

(Contents Continued from outside back cover)

Anti-Prelog reduction of ketones by hairy root cultures A.A. Orden, C. Magallanes-Noguera (San Luis, Argentina), E. Agostini (Córdoba, Argentina) and M. Kurina-Sanz (San Luis, Argentina)	216
Transformation of isoxanthohumol by fungi A. Bartmańska, E. Huszcza and T. Tronina (Wrocław, Poland)	221
Differences in biocatalytic behavior between two variants of StcI esterase from <i>Aspergillus nidulans</i> and its potential use in biocatalysis C. Peña-Montes (Mexico, Mexico and Stuttgart, Germany), S. Lange (Stuttgart, Germany), D. Castro-Ochoa, K. Ruiz-Noria, F. Cruz-García (Mexico, Mexico), R. Schmid (Stuttgart, Germany), A. Navarro-Ocaña and A. Farrés (Mexico, Mexico)	225
An active-site mutation enhances the catalytic activity of the yeast <i>Cryptococcus humicola</i> D-aspartate oxidase S. Takahashi, S. Matsumoto, K. Maruyama, A. Wakaizumi, K. Abe, Y. Kera and R.-h. Yamada (Niigata, Japan)	235
Study of the removal of allyl esters by <i>Candida antarctica</i> lipase B (CAL-B) and pig liver esterase (PLE) K. Thodi, E. Barbayanni, I. Fotakopoulou (Athens, Greece), U.T. Bornscheuer (Greifswald, Germany), V. Constantinou-Kokotou, P. Moutevelis-Minakakis and G. Kokotos (Athens, Greece)	241
Chemoenzymatic preparative separation of silybins A and B V. Křen, R. Gažák, K. Purchartová, P. Marhol, D. Biedermann and P. Sedmera (Prague, Czech Republic)	247
Purification and characterization of an extracellular laccase from a <i>Pseudomonas</i> sp. LBC1 and its application for the removal of bisphenol A A.A. Telke, D.C. Kalyani, U.U. Jadhav (Kolhapur, India), G.K. Parshetti (Hsinchu, Taiwan) and S.P. Govindwar (Kolhapur, India)	252
Carboxylic acids used in common buffer systems inhibit the activity of fungal laccases T. Ters (Wien, Austria), T. Kuncinger and E. Srebotnik (Wien, Austria and Linz, Austria)	261
α - and β -oxygenated aldehydes derived from Diels–Alder reactions as substrates for hydroxynitrile lyases M. Avi, G. Steinkellner (Graz, Austria), J. Keilitz, C. Hajji, R. Haag (Berlin, Germany), K. Gruber and H. Griengl (Graz, Austria)	268
Non-native states of cardosin A induced by acetonitrile: Activity modulation via polypeptide chains rearrangements C.S. Oliveira, A.C. Sarmento, A. Pereira (Aveiro, Portugal), I. Correia, J.C. Pessoa (Lisboa, Portugal), V.I. Esteves, H.M.A.C. Fonseca (Aveiro, Portugal), E. Pires (Coimbra, Portugal) and M.T. Barros (Coimbra, Portugal and Viseu, Portugal)	274
Chemoenzymatic preparation of a biologically active naphthoquinone from <i>Tabebuia impetiginosa</i> using lipases or alcohol dehydrogenases D.M. de Freitas Araujo, G.A.B. Vieira, M.C. de Mattos, T.L.G. Lemos, M. da Conceição F. de Oliveira, V.M.M. Melo (Fortaleza, Brazil), G. de Gonzalo, V. Gotor-Fernández and V. Gotor (Oviedo, Spain)	279
Enantioselective reduction of fluorenones in surfactant-aqueous solution by fruits and vegetables B. Xie, J. Yang, Q. Yang and W. Yuan (Dalian, China)	284
Molecular modeling of the mechanism of ethyl fatty ester synthesis catalyzed by lipases. Effects of structural water and ethanol initial co-adsorption with the fatty acid M.L. Foresti and M.L. Ferreira (Bahía Blanca, Argentina)	289
Quantitative enzyme immobilization: Control of the carboxyl group density on support surface P. Ye, R.-B. Wan and X.-P. Wang (Hangzhou, PR China)	296
Peroxidase-like activity of <i>Thermobifida fusca</i> hemoglobin: The oxidation of dibenzylbutanolide R. Torge, A. Comandini, B. Catacchio, A. Bonamore, B. Botta and A. Boffi (Rome, Italy)	303
