

Subject Index

- Absidia cylindrospora*
Lactones 26 [1]: Stereoselective microbial epoxidation of unsaturated bicyclic γ -lactones with the alkylsubstituted cyclohexane system 79
- Activation
Effect of nonionic detergents on the activity of a thermostable lipase from *Bacillus stearothermophilus* MC7 88
- Adsorption
Influence of pH and ionic strength on the adsorption, leaching and activity of myoglobin immobilized onto ordered mesoporous silicates 61
- Agricultural wastes
Production, optimization growth conditions and properties of the xylanase from *Aspergillus carneus* M34 36
- Alkyl glucoside
Production of alkyl glucoside from cellooligosaccharides using yeast strains displaying *Aspergillus aculeatus* β -glucosidase 1 92
- Amberlite
Immobilization of α -amylase from mung beans (*Vigna radiata*) on Amberlite MB 150 and chitosan beads: A comparative study 69
- Ammonium selective electrode
A novel biosensor based on L-homocysteine desulfhydrase enzyme immobilized in eggshell membrane 55
- α -Amylase
Immobilization of α -amylase from mung beans (*Vigna radiata*) on Amberlite MB 150 and chitosan beads: A comparative study 69
- Aspergillus carneus* M34
Production, optimization growth conditions and properties of the xylanase from *Aspergillus carneus* M34 36
- Bacillus firmus*
Immobilization of *Bacillus firmus* strain 37 in inorganic matrix for cyclodextrin production 1
- Bacillus* sp. G1
The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118
- Bacillus stearothermophilus*
Effect of nonionic detergents on the activity of a thermostable lipase from *Bacillus stearothermophilus* MC7 88
- Baicalin
Microbial transformation of baicalin and baicalein 113
- Baicalin
Microbial transformation of baicalin and baicalein 113
- β -Glucosidase
Production of alkyl glucoside from cellooligosaccharides using yeast strains displaying *Aspergillus aculeatus* β -glucosidase 1 92
- Biocatalysis
Are endophytic microorganisms involved in the stereoselective reduction of ketones by *Daucus carota* root? 8
- Bioepoxidation
Lactones 26 [1]: Stereoselective microbial epoxidation of unsaturated bicyclic γ -lactones with the alkylsubstituted cyclohexane system 79
- Biotransformations
Enantiomeric oxidation of organic sulfides by the filamentous fungi *Botrytis cinerea*, *Eutypa lata* and *Trichoderma viride* 18
- Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24
- Microbial transformation of baicalin and baicalein 113
- Botrytis cinerea*
Enantiomeric oxidation of organic sulfides by the filamentous fungi *Botrytis cinerea*, *Eutypa lata* and *Trichoderma viride* 18
- Candida antarctica*
Lipase-catalyzed synthesis of glycerol carbonate from renewable glycerol and dimethyl carbonate through transesterification 75
- Carrot
Are endophytic microorganisms involved in the stereoselective reduction of ketones by *Daucus carota* root? 8
- Catalysis
Hydrolase-catalyzed Michael addition of 1,3-dicarbonyl compounds to α,β -unsaturated compounds in organic solvent 50
- Cell immobilization
Immobilization of *Bacillus firmus* strain 37 in inorganic matrix for cyclodextrin production 1
- Cell surface engineering
Production of alkyl glucoside from cellooligosaccharides using yeast strains displaying *Aspergillus aculeatus* β -glucosidase 1 92
- Chaetomium* sp.
Microbial transformation of baicalin and baicalein 113
- Characterization
Gene cloning, overexpression and characterization of a novel organic solvent tolerant and thermostable lipase from *Galactomyces geotrichum* Y05 28
- Chiral sulfoxide
Enantiomeric oxidation of organic sulfides by the filamentous fungi *Botrytis cinerea*, *Eutypa lata* and *Trichoderma viride* 18
- Chitosan
Immobilization of α -amylase from mung beans (*Vigna radiata*) on Amberlite MB 150 and chitosan beads: A comparative study 69
- Cloning
Gene cloning, overexpression and characterization of a novel organic solvent tolerant and thermostable lipase from *Galactomyces geotrichum* Y05 28
- Competitive inhibition
Enzymatic synthesis of a galactose-containing trehalose analogue disaccharide by *Pyrococcus horikoshii* trehalose-synthesizing glycosyltransferase: Inhibitory effects on several disaccharidase activities 98
- Coryneum betulinum*
Microbial transformation of baicalin and baicalein 113
- Cryptosporiopsis radicialis*
Microbial transformation of baicalin and baicalein 113
- Cyclodextrin glucanotransferase
The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118
- Cyclodextrins
Immobilization of *Bacillus firmus* strain 37 in inorganic matrix for cyclodextrin production 1

