

Additions and Corrections

2005, Volume 68

Simon P. B. Oviden, Jin Yu, Jill Bernays, Soo San Wan, Larissa J. Christophidis, Gian Sberna, R. Murray Tait, Howard G. Wildman, Dominique Lebeller, Denis Platel, Tom W. May, and Barbara M. Meurer-Grimes*: Trichomycins A and B: Antibacterial Triterpenes from the New Species *Tricholoma* sp. AU1.

Page 409: It has been brought to the authors' attention that the name trichomycin has been previously used for a series of unrelated polyene antibiotics (see Komori, T.; Morimoto, Y. *J. Chromatogr.* **1989**, *481*, 416–420). We therefore rename the compounds cerylimycins A (**1**) and B (**2**) and change the title of the paper to “Cerylimycins A and B: Antibacterial Triterpenes from the New Species *Tricholoma* sp. AU1”.

(1) R = CHO
(2) R = H
