

Subject Index

Absorption

Novel regenerable potassium-based dry sorbents for CO₂ capture at low temperatures 179

Activation enthalpy

Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300

Aggregate

Cloning, expression and characterization of an organic solvent tolerant lipase from *Pseudomonas fluorescens* JCM5963 78

Alcohol

Effects of alcohol and solvent on the performance of lipase from *Candida* sp. in enantioselective esterification of racemic ibuprofen 126

Alcohol dehydrogenase

Enzymatic hydrogen transfer reduction of α -chloro aromatic ketones catalyzed by a hyperthermophilic alcohol dehydrogenase 272

Alcohol solution

Effect of alcohol on the solubility of amino acid in water 185

Alginate

Encapsulation of lactate dehydrogenase in carbon nanotube doped alginate–chitosan capsules 102

Alkaline protease

A novel organic solvent-stable alkaline protease from organic solvent-tolerant *Bacillus licheniformis* YP1A 85

Alkaline serine endopeptidase

Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34

Amidase

Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89

Amino acid

Kinetic analysis for suicide-substrate inactivation of microperoxidase-11: A modified model for bisubstrate enzymes in the presence of reversible inhibitors 61

Effect of alcohol on the solubility of amino acid in water 185

Aminoalcohols

Lipase-catalyzed chemoselective aminolysis of various aminoalcohols with fatty acids 29

Aminolysis

Lipase-catalyzed chemoselective aminolysis of various aminoalcohols with fatty acids 29

Anomeric purity

Enzymatic synthesis of cyclohexyl- α and β -D-glucosides catalyzed by α - and β -glucosidase in a biphasic system 131

Antioxidant

Optimized synthesis of lipase-catalyzed L-ascorbyl laurate by Novozym® 435 7

Lipase-catalysed synthesis of esters of ferulic acid with natural compounds and evaluation of their antioxidant properties 277

Anti-oxidation

Enhancement of polyphenol bio-activities by enzyme reaction 173

Arbutin

Lipase-catalysed synthesis of esters of ferulic acid with natural compounds and evaluation of their antioxidant properties 277

Ascorbyl esters

Optimized synthesis of lipase-catalyzed L-ascorbyl laurate by Novozym® 435 7

Aspergillus oryzae

Resolution of biotin intermediate lactone by enzyme-catalyzed stereoselective lactonization in organic solvent 20

Asymmetric reduction

Use of an ionic liquid to improve asymmetric reduction of 4'-methoxyacetophenone catalyzed by immobilized *Rhodotorula* sp. AS2.2241 cells 70

Asymmetric synthesis

Enzymatic hydrogen transfer reduction of α -chloro aromatic ketones catalyzed by a hyperthermophilic alcohol dehydrogenase 272

Azaindole

Preparation and application of cross-linked aggregates of chloroperoxidase with enhanced hydrogen peroxide tolerance 41

Bacillus licheniformis

A novel organic solvent-stable alkaline protease from organic solvent-tolerant *Bacillus licheniformis* YP1A 85

Bacillus subtilis

Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89

Investigation on enzymatic degradation of γ -polyglutamic acid from *Bacillus subtilis* NX-2 158

Benzoylacetates

Screening and reaction engineering for the bioreduction of ethyl benzoylacetate and its analogues 55

Bio-activity

Enhancement of polyphenol bio-activities by enzyme reaction 173

Biocatalysis

Resolution of biotin intermediate lactone by enzyme-catalyzed stereoselective lactonization in organic solvent 20

Preparation and application of cross-linked aggregates of chloroperoxidase with enhanced hydrogen peroxide tolerance 41

Lipase-catalysed synthesis of esters of ferulic acid with natural compounds and evaluation of their antioxidant properties 277

Bioconversion

Kinetic analysis of 11 α -hydroxylation of steroids by *Rhizopus nigricans* 136

Bioprocessing

Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253

Bioreduction

Screening and reaction engineering for the bioreduction of ethyl benzoylacetate and its analogues 55

