimization for the production of the aroma compound 2-phenylethanol using a genetic algorithm 187
- Yeast cells  
  Impact of surfactants on the biotransformation of methyl ricinoleate into  $\gamma$ -decalactone by *Yarrowia lipolytica* 31
- Zygosaccharomyces rouxii*  
  Process development of methylenedioxyphenyl-acetone chiral bioreduction 195
