

Subject Index

Ab initio calculations

Aldol additions with mutant lipase: analysis by experiments and theoretical calculations 123

Aldolase

Aldol additions with mutant lipase: analysis by experiments and theoretical calculations 123

β -Amino propionitrile

A novel process for enzymatic synthesis of *N*-lauroyl- β -amino propionitrile using packed bed reactor coupled with on-line separation 111

Aspartic proteinases

Evaluation of cardosin A as a proteolytic probe in the presence of organic solvents 137

Asymmetric alcoholysis

The kinetic study on lipase-catalyzed asymmetric alcoholysis of α -cyano-benzyl acetate in organic media 67

Bacillus subtilis

Enantioselective lipase-catalyzed kinetic resolution of *N*-(2-ethyl-6-methylphenyl)alanine 117

Baeyer–Villiger oxidation

Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129

Benzaldehyde

In vitro bi-enzymatic synthesis of benzaldehyde from phenylalanine: practical and mechanistic studies 97

Bi-enzymatic synthesis

In vitro bi-enzymatic synthesis of benzaldehyde from phenylalanine: practical and mechanistic studies 97

Biocatalysis

Evaluation of the potential for use in biocatalysis of a lipase from a wild strain of *Bacillus megaterium* 53

A comparative molecular field analysis of the biotransformation of sulfides by *Rhodococcus erythropolis* 87

Comparison of cyclohexanone monooxygenase as an isolated enzyme and whole cell biocatalyst for the enantioselective oxidation of 1,3-dithiane 165

Biocatalytic reduction

Reduction of (+)- and (–)-camphorquinones by cyanobacteria 19

Chemo- and stereo-selective biocatalytic reduction of α,β -unsaturated ketones employing a chemo-tolerant ADH from *Rhodococcus ruber* DSM 44541 159

Biopharmaceuticals

Current strategies for in vitro protein glycosylation 73

Bioreduction

Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129

Biosensors

Glucose concentration determination by means of fluorescence emission spectra of soluble and insoluble glucose oxidase: some useful indications for optical fibre-based sensors 151

Biotransformation

Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129

BSL2

Enantioselective lipase-catalyzed kinetic resolution of *N*-(2-ethyl-6-methylphenyl)alanine 117

(–)-Camphorquinone

Reduction of (+)- and (–)-camphorquinones by cyanobacteria 19

(+)-Camphorquinone

Reduction of (+)- and (–)-camphorquinones by cyanobacteria 19

Candida rugosa lipase

Enhanced enantioselectivity of *Candida rugosa* lipase in ionic liquids as compared to organic solvents 39

Catalytic antibody

Chemical modification of a catalytic antibody that accelerates insertion of a metal ion into porphyrin: essential amino acid residues for the catalytic activity 9

Chemical modification

Chemical modification of a catalytic antibody that accelerates insertion of a metal ion into porphyrin: essential amino acid residues for the catalytic activity 9

Chemoenzymatic synthesis

Current strategies for in vitro protein glycosylation 73

Chemoselective

Chemo- and stereo-selective biocatalytic reduction of α,β -unsaturated ketones employing a chemo-tolerant ADH from *Rhodococcus ruber* DSM 44541 159

α -Chymotrypsin

Distinct effect of a cationic surfactant on the transient and steady state phases of 2-naphthyl acetate hydrolysis catalyzed by α -chymotrypsin 83

CoMFA

A comparative molecular field analysis of the biotransformation of sulfides by *Rhodococcus erythropolis* 87

Cyanobacteria

Reduction of (+)- and (–)-camphorquinones by cyanobacteria 19

α -Cyano-benzyl acetate

The kinetic study on lipase-catalyzed asymmetric alcoholysis of α -cyano-benzyl acetate in organic media 67

β -Cyclodextrin

Functional properties and application in peptide synthesis of trypsin modified with cyclodextrin-containing dicarboxylic acids 47

Cyclohexanone monooxygenase

Comparison of cyclohexanone monooxygenase as an isolated enzyme and whole cell biocatalyst for the enantioselective oxidation of 1,3-dithiane 165

D-amino acid oxidase

In vitro bi-enzymatic synthesis of benzaldehyde from phenylalanine: practical and mechanistic studies 97