Enzymatic hydrogen transfer reduction of α -chloro aromatic ketones catalyzed by a hyperthermophilic alcohol dehydrogenase 272

Biotin intermediate lactone

Resolution of biotin intermediate lactone by enzyme-catalyzed stereoselective lactonization in organic solvent 20

Biotransformation

Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253

Biphasic system

Enzymatic synthesis of cyclohexyl- α and β -D-glucosides catalyzed by α - and β -glucosidase in a biphasic system 131

Biphasic system

Parameters influencing asymmetric synthesis of (*R*)-mandelonitrile by a novel (*R*)-hydroxynitrile lyase from *Eriobotrya japonica* 208

- Candida antarctica*
Lipase-catalyzed chemoselective aminolysis of various aminoalcohols with fatty acids 29
- ϵ -Caprolactone
Ring-opening polymerization of ϵ -caprolactone catalyzed by a novel thermophilic esterase from the archaeon *Archaeoglobus fulgidus* 151
- m*-Cresol
Co-polymerization of MTPC (methylene tri *p*-cresol) and *m*-cresol using CiP (*Coprinus cinereus* peroxidase) to improve the dissolution characteristics of the enzyme-catalyzed polymer 227
- Candida antarctica* lipase B
Macroporous poly(glycidyl methacrylate-co-ethylene glycol dimethacrylate) resins—Versatile immobilization supports for biocatalysts 196
- Candida* sp. 99-125
Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115
- Candida* sp. lipase
Effects of alcohol and solvent on the performance of lipase from *Candida* sp. in enantioselective esterification of racemic ibuprofen 126
- Carbon nanotube
Encapsulation of lactate dehydrogenase in carbon nanotube doped alginate-chitosan capsules 102
- Casein hydrolysis
Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34
- Catalytic properties
Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115
Quantitative characteristic of the catalytic properties and microstructure of cross-linked enzyme aggregates of penicillin acylase 202
- Catechins
Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- α -Chloroalcohol
Enzymatic hydrogen transfer reduction of α -chloro aromatic ketones catalyzed by a hyperthermophilic alcohol dehydrogenase 272
- Characterization
Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115
- Chitosan
Encapsulation of lactate dehydrogenase in carbon nanotube doped alginate-chitosan capsules 102
- Chloroperoxidase
Preparation and application of cross-linked aggregates of chloroperoxidase with enhanced hydrogen peroxide tolerance 41
- Cloning
Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89
- CO₂
Novel regenerable potassium-based dry sorbents for CO₂ capture at low temperatures 179
- Cold activity
Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Congo red
Response surface analysis for enzymatic decolorization of Congo red by manganese peroxidase 1
- Coprinus cinereus* peroxidase
Co-polymerization of MTPC (methylene tri *p*-cresol) and *m*-cresol using CiP (*Coprinus cinereus* peroxidase) to improve the dissolution characteristics of the enzyme-catalyzed polymer 227
- Covalent immobilization
Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
- Cross-linked enzyme aggregate
Preparation and application of cross-linked aggregates of chloroperoxidase with enhanced hydrogen peroxide tolerance 41
- Cross-linked enzyme aggregates
Quantitative characteristic of the catalytic properties and microstructure of cross-linked enzyme aggregates of penicillin acylase 202
