## ERRATUM

For the paper by Ghosh *et al.* entitled "Acidissimin, a New Tyramine Deviative from the Fruit of *Limonia acidissima*," *J. Nat. Prod.*, **52**, 1323 (1989), the authors request a name change in the title compound due to the earlier use of the name acidissimin. The new tyramine deviative is thus renamed acidissiminin [1].

For the paper by Kingston *et al.* entitled "The Chemistry of Taxol, a Clinically Useful Anticancer Agent," *J. Nat. Prod.*, **53**, 1 (1990), the authors have requested the following corrections:

Page 4, Structure 9: The AcO group in the 2'-position of the side-chain should be an HO group.

Page 5, Table 2: References 16, 15, 18, and 13 cited in footnotes a-d should be 18, 17, 16, and 14 respectively.

Page 5 line 10: Reference 17 should be 19.
