

Subject Index

- Acidolysis**
Enzymatic synthesis of structured phenolic lipids by acidolysis of flaxseed oil with selected phenolic acids 96
- Adenosine**
Nucleoside synthesis using a novel macroporous grafted polyethylene as biocatalyst support 189
- Alcoholysis**
Preparation of regioprotected morins by lipase-catalysed transesterification 78
Exploring the possibility of predicting CALB activity in liquid organic medium, with the aid of intrinsic kinetic parameters and intrinsic solvent effect data obtained in solid/gaz reactor 121
- Aldol reaction**
Four types of threonine aldolases: Similarities and differences in kinetics/thermodynamics 19
- Aliphatic and aromatic aldehydes and ketones**
Sugar cane juice for the bioreduction of carbonyl compounds 194
- Alkyl 3-(hetero-2-yl)-3-hydroxypropanoates**
Preparation of optically pure alkyl 3-(hetero-2-yl)-3-hydroxypropanoates by *Candida parapsilosis* ATCC 7330 mediated deracemisation 168
- Almond**
Synthesis of novel glycoconjugates and evaluation as inhibitors against β -glucosidase from almond 153
- Anti-inflammatory**
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Antioxidant enzyme**
Recombinant hydroperoxide lyase for the production of aroma compounds: Effect of substrate on the yeast *Yarrowia lipolytica* 146
- Aspergillus niger***
Microbial transformations of flavanone by *Aspergillus niger* and *Penicillium chermesinum* cultures 34
- Bacillus thermocatenulatus* lipase**
Selective esterification of phthalic acids in two ionic liquids at high temperatures using a thermostable lipase of *Bacillus thermocatenulatus*: A comparative study 162
- Baker's yeast**
Characterization of glycerol kinase from baker's yeast: Response surface modeling of the enzymatic reaction 113
Kinetic properties of glycerophosphate oxidase isolated from dry baker's yeast 140
- Benzoin**
Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133
- β -Galactosidase**
Kluyveromyces lactis β -galactosidase crystallization using full-factorial experimental design 178
- β -Glucosidase**
Synthesis of novel glycoconjugates and evaluation as inhibitors against β -glucosidase from almond 153
- β -Hydroxy ester**
Preparation of optically pure alkyl 3-(hetero-2-yl)-3-hydroxypropanoates by *Candida parapsilosis* ATCC 7330 mediated deracemisation 168
- Biocatalysis**
Preparation of regioprotected morins by lipase-catalysed transesterification 78
Secondary structure conformation of hydroperoxide lyase from green bell pepper, cloned in *Yarrowia lipolytica*, and its activity in selected media 128
- Biocatalytic reduction**
Sugar cane juice for the bioreduction of carbonyl compounds 194
- Biological microcalorimetry**
Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Bioreduction**
Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Biosynthesis**
Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Biotransformation**
Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
Chiral *O*-phosphorylated derivative of 2-hydroxy-2-phenylethylphosphonate as a valuable product of microbial biotransformation of diethyl 2-oxo-2-phenylethylphosphonate 74
Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Biotransformations**
Microbial transformations of flavanone by *Aspergillus niger* and *Penicillium chermesinum* cultures 34
- Botrytis cinerea***
Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Candida antarctica* lipase**
Incorporation of primary amines into a poly(1,5-dioxepan-2-one) *via* lipase-catalyzed ring-opening polymerization 158
- Candida parapsilosis* ATCC 7330**
Preparation of optically pure alkyl 3-(hetero-2-yl)-3-hydroxypropanoates by *Candida parapsilosis* ATCC 7330 mediated deracemisation 168
- Candida rugosa***
Influence of gelation time on the morphological and physico-chemical properties of the sol–gel entrapped lipase 27
- Chiral alcohols**
Biocatalyst expressing *cis*-naphthalene dihydrodiol dehydrogenase from *Pseudomonas fluorescens* N3 catalyzes alcohol and 1,2-diol dehydrogenase reactions 67
- Chiral 1,2-diols**
Biocatalyst expressing *cis*-naphthalene dihydrodiol dehydrogenase from *Pseudomonas fluorescens* N3 catalyzes alcohol and 1,2-diol dehydrogenase reactions 67
- Comparability tests**
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13

- Competitive inhibition
Exploring the possibility of predicting CALB activity in liquid organic medium, with the aid of intrinsic kinetic parameters and intrinsic solvent effect data obtained in solid/gaz reactor 121
- Crystallization
Kluyveromyces lactis β -galactosidase crystallization using full-factorial experimental design 178
- Cyanohydrin
Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Dehydrogenase
Biocatalyst expressing *cis*-naphthalene dihydrodiol dehydrogenase from *Pseudomonas fluorescens* N3 catalyzes alcohol and 1,2-diol dehydrogenase reactions 67
- Deracemisation
Preparation of optically pure alkyl 3-(hetero-2-yl)-3-hydroxypropanoates by *Candida parapsilosis* ATCC 7330 mediated deracemisation 168
- D-Hydantoinase families
