Scope

The *Journal of Molecular Catalysis B: Enzymatic* provides an international forum devoted to research and developments in the applications of **whole-cell and cell-free enzymes as catalysts** in organic synthesis. Emphasis is placed on mechanistic and synthetic aspects of the **biocatalytic transformation**.

The journal publishes papers on:

- industrial applications of enzymatic processes, e.g., in fine chemical synthesis;
- chemo-, regio- and enantioselective transformations;
- screening for biocatalysts;
- integration of biocatalytic and chemical steps in organic synthesis;
- novel biocatalysts, e.g., enzymes for extremophiles and catalytic antibodies;
- enzyme immobilization and stabilization, particularly in non-conventional media;
- bioprocess engineering aspects, e.g., membrane bioreactors;
- improvement of catalytic performance of enzymes, e.g., by protein engineering or chemical modification;
- structural studies, including computer simulation, relating to substrate specificity and reaction selectivity;
- biomimetic studies related to enzymatic transformations.

Types of contribution

- Letters (maximum 1500 words; will receive preferential treatment in editorial processing)
- Original Papers
- Invited Subject Reviews
- Book Reviews
- Conference Announcements and News

Frequency

The journal appears eight times a year.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with potential manuscript archiving requirements as specified as conditions of their grant awards.
