

Subject Index

- Activation
Application of bacterial cellulose pellets in enzyme immobilization 103
- Acylase
Enzyme-catalysed deprotection of *N*-acetyl and *N*-formyl amino acids 67
- Alkyl ferulates
Preparation of multipurpose cross-linked enzyme aggregates and their application to production of alkyl ferulates 35
- Allyl ether
Production of glycidyl ethers by chemo-enzymatic epoxidation of allyl ethers 1
- Ampicillin
Efficient enzymatic synthesis of ampicillin in organic media 13
- Aromatic aldehydes and ketones
Bioreduction of aromatic aldehydes and ketones by fruits' barks of *Passiflora edulis* 130
- Aspergillus niger*
Performance of *Aspergillus niger* B 03 β -xylosidase immobilized on polyamide membrane support 109
- Asymmetric reduction
Efficient synthesis of enantiopure (*S*)-4-(trimethylsilyl)-3-butyn-2-ol via asymmetric reduction of 4-(trimethylsilyl)-3-butyn-2-one with immobilized *Candida parapsilosis* CCTCC M203011 cells 122
- Asymmetric synthesis
Asymmetric synthesis of 2-substituted 4-chromanones using enzyme-catalyzed reactions 93
- Bacillus stearothermophilus*
Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Bacterial cellulose beads
Application of bacterial cellulose pellets in enzyme immobilization 103
- β -Adrenergic blockers
Lipase-catalyzed resolution of 1-chloro-3-[(4-morpholin-4-yl)-1,2,5-thiadiazole-3-yl]oxy]propan-2-ol. Synthesis of (*R*)- and (*S*)-timolol 55
- Baeyer–Villiger oxidation
Chemo-enzymatic Baeyer–Villiger oxidation of cyclopentanone and substituted cyclopentanones 61
- Biocatalysis
Bioreduction of aromatic aldehydes and ketones by fruits' barks of *Passiflora edulis* 130
- Biocatalytic synthesis
Efficient synthesis of enantiopure (*S*)-4-(trimethylsilyl)-3-butyn-2-ol via asymmetric reduction of 4-(trimethylsilyl)-3-butyn-2-one with immobilized *Candida parapsilosis* CCTCC M203011 cells 122
- Biodiesel
Comparison among immobilised lipases on macroporous polypropylene toward biodiesel synthesis 19
- Bioreduction
Bioreduction of aromatic aldehydes and ketones by fruits' barks of *Passiflora edulis* 130
- Biosynthesis
Performance of *Aspergillus niger* B 03 β -xylosidase immobilized on polyamide membrane support 109
- Biotransformation
Biotransformation of *p*-, *m*-, and *o*-hydroxybenzoic acids by *Panax ginseng* hairy root cultures 72
- β -Ketoester
Bioreduction of aromatic aldehydes and ketones by fruits' barks of *Passiflora edulis* 130
- β -Xylosidase
Performance of *Aspergillus niger* B 03 β -xylosidase immobilized on polyamide membrane support 109
- Candida antarctica* lipase-B
Chemo-enzymatic Baeyer–Villiger oxidation of cyclopentanone and substituted cyclopentanones 61
- Candida parapsilosis* CCTCC M203011
Efficient synthesis of enantiopure (*S*)-4-(trimethylsilyl)-3-butyn-2-ol via asymmetric reduction of 4-(trimethylsilyl)-3-butyn-2-one with immobilized *Candida parapsilosis* CCTCC M203011 cells 122
- Chemo-enzymatic oxidation
Chemo-enzymatic Baeyer–Villiger oxidation of cyclopentanone and substituted cyclopentanones 61
- Chromanones
Asymmetric synthesis of 2-substituted 4-chromanones using enzyme-catalyzed reactions 93
- CLEA
Preparation of multipurpose cross-linked enzyme aggregates and their application to production of alkyl ferulates 35
- Crenarchaeota
Characterization of a glucan phosphorylase from the thermophilic archaeon *Sulfolobus tokodaii* strain 7 27
- Cross-linked enzyme aggregates
Resolution of *N*-(2-ethyl-6-methylphenyl) alanine via cross-linked aggregates of *Pseudomonas* sp. Lipase 7
- Deprotection
Enzyme-catalysed deprotection of *N*-acetyl and *N*-formyl amino acids 67
- Deracemization
1,2-Octanediol deracemization by stereoinversion using whole cells 50
- D-Xylulose 5-phosphate
Enzymatic synthesis of D-xylulose 5-phosphate from hydroxypyruvate and D-glyceraldehyde-3-phosphate 90
- Dye decolorization
Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Enantioselectivity
