## Subject index for PSI-14

### **$\beta$ -ray induced X-ray spectrometry (BIXS)**

Nondestructive measurement of surface tritium by  $\beta$ -ray induced X-ray spectrometry (BIXS), M. Matsuyama, T. Tanaabe, N. Noda, V. Philipps, K.H. Finken and K. Watanabe  
290–293 (2001) 437

### **1D model**

The effect of baffling on divertor leakage in Alcator C-Mod, C.S. Pitcher, C.J. Boswell, T. Chung, J.A. Goetz, B. LaBombard, B. Lipschultz, J.E. Rice, D.P. Stotler and J.L. Terry  
290–293 (2001) 812

### **2D fluid code**

Calculation of 2D profiles for the plasma and electric field in the boundary layer of the TEXTOR-94 Tokamak, H. Gerhauser, R. Zagórski, H.A. Claaßen and M. Lehnen  
290–293 (2001) 604

### **2D model**

Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby  
290–293 (2001) 224

Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner  
290–293 (2001) 464

Interpretation of SOL flows and target asymmetries in JET using EDGE2D code calculations, A.V. Chankin, G. Corrigan, S.K. Erents, G.F. Matthews, J. Spence and P.C. Stangeby  
290–293 (2001) 518

Plasma edge fluid models for recycling at near tangential surfaces, M. Baelmans, D. Reiter, B. Küppers and P. Börner  
290–293 (2001) 537

Analysis of SOL behaviour in JET MkIIIGB using an advanced onion-skin solver (OSM2), W. Fundamenski, S.K. Erents, G.F. Matthews, A.V. Chankin, V. Riccardo, P.C. Stangeby and J.D. Elder  
290–293 (2001) 593

Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte  
290–293 (2001) 733

Multi-machine modelling of divertor geometry effects, A. Loarte  
290–293 (2001) 805

Critical issues in divertor optimisation for ITER-FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887

Cloud drifts over eroding surfaces in magnetic field configurations with three field components, P. Lalouis, R. Schneider and L.L. Lengyel  
290–293 (2001) 1084

### **Ablation**

Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev  
290–293 (2001) 1074

### **a-C:D**

Wall conditioning by microwave generated plasmas in a toroidal magnetic field, J. Ihde, H.B. Störk, J. Winter, M. Rubel, H.G. Esser and H. Toyoda  
290–293 (2001) 1180

### **Alcator C-Mod**

Molybdenum sources and transport in Alcator C-Mod, B. Lipschultz, D.A. Pappas, B. LaBombard, J.E. Rice, D. Smith and S. Wukitch  
290–293 (2001) 286

High resolution measurements of neutral density and ionization rate in the main chamber of the Alcator C-Mod tokamak, R.L. Boivin, J. Goetz, A. Hubbard, J.W. Hughes, J. Irby, B. LaBombard, E. Marmor, D. Mossessian and J.L. Terry  
290–293 (2001) 542

Observations of cold, high density plasma in the private flux region of the Alcator C-Mod divertor, C.J. Boswell, J.L. Terry, B. LaBombard, B. Lipschultz and J.A. Goetz  
290–293 (2001) 556

Impurity transport experiments in the edge plasma of Alcator C-Mod using gas injection plumes, S. Gangadhara, B. LaBombard and C. MacLachy  
290–293 (2001) 598

Visible imaging of turbulence in the SOL of the Alcator C-Mod tokamak, J.L. Terry, R. Maqueda, C.S. Pitcher, S.J. Zweben, B. LaBombard, E.S. Marmor, A.Y. Pigarov and G. Wurden  
290–293 (2001) 757

Effects of flush-mounted probe bias on local turbulent fluctuations, D.L. Winslow and B. LaBombard  
290–293 (2001) 788

Multi-machine modelling of divertor geometry effects, A. Loarte  
290–293 (2001) 805

The effect of baffling on divertor leakage in Alcator C-Mod, C.S. Pitcher, C.J. Boswell, T. Chung, J.A. Goetz, B. La-