- Cyclohexyl- α -D-glucoside
Enzymatic synthesis of cyclohexyl- α and β -D-glucosides catalyzed by α - and β -glucosidase in a biphasic system 131
- Cyclohexyl- β -D-glucoside
Enzymatic synthesis of cyclohexyl- α and β -D-glucosides catalyzed by α - and β -glucosidase in a biphasic system 131
- $\Delta 9$ desaturase
Identification and functional expression of a $\Delta 9$ fatty acid desaturase from the marine bacterium *Pseudoalteromonas* sp. MLY15 96
- Depolymerase
Investigation on enzymatic degradation of γ -polyglutamic acid from *Bacillus subtilis* NX-2 158
- Detergents
Biochemical and molecular characterisation of a thermoactive, alkaline and detergent-stable lipase from a newly isolated *Staphylococcus aureus* strain 237
- Diacylglycerol
Preparation of a diacylglycerol-enriched soybean oil by phospholipase A1 catalyzed hydrolysis 165
- DNA-silver nano hybrids
Amperometric hydrogen peroxide biosensor based on the immobilization of HRP on DNA-silver nano hybrids and PDDA-protected gold nanoparticles 215
- Electrospinning
Enzyme immobilization on electrospun polymer nanofibers: An overview 189
- Enantioselective
Resolution of biotin intermediate lactone by enzyme-catalyzed stereoselective lactonization in organic solvent 20
- Enantioselectivity
Effects of alcohol and solvent on the performance of lipase from *Candida* sp. in enantioselective esterification of racemic ibuprofen 126
Parameters influencing asymmetric synthesis of (*R*)-mandelonitrile by a novel (*R*)-hydroxynitrile lyase from *Eriobotrya japonica* 208
Environmental DNA as a source of a novel epoxide hydrolase reacting with aliphatic terminal epoxides 288
- Encapsulation
Encapsulation of lactate dehydrogenase in carbon nanotube doped alginate-chitosan capsules 102
Enzyme immobilization on electrospun polymer nanofibers: An overview 189
- Environmental DNA
Environmental DNA as a source of a novel epoxide hydrolase reacting with aliphatic terminal epoxides 288
- Enzymatic decolorization
Response surface analysis for enzymatic decolorization of Congo red by manganese peroxidase 1
- Enzymatic hydrogen transfer
Enzymatic hydrogen transfer reduction of α -chloro aromatic ketones catalyzed by a hyperthermophilic alcohol dehydrogenase 272
- Enzymatic polymerization
Co-polymerization of MTPC (methylene tri *p*-cresol) and *m*-cresol using CiP (*Coprinus cinereus* peroxidase) to improve the dissolution characteristics of the enzyme-catalyzed polymer 227
- Enzyme immobilization
Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34
Enzyme immobilization on electrospun polymer nanofibers: An overview 189
Macroporous poly(glycidyl methacrylate-co-ethylene glycol dimethacrylate) resins—Versatile immobilization supports for biocatalysts 196
Effects of pH and pore characters of mesoporous silicas on horseradish peroxidase immobilization 246
- Enzyme reaction
Enhancement of polyphenol bio-activities by enzyme reaction 173
- Enzyme reusability
Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34
- Enzymes
On the biocatalytic cleavage of silicon-oxygen bonds: A substrate structural approach to investigating the cleavage of protecting group silyl ethers by serine-triad hydrolases 24
- Enzymic synthesis
Enzymatic synthesis of cyclohexyl- α and β -D-glucosides catalyzed by α - and β -glucosidase in a biphasic system 131

