

Subject Index

- 1- β -D-Arabinofuranosylcytosine
Novozym 435-catalyzed regioselective acylation of 1- β -D-arabinofuranosylcytosine in a co-solvent mixture of pyridine and isopropyl ether 48
- Acrylonitrile copolymers
Immobilization of glucose oxidase by acrylonitrile copolymer coated silica supports 59
- D- β -Acetylthioisobutyric acid
Enzymatic resolution of methyl DL- β -acetylthioisobutyrate and DL- β -acetylthioisobutyramide using a stereoselective esterase from *Pseudomonas putida* IFO12996 163
- Acyloin condensation
Preparative enantioselective synthesis of benzoin and (*R*)-2-hydroxy-1-phenylpropanone using benzaldehyde lyase 43
- Additives
Enhancement of enantioselectivity in lipase-catalyzed resolution of *N*-(2-ethyl-6-methylphenyl)alanine by additives 17
- Adsorption
Invertase reversibly immobilized onto polyethylenimine-grafted poly(GMA–MMA) beads for sucrose hydrolysis 131
- Affinity beads
Invertase reversibly immobilized onto polyethylenimine-grafted poly(GMA–MMA) beads for sucrose hydrolysis 131
- Alcohol
Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- Alcohol inhibition
The *Candida rugosa* lipase catalyzed synthesis of amyl isobutyrate in organic solvent and solvent-free system: A kinetic study 11
- Alcohol oxidase
Substrate specificity of membrane-bound alcohol oxidase from the tobacco hornworm moth (*Manduca sexta*) female pheromone glands 37
- Aldehydes
Substrate specificity of membrane-bound alcohol oxidase from the tobacco hornworm moth (*Manduca sexta*) female pheromone glands 37
Preparative enantioselective synthesis of benzoin and (*R*)-2-hydroxy-1-phenylpropanone using benzaldehyde lyase 43
- Arylamine
Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104
- Aspergillus niger
Commercial enzyme preparations catalyze feruloylation of glycosides 54
- Aspergillus oryzae protease
Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73
- Asymmetrization
Comparison of the chiral recognition of prochiral substrates in the acetylation reaction by a novel lipase (CSL) from the yeast, *Cryptococcus* spp. S-2 with immobilized PPL. Enzyme-catalyzed desymmetrization and asymmetrization of prochiral 2-substituted 1,3-propanediols by CSL and immobilized PPL 1
- AtNIT1
Selective hydrolysis of the nitrile group of *cis*-dihydrodiols from aromatic nitriles 76
- Benzaldehyde lyase
Preparative enantioselective synthesis of benzoin and (*R*)-2-hydroxy-1-phenylpropanone using benzaldehyde lyase 43
- Bicyclic
A novel resolution of a pharmaceutically important bridged bicyclic ketone intermediate via selective enzymatic reduction with a commercially available ketoreductase 158
- Biocatalysis
Selective hydrolysis of the nitrile group of *cis*-dihydrodiols from aromatic nitriles 76
- Biooxidation
Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- Bioreduction
Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- Biotransformation
Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- Biotransformations
Selective hydrolysis of the nitrile group of *cis*-dihydrodiols from aromatic nitriles 76
- Biphasic system
Substrate specificity of membrane-bound alcohol oxidase from the tobacco hornworm moth (*Manduca sexta*) female pheromone glands 37
- Bridged
A novel resolution of a pharmaceutically important bridged bicyclic ketone intermediate via selective enzymatic reduction with a commercially available ketoreductase 158
- Burkholderia cepacia* lipase
Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139