Dehydrogenase

Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129

- Dodecyltrimethylammonium bromide
Distinct effect of a cationic surfactant on the transient and steady state phases of 2-naphthyl acetate hydrolysis catalyzed by α -chymotrypsin 83
- 3D-QSAR
A comparative molecular field analysis of the biotransformation of sulfides by *Rhodococcus erythropolis* 87
- Emission fluorescence spectra
Glucose concentration determination by means of fluorescence emission spectra of soluble and insoluble glucose oxidase: some useful indications for optical fibre-based sensors 151
- Enantioselective esterification
Enhanced enantioselectivity of *Candida rugosa* lipase in ionic liquids as compared to organic solvents 39
- Engineered whole cells
Comparison of cyclohexanone monooxygenase as an isolated enzyme and whole cell biocatalyst for the enantioselective oxidation of 1,3-dithiane 165
- Enzymatic separation
Enzymatic separation of hardly separable mixtures of structural isomers 103
- Enzymatic synthesis
A novel process for enzymatic synthesis of *N*-lauroyl- β -amino propionitrile using packed bed reactor coupled with on-line separation 111
- Enzyme catalysis
Evaluation of cardosin A as a proteolytic probe in the presence of organic solvents 137
- Enzyme stability
Functional properties and application in peptide synthesis of trypsin modified with cyclodextrin-containing dicarboxylic acids 47
Use of high acyl donor concentrations leads to penicillin acylase inactivation in the course of peptide synthesis 63
- (*S*)-(-)-*N*-(2-ethyl-6-methylphenyl)alanine
Enantioselective lipase-catalyzed kinetic resolution of *N*-(2-ethyl-6-methylphenyl)alanine 117
- Fungus
Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129
- Glucose concentration determination
Glucose concentration determination by means of fluorescence emission spectra of soluble and insoluble glucose oxidase: some useful indications for optical fibre-based sensors 151
- Glucose oxidase
Glucose concentration determination by means of fluorescence emission spectra of soluble and insoluble glucose oxidase: some useful indications for optical fibre-based sensors 151
- Glycopeptides
Current strategies for in vitro protein glycosylation 73
- Glycoproteins
Current strategies for in vitro protein glycosylation 73
- Hemiacetal esters
Hemiacetals and their esters as side-products in lipase-catalysed transesterifications of vinyl esters with sterically hindered alcohols 31
"Hybrid"
Reactions of "hybrid" Mn-peroxidase of the white rot fungus *Panus tigrinus* with benzylic alcohols in the presence of mediators 1
- Hydrolysis
Enantioselective lipase-catalyzed kinetic resolution of *N*-(2-ethyl-6-methylphenyl)alanine 117
Entrapment of lipase into K-carrageenan beads and its use in hydrolysis of olive oil in biphasic system 143
- Hydrolysis intermediates
Evaluation of cardosin A as a proteolytic probe in the presence of organic solvents 137
- Hydrophobicity
Enhanced enantioselectivity of *Candida rugosa* lipase in ionic liquids as compared to organic solvents 39
- 3-Hydroxyanthranilic acid
Determination of the activity of laccase, and mediated oxidation of a lignin model compound, in aqueous-organic mixed solvents 25
- Immobilization
Entrapment of lipase into K-carrageenan beads and its use in hydrolysis of olive oil in biphasic system 143
- Immobilized enzymes
Glucose concentration determination by means of fluorescence emission spectra of soluble and insoluble glucose oxidase: some useful indications for optical fibre-based sensors 151
- Inactivation by substrate
Use of high acyl donor concentrations leads to penicillin acylase inactivation in the course of peptide synthesis 63
- Ionic liquid
Enhanced enantioselectivity of *Candida rugosa* lipase in ionic liquids as compared to organic solvents 39
- K-carrageenan
Entrapment of lipase into K-carrageenan beads and its use in hydrolysis of olive oil in biphasic system 143
- Ketones
Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129
- Kinetic resolution
Enantioselective lipase-catalyzed kinetic resolution of *N*-(2-ethyl-6-methylphenyl)alanine 117
- Kinetics
The kinetic study on lipase-catalyzed asymmetric alcoholysis of α -cyano-benzyl acetate in organic media 67
- Laccase activity
Determination of the activity of laccase, and mediated oxidation of a lignin model compound, in aqueous-organic mixed solvents 25
- N*-Lauroyl- β -amino propionitrile
A novel process for enzymatic synthesis of *N*-lauroyl- β -amino propionitrile using packed bed reactor coupled with on-line separation 111
- Lipase
Hemiacetals and their esters as side-products in lipase-catalysed transesterifications of vinyl esters with sterically hindered alcohols 31
Evaluation of the potential for use in biocatalysis of a lipase from a wild strain of *Bacillus megaterium* 53
The kinetic study on lipase-catalyzed asymmetric alcoholysis of α -cyano-benzyl acetate in organic media 67
Enzymatic separation of hardly separable mixtures of structural isomers 103
A novel process for enzymatic synthesis of *N*-lauroyl- β -amino propionitrile using packed bed reactor coupled with on-line separation 111
Aldol additions with mutant lipase: analysis by experiments and theoretical calculations 123
Entrapment of lipase into K-carrageenan beads and its use in hydrolysis of olive oil in biphasic system 143
- Mediators
Reactions of "hybrid" Mn-peroxidase of the white rot fungus *Panus tigrinus* with benzylic alcohols in the presence of mediators 1
Determination of the activity of laccase, and mediated oxidation of a lignin model compound, in aqueous-organic mixed solvents 25