- Epoxide hydrolase
Environmental DNA as a source of a novel epoxide hydrolase reacting with aliphatic terminal epoxides 288
- Epoxy-activated support
Macroporous poly(glycidyl methacrylate-co-ethylene glycol dimethacrylate) resins—Versatile immobilization supports for biocatalysts 196
- Eriobotrya japonica*
Parameters influencing asymmetric synthesis of (*R*)-mandelonitrile by a novel (*R*)-hydroxynitrile lyase from *Eriobotrya japonica* 208
- Escherichia coli*
Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89
- Ethoxylated fatty alcohol
Singlet oxygenation in microemulsion catalysed by vanadium chloroperoxidase 259
- Expression
Cloning, expression and characterization of an organic solvent tolerant lipase from *Pseudomonas fluorescens* JCM5963 78
Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89
- Extraction
Kinetic resolution of *rac*-alkyl alcohols via lipase-catalyzed enantioselective acylation using succinic anhydride as acylating agent 142
- Fatty acids
Lipase-catalyzed chemoselective aminolysis of various aminoalcohols with fatty acids 29
- Ferulic acid
Lipase-catalysed synthesis of esters of ferulic acid with natural compounds and evaluation of their antioxidant properties 277
- Fish diagram
Singlet oxygenation in microemulsion catalysed by vanadium chloroperoxidase 259
- Flexibility
Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Full factorial design
Response surface design for the optimization of enzymatic detection of mercury in aqueous solution using immobilized urease from vegetable waste 265
- Glass beads
Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
- Glycerol dehydratase
Quantitative analysis on inactivation and reactivation of recombinant glycerol dehydratase from *Klebsiella pneumoniae* XJPD-Li 108
- Glycerol trioleate
Effect of water on methanolysis of glycerol trioleate catalyzed by immobilized lipase *Candida* sp. 99–125 in organic solvent system 122
- α -Glucosidase
Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Heme-peptide
Kinetic analysis for suicide-substrate inactivation of microperoxidase-11: A modified model for bisubstrate enzymes in the presence of reversible inhibitors 61
- Hg²⁺
Response surface design for the optimization of enzymatic detection of mercury in aqueous solution using immobilized urease from vegetable waste 265
- Horseradish peroxidase
Effects of pH and pore characters of mesoporous silicas on horseradish peroxidase immobilization 246
- HRP
Amperometric hydrogen peroxide biosensor based on the immobilization of HRP on DNA-silver nanohybrids and PDDA-protected gold nanoparticles 215
- Hydrogen peroxide biosensor
Amperometric hydrogen peroxide biosensor based on the immobilization of HRP on DNA-silver nanohybrids and PDDA-protected gold nanoparticles 215
- Hydrolysis
Effect of water on methanolysis of glycerol trioleate catalyzed by immobilized lipase *Candida* sp. 99–125 in organic solvent system 122
- Hydrolysis of glycoside
Enhancement of polyphenol bio-activities by enzyme reaction 173
- Hydrolytic activity
The effect of spacer arm on hydrolytic and synthetic activity of *Candida rugosa* lipase immobilized on silica gel 231
- Hydroxynitrile lyase
Parameters influencing asymmetric synthesis of (*R*)-mandelonitrile by a novel (*R*)-hydroxynitrile lyase from *Eriobotrya japonica* 208
- 3-Hydroxy-1-phenylpropane-1-one
Microbial production of (*S*)-1-phenyl-1,3-propanediol by stereospecific reduction of 3-hydroxy-1-phenylpropane-1-one 283
- Ibuprofen
Effects of alcohol and solvent on the performance of lipase from *Candida* sp. in enantioselective esterification of racemic ibuprofen 126
- Immobilization
Screening and reaction engineering for the bioreduction of ethyl benzoylacetate and its analogues 55
The effect of spacer arm on hydrolytic and synthetic activity of *Candida rugosa* lipase immobilized on silica gel 231
Quantitative characteristic of the catalytic properties and microstructure of cross-linked enzyme aggregates of penicillin acylase 202
Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- Immobilized enzyme
Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- Immobilized lipase
Effect of water on methanolysis of glycerol trioleate catalyzed by immobilized lipase *Candida* sp. 99–125 in organic solvent system 122
- Inactivation
Quantitative analysis on inactivation and reactivation of recombinant glycerol dehydratase from *Klebsiella pneumoniae* XJPD-Li 108
- Inhibition
Kinetic analysis for suicide-substrate inactivation of microperoxidase-11: A modified model for bisubstrate enzymes in the presence of reversible inhibitors 61
- Interaction
Response surface analysis for enzymatic decolorization of Congo red by manganese peroxidase 1
- Ionic liquid
Use of an ionic liquid to improve asymmetric reduction of 4'-methoxyacetophenone catalyzed by immobilized *Rhodotorula* sp. AS2.2241 cells 70
- Ionic liquids
Stereoselective synthesis of (*R*)-1-chloro-3(3,4-difluorophenoxy)-2-propanol using lipases from *Pseudomonas aeruginosa* in ionic liquid-containing system 294
- Iridoid glycoside
Regio-selective acylation of biologically important iridoid glycosides by *Candida antarctica* lipase 46
- K₂CO₃
Novel regenerable potassium-based dry sorbents for CO₂ capture at low temperatures 179
- KHCO₃
Novel regenerable potassium-based dry sorbents for CO₂ capture at low temperatures 179
- Kinetic resolution
Kinetic resolution of *rac*-alkyl alcohols via lipase-catalyzed enantioselective acylation using succinic anhydride as acylating agent 142
- Kinetics
Kinetic analysis of 11 α -hydroxylation of steroids by *Rhizopus nigricans* 136
- Klebsiella pneumoniae*
Quantitative analysis on inactivation and reactivation of recombinant glycerol dehydratase from *Klebsiella pneumoniae* XJPD-Li 108
- Lactate dehydrogenase
Encapsulation of lactate dehydrogenase in carbon nanotube doped alginate-chitosan capsules 102
- Lactonization
Resolution of biotin intermediate lactone by enzyme-catalyzed stereoselective lactonization in organic solvent 20
- Lip2
Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115

