Special Issue: Selected Papers from the IXth International Symposium on Biocatalysis and Biotransformations

Guest Editor: Jean-Louis Reymond

Selected Papers from the Biotrans 2009 Conference

J.-L. Reymond (Freiestrasse, Switzerland) . . . . .	1
Increased activity of enzymatic transacylation of acrylates through rational design of lipases P.-O. Syrén, E. Lindgren (Stockholm, Sweden), H.W. Hoeffken, C. Branney, S. Maurer, B. Hauer (Ludwigshafen, Germany) and K. Hult (Stockholm, Sweden) . . . . .	3
Mutations in the stereospecificity pocket and at the entrance of the active site of <i>Candida antarctica</i> lipase B enhancing enzyme enantioselectivity Z. Marton, V. Léonard-Nevers (La Rochelle, France), P.-O. Syrén (Stockholm, Sweden), C. Bauer, S. Lamare (La Rochelle, France), K. Hult (Stockholm, Sweden), V. Tranc (Nantes, France) and M. Graber (La Rochelle, France) . . . . .	11
Lipases for use in industrial biocatalysis: Specificity of selected structural groups of lipases S. Naik, A. Basu, R. Saikia, B. Madan, P. Paul (Bangalore, India), R. Chatterjee (Stockholm, Sweden), J. Brask and A. Svendsen (Bagsvaerd, Denmark) . . . . .	18
Substitution of the catalytic acid–base Glu <sup>237</sup> by Gln suppresses hydrolysis during glucosylation of phenolic acceptors catalyzed by <i>Leuconostoc mesenteroides</i> sucrose phosphorylase J. Wiesbauer, C. Goedel, A. Schwarz (Graz, Austria), L. Brecker (Vienna, Austria) and B. Nidetzky (Graz, Austria) . . . . .	24
Lactones 34 [1]. Application of alcohol dehydrogenase from horse liver (HLADH) in enantioselective synthesis of $\delta$ - and $\epsilon$ - lactones F. Boratyriski, G. Kiebowicz, C. Wawrzyńczyk (Wroclaw, Poland) . . . . .	30
Bioreduction of prochiral ketones by growing cells of <i>Lasiodiplodia theobromae</i> : Discovery of a versatile biocatalyst for asymmetric synthesis B.A. Barros-Filho (Florianópolis, Brazil), F.M. Nunes (Belém, Brazil), M. da Conceição F. de Oliveira, T.L.G. Lemos, M.C. de Mattos (Fortaleza, Brazil), G. de Gonzalo, V. Gotor-Fernández and V. Gotor (Oviedo, Spain) . . . . .	37
Access to enantiopure aromatic epoxides and diols using epoxide hydrolases derived from total biofilter DNA M. Kotík, V. Štěpánek, M. Grulich, P. Kyslík (Prague, Czech Republic) and A. Archelas (Marseille, France) . . . . .	41
Biocatalyzed irreversible esterification in the preparation of S-naproxen R. Morrone, N. D'Antona, D. Lambusta and G. Nicolosi (Catania, Italy) . . . . .	49
Laccase-mediated oxidation of phenolic derivatives C. Navarra (Milano, Italy), C. Goodwin, S. Burton (Cape Town, South Africa), B. Danieli and S. Riva (Milano, Italy) . . . . .	52
An efficient enzymatic synthesis of 5-aminovaleric acid A.V. Pukin (Wageningen, The Netherlands), C.G. Boeriu (Wageningen, The Netherlands and Arad, Romania), E.L. Scott, J.P.M. Sanders and M.C.R. Franssen (Wageningen, The Netherlands) . . . . .	58
Predicted secondary structure of hydroperoxide lyase from green bell pepper cloned in the yeast <i>Yarrowia lipolytica</i> M.P. Santiago-Gómez (Dijon, France), S. Kermasha (Quebec, Canada), J.-M. Nicaud (Thiverval-Grignon, France), J.-M. Belin and F. Husson (Dijon, France) . . . . .	63
<i>Pseudomonas cepacia</i> lipase catalyzed esterification and transesterification of 3-(furan-2-yl) propanoic acid/ethyl ester: A comparison in ionic liquids vs hexane P. Vidya and A. Chadha (Chennai, India) . . . . .	68
Chemical modifications by ionic liquid-inspired cations improve the activity and the stability of formate dehydrogenase in [MMIm][Me <sub>2</sub> PO <sub>4</sub> ] M. Bekhouche, B. Doumèche and L.J. Blum (Villeurbanne, France) . . . . .	73
Preparation and properties of xerogels obtained by ionic liquid incorporation during the immobilization of lipase by the sol–gel method C. Zarcu, L. Corici, R. Croitoru, A. Ursou and F. Peter (Timișoara, Romania) . . . . .	79
Enzymatic synthesis of monoglycerides by esterification reaction using <i>Penicillium camembertii</i> lipase immobilized on epoxy SiO <sub>2</sub> -PVA composite L. Freitas, A.V. Paula, J.C. dos Santos (São Paulo, Brazil), G.M. Zanin (Maringá, Brazil) and H.F. de Castro (São Paulo, Brazil) . . . . .	87
Improvement of activity and stability of soluble and sol–gel immobilized naringinase in co-solvent systems H. Vila-Real, A.J. Alfaia, A.R. Calado and M.H.L. Ribeiro (Lisbon, Portugal) . . . . .	91
Pressure-enhanced activity and stability of $\alpha$ -L-rhamnosidase and $\beta$ -D-glucosidase activities expressed by naringinase H. Vila-Real, A.J. Alfaia (Lisbon, Portugal), R.S. Phillips (Athens, GA, USA), A.R. Calado and M.H.L. Ribeiro (Lisbon, Portugal) . . . . .	102
Thermophilic $\alpha$ -glucan phosphorylase from <i>Clostridium thermocellum</i> : Cloning, characterization and enhanced thermostability X. Ye, J. Rollin (Blacksburg, VA, USA) and Y.-H.P. Zhang (Blacksburg, VA, USA and Oak Ridge, TN, USA) . . . . .	110
Interesterification of milkfat and soybean oil blends catalyzed by immobilized <i>Rhizopus oryzae</i> lipase A.V. Paula, G.F.M. Nunes, L. Freitas, H.F. de Castro and J.C. Santos (Lorena, Brazil) . . . . .	117
Production of human milk fat substitutes enriched in omega-3 polyunsaturated fatty acids using immobilized commercial lipases and <i>Candida parapsilosis</i> lipase/acyltransferase C. Tecelão (Peniche, Portugal and Lisbon, Portugal), J. Silva (Lisbon, Portugal), E. Dubreucq (Montpellier, France), M.H. Ribeiro and S. Ferreira-Dias (Lisbon, Portugal) . . . . .	122
Recombinant expression of glycerol-3-phosphate dehydrogenase using the <i>Pichia pastoris</i> system M. de Freitas Sanches Peres, V.C. Silva, S.R. Valentini and E.A. de Lucca Gattás (São Paulo, Brazil) . . . . .	128
Application of lipase from the physic nut ( <i>Jatropha curcas</i> L.) to a new hybrid (enzyme/chemical) hydroesterification process for biodiesel production J.S. de Sousa, E. d'Ávila Cavalcanti-Oliveira, D.A.G. Aranda and D.M.G. Freire (Rio de Janeiro, Brazil) . . . . .	133