- Metalation**
Chemical modification of a catalytic antibody that accelerates insertion of a metal ion into porphyrin: essential amino acid residues for the catalytic activity 9
- Mixed solvents**
Determination of the activity of laccase, and mediated oxidation of a lignin model compound, in aqueous-organic mixed solvents 25
- Mn-peroxidase**
Reactions of "hybrid" Mn-peroxidase of the white rot fungus *Panus tigrinus* with benzylic alcohols in the presence of mediators 1
- Modified enzyme**
Functional properties and application in peptide synthesis of trypsin modified with cyclodextrin-containing dicarboxylic acids 47
- Monooxygenase**
Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129
- 2-Naphthyl acetate**
Distinct effect of a cationic surfactant on the transient and steady state phases of 2-naphthyl acetate hydrolysis catalyzed by α -chymotrypsin 83
- Olive oil**
Entrapment of lipase into K-carrageenan beads and its use in hydrolysis of olive oil in biphasic system 143
- Organic media**
The kinetic study on lipase-catalyzed asymmetric alcoholysis of α -cyano-benzyl acetate in organic media 67
A novel process for enzymatic synthesis of *N*-lauroyl- β -amino propionitrile using packed bed reactor coupled with on-line separation 111
- Oxyanion hole**
Aldol additions with mutant lipase: analysis by experiments and theoretical calculations 123
- Panus tigrinus***
Reactions of "hybrid" Mn-peroxidase of the white rot fungus *Panus tigrinus* with benzylic alcohols in the presence of mediators 1
- Penicillin acylase**
Use of high acyl donor concentrations leads to penicillin acylase inactivation in the course of peptide synthesis 63
- Peptide synthesis**
Functional properties and application in peptide synthesis of trypsin modified with cyclodextrin-containing dicarboxylic acids 47
- Peroxidase**
In vitro bi-enzymatic synthesis of benzaldehyde from phenylalanine: practical and mechanistic studies 97
- Phenols**
Evaluation of acetophenone monooxygenase and alcohol dehydrogenase activities in different fungal strains by biotransformation of acetophenone derivatives 129
- Phenylalanine**
In vitro bi-enzymatic synthesis of benzaldehyde from phenylalanine: practical and mechanistic studies 97
- Porphyrin**
Chemical modification of a catalytic antibody that accelerates insertion of a metal ion into porphyrin: essential amino acid residues for the catalytic activity 9
- Reaction specificity**
Aldol additions with mutant lipase: analysis by experiments and theoretical calculations 123
- Regio-selective hydrolysis**
Enzymatic separation of hardly separable mixtures of structural isomers 103
- Reversed micelles**
Evaluation of the potential for use in biocatalysis of a lipase from a wild strain of *Bacillus megaterium* 53
- Rhodococcus erythropolis***
A comparative molecular field analysis of the biotransformation of sulfides by *Rhodococcus erythropolis* 87
- Rhodococcus ruber***
Chemo- and stereo-selective biocatalytic reduction of α,β -unsaturated ketones employing a chemo-tolerant ADH from *Rhodococcus ruber* DSM 44541 159
- Selective modification**
Current strategies for in vitro protein glycosylation 73
- Solvent effects**
Evaluation of cardosin A as a proteolytic probe in the presence of organic solvents 137
- Specificity**
Evaluation of cardosin A as a proteolytic probe in the presence of organic solvents 137
- Spectrophotometric assay**
Determination of the activity of laccase, and mediated oxidation of a lignin model compound, in aqueous-organic mixed solvents 25
- Stability**
Evaluation of the potential for use in biocatalysis of a lipase from a wild strain of *Bacillus megaterium* 53
- Stereoselective**
Chemo- and stereo-selective biocatalytic reduction of α,β -unsaturated ketones employing a chemo-tolerant ADH from *Rhodococcus ruber* DSM 44541 159
- Stereoselectivity**
Reduction of (+)- and (–)-camphorquinones by cyanobacteria 19
- Sterically hindered alcohol**
Hemiacetals and their esters as side-products in lipase-catalysed transesterifications of vinyl esters with sterically hindered alcohols 31
- Structural isomer**
Enzymatic separation of hardly separable mixtures of structural isomers 103
- Sulfoxide**
A comparative molecular field analysis of the biotransformation of sulfides by *Rhodococcus erythropolis* 87
- Sulphide oxidation**
Comparison of cyclohexanone monooxygenase as an isolated enzyme and whole cell biocatalyst for the enantioselective oxidation of 1,3-dithiane 165
- Trypsin**
Functional properties and application in peptide synthesis of trypsin modified with cyclodextrin-containing dicarboxylic acids 47
- Water activity**
Enhanced enantioselectivity of *Candida rugosa* lipase in ionic liquids as compared to organic solvents 39