- Lipase**
 Optimized synthesis of lipase-catalyzed L-ascorbyl laurate by Novozym® 435 7
 Regio-selective acylation of biologically important iridoid glycosides by *Candida antarctica* lipase 46
 Cloning, expression and characterization of an organic solvent tolerant lipase from *Pseudomonas fluorescens* JCM5963 78
 Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115
 Kinetic resolution of *rac*-alkyl alcohols via lipase-catalyzed enantioselective acylation using succinic anhydride as acylating agent 142
 The effect of spacer arm on hydrolytic and synthetic activity of *Candida rugosa* lipase immobilized on silica gel 231
 Lipase-catalysed synthesis of esters of ferulic acid with natural compounds and evaluation of their antioxidant properties 277
- Lipases**
 Stereoselective synthesis of (*R*)-1-chloro-3(3,4-difluorophenoxy)-2-propanol using lipases from *Pseudomonas aeruginosa* in ionic liquid-containing system 294
- Loquat**
 Parameters influencing asymmetric synthesis of (*R*)-mandelonitrile by a novel (*R*)-hydroxynitrile lyase from *Eriobotrya japonica* 208
- Manganese peroxidase**
 Response surface analysis for enzymatic decolorization of Congo red by manganese peroxidase 1
- Matrix**
 Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- MCF**
 Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34
- α -Methyl-L-serine**
 Screening of microorganisms producing α -methylserine hydroxymethyltransferase, purification of the enzyme, gene cloning, and application to the enzymatic synthesis of α -methyl-L-serine 221
- α -Methylserine hydroxymethyltransferase**
 Screening of microorganisms producing α -methylserine hydroxymethyltransferase, purification of the enzyme, gene cloning, and application to the enzymatic synthesis of α -methyl-L-serine 221
- Membrane topology**
 Identification and functional expression of a $\Delta 9$ fatty acid desaturase from the marine bacterium *Pseudoalteromonas* sp. MLY15 96
- Mesoporous silica**
 Effects of pH and pore characters of mesoporous silicas on horseradish peroxidase immobilization 246
- Metagenome**
 Environmental DNA as a source of a novel epoxide hydrolase reacting with aliphatic terminal epoxides 288
- Methanolysis**
 Effect of water on methanolysis of glycerol trioleate catalyzed by immobilized lipase *Candida* sp. 99-125 in organic solvent system 122
- 4'-Methoxyacetophenone**
 Use of an ionic liquid to improve asymmetric reduction of 4'-methoxyacetophenone catalyzed by immobilized *Rhodotorula* sp. AS2.2241 cells 70
- Microemulsion**
 Singlet oxygenation in microemulsion catalysed by vanadium chloroperoxidase 259
- Microperoxidase-11**
 Kinetic analysis for suicide-substrate inactivation of microperoxidase-11: A modified model for bisubstrate enzymes in the presence of reversible inhibitors 61
- Microstructure**
 Quantitative characteristic of the catalytic properties and microstructure of cross-linked enzyme aggregates of penicillin acylase 202
- Molecular weight**
 Investigation on enzymatic degradation of γ -polyglutamic acid from *Bacillus subtilis* NX-2 158
- MTPC**
 Co-polymerization of MTPC (methylene tri *p*-cresol) and *m*-cresol using CiP (*Coprinus cinereus* peroxidase) to improve the dissolution characteristics of the enzyme-catalyzed polymer 227
