

Subject Index

- Activity**
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
Enhanced activity and stability of ionic liquid-pretreated lipase 118
- α -N-Acetylgalactosaminidase**
Enzymatic synthesis of the Tn antigen 128
- Adsorption**
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
- Aminoquinone**
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
- Arbutin**
Oxidative coupling reaction of arbutin and gentisate catalyzed by horseradish peroxidase 50
- Aroma esters**
The effect of substrate polarity on the lipase-catalyzed synthesis of aroma esters in solvent-free systems 97
- Arylmalonate decarboxylase**
Inversion of enantioselectivity of arylmalonate decarboxylase via site-directed mutation based on the proposed reaction mechanism 15
- Aspergillus aculeatus***
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
- Aspergillus terreus***
Biotransformation of β -hydroxyphenyl selenides, diphenyldiselenide and benzeneseleninic acid by whole cells of *Aspergillus terreus* 135
- Biocatalysis**
Cartridge filter systems containing immobilized enzymes. Part I. Concept and features 1
- Biodiesel**
Cloning, expression and characterization of a novel thermal stable and short-chain alcohol tolerant lipase from *Burkholderia cepacia* strain G63 91
Optimization of whole cell-catalyzed methanolysis of soybean oil for biodiesel production using response surface methodology 122
- Biomethylation**
Biotransformation of β -hydroxyphenyl selenides, diphenyldiselenide and benzeneseleninic acid by whole cells of *Aspergillus terreus* 135
- Biotransformation**
Biotransformation of α -bromo and α,α' -dibromo alkanone to α -hydroxyketone and α -diketone by *Spirulina platensis* 68
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
Biotransformation of β -hydroxyphenyl selenides, diphenyldiselenide and benzeneseleninic acid by whole cells of *Aspergillus terreus* 135
- Bromo cycloalkanone**
Biotransformation of α -bromo and α,α' -dibromo alkanone to α -hydroxyketone and α -diketone by *Spirulina platensis* 68
- Burkholderia cepacia***
Cloning, expression and characterization of a novel thermal stable and short-chain alcohol tolerant lipase from *Burkholderia cepacia* strain G63 91
- Candida antarctica***
Functional expression of lipase A from *Candida antarctica* in *Escherichia coli*—A prerequisite for high-throughput screening and directed evolution 62
- Candida antarctica* lipase A**
Enantioselective resolution of methyl 2-chloromandelate by *Candida antarctica* lipase A in a solvent-free transesterification reaction 34
- Capillary electrophoresis of oligosaccharides**
Enzymatic synthesis of the Tn antigen 128
- Capillary zone electrophoresis**
Phenols removal in musts: Strategy for wine stabilization by laccase 102
- Cardanol**
Enzymatic epoxidation and polymerization of cardanol obtained from a renewable resource and curing of epoxide-containing polycardanol 39
- Cartridge filter reaction system**
Cartridge filter systems containing immobilized enzymes. Part I. Concept and features 1
- Cellulase**
Improving the stability of cellulase by immobilization on modified polyvinyl alcohol coated chitosan beads 10
- Chaperone co-expression**
Functional expression of lipase A from *Candida antarctica* in *Escherichia coli*—A prerequisite for high-throughput screening and directed evolution 62
- Chitosan**
Improving the stability of cellulase by immobilization on modified polyvinyl alcohol coated chitosan beads 10
- α -Chymotrypsin**
Covalent binding of α -chymotrypsin on the magnetic nanogels covered by amino groups 84
- CLA ester**
Convenient enzymatic preparation of conjugated linoleic acid alkyl esters with C6–C22 alcohols 45
- Coimmobilization**
Using ionic liquids to stabilize lipase within sol–gel derived silica 57
- Comparison**
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
- Conjugated linoleic acid ester**
Convenient enzymatic preparation of conjugated linoleic acid alkyl esters with C6–C22 alcohols 45
- Coupling**
Oxidative coupling reaction of arbutin and gentisate catalyzed by horseradish peroxidase 50
- Cryptococcus laurentii***
Exploration of transfructosylation activity in cell walls from *Cryptococcus laurentii* for production of functionalised β -D-fructofuranosides 27
- Dibromo cycloalkanone**
Biotransformation of α -bromo and α,α' -dibromo alkanone to α -hydroxyketone and α -diketone by *Spirulina platensis* 68

- Enantioselectivity inversion
Inversion of enantioselectivity of arylmalonate decarboxylase via site-directed mutation based on the proposed reaction mechanism 15
- Enzymatic synthesis
Enzymatic synthesis of the Tn antigen 128
- Epichlorohydrin
Improving the stability of cellulase by immobilization on modified polyvinyl alcohol coated chitosan beads 10
