

1999, Volume 62

Richard J. Clark, Mary J. Garson, Ian M. Brereton, and John A. Kennedy: Vinylfurans Revisited: A New Sesquiterpene from *Euryspongia deliculata*.

Page 915: The authors point out that *iso*-dehydrodrolasin reported in the above paper is 2-[(1'*E*,4'*E*,6'*E*)-4',8'-dimethylnona-1',4',6'-trienyl]furan, while the furan isodehydrodrolasin of similar name and previously reported by A. Fontana, C. Avila, E. Martonez, J. Ortea, E. Trivelone, and G. Cimino (*J. Chem. Ecol.* **1993**, *19*, 339–356) has the isomeric 2-[(3'*E*,6'*E*)-4',8'-dimethylnona-3',6',8'-trienyl]furan structure.