- p*-Nitrophenyl alkanoate**
 Regio-selective acylation of biologically important iridoid glycosides by *Candida antarctica* lipase 46
- Nanofiber**
 Enzyme immobilization on electrospun polymer nanofibers: An overview 189
- Optical purity**
 Microbial production of (*S*)-1-phenyl-1,3-propanediol by stereospecific reduction of 3-hydroxy-1-phenylpropane-1-one 283
- Optimization**
 Optimized synthesis of lipase-catalyzed L-ascorbyl laurate by Novozym® 435 7
 Kinetic analysis of 11 α -hydroxylation of steroids by *Rhizopus nigricans* 136
- Optimum temperature**
 Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Organic solvent**
 Cloning, expression and characterization of an organic solvent tolerant lipase from *Pseudomonas fluorescens* JCM5963 78
- Organic solvent-tolerant bacteria**
 A novel organic solvent-stable alkaline protease from organic solvent-tolerant *Bacillus licheniformis* YP1A 85
- γ -Polyglutamic acid**
 Investigation on enzymatic degradation of γ -polyglutamic acid from *Bacillus subtilis* NX-2 158
- Partial hydrolysis**
 Preparation of a diacylglycerol-enriched soybean oil by phospholipase A1 catalyzed hydrolysis 165
- PDDA-protected gold nanoparticles**
 Amperometric hydrogen peroxide biosensor based on the immobilization of HRP on DNA-silver nanohybrids and PDDA-protected gold nanoparticles 215
- Pectinesterase**
 Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
- Penicillin acylase**
 Quantitative characteristic of the catalytic properties and microstructure of cross-linked enzyme aggregates of penicillin acylase 202
- Phospholipase A1**
 Preparation of a diacylglycerol-enriched soybean oil by phospholipase A1 catalyzed hydrolysis 165
- Photoresist**
 Co-polymerization of MTPC (methylene tri *p*-cresol) and *m*-cresol using CiP (*Coprinus cinereus* peroxidase) to improve the dissolution characteristics of the enzyme-catalyzed polymer 227
- Polydispersity**
 Investigation on enzymatic degradation of γ -polyglutamic acid from *Bacillus subtilis* NX-2 158
- Poly(GMA-co-EGDMA)**
 Macroporous poly(glycidyl methacrylate-co-ethylene glycol dimethacrylate) resins—Versatile immobilization supports for biocatalysts 196
- Polyphenol oxidase**
 Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- Preparative scale**
 Screening and reaction engineering for the bioreduction of ethyl benzoylacetate and its analogues 55
- Promoters**
 Cloning of amidase gene from *Rhodococcus erythropolis* and expression by distinct promoters in *Bacillus subtilis* 89
- Protecting groups**
 On the biocatalytic cleavage of silicon-oxygen bonds: A substrate structural approach to investigating the cleavage of protecting group silyl ethers by serine-triad hydrolases 24
- Pseudoalteromonas***
 Identification and functional expression of a $\Delta 9$ fatty acid desaturase from the marine bacterium *Pseudoalteromonas* sp. MLY15 96
- Pseudomonas aeruginosa***
 Stereoselective synthesis of (*R*)-1-chloro-3(3,4-difluorophenoxy)-2-propanol using lipases from *Pseudomonas aeruginosa* in ionic liquid-containing system 294
- Pseudomonas fluorescens***
 Cloning, expression and characterization of an organic solvent tolerant lipase from *Pseudomonas fluorescens* JCM5963 78
- Psychrophilic enzymes**
 Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300