- Candida antarctica* B lipase
Enhancement of enantioselectivity in lipase-catalyzed resolution of *N*-(2-ethyl-6-methylphenyl)alanine by additives 17
- Candida rugosa* lipase
The *Candida rugosa* lipase catalyzed synthesis of amyl isobutyrate in organic solvent and solvent-free system: A kinetic study 11
- Captopril
Enzymatic resolution of methyl DL- β -acetylthioisobutyrate and DL- β -acetylthioisobutyramide using a stereoselective esterase from *Pseudomonas putida* IFO12996 163
- Chemical modification
Chemical modification of papain for use in alkaline medium 171
- Chiral terpene
Enzymatic reduction of the α , β -unsaturated carbon bond in citral 126
- Chloroperoxidase
Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65
- CLEC
Preparation and characterization of cross-linked enzyme crystals of laccase 31
- Coatings
Immobilization of glucose oxidase by acrylonitrile copolymer coated silica supports 59
- Condensation
Comparison between various commercial sources of almond β -glucosidase for the production of alkyl glucosides 91
- Configuration
Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148
- Co-solvent mixture
Novozym 435-catalyzed regioselective acylation of 1- β -D-arabinofuranosylcytosine in a co-solvent mixture of pyridine and isopropyl ether 48
- Cross-linking
Preparation and characterization of cross-linked enzyme crystals of laccase 31
- Cryptococcus*
Comparison of the chiral recognition of prochiral substrates in the acetylation reaction by a novel lipase (CSL) from the yeast, *Cryptococcus* spp. S-2 with immobilized PPL. Enzyme-catalyzed desymmetrization and asymmetrization of prochiral 2-substituted 1,3-propanediols by CSL and immobilized PPL 1
- Crystallization
Preparation and characterization of cross-linked enzyme crystals of laccase 31
- Dendritic composite silica
Preparation and characterization of dendritic composite magnetic particles as a novel enzyme immobilization carrier 24
- Desymmetrization
Comparison of the chiral recognition of prochiral substrates in the acetylation reaction by a novel lipase (CSL) from the yeast, *Cryptococcus* spp. S-2 with immobilized PPL. Enzyme-catalyzed desymmetrization and asymmetrization of prochiral 2-substituted 1,3-propanediols by CSL and immobilized PPL 1
Chemical modification of papain for use in alkaline medium 171
- Dihydrodiols
Selective hydrolysis of the nitrile group of *cis*-dihydrodiols from aromatic nitriles 76
- Directed evolution
Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148
- Enantioselective hydrolysis
Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73
- Enantioselectivity
Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148
- Enantioselectivity enhancement
Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73
- Enzymatic acylation
Novozym 435-catalyzed regioselective acylation of 1- β -D-arabinofuranosylcytosine in a co-solvent mixture of pyridine and isopropyl ether 48
- Enzymatic carboligation
Preparative enantioselective synthesis of benzoin and (*R*)-2-hydroxy-1-phenylpropanone using benzaldehyde lyase 43
- Enzymatic reduction of citral to citronellal
Enzymatic reduction of the α , β -unsaturated carbon bond in citral 126
- Enzymatic resolution
Enzymatic resolution of methyl DL- β -acetylthioisobutyrate and DL- β -acetylthioisobutyramide using a stereoselective esterase from *Pseudomonas putida* IFO12996 163
- Enzyme aggregate
Stabilisation of oxygen-labile nitrilases via co-aggregation with poly(ethyleneimine) 154
- Enzyme inactivation
Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65
- Enzyme kinetics
Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73
- Enzyme reactor
Invertase reversibly immobilized onto polyethylenimine-grafted poly(GMA-MMA) beads for sucrose hydrolysis 131
- Esterification
The *Candida rugosa* lipase catalyzed synthesis of amyl isobutyrate in organic solvent and solvent-free system: A kinetic study 11
- Esterification of secondary alcohol
Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139
- Feruloylated glycosides
Commercial enzyme preparations catalyse feruloylation of glycosides 54
- Funastrain
Study of phytoproteases stability in aqueous-organic biphasic systems using linear free energy relationships 95
- Fusarium proliferatum*
Enzymatic transformation of ginsenoside Rg₃ to Rh₂ using newly isolated *Fusarium proliferatum* ECU2042 113
- Ginseng saponin
Enzymatic transformation of ginsenoside Rg₃ to Rh₂ using newly isolated *Fusarium proliferatum* ECU2042 113
- Ginsenoside Rg₃
Enzymatic transformation of ginsenoside Rg₃ to Rh₂ using newly isolated *Fusarium proliferatum* ECU2042 113
- Ginsenoside Rh₂
Enzymatic transformation of ginsenoside Rg₃ to Rh₂ using newly isolated *Fusarium proliferatum* ECU2042 113
- Glass
Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104
- Glucose oxidase
Immobilization of glucose oxidase by acrylonitrile copolymer coated silica supports 59
- Glucosidase
Comparison between various commercial sources of almond β -glucosidase for the production of alkyl glucosides 91
- β -Glucosidase
Enzymatic transformation of ginsenoside Rg₃ to Rh₂ using newly isolated *Fusarium proliferatum* ECU2042 113
- Glucoside
Comparison between various commercial sources of almond β -glucosidase for the production of alkyl glucosides 91