- Epoxide-containing polycardanol
Enzymatic epoxidation and polymerization of cardanol obtained from a renewable resource and curing of epoxide-containing polycardanol 39
- Escherichia coli*
Functional expression of lipase A from *Candida antarctica* in *Escherichia coli*—A prerequisite for high-throughput screening and directed evolution 62
- Esterification
Convenient enzymatic preparation of conjugated linoleic acid alkyl esters with C6–C22 alcohols 45
- Eupergit C
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
- β -D-Fructofuranosidase
Exploration of transfructosylation activity in cell walls from *Cryptococcus laurentii* for production of functionalised β -D-fructofuranosides 27
- β -D-Fructofuranosides
Exploration of transfructosylation activity in cell walls from *Cryptococcus laurentii* for production of functionalised β -D-fructofuranosides 27
- Functional expression
Functional expression of lipase A from *Candida antarctica* in *Escherichia coli*—A prerequisite for high-throughput screening and directed evolution 62
- Galactooligosaccharides
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
- β -Galactosidase
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
- Gentisate
Oxidative coupling reaction of arbutin and gentisate catalyzed by horseradish peroxidase 50
- Glycoside
Oxidative coupling reaction of arbutin and gentisate catalyzed by horseradish peroxidase 50
- Histidine
Oriented immobilization of stem bromelain via the lone histidine on a metal affinity support 78
- Hydrolysis
Enhanced activity and stability of ionic liquid-pretreated lipase 118
- α -Hydroxyketone
Biotransformation of α -bromo and α,α' -dibromo alkanone to α -hydroxyketone and α -diketone by *Spirulina platensis* 68
- Immobilization
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
- Immobilized enzyme
Cartridge filter systems containing immobilized enzymes. Part I. Concept and features 1
Covalent binding of α -chymotrypsin on the magnetic nanogels covered by amino groups 84
- Ionic liquids
Using ionic liquids to stabilize lipase within sol–gel derived silica 57
Enhanced activity and stability of ionic liquid-pretreated lipase 118
- Laccase
Phenols removal in musts: Strategy for wine stabilization by laccase 102
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
- Laccase–mediator system
Differences in stereo-preference in the oxidative degradation of diastereomers of the lignin model compound 1-(3,4-dimethoxyphenyl)-2-(2-methoxyphenoxy)-1,3-propanediol with enzymic and non-enzymic oxidants 21
- β -O-4 lignin model compound
Differences in stereo-preference in the oxidative degradation of diastereomers of the lignin model compound 1-(3,4-dimethoxyphenyl)-2-(2-methoxyphenoxy)-1,3-propanediol with enzymic and non-enzymic oxidants 21
- Lignin peroxidase
Differences in stereo-preference in the oxidative degradation of diastereomers of the lignin model compound 1-(3,4-dimethoxyphenyl)-2-(2-methoxyphenoxy)-1,3-propanediol with enzymic and non-enzymic oxidants 21
- Lipase
Enzymatic epoxidation and polymerization of cardanol obtained from a renewable resource and curing of epoxide-containing polycardanol 39
Convenient enzymatic preparation of conjugated linoleic acid alkyl esters with C6–C22 alcohols 45
Using ionic liquids to stabilize lipase within sol–gel derived silica 57
Functional expression of lipase A from *Candida antarctica* in *Escherichia coli*—A prerequisite for high-throughput screening and directed evolution 62
Cloning, expression and characterization of a novel thermal stable and short-chain alcohol tolerant lipase from *Burkholderia cepacia* strain G63 91
The effect of substrate polarity on the lipase-catalyzed synthesis of aroma esters in solvent-free systems 97
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
Enhanced activity and stability of ionic liquid-pretreated lipase 118
Optimization of whole cell-catalyzed methanolysis of soybean oil for biodiesel production using response surface methodology 122
- Log *P*
The effect of substrate polarity on the lipase-catalyzed synthesis of aroma esters in solvent-free systems 97
- Magnetic nanogels
Covalent binding of α -chymotrypsin on the magnetic nanogels covered by amino groups 84
- Maleic anhydride
Improving the stability of cellulase by immobilization on modified polyvinyl alcohol coated chitosan beads 10
- Metal affinity
Oriented immobilization of stem bromelain via the lone histidine on a metal affinity support 78
- Methanolysis
Optimization of whole cell-catalyzed methanolysis of soybean oil for biodiesel production using response surface methodology 122
- Methyl (*R*)-2-chloromandelate
Enantioselective resolution of methyl 2-chloromandelate by *Candida antarctica* lipase A in a solvent-free transesterification reaction 34