- Bombard, B. Lipschultz, J.E. Rice, D.P. Stotler and J.L. Terry 290–293 (2001) 812  
 Modeling of Alcator C-Mod divertor baffling experiments, D.P. Stotler, C.S. Pitcher, C.J. Boswell, T.K. Chung, B. LaBombard, B. Lipschultz, J.L. Terry and R.J. Kanzleiter 290–293 (2001) 967
- Amorphous carbon**  
 Carbon erosion mechanisms in tokamak divertor materials: insight from molecular dynamics simulations, E. Salonen, K. Nordlund, J. Keinonen and C.H. Wu 290–293 (2001) 144  
 Reactivity of lithium-containing amorphous carbon (a-C) films, M. Töwe, P. Reinke and P. Oelhafen 290–293 (2001) 153  
 Silicon diffusion in amorphous carbon films, E. Vainonen-Ahlgren, T. Ahlgren, L. Khriachtchev, J. Likonen, S. Lehto, J. Keinonen and C.H. Wu 290–293 (2001) 216
- Annealing behavior**  
 Silicon diffusion in amorphous carbon films, E. Vainonen-Ahlgren, T. Ahlgren, L. Khriachtchev, J. Likonen, S. Lehto, J. Keinonen and C.H. Wu 290–293 (2001) 216
- Anomalous transport**  
 Turbulent transport studies in JET edge plasmas in X-point configurations, I. García-Cortés, A. Loarte, R. Balbín, J. Bleuel, A. Chankin, S.J. Davies, M. Endler, S.K. Erements, C. Hidalgo, G.F. Matthews and H. Thomsen 290–293 (2001) 604  
 ASDEX-Upgrade edge transport scalings from the two-dimensional interpretative code B2.5-I, J.-W. Kim, D.P. Coster, J. Neuhauser, R. Schneider and ASDEX-Upgrade Team 290–293 (2001) 644
- Argon**  
 Trapping of eV deuterium ions by niobium at glancing incidence, V.A. Kurnaev, A.V. Golubeva, A.A. Evanov, D.V. Levchuk, A.A. Pisarev and N.N. Trifonov 290–293 (2001) 112  
 Impurity behavior in high performance radiative discharges of JT-60U, S. Sakurai, H. Kubo, A. Takenaga, N. Asakura, H. Tamai, T. Ishijima, S. Konoshima, K. Itami, A. Sakasai, S. Higashijima, T. Sugie and JT-60 Team 290–293 (2001) 1002
- ASDEX-Upgrade**  
 Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367  
 High-density H-mode operation achieved using efficient plasma refueling by inboard pellet launch, P.T. Lang, O. Gruber, L.D. Horton, T.T.C. Jones, M. Kaufmann, A. Lorenz, M. Maraschek, V. Mertens, J. Neuhauser, G. Saibene, H. Zohm, ASDEX Upgrade Team and JET Team 290–293 (2001) 374  
 Vibrational population of the ground state of H<sub>2</sub> and D<sub>2</sub> in the divertor of ASDEX Upgrade, B. Heger, U. Fantz, K. Behringer and ASDEX Upgrade Team 290–293 (2001) 413  
 Radiation distribution and power balance in the ASDEX Upgrade LYRA divertor, J.C. Fuchs, D. Coster, A. Herrmann, A. Kallenbach, K.F. Mast and ASDEX Upgrade Team 290–293 (2001) 525  
 Heat flux decay length in the midplane of ASDEX Upgrade, A. Herrmann, A. Carlson, J.C. Fuchs, O. Gruber, M. Laux, J. Neuhauser, R. Pugno, A. Sips, W. Treutterer, W. Schneider and ASDEX Upgrade Team 290–293 (2001) 619  
 ASDEX-Upgrade edge transport scalings from the two-dimensional interpretative code B2.5-I, J.-W. Kim, D.P. Coster, J. Neuhauser, R. Schneider and ASDEX-Upgrade Team 290–293 (2001) 644  
 Helium transport and exhaust with an ITER-like divertor in ASDEX Upgrade, H.-S. Bosch, W. Ullrich, D. Coster, O. Gruber, G. Haas, J. Neuhauser, R. Schneider, R. Wolf and ASDEX Upgrade Team 290–293 (2001) 836  
 B2-EIRENE modelling of He compression and enrichment, D.P. Coster, H.-S. Bosch, W. Ullrich and ASDEX Upgrade Team 290–293 (2001) 845
- Atomic beams**  
 Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina 290–293 (2001) 748
- Atomic density**  
 High resolution measurements of neutral density and ionization rate in the main chamber of the Alcator C-Mod tokamak, R.L. Boivin, J. Goetz, A. Hubbard, J.W. Hughes, J. Irby, B. LaBombard, E. Marmor, D. Mossessian and J.L. Terry 290–293 (2001) 542
- B-field reversals**  
 Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski 290–293 (2001) 663
- B2/EIRENE**  
 Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu 290–293 (2001) 260  
 Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367  
 Reversal of in-out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura 290–293 (2001) 407  
 ASDEX-Upgrade edge transport scalings from the two-dimensional interpretative code B2.5-I, J.-W. Kim, D.P. Coster, J. Neuhauser, R. Schneider and ASDEX-Upgrade Team 290–293 (2001) 644