- Pumpkin
Response surface design for the optimization of enzymatic detection of mercury in aqueous solution using immobilized urease from vegetable waste 265
- Purification
Immobilization of apricot pectinesterase (*Prunus armeniaca* L.) on porous glass beads and its characterization 13
Biochemical and molecular characterisation of a thermoactive, alkaline and detergent-stable lipase from a newly isolated *Staphylococcus aureus* strain 237
- Pyridoxal-5'-phosphate
Screening of microorganisms producing α -methylserine hydroxymethyltransferase, purification of the enzyme, gene cloning, and application to the enzymatic synthesis of α -methyl-L-serine 221
- rac*-Alkyl alcohol
Kinetic resolution of *rac*-alkyl alcohols via lipase-catalyzed enantioselective acylation using succinic anhydride as acylating agent 142
- rac*-CDPP
Stereoselective synthesis of (*R*)-1-chloro-3(3,4-difluorophenoxy)-2-propanol using lipases from *Pseudomonas aeruginosa* in ionic liquid-containing system 294
- Reactivation
Quantitative analysis on inactivation and reactivation of recombinant glycerol dehydratase from *Klebsiella pneumoniae* XJPD-Li 108
- Reactivation factor
Quantitative analysis on inactivation and reactivation of recombinant glycerol dehydratase from *Klebsiella pneumoniae* XJPD-Li 108
- Regioselectivity
Environmental DNA as a source of a novel epoxide hydrolase reacting with aliphatic terminal epoxides 288
- Response surface methodology
Response surface analysis for enzymatic decolorization of Congo red by manganese peroxidase 1
Optimized synthesis of lipase-catalyzed L-ascorbyl laurate by Novozym® 435 7
- Response surface methodology (RSM)
Response surface design for the optimization of enzymatic detection of mercury in aqueous solution using immobilized urease from vegetable waste 265
- Rhizopus nigricans*
Kinetic analysis of 11 α -hydroxylation of steroids by *Rhizopus nigricans* 136
- Rhodotorula* sp. AS2.2241
Use of an ionic liquid to improve asymmetric reduction of 4'-methoxyacetophenone catalyzed by immobilized *Rhodotorula* sp. AS2.2241 cells 70
- Ring-opening polymerization
Ring-opening polymerization of ϵ -caprolactone catalyzed by a novel thermophilic esterase from the archaeon *Archaeoglobus fulgidus* 151
- SAFT
Effect of alcohol on the solubility of amino acid in water 185
- SBA-15
Immobilization of alkaline serine endopeptidase from *Bacillus licheniformis* on SBA-15 and MCF by surface covalent binding 34
- Selectivity
Lipase-catalyzed chemoselective aminolysis of various aminoalcohols with fatty acids 29
- Separation
Separation, characterization and catalytic properties of Lip2 isoforms from *Candida* sp. 99-125 115
- Sequencing
Biochemical and molecular characterisation of a thermoactive, alkaline and detergent-stable lipase from a newly isolated *Staphylococcus aureus* strain 237
- Serine hydrolases
On the biocatalytic cleavage of silicon-oxygen bonds: A substrate structural approach to investigating the cleavage of protecting group silyl ethers by serine-triad hydrolases 24
- Silylethers
On the biocatalytic cleavage of silicon-oxygen bonds: A substrate structural approach to investigating the cleavage of protecting group silyl ethers by serine-triad hydrolases 24
- Singlet oxygen
Singlet oxygenation in microemulsion catalysed by vanadium chloroperoxidase 259
- Solubility
Effect of alcohol on the solubility of amino acid in water 185
- Solvent
Effects of alcohol and solvent on the performance of lipase from *Candida* sp. in enantioselective esterification of racemic ibuprofen 126
- Solvent-stable protease
A novel organic solvent-stable alkaline protease from organic solvent-tolerant *Bacillus licheniformis* YP1A 85
- Soybean oil