Genes responsible for hydantoin degradation of a halophilic *Ochrobactrum* sp. G21 and *Delftia* sp. I24 — New insight into relation of D-hydantoinases and dihydropyrimidinases 2
- Dichroism circular spectroscopy
Secondary structure conformation of hydroperoxide lyase from green bell pepper, cloned in *Yarrowia lipolytica*, and its activity in selected media 128
- Dihydrochalcones
Microbial transformations of flavanone by *Aspergillus niger* and *Penicillium chermesinum* cultures 34
- 1,5-dioxepan-2-one
Incorporation of primary amines into a poly(1,5-dioxepan-2-one) via lipase-catalyzed ring-opening polymerization 158
- Dynamic kinetic resolution
Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133
- Enantioselectivity
Whole cell quick *E* for epoxide hydrolase screening using fluorescent probes 173
- Entrapped lipase
Influence of gelation time on the morphological and physico-chemical properties of the sol-gel entrapped lipase 27
- Enzymatic methods
Biocatalyst expressing *cis*-naphthalene dihydrodiol dehydrogenase from *Pseudomonas fluorescens* N3 catalyzes alcohol and 1,2-diol dehydrogenase reactions 67
- Enzyme catalysis
Four types of threonine aldolases: Similarities and differences in kinetics/thermodynamics 19
- Enzyme immobilization
Pseudomonas fluorescens lipase immobilization on polysiloxane-polyvinyl alcohol composite chemically modified with epichlorohydrin 49
- Epichlorohydrin
Pseudomonas fluorescens lipase immobilization on polysiloxane-polyvinyl alcohol composite chemically modified with epichlorohydrin 49
- Epoxide hydrolases
Whole cell quick *E* for epoxide hydrolase screening using fluorescent probes 173
- Escherichia coli* BL21
Nucleoside synthesis using a novel macroporous grafted polyethylene as biocatalyst support 189
- Eupergit
Immobilization of an enzymatic extract from *Penicillium camemberti* containing lipoxygenase and hydroperoxide lyase activities 88
- Extreme environment
Genes responsible for hydantoin degradation of a halophilic *Ochrobactrum* sp. G21 and *Delftia* sp. I24 — New insight into relation of D-hydantoinases and dihydropyrimidinases 2
- Farnesol
Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Flavanones
Microbial transformations of flavanone by *Aspergillus niger* and *Penicillium chermesinum* cultures 34
- Flaxseed oil
Enzymatic synthesis of structured phenolic lipids by acidolysis of flaxseed oil with selected phenolic acids 96
- Full-factorial design
Kluyveromyces lactis β -galactosidase crystallization using full-factorial experimental design 178
- Fungi
Chiral *O*-phosphorylated derivative of 2-hydroxy-2-phenylethylphosphonate as a valuable product of microbial biotransformation of diethyl 2-oxo-2-phenylethylphosphonate 74
- Fusarium culmorum*
Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Gelation time
Influence of gelation time on the morphological and physico-chemical properties of the sol-gel entrapped lipase 27
- Glutaraldehyde
Pseudomonas fluorescens lipase immobilization on polysiloxane-polyvinyl alcohol composite chemically modified with epichlorohydrin 49
- Glutathione
Recombinant hydroperoxide lyase for the production of aroma compounds: Effect of substrate on the yeast *Yarrowia lipolytica* 146
- Glycerol kinase
Characterization of glycerol kinase from baker's yeast: Response surface modeling of the enzymatic reaction 113
- Glycerophosphate oxidase
Kinetic properties of glycerophosphate oxidase isolated from dry baker's yeast 140
- Glycoconjugate
Synthesis of novel glycoconjugates and evaluation as inhibitors against β -glucosidase from almond 153
- Glycosylation reaction
A chemo-biocatalytic approach in the synthesis of β -*O*-naphthylmethyl-*N*-peracetylated lactosamine 106
- Grapefruit juice
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Hetero-2-yl
Preparation of optically pure alkyl 3-(hetero-2-yl)-3-hydroxypropanoates by *Candida parapsilosis* ATCC 7330 mediated deracemisation 168
- High pressure
Interesterification of fat blends rich in ω -3 polyunsaturated fatty acids catalysed by immobilized *Thermomyces lanuginosa* lipase under high pressure 58
- High throughput screening
Whole cell quick *E* for epoxide hydrolase screening using fluorescent probes 173
- HNL
Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Hydantoinase operon
Genes responsible for hydantoin degradation of a halophilic *Ochrobactrum* sp. G21 and *Delftia* sp. I24 — New insight into relation of D-hydantoinases and dihydropyrimidinases 2
- Hydrolysis
Influence of gelation time on the morphological and physico-chemical properties of the sol-gel entrapped lipase 27
- Hydroperoxide lyase
Immobilization of an enzymatic extract from *Penicillium camemberti* containing lipoxygenase and hydroperoxide lyase activities 88

- Secondary structure conformation of hydroperoxide lyase from green bell pepper, cloned in *Yarrowia lipolytica*, and its activity in selected media 128
- Hydroxynitrile lyase
Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Hydroxypivalaldehyde
Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Immobilisation
Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133
- Immobilization
Immobilization of an enzymatic extract from *Penicillium camemberti* containing lipoxygenase and hydroperoxide lyase activities 88
- Immobilized lipase
Interesterification of fat blends rich in ω -3 polyunsaturated fatty acids catalysed by immobilized *Thermomyces lanuginosa* lipase under high pressure 58
- Inhibitor
Synthesis of novel glycoconjugates and evaluation as inhibitors against β -glucosidase from almond 153
- Interesterification
Interesterification of fat blends rich in ω -3 polyunsaturated fatty acids catalysed by immobilized *Thermomyces lanuginosa* lipase under high pressure 58
- Ionic liquids
Selective esterification of phthalic acids in two ionic liquids at high temperatures using a thermostable lipase of *Bacillus thermocatenuatus*: A comparative study 162
- Kinetic properties
Kinetic properties of glycerophosphate oxidase isolated from dry baker's yeast 140
- Kluyveromyces lactis*
Kluyveromyces lactis β -galactosidase crystallization using full-factorial experimental design 178
- Linoleic acid hydroperoxides
Recombinant hydroperoxide lyase for the production of aroma compounds: Effect of substrate on the yeast *Yarrowia lipolytica* 146
- Lipase
Pseudomonas fluorescens lipase immobilization on polysiloxane–polyvinyl alcohol composite chemically modified with epichlorohydrin 49
Enzymatic synthesis of structured phenolic lipids by acidolysis of flaxseed oil with selected phenolic acids 96
Preparation of regioprotected morins by lipase-catalysed transesterification 78
Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133
- Lipase B from *Candida antarctica*
Exploring the possibility of predicting CALB activity in liquid organic medium, with the aid of intrinsic kinetic parameters and intrinsic solvent effect data obtained in solid/gas reactor 121
- Lipases
A chemo-biocatalytic approach in the synthesis of β -*O*-naphthylmethyl-*N*-peracetylated lactosamine 106
- Lipoxygenase
Immobilization of an enzymatic extract from *Penicillium camemberti* containing lipoxygenase and hydroperoxide lyase activities 88
- Lyases
Four types of threonine aldolases: Similarities and differences in kinetics/thermodynamics 19
- Metabolism
Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Morin
Preparation of regioprotected morins by lipase-catalysed transesterification 78
- Naringenin
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Naringin
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Naringinase
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Novozym 435
Incorporation of primary amines into a poly(1,5-dioxepan-2-one) *via* lipase-catalyzed ring-opening polymerization 158
- Nucleoside phosphorylases
Nucleoside synthesis using a novel macroporous grafted polyethylene as biocatalyst support 189
- Operational stability
Interesterification of fat blends rich in ω -3 polyunsaturated fatty acids catalysed by immobilized *Thermomyces lanuginosa* lipase under high pressure 58
- Organic solvent
Exploring the possibility of predicting CALB activity in liquid organic medium, with the aid of intrinsic kinetic parameters and intrinsic solvent effect data obtained in solid/gas reactor 121
- Organic solvent media
Enzymatic synthesis of structured phenolic lipids by acidolysis of flaxseed oil with selected phenolic acids 96
- Oxidative stress
Recombinant hydroperoxide lyase for the production of aroma compounds: Effect of substrate on the yeast *Yarrowia lipolytica* 146
- Partial purification
Characterization of glycerol kinase from baker's yeast: Response surface modeling of the enzymatic reaction 113
- Paw edema
Effect of naringin enzymatic hydrolysis towards naringenin on the anti-inflammatory activity of both compounds 13
- Penicillium camemberti*
Immobilization of an enzymatic extract from *Penicillium camemberti* containing lipoxygenase and hydroperoxide lyase activities 88
- Penicillium chermesinum*
Microbial transformations of flavanone by *Aspergillus niger* and *Penicillium chermesinum* cultures 34
- Phenolic acid
Enzymatic synthesis of structured phenolic lipids by acidolysis of flaxseed oil with selected phenolic acids 96
- Phenylserine
Four types of threonine aldolases: Similarities and differences in kinetics/thermodynamics 19
- Phosphonates
Chiral *O*-phosphorylated derivative of 2-hydroxy-2-phenylethylphosphonate as a valuable product of microbial biotransformation of diethyl 2-oxo-2-phenylethylphosphonate 74
- Poaceae
Sugar cane juice for the bioreduction of carbonyl compounds 194
- Polyesters
Incorporation of primary amines into a poly(1,5-dioxepan-2-one) *via* lipase-catalyzed ring-opening polymerization 158
- Polyethylene
Nucleoside synthesis using a novel macroporous grafted polyethylene as biocatalyst support 189
- Polysiloxane–polyvinyl alcohol
Pseudomonas fluorescens lipase immobilization on polysiloxane–polyvinyl alcohol composite chemically modified with epichlorohydrin 49
- Prunus* sp.
Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Pseudomonas stutzeri*
Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133

- Purification
Kluyveromyces lactis β -galactosidase crystallization using full-factorial experimental design 178
- Quick *E*
 Whole cell quick *E* for epoxide hydrolase screening using fluorescent probes 173
- Racemate resolution
 Biocatalyst expressing *cis*-naphthalene dihydrodiol dehydrogenase from *Pseudomonas fluorescens* N3 catalyzes alcohol and 1,2-diol dehydrogenase reactions 67
- Regioselectivity
 A chemo-biocatalytic approach in the synthesis of β -*O*-naphthylmethyl-*N*-peracetylated lactosamine 106
 Preparation of regioprotected morins by lipase-catalysed transesterification 78
- Response surface methodology
 Characterization of glycerol kinase from baker's yeast: Response surface modeling of the enzymatic reaction 113
- Rhodotorula marina*
 Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Rhodotorula rubra*
 Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Ring-opening polymerization
 Incorporation of primary amines into a poly(1,5-dioxepan-2-one) *via* lipase-catalyzed ring-opening polymerization 158
- (*R*)-Pantolactone
 Screening hydroxynitrile lyases for (*R*)-pantolactone synthesis 183
- Saccharomyces cerevisiae*
 Bioreduction of ethyl 3-oxobutyrate by *Saccharomyces cerevisiae*: A metabolic *in vivo* study 82
- Saccharum officinarum*
 Sugar cane juice for the bioreduction of carbonyl compounds 194
- Secondary structure
 Secondary structure conformation of hydroperoxide lyase from green bell pepper, cloned in *Yarrowia lipolytica*, and its activity in selected media 128
- Selectivity
 Selective esterification of phthalic acids in two ionic liquids at high temperatures using a thermostable lipase of *Bacillus thermocatenulatus*: A comparative study 162
- Sesquiterpenes
 Oxidative biotransformation of farnesol and 10,11-epoxyfarnesol by fungal strains 40
- Shvo's catalyst
 Highly efficient one pot dynamic kinetic resolution of benzoin with entrapped *Pseudomonas stutzeri* lipase 133
- Sol-gel
 Influence of gelation time on the morphological and physico-chemical properties of the sol-gel entrapped lipase 27
- Solid/gas biocatalysis
 Exploring the possibility of predicting CALB activity in liquid organic medium, with the aid of intrinsic kinetic parameters and intrinsic solvent effect data obtained in solid/gas reactor 121
- Stability
 Characterization of glycerol kinase from baker's yeast: Response surface modeling of the enzymatic reaction 113
- Substrate recognition
 Genes responsible for hydantoin degradation of a halophilic *Ochrobactrum* sp. G21 and *Delftia* sp. I24 — New insight into relation of D-hydantoinases and dihydropyrimidinases 2
- Threonine aldolase
 Four types of threonine aldolases: Similarities and differences in kinetics/thermodynamics 19
- ω -3 polyunsaturated fatty acids
 Interesterification of fat blends rich in ω -3 polyunsaturated fatty acids catalysed by immobilized *Thermomyces lanuginosa* lipase under high pressure 58
- Water activity
 Selective esterification of phthalic acids in two ionic liquids at high temperatures using a thermostable lipase of *Bacillus thermocatenulatus*: A comparative study 162
- Whole cell immobilization
 Nucleoside synthesis using a novel macroporous grafted polyethylene as biocatalyst support 189
- Whole cells
 Whole cell quick *E* for epoxide hydrolase screening using fluorescent probes 173
- Yarrowia lipolytica*
 Recombinant hydroperoxide lyase for the production of aroma compounds: Effect of substrate on the yeast *Yarrowia lipolytica* 146