- D-Aminoacylase
Hydrolase-catalyzed Michael addition of 1,3-dicarbonyl compounds to α,β -unsaturated compounds in organic solvent 50
- Deacetylation
Screening of lipases for regioselective hydrolysis of peracetylated β -monosaccharides 12
- 1,3-Dicarbonyl compounds
Hydrolase-catalyzed Michael addition of 1,3-dicarbonyl compounds to α,β -unsaturated compounds in organic solvent 50
- 1,4-Diol
Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24
- Disaccharidase
Enzymatic synthesis of a galactose-containing trehalose analogue disaccharide by *Pyrococcus horikoshii* trehalose-synthesizing glycosyltransferase: Inhibitory effects on several disaccharidase activities 98
- Eggshell membrane
A novel biosensor based on L-homocysteine desulphydrase enzyme immobilized in eggshell membrane 55
- Enantioselectivity
Mapping substrate selectivity of lipases from thermophilic fungi 104
- Endophytic microorganisms
Are endophytic microorganisms involved in the stereoselective reduction of ketones by *Daucus carota* root? 8
- Enzymes
Hydrolase-catalyzed Michael addition of 1,3-dicarbonyl compounds to α,β -unsaturated compounds in organic solvent 50
- Eutypa lata*
Enantiomeric oxidation of organic sulfides by the filamentous fungi *Botrytis cinerea*, *Eutypa lata* and *Trichoderma viride* 18
- Freeze-drying
Effect of nonionic detergents on the activity of a thermostable lipase from *Bacillus stearothermophilus* MC7 88
- Fructooligosaccharides
Screening of yeast strains for transfructosylating activity 43
- Fructosyl transferase
Screening of yeast strains for transfructosylating activity 43
- Fungal lipases
Mapping substrate selectivity of lipases from thermophilic fungi 104
- Galactomyces geotrichum* Y05
Gene cloning, overexpression and characterization of a novel organic solvent tolerant and thermostable lipase from *Galactomyces geotrichum* Y05 28
- Galactose acceptor
Enzymatic synthesis of a galactose-containing trehalose analogue disaccharide by *Pyrococcus horikoshii* trehalose-synthesizing glycosyltransferase: Inhibitory effects on several disaccharidase activities 98
- Gamma-cyclodextrin
The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118
- Glycerol
Lipase-catalyzed synthesis of glycerol carbonate from renewable glycerol and dimethyl carbonate through transesterification 75
- Glycerol carbonate
Lipase-catalyzed synthesis of glycerol carbonate from renewable glycerol and dimethyl carbonate through transesterification 75
- High-throughput screening
Mapping substrate selectivity of lipases from thermophilic fungi 104
- Homocysteine biosensor
A novel biosensor based on L-homocysteine desulphydrase enzyme immobilized in eggshell membrane 55
- Hydroxylation
Lactones 26 [1]: Stereoselective microbial epoxidation of unsaturated bicyclic γ -lactones with the alkylsubstituted cyclohexane system 79
- Immobilization
Influence of pH and ionic strength on the adsorption, leaching and activity of myoglobin immobilized onto ordered mesoporous silicates 61
Immobilization of α -amylase from mung beans (*Vigna radiata*) on Amberlite MB 150 and chitosan beads: A comparative study 69
- Inorganic matrix
Immobilization of *Bacillus firmus* strain 37 in inorganic matrix for cyclodextrin production 1
- γ -Lactol
Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24
- γ -Lactone
Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24
- Lactones
Lactones 26 [1]: Stereoselective microbial epoxidation of unsaturated bicyclic γ -lactones with the alkylsubstituted cyclohexane system 79
- Leaching
Influence of pH and ionic strength on the adsorption, leaching and activity of myoglobin immobilized onto ordered mesoporous silicates 61
- L-Homocysteine desulphydrase
A novel biosensor based on L-homocysteine desulphydrase enzyme immobilized in eggshell membrane 55
- Lipase
Screening of lipases for regioselective hydrolysis of peracetylated β -monosaccharides 12
Gene cloning, overexpression and characterization of a novel organic solvent tolerant and thermostable lipase from *Galactomyces geotrichum* Y05 28
Lipase-catalyzed synthesis of glycerol carbonate from renewable glycerol and dimethyl carbonate through transesterification 75
- Michael additions
Hydrolase-catalyzed Michael addition of 1,3-dicarbonyl compounds to α,β -unsaturated compounds in organic solvent 50
- Monosaccharides
Screening of lipases for regioselective hydrolysis of peracetylated β -monosaccharides 12
- Myoglobin
Influence of pH and ionic strength on the adsorption, leaching and activity of myoglobin immobilized onto ordered mesoporous silicates 61
- Nonionic detergents
Effect of nonionic detergents on the activity of a thermostable lipase from *Bacillus stearothermophilus* MC7 88
- Operational stability
Immobilization of *Bacillus firmus* strain 37 in inorganic matrix for cyclodextrin production 1
- Ordered mesoporous silicates
Influence of pH and ionic strength on the adsorption, leaching and activity of myoglobin immobilized onto ordered mesoporous silicates 61
- Overexpression
Gene cloning, overexpression and characterization of a novel organic solvent tolerant and thermostable lipase from *Galactomyces geotrichum* Y05 28
- Oxidation
Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24
- Penicillium chrysogenum*
Microbial transformation of baicalin and baicalein 113
- Prebiotics
Screening of yeast strains for transfructosylating activity 43