Lipase-catalyzed resolution of 1-chloro-3-[(4-morpholin-4-yl)-1,2,5-thiadiazole-3-yl]oxy]propan-2-ol. Synthesis of (*R*)- and (*S*)-timolol 55
- Enzymatic synthesis
Efficient enzymatic synthesis of ampicillin in organic media 13
Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine via two-step enzymatic or chemo-enzymatic highly regioselective strategy 76

- Enzymatic synthesis of D-xylulose 5-phosphate from hydroxypyruvate and D-glyceraldehyde-3-phosphate 90
- Enzyme
- Asymmetric synthesis of 2-substituted 4-chromanones using enzyme-catalyzed reactions 93
- Enzyme immobilization
- Preparation of multipurpose cross-linked enzyme aggregates and their application to production of alkyl ferulates 35
- Epoxidation
- Production of glycidyl ethers by chemo-enzymatic epoxidation of allyl ethers 1
- Epoxide-hydrolases
- 1,2-Octanediol deracemization by stereoinversion using whole cells 50
- Escherichia coli*
- Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Ethyl acetate
- Efficient enzymatic synthesis of ampicillin in organic media 13
- Feruloyl esterases
- Preparation of multipurpose cross-linked enzyme aggregates and their application to production of alkyl ferulates 35
- 5-Fluorouridine
- Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine *via* two-step enzymatic or chemo-enzymatic highly regioselective strategy 76
- Glucan
- Characterization of a glucan phosphorylase from the thermophilic archaeon *Sulfolobus tokodaii* strain 7 27
- Glucan phosphorylase
- Characterization of a glucan phosphorylase from the thermophilic archaeon *Sulfolobus tokodaii* strain 7 27
- Glucoamylase
- Application of bacterial cellulose pellets in enzyme immobilization 103
- Glycidyl ether
- Production of glycidyl ethers by chemo-enzymatic epoxidation of allyl ethers 1
- Glycosylation
- Biotransformation of *p*-, *m*-, and *o*-hydroxybenzoic acids by *Panax ginseng* hairy root cultures 72
- Gold nanoparticles
- Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Hairy root cultures
- Biotransformation of *p*-, *m*-, and *o*-hydroxybenzoic acids by *Panax ginseng* hairy root cultures 72
- Hydrolase
- Enzyme-catalysed deprotection of *N*-acetyl and *N*-formyl amino acids 67
- Hydrolysis
- Asymmetric synthesis of 2-substituted 4-chromanones using enzyme-catalyzed reactions 93
- Hydroxybenzoic acid
- Biotransformation of *p*-, *m*-, and *o*-hydroxybenzoic acids by *Panax ginseng* hairy root cultures 72
- Ibuprofen
- The use of polyaniline nanofibre as a support for lipase mediated reaction 116
- Immobilisation
- The use of polyaniline nanofibre as a support for lipase mediated reaction 116
- Immobilization
- Application of bacterial cellulose pellets in enzyme immobilization 103
 - Performance of *Aspergillus niger* B 03 β -xylosidase immobilized on polyamide membrane support 109
 - Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Kinetic resolution
- Resolution of *N*-(2-ethyl-6-methylphenyl) alanine *via* cross-linked aggregates of *Pseudomonas* sp. Lipase 7
- Leucine aminopeptidase
- Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Lipases
- Production of glycidyl ethers by chemo-enzymatic epoxidation of allyl ethers 1
 - Lipase-catalyzed resolution of 1-chloro-3-[(4-morpholin-4-yl-1,2,5-thiadiazole-3-yl)oxy]propan-2-ol. Synthesis of (*R*)- and (*S*)-timolol 55
 - Enzyme-catalysed deprotection of *N*-acetyl and *N*-formyl amino acids 67
 - The use of polyaniline nanofibre as a support for lipase mediated reaction 116
- Lysine tag
- Characterization of lysine-tagged *Bacillus stearothermophilus* leucine aminopeptidase II immobilized onto carboxylated gold nanoparticles 83
- Macroporous polypropylene
- Comparison among immobilised lipases on macroporous polypropylene toward biodiesel synthesis 19
- Mesoporous materials
- Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Methanol
- Comparison among immobilised lipases on macroporous polypropylene toward biodiesel synthesis 19