- Helium transport and exhaust with an ITER-like divertor in ASDEX Upgrade, H.-S. Bosch, W. Ullrich, D. Coster, O. Gruber, G. Haas, J. Neuhauser, R. Schneider, R. Wolf and ASDEX Upgrade Team 290–293 (2001) 836
- B2–EIRENE modelling of He compression and enrichment, D.P. Coster, H.-S. Bosch, W. Ullrich and ASDEX Upgrade Team 290–293 (2001) 845
- Critical issues in divertor optimisation for ITER–FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider 290–293 (2001) 887
- B2-solpr.5.0**  
Extension of the B2 code towards the plasma core for a self-consistent simulation of ASDEX upgrade scenarios, H. Bürbaumer, R. Neu, R. Schneider, D. Coster, J. Stober, F. Aumayr and H.P. Winter 290–293 (2001) 571
- Balmer lines**  
Hydrogen recycling study by Balmer lines emissions in linear plasma machine TPE, K. Shimada, T. Tanabe, R. Causey, T. Venhaus and K. Okuno 290–293 (2001) 478
- Beam emission spectroscopy**  
Explorative studies for the development of fast He beam plasma diagnostics, S. Menhart, M. Proschek, H.-D. Falter, H. Anderson, H. Summers, A. Staebler, P. Franzen, H. Meister, J. Schweinzer, T.T.C. Jones, S. Cox, N. Hawkes, F. Aumayr and H.P. Winter 290–293 (2001) 673
- Beryllium**  
Mixed material formation and erosion, C. Linsmeier, J. Luthin and P. Goldstrab 290–293 (2001) 25  
Formation of mixed layers and compounds on beryllium due to  $C^+$  and  $CO^+$  bombardment, P. Goldstrass and Ch. Linsmeier 290–293 (2001) 71  
Surface reactions on beryllium after carbon vapour deposition and thermal treatment, P. Goldstrass, K.U. Klages and Ch. Linsmeier 290–293 (2001) 76  
Tritium retention in neutron-irradiated low-Z materials for use as plasma facing materials, F. Scaffidi-Argentina, C. Sand and C.H. Wu 290–293 (2001) 211
- Beryllium carbide**  
Formation of mixed layers and compounds on beryllium due to  $C^+$  and  $CO^+$  bombardment, P. Goldstrass and Ch. Linsmeier 290–293 (2001) 71  
Surface reactions on beryllium after carbon vapour deposition and thermal treatment, P. Goldstrass, K.U. Klages and Ch. Linsmeier 290–293 (2001) 76
- Biasing**  
Divertor target heat load reduction by electrical biasing, and application to COMPASS-D, S.J. Fielding, R.H. Cohen, P. Helander and D.D. Ryutov 290–293 (2001) 859  
The influence of the poloidal variation of the density on the locally measured velocities induced by biasing experiments, M. van Schoor, H. van Goubergen and R. Weynants 290–293 (2001) 962
- Spectroscopic measurement of biasing effect on sheath electric field distribution in front of a metal plate inserted in a plasma flow, K. Takiyama, T. Oda and K. Sato 290–293 (2001) 976
- Blistering**  
Non-destructive structural analysis of surface blistering by TEM and EELS in a reflection configuration, S. Muto, T. Matsui and T. Tanabe 290–293 (2001) 131
- Boron**  
Methane formation in graphite and boron-doped graphite under simultaneous  $O^+$  and  $H^+$  irradiation, A.Y.K. Chen, J.W. Davis and A.A. Haasz 290–293 (2001) 61  
Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341
- Boronization**  
Chemical erosion of boronized films from DIII-D tiles, J.W. Davis, P.B. Wright, R.G. Macaulay-Newcombe, A.A. Haasz and C.G. Hamilton 290–293 (2001) 66
- Boronized carbon film**  
Chemical erosion of boronized films from DIII-D tiles, J.W. Davis, P.B. Wright, R.G. Macaulay-Newcombe, A.A. Haasz and C.G. Hamilton 290–293 (2001) 66
- Boronized graphite**  
Methane formation in graphite and boron-doped graphite under simultaneous  $O^+$  and  $H^+$  irradiation, A.Y.K. Chen, J.W. Davis and A.A. Haasz 290–293 (2001) 61
- Boundary plasma**  
Towards an improved understanding of the relationship between plasma edge and materials issues in a next-step fusion device, G.F. Counsell, J.P. Coad, G. Federici, K. Krieger, V. Philipps, C.H. Skinner and D.G. Whyte 290–293 (2001) 255  
Density fluctuations at high density in the ergodic divertor configuration of Tore Supra, P. Devynck, J. Gunn, Ph. Ghendrih, X. Garbet, G. Antar, P. Beyer, C. Boucher, C. Honore, F. Gervais, P. Hennequin, A. Quémeneur and A. Truc 290–293 (2001) 584
- Boundary sheath**  
Energy flux measurements in a steady-state discharge at PSI-2, B. Koch, W. Bohmeyer, G. Fussmann, P. Kornejew and H.-D. Reiner 290–293 (2001) 653
- Brittle destruction**  
Study of brittle destruction and erosion mechanisms of carbon-based materials during plasma instabilities, T. Burtseva, A. Hassanein, I. Ovchinnikov and V. Titov 290–293 (2001) 1059
- Calorimetry**  
Divertor energy distribution in JET H-modes, G.F. Matthews, S.K. Erents, W. Fundamenski, C. Ingesson, R.D. Monk and V. Riccardo 290–293 (2001) 668

