

## Subject Index

- Activation of subtilisin Carlsberg  
Activation of subtilisin Carlsberg in hexane by lyophilization in the presence of fumed silica 18
- Additive  
Thermal stabilization of trypsin with glycol chitosan 14
- Alginate-carrageenan matrices  
Study of the deactivation of  $\beta$ -galactosidase entrapped in alginate-carrageenan gels 7
- AOT  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44
- Bicyclo[3.2.0]-hept-2-en-6-one  
Comparative study of the properties of wild type and recombinant cyclohexanone monooxygenase, an enzyme of synthetic interest 1
- Biocatalysis  
A comparative study of the synthesis of *n*-butyl-oleate using a crude lipolytic extract of *Penicillium coryophilum* in water-restricted environments 25
- Biocatalyst deactivation  
Study of the deactivation of  $\beta$ -galactosidase entrapped in alginate-carrageenan gels 7
- Cardanol  
Synthesis of polycardanol from a renewable resource using a fungal peroxidase from *Coprinus cinereus* 33
- Carica papaya*  
Enantioselective hydrolysis of (*R,S*)-naproxen 2,2,2-trifluoroethyl ester in water-saturated solvents via lipases from *Carica pentagona* Heilborn and *Carica papaya* 51
- Carica pentagona* Heilborn  
Enantioselective hydrolysis of (*R,S*)-naproxen 2,2,2-trifluoroethyl ester in water-saturated solvents via lipases from *Carica pentagona* Heilborn and *Carica papaya* 51
- CGTase  
Production of cyclodextrin by poly-lysine fused *Bacillus macerans* cyclodextrin glycosyltransferase immobilized on cation exchanger 39
- Coprinus cinereus*  
Synthesis of polycardanol from a renewable resource using a fungal peroxidase from *Coprinus cinereus* 33
- Cyclodextrin  
Production of cyclodextrin by poly-lysine fused *Bacillus macerans* cyclodextrin glycosyltransferase immobilized on cation exchanger 39
- Cyclohexanone monooxygenase  
Comparative study of the properties of wild type and recombinant cyclohexanone monooxygenase, an enzyme of synthetic interest 1
- Enzymatic polymerization  
Synthesis of polycardanol from a renewable resource using a fungal peroxidase from *Coprinus cinereus* 33
- Enzyme entrapment  
Study of the deactivation of  $\beta$ -galactosidase entrapped in alginate-carrageenan gels 7
- Enzyme purification  
Comparative study of the properties of wild type and recombinant cyclohexanone monooxygenase, an enzyme of synthetic interest 1
- Enzyme stability  
Thermal stabilization of trypsin with glycol chitosan 14
- Fumed silica  
Activation of subtilisin Carlsberg in hexane by lyophilization in the presence of fumed silica 18
- Gelatin  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44
- Glycol chitosan  
Thermal stabilization of trypsin with glycol chitosan 14
- Hexane  
Activation of subtilisin Carlsberg in hexane by lyophilization in the presence of fumed silica 18
- Hydrolytic resolution  
Enantioselective hydrolysis of (*R,S*)-naproxen 2,2,2-trifluoroethyl ester in water-saturated solvents via lipases from *Carica pentagona* Heilborn and *Carica papaya* 51
- Immobilization  
Activation of subtilisin Carlsberg in hexane by lyophilization in the presence of fumed silica 18  
Production of cyclodextrin by poly-lysine fused *Bacillus macerans* cyclodextrin glycosyltransferase immobilized on cation exchanger 39
- Lipases  
A comparative study of the synthesis of *n*-butyl-oleate using a crude lipolytic extract of *Penicillium coryophilum* in water-restricted environments 25  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44  
Enantioselective hydrolysis of (*R,S*)-naproxen 2,2,2-trifluoroethyl ester in water-saturated solvents via lipases from *Carica pentagona* Heilborn and *Carica papaya* 51
- Low-water systems  
A comparative study of the synthesis of *n*-butyl-oleate using a crude lipolytic extract of *Penicillium coryophilum* in water-restricted environments 25
- Lyophilization  
Activation of subtilisin Carlsberg in hexane by lyophilization in the presence of fumed silica 18
- Microemulsion  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44

- (S)-Naproxen  
Enantioselective hydrolysis of (R,S)-naproxen 2,2,2-trifluoroethyl ester in water-saturated solvents via lipases from *Carica pentagona* Heilborn and *Carica papaya* 51
- Organogels  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44
- Packed-bed enzyme reactor  
Production of cyclodextrin by poly-lysine fused *Bacillus macerans* cyclodextrin glycosyltransferase immobilized on cation exchanger 39
- Packed-bed reactor model  
Study of the deactivation of  $\beta$ -galactosidase entrapped in alginate-carrageenan gels 7
- Penicillium coryophilum*  
A comparative study of the synthesis of *n*-butyl-oleate using a crude lipolytic extract of *Penicillium coryophilum* in water-restricted environments 25
- Peroxidase  
Synthesis of polycardanol from a renewable resource using a fungal peroxidase from *Coprinus cinereus* 33
- Poly-lysine  
Production of cyclodextrin by poly-lysine fused *Bacillus macerans* cyclodextrin glycosyltransferase immobilized on cation exchanger 39
- Protein loss  
Study of the deactivation of  $\beta$ -galactosidase entrapped in alginate-carrageenan gels 7
- Recombinant microorganism  
Comparative study of the properties of wild type and recombinant cyclohexanone monooxygenase, an enzyme of synthetic interest 1
- Renewable resource  
Synthesis of polycardanol from a renewable resource using a fungal peroxidase from *Coprinus cinereus* 33
- Reverse micelles  
A comparative study of the synthesis of *n*-butyl-oleate using a crude lipolytic extract of *Penicillium coryophilum* in water-restricted environments 25
- Trypsin  
Thermal stabilization of trypsin with glycol chitosan 14
- Tween 85  
Enhanced activity of *Mucor javanicus* lipase in polyoxyethylene sorbitan trioleate containing microemulsion-based organogels 44