Humicola insolens

- Commercial enzyme preparations catalyse feruloylation of glycosides 54
- Hydrolysis of secondary alcohol ester
 - Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139

Immobilization

- Preparation and characterization of dendritic composite magnetic particles as a novel enzyme immobilization carrier 24
- Immobilization of glucose oxidase by acrylonitrile copolymer coated silica supports 59
- Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104
- Resolution of *N*-(2-ethyl-6-methylphenyl)alanine via free and immobilized lipase from *Pseudomonas cepacia* 119
- Chemical modification of papain for use in alkaline medium 171

Immobilized-enzyme

- Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65
- Invertase reversibly immobilized onto polyethylenimine-grafted poly(GMA–MMA) beads for sucrose hydrolysis 131

Insects

- Substrate specificity of membrane-bound alcohol oxidase from the tobacco hornworm moth (*Manduca sexta*) female pheromone glands 37

Invertase

- Invertase reversibly immobilized onto polyethylenimine-grafted poly(GMA–MMA) beads for sucrose hydrolysis 131

Isobutyl ester

- Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73

Ketone

- Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- A novel resolution of a pharmaceutically important bridged bicyclic ketone intermediate via selective enzymatic reduction with a commercially available ketoreductase 158

Ketoreductase

- A novel resolution of a pharmaceutically important bridged bicyclic ketone intermediate via selective enzymatic reduction with a commercially available ketoreductase 158

Kinetic parameters

- Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65

Kinetics

- Preparation and characterization of cross-linked enzyme crystals of laccase 31

Laccase

- Preparation and characterization of cross-linked enzyme crystals of laccase 31

LFERS

- Study of phytoproteases stability in aqueous-organic biphasic systems using linear free energy relationships 95

Lipase

- Comparison of the chiral recognition of prochiral substrates in the acetylation reaction by a novel lipase (CSL) from the yeast, *Cryptococcus* spp. S-2 with immobilized PPL. Enzyme-catalyzed desymmetrization and asymmetrization of prochiral 2-substituted 1,3-propanediols by CSL and immobilized PPL 1

Lipase catalysis proton transfer

- Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139

Magnetic microparticle

- Preparation and characterization of dendritic composite magnetic particles as a novel enzyme immobilization carrier 24

Molecular modelling

- Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139

Mutant

- Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148

Nitrilase

- Stabilisation of oxygen-labile nitrilases via co-aggregation with poly(ethyleneimine) 154

Nitrile hydrolysis

- Selective hydrolysis of the nitrile group of *cis*-dihydrodiols from aromatic nitriles 76

2-Octanol acetate

- Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148

Organic solvent

- Preparation and characterization of cross-linked enzyme crystals of laccase 31

Organic/aqueous two-phase biotransformation

- Enzymatic reduction of the α , β -unsaturated carbon bond in citral 126

Oxygen tolerance

- Stabilisation of oxygen-labile nitrilases via co-aggregation with poly(ethyleneimine) 154

Papain

- Study of phytoproteases stability in aqueous-organic biphasic systems using linear free energy relationships 95
- Chemical modification of papain for use in alkaline medium 171

pH effect

- Studies on the enhancement of enantioselectivity in the microbial protease-catalyzed hydrolysis of *N*-free non-protein amino acid esters 73

Phytoproteases

- Study of phytoproteases stability in aqueous-organic biphasic systems using linear free energy relationships 95

Pigeonpea (*Cajanus cajan*)

- Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104

Ping-pong bi-bi kinetics

- The *Candida rugosa* lipase catalyzed synthesis of amyl isobutyrate in organic solvent and solvent-free system: A kinetic study 11