- Active cooling, calorimetry and energy balance in Tore Supra, J.C. Vallet, R. Reichle, M. Chantant, V. Basiuk and R. Mitteau 290–293 (2001) 1023
- Carbide**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. García-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52
- Chemical erosion of doped graphites for fusion devices, C. García-Rosales and M. Balden 290–293 (2001) 173
- Carbon**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Deuterium retention in W, W1%La, C-coated W and W<sub>2</sub>C, R.A. Anderl, R.J. Pawelko and S.T. Schuetz 290–293 (2001) 38
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42
- Formation of mixed layers and compounds on beryllium due to C<sup>+</sup> and CO<sup>+</sup> bombardment, P. Goldstrass and Ch. Linsmeier 290–293 (2001) 71
- Surface reactions on beryllium after carbon vapour deposition and thermal treatment, P. Goldstrass, K.U. Klages and Ch. Linsmeier 290–293 (2001) 76
- Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider 290–293 (2001) 89
- Synergistic effects by simultaneous bombardment of tungsten with hydrogen and carbon, K. Krieger and J. Roth 290–293 (2001) 107
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Influence of diffusion on W sputtering by carbon, K. Schmid, J. Roth and W. Eckstein 290–293 (2001) 148
- Energy distributions of CD<sub>4</sub> and CD<sub>3</sub> chemically released from graphite by D<sup>+</sup> and D<sup>0</sup>/Ne<sup>+</sup> impact, E. Vietzke 290–293 (2001) 158
- Implantation, erosion, and retention of tungsten in carbon, R.A. Zuhr, J. Roth, W. Eckstein, U. von Toussaint and J. Luthin 290–293 (2001) 162
- The primary results for the mixed carbon material used for high flux steady-state tokamak operation in China, Q.G. Guo, J.G. Li, G.T. Zhai, L. Liu, J.R. Song, L.F. Zhang, Y.X. He and J.L. Chen 290–293 (2001) 191
- Tritium retention in neutron-irradiated low-Z materials for use as plasma facing materials, F. Scaffidi-Argentina, C. Sand and C.H. Wu 290–293 (2001) 211
- Dust characterization and analysis in Tore-Supra, Ph. Chappuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245
- Transport of and deposition from hydrocarbon radicals in a flow tube downstream from a CH<sub>4</sub> RF discharge, A.E. Gorodetsky, I.I. Arkhipov, R.Kh. Zalavutdinov, A.P. Zakharov, Yu.N. Tolmachev, S.P. Vnukov and V.L. Bukhovets 290–293 (2001) 271
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Rapid diffusion of lithium into bulk graphite in lithium conditioning, N. Itou, H. Toyoda, K. Morita and H. Sugai 290–293 (2001) 281
- Effects of condensible impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura 290–293 (2001) 299
- Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda 290–293 (2001) 303
- Carbon layers in the divertor of ASDEX Upgrade, V. Rohde, H. Maier, K. Krieger, R. Neu, J. Perchermaier and ASDEX Upgrade Team 290–293 (2001) 317
- Chemical erosion yields and photon efficiency measurements in the JET gas box divertor, M.F. Stamp, S.K. Erents, W. Fundamenski, G.F. Matthews and R.D. Monk 290–293 (2001) 321
- Net erosion measurements on plasma facing components of Tore Supra, E. Tsitrone, P. Chappuis, Y. Corre, E. Gauthier, A. Grosman and J.Y. Pascal 290–293 (2001) 331
- Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341
- Reduction of divertor carbon sources in DIII-D, D.G. Whyte, W.P. West, R. Doerner, N.H. Brooks, R.C. Isler, G.L. Jackson, G. Porter, M.R. Wade and C.P.C. Wong 290–293 (2001) 356
- Investigation of carbon transport in the scrape-off layer of TEXTOR-94, P. Wienhold, H.G. Esser, D. Hildebrandt, A. Kirschner, M. Mayer, V. Philipps and M. Rubel 290–293 (2001) 362
- Laboratory study of the transport and condensation of hydrocarbon radicals and its consequences for mitigating the tritium inventory in the ITER-FEAT divertor, I.I. Arkhipov, G. Federici, A.E. Gorodetsky, C. Ibbott, D.A. Komarov, A.N. Makhankov, A.V. Markin, I.V. Mazul, R. Tivey, A.P. Zakharov and R.Kh. Zalavutdinov 290–293 (2001) 394
- Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann 290–293 (2001) 418
- Role of grain boundaries and carbon deposition in deuterium retention behavior of deuterium plasma exposed tungsten, D.A. Komarov, A.V. Markin, S.Yu. Rybakov and A.P. Zakharov 290–293 (2001) 433