Pullulanase

The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118

Pyrococcus horikoshii trehalose-synthesizing glycosyltransferase (PhTG)

Enzymatic synthesis of a galactose-containing trehalose analogue disaccharide by *Pyrococcus horikoshii* trehalose-synthesizing glycosyltransferase: Inhibitory effects on several disaccharidase activities 98

Reductases

Are endophytic microorganisms involved in the stereoselective reduction of ketones by *Daucus carota* root? 8

Regioselective

Screening of lipases for regioselective hydrolysis of peracetylated β -monosaccharides 12

Response surface methodology (RSM)

Production, optimization growth conditions and properties of the xylanase from *Aspergillus carneus* M34 36

Rhodococcus

Oxidation of 1,4-alkanediols into γ -lactones via γ -lactols using *Rhodococcus erythropolis* as biocatalyst 24

Screening

Screening of yeast strains for transfructosylating activity 43

Selectivity

Mapping substrate selectivity of lipases from thermophilic fungi 104

Site-directed mutagenesis

The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118

Stability

Immobilization of α -amylase from mung beans (*Vigna radiata*) on Amberlite MB 150 and chitosan beads: A comparative study 69

Tapioca starch

The effects of reaction conditions on the production of γ -cyclodextrin from tapioca starch by using a novel recombinant engineered CGTase 118

Thermophilic lipase

Effect of nonionic detergents on the activity of a thermostable lipase from *Bacillus stearothermophilus* MC7 88

Trehalose analogue

Enzymatic synthesis of a galactose-containing trehalose analogue disaccharide by *Pyrococcus horikoshii* trehalose-synthesizing glycosyltransferase: Inhibitory effects on several disaccharidase activities 98

Trichoderma viride

Enantiomeric oxidation of organic sulfides by the filamentous fungi *Botrytis cinerea*, *Eutypa lata* and *Trichoderma viride* 18

Whole-cell biocatalyst

Production of alkyl glucoside from cellooligosaccharides using yeast strains displaying *Aspergillus aculeatus* β -glucosidase 1 92

Xylanase

Production, optimization growth conditions and properties of the xylanase from *Aspergillus carneus* M34 36

Yeasts

Screening of yeast strains for transfructosylating activity 43