Preparation of a diacylglycerol-enriched soybean oil by phospholipase A1 catalyzed hydrolysis 165
- Spacer arm
The effect of spacer arm on hydrolytic and synthetic activity of *Candida rugosa* lipase immobilized on silica gel 231
- (*S*)-1-Phenyl-1,3-propanediol
Microbial production of (*S*)-1-phenyl-1,3-propanediol by stereospecific reduction of 3-hydroxy-1-phenylpropane-1-one 283
- Staphylococcus aureus* lipase
Biochemical and molecular characterisation of a thermoactive, alkaline and detergent-stable lipase from a newly isolated *Staphylococcus aureus* strain 237
- Stereospecific reduction
Microbial production of (*S*)-1-phenyl-1,3-propanediol by stereospecific reduction of 3-hydroxy-1-phenylpropane-1-one 283
- Substrate
Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- Succinic anhydride
Kinetic resolution of *rac*-alkyl alcohols via lipase-catalyzed enantioselective acylation using succinic anhydride as acylating agent 142
- Suicide inactivation
Kinetic analysis for suicide-substrate inactivation of microperoxidase-11: A modified model for bisubstrate enzymes in the presence of reversible inhibitors 61
- Surface attachment
Enzyme immobilization on electrospun polymer nanofibers: An overview 189
- Synthetic activity
The effect of spacer arm on hydrolytic and synthetic activity of *Candida rugosa* lipase immobilized on silica gel 231
- Temperature dependence
Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Tertiary acids
On the biocatalytic cleavage of silicon-oxygen bonds: A substrate structural approach to investigating the cleavage of protecting group silyl ethers by serine-triad hydrolases 24
- Tetrahydrofolate
Screening of microorganisms producing α -methylserine hydroxymethyltransferase, purification of the enzyme, gene cloning, and application to the enzymatic synthesis of α -methyl-L-serine 221
- Theaflavins
Biotransformation of tea catechins into theaflavins with immobilized polyphenol oxidase 253
- Thermo-alkaline
Biochemical and molecular characterisation of a thermoactive, alkaline and detergent-stable lipase from a newly isolated *Staphylococcus aureus* strain 237
- Thermophilic esterase
Ring-opening polymerization of ϵ -caprolactone catalyzed by a novel thermophilic esterase from the archaeon *Archaeoglobus fulgidus* 151
- Thermostability
Kinetic and thermodynamic characterization of the cold activity acquired upon single amino-acid substitution near the active site of a thermostable α -glucosidase 300
- Trans*-esterification
Regio-selective acylation of biologically important iridoid glycosides by *Candida antarctica* lipase 46
- Tyrosinase inhibition
Enhancement of polyphenol bio-activities by enzyme reaction 173
- Uniform design
Kinetic analysis of 11 α -hydroxylation of steroids by *Rhizopus nigricans* 136
- Unsaturated fatty acid
Identification and functional expression of a $\Delta 9$ fatty acid desaturase from the marine bacterium *Pseudoalteromonas* sp. MLY15 96

- Urease
Response surface design for the optimization of enzymatic detection of mercury in aqueous solution using immobilized urease from vegetable waste 265
- Vanadium chloroperoxidase
Singlet oxygenation in microemulsion catalysed by vanadium chloroperoxidase 259
- Water
Effect of water on methanolysis of glycerol trioleate catalyzed by immobilized lipase *Candida* sp. 99–125 in organic solvent system 122
- Williopsis saturnus* var. *mraakii*
Microbial production of (*S*)-1-phenyl-1,3-propanediol by stereospecific reduction of 3-hydroxy-1-phenylpropane-1-one 283
- Yeasts
Screening and reaction engineering for the bioreduction of ethyl benzoylacetate and its analogues 55
- ZrO₂
Novel regenerable potassium-based dry sorbents for CO₂ capture at low temperatures 179