Plants

- Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84

Polyethyleneimine

- Stabilisation of oxygen-labile nitrilases via co-aggregation with poly(ethyleneimine) 154

Porcine pancreas lipase

- Preparation and characterization of dendritic composite magnetic particles as a novel enzyme immobilization carrier 24

Potentiometry

- Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104

Pseudomonas cepacia lipase

- Resolution of *N*-(2-ethyl-6-methylphenyl)alanine via free and immobilized lipase from *Pseudomonas cepacia* 119

Quantum mechanical study

- Quantum mechanical study of *Burkholderia cepacia* lipase enantioselectivity 139

Recyclable

- Preparation and characterization of dendritic composite magnetic particles as a novel enzyme immobilization carrier 24

Regioselectivity

- Novozym 435-catalyzed regioselective acylation of 1- β -D-arabinofuranosylcytosine in a co-solvent mixture of pyridine and isopropyl ether 48

- Resolution
 Enhancement of enantioselectivity in lipase-catalyzed resolution of *N*-(2-ethyl-6-methylphenyl)alanine by additives 17
 Resolution of *N*-(2-ethyl-6-methylphenyl)alanine via free and immobilized lipase from *Pseudomonas cepacia* 119
- Root
 Edible catalysts for clean chemical reactions: Bioreduction of aromatic ketones and biooxidation of secondary alcohols using plants 84
- SBA-15
 Resolution of *N*-(2-ethyl-6-methylphenyl)alanine via free and immobilized lipase from *Pseudomonas cepacia* 119
- Screening
 Study on the relationship between structure and enantioselectivity of a hyperthermophilic esterase from archaeon *Aeropyrum pernix* K1 148
- Silica gel
 Immobilization of glucose oxidase by acrylonitrile copolymer coated silica supports 59
- (*S*)-*N*-(2-ethyl-6-methylphenyl)alanine
 Enhancement of enantioselectivity in lipase-catalyzed resolution of *N*-(2-ethyl-6-methylphenyl)alanine by additives 17
 Resolution of *N*-(2-ethyl-6-methylphenyl)alanine via free and immobilized lipase from *Pseudomonas cepacia* 119
- Stability
 Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104
- Stereoselective
 A novel resolution of a pharmaceutically important bridged bicyclic ketone intermediate via selective enzymatic reduction with a commercially available ketoreductase 158
- 2-Substituted 1,3-propanediol
 Comparison of the chiral recognition of prochiral substrates in the acetylation reaction by a novel lipase (CSL) from the yeast, *Cryptococcus* spp. S-2 with immobilized PPL. Enzyme-catalyzed desymmetrization and asymmetrization of prochiral 2-substituted 1,3-propanediols by CSL and immobilized PPL 1
- Suicide substrate
 Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65
- Synthesis
 Comparison between various commercial sources of almond β -glucosidase for the production of alkyl glucosides 91
- Thermal stability
 Preparation and characterization of cross-linked enzyme crystals of laccase 31
- Thermomyces lanuginosus*
 Commercial enzyme preparations catalyse feruloylation of glycosides 54
- Thiamine-diphosphate
 Preparative enantioselective synthesis of benzoin and (*R*)-2-hydroxy-1-phenylpropanone using benzaldehyde lyase 43
- Time course
 Inactivation studies on native and silica gel non-homogeneous immobilized chloroperoxidase 65
- Transesterification
 Commercial enzyme preparations catalyse feruloylation of glycosides 54
- α , β -Unsaturated carbonyl
 Enzymatic reduction of the α , β -unsaturated carbon bond in citral 126
- Urease
 Improved stability of urease upon coupling to alkylamine and arylamine glass and its analytical use 104
- Vinyl acetate
 Novozym 435-catalyzed regioselective acylation of 1- β -D-arabinofuranosylcytosine in a co-solvent mixture of pyridine and isopropyl ether 48
- Washing detergents
 Chemical modification of papain for use in alkaline medium 171
- Zymomonas mobilis*
 Enzymatic reduction of the α , β -unsaturated carbon bond in citral 126