- Monosaccharide
- Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine *via* two-step enzymatic or chemo-enzymatic highly regioselective strategy 76
- N*-acetyl amino acids
- Enzyme-catalysed deprotection of *N*-acetyl and *N*-formyl amino acids 67
- N*-(2-ethyl-6-methylphenyl) alanine
- Resolution of *N*-(2-ethyl-6-methylphenyl) alanine *via* cross-linked aggregates of *Pseudomonas* sp. Lipase 7
- Organic medium
- Efficient enzymatic synthesis of ampicillin in organic media 13
- Panax ginseng*
- Biotransformation of *p*-, *m*-, and *o*-hydroxybenzoic acids by *Panax ginseng* hairy root cultures 72
- Passiflora edulis*
- Bioreduction of aromatic aldehydes and ketones by fruits' barks of *Passiflora edulis* 130
- Penicillin acylase
- Efficient enzymatic synthesis of ampicillin in organic media 13
- Peracid
- Production of glycidyl ethers by chemo-enzymatic epoxidation of allyl ethers 1
- Polyaniline nanofibre
- The use of polyaniline nanofibre as a support for lipase mediated reaction 116
- Polymerization
- Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine *via* two-step enzymatic or chemo-enzymatic highly regioselective strategy 76
- Prodrugs
- Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine *via* two-step enzymatic or chemo-enzymatic highly regioselective strategy 76
- Pseudomonas fluorescens* lipase
- Comparison among immobilised lipases on macroporous polypropylene toward biodiesel synthesis 19

- Pseudomonas* sp. Lipase
Resolution of *N*-(2-ethyl-6-methylphenyl) alanine via cross-linked aggregates of *Pseudomonas* sp. Lipase 7
- Recombinant dye-decolorizing peroxidase (rDyP)
Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Remazol Brilliant Blue R (RBBR)
Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Repeated-batch
Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Resolution
Asymmetric synthesis of 2-substituted 4-chromanones using enzyme-catalyzed reactions 93
- Stability
Application of bacterial cellulose pellets in enzyme immobilization 103
- Stereoinversion
1,2-Octanediol deracemization by stereoinversion using whole cells 50
- Stereoselective
The use of polyaniline nanofibre as a support for lipase mediated reaction 116
- Sulfolobus tokodaii*
Characterization of a glucan phosphorylase from the thermophilic archaeon *Sulfolobus tokodaii* strain 7 27
- Surface charge
Decolorization of an anthraquinone dye by the recombinant dye-decolorizing peroxidase (rDyP) immobilized on mesoporous materials 42
- Thermostability
Characterization of a glucan phosphorylase from the thermophilic archaeon *Sulfolobus tokodaii* strain 7 27
- Timolol
Lipase-catalyzed resolution of 1-chloro-3-[(4-morpholin-4-yl-1,2,5-thiazole-3-yl)oxy]propan-2-ol. Synthesis of (*R*)- and (*S*)-timolol 55
- Trans-esterification
Chemo-enzymatic Baeyer–Villiger oxidation of cyclopentanone and substituted cyclopentanones 61
- Transesterification
Preparation of multipurpose cross-linked enzyme aggregates and their application to production of alkyl ferulates 35
Lipase-catalyzed resolution of 1-chloro-3-[(4-morpholin-4-yl-1,2,5-thiazole-3-yl)oxy]propan-2-ol. Synthesis of (*R*)- and (*S*)-timolol 55
- Transesterification
Synthesis of monosaccharide derivatives and polymeric prodrugs of 5-fluorouridine *via* two-step enzymatic or chemo-enzymatic highly regioselective strategy 76
- Transketolase
Enzymatic synthesis of D-xylulose 5-phosphate from hydroxypyruvate and D-glyceraldehyde-3-phosphate 90
- 4-(Trimethylsilyl)-3-butyne-2-one
Efficient synthesis of enantiopure (*S*)-4-(trimethylsilyl)-3-butyne-2-ol *via* asymmetric reduction of 4-(trimethylsilyl)-3-butyne-2-one with immobilized *Candida parapsilosis* CCTCC M203011 cells 122
- Vegetable oil
Comparison among immobilised lipases on macroporous polypropylene toward biodiesel synthesis 19
- Xylan
Performance of *Aspergillus niger* B 03 β -xylosidase immobilized on polyamide membrane support 109