- Must
Phenols removal in musts: Strategy for wine stabilization by laccase 102
- Mutagenesis
Inversion of enantioselectivity of arylmalonate decarboxylase via site-directed mutation based on the proposed reaction mechanism 15
- Nuclear amination
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113

- Organic solvent
Cloning, expression and characterization of a novel thermal stable and short-chain alcohol tolerant lipase from *Burkholderia cepacia* strain G63 91
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
- Oriented immobilization
Oriented immobilization of stem bromelain via the lone histidine on a metal affinity support 78
- Oxidation
Differences in stereo-preference in the oxidative degradation of diastereomers of the lignin model compound 1-(3,4-dimethoxyphenyl)-2-(2-methoxyphenoxy)-1,3-propanediol with enzymic and non-enzymic oxidants 21
- Pectinex Ultra SP-L
Immobilization of Pectinex Ultra SP-L to produce galactooligosaccharides 73
- Penicillin G acylase
Cartridge filter systems containing immobilized enzymes. Part I. Concept and features 1
- Peroxidase
Enzymatic epoxidation and polymerization of cardanol obtained from a renewable resource and curing of epoxide-containing polycardanol 39
Oxidative coupling reaction of arbutin and gentisate catalyzed by horseradish peroxidase 50
- Phenols
Phenols removal in musts: Strategy for wine stabilization by laccase 102
- Photochemical polymerization
Covalent binding of α -chymotrypsin on the magnetic nanogels covered by amino groups 84
- Pig Liver Esterase
Cartridge filter systems containing immobilized enzymes. Part I. Concept and features 1
- Polyvinyl alcohol
Improving the stability of cellulase by immobilization on modified polyvinyl alcohol coated chitosan beads 10
- Reaction
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
- Reaction mechanism
Inversion of enantioselectivity of arylmalonate decarboxylase via site-directed mutation based on the proposed reaction mechanism 15
- Rhizomucor miehei*
The effect of substrate polarity on the lipase-catalyzed synthesis of aroma esters in solvent-free systems 97
- Selenides
Biotransformation of β -hydroxyphenyl selenides, diphenyldiselenide and benzeneseleninic acid by whole cells of *Aspergillus terreus* 135
- Sodium iodate
Nuclear amination catalyzed by fungal laccases: Comparison of laccase catalyzed amination with known chemical routes to aminoquinones 113
- Sol-gel
Using ionic liquids to stabilize lipase within sol-gel derived silica 57
- Solvent free condition
Convenient enzymatic preparation of conjugated linoleic acid alkyl esters with C6-C22 alcohols 45
- Solvent-free reaction
Enantioselective resolution of methyl 2-chloromandelate by *Candida antarctica* lipase A in a solvent-free transesterification reaction 34
- Solvent-free synthesis
The effect of substrate polarity on the lipase-catalyzed synthesis of aroma esters in solvent-free systems 97
- Spirulina platensis*
Biotransformation of α -bromo and α,α' -dibromo alkanone to α -hydroxyketone and α -diketone by *Spirulina platensis* 68
- Stability
Enhanced activity and stability of immobilized lipases by treatment with polar solvents prior to lyophilization 108
Enhanced activity and stability of ionic liquid-pretreated lipase 118
- Stem bromelain
Oriented immobilization of stem bromelain via the lone histidine on a metal affinity support 78
- Stereo-preference
Differences in stereo-preference in the oxidative degradation of diastereomers of the lignin model compound 1-(3,4-dimethoxyphenyl)-2-(2-methoxyphenoxy)-1,3-propanediol with enzymic and non-enzymic oxidants 21
- Temperature
Cloning, expression and characterization of a novel thermal stable and short-chain alcohol tolerant lipase from *Burkholderia cepacia* strain G63 91
- Tn antigen
Enzymatic synthesis of the Tn antigen 128
- Transesterification
Enantioselective resolution of methyl 2-chloromandelate by *Candida antarctica* lipase A in a solvent-free transesterification reaction 34
- Transfructosylation
Exploration of transfructosylation activity in cell walls from *Cryptococcus laurentii* for production of functionalised β -D-fructofuranosides 27
- Vinyl propionate
Enantioselective resolution of methyl 2-chloromandelate by *Candida antarctica* lipase A in a solvent-free transesterification reaction 34
- Whole cell
Optimization of whole cell-catalyzed methanolysis of soybean oil for biodiesel production using response surface methodology 122
- Whole fungal cells
Biotransformation of β -hydroxyphenyl selenides, diphenyldiselenide and benzeneseleninic acid by whole cells of *Aspergillus terreus* 135
- Wine
Phenols removal in musts: Strategy for wine stabilization by laccase 102