- A study of tritium decontamination of deposits by UV irradiation, Y. Oya, W. Shu, S. O'hira, T. Hayashi, H. Nakamura, T. Sakai, T. Tadokoro, K. Kobayashi, T. Suzuki and M. Nishi 290–293 (2001) 469
- Tritium decontamination of TFTR carbon tiles employing ultra violet light, W.M. Shu, S. Ohira, C.A. Gentile, Y. Oya, H. Nakamura, T. Hayashi, Y. Iwai, Y. Kawamura, S. Konishi, M.F. Nishi and K.M. Young 290–293 (2001) 482
- In situ measurement of hydrogen retention in JET carbon tiles, D.D.R. Summers, M.N.A. Beurskens, J.P. Coad, G. Counsell, W. Fundamenski, G.F. Matthews and M.F. Stamp 290–293 (2001) 496
- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau 290–293 (2001) 701
- Consistency check of  $Z_{\text{eff}}$  measurements in ergodic divertor plasmas on Tore Supra, B. Schunke, C. De Michelis, R. Guirlet, P. Monier-Garbet, M. Mattioli, E. Chareyre and O. Meyer 290–293 (2001) 715
- Modeling of carbon transport in the divertor and SOL of DIII-D during high performance plasma operation, W.P. West, G.D. Porter, T.E. Evans, P. Stangeby, N.H. Brooks, M.E. Fenstermacher, R.C. Isler, T.D. Rognlien, M.R. Wade, D.G. Whyte and N.S. Wolf 290–293 (2001) 783
- JET methane screening experiments, J.D. Strachan, K. Erents, W. Fundamenski, M. von Hellermann, L. Horton, K. Lawson, G. McCracken, J. Spence, M. Stamp and K.-D. Zastrow 290–293 (2001) 972
- Carbon and deuterium radiation**
- Characterisation of radiation and flux measurements on a neutraliser plate of the Tore Supra ergodic divertor, Y. Corre, R. Giannella, C. De Michelis, R. Guirlet, A. Azéroual, E. Chareyre, L. Costanzo, A. Escarguel, E. Gauthier, Ph. Ghendrih, J. Gunn, J. Hogan, P. Monier-Garbet, B. Pégourié, A. Pospieszczyk and E. Tsitrone 290–293 (2001) 250
- Carbon deposition**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Dust characterization and analysis in Tore-Supra, P. Chappuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245
- Effects of condensible impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura 290–293 (2001) 299
- Carbon erosion**
- Dust characterization and analysis in Tore-Supra, P. Chappuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Carbon-based materials**
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Study of brittle destruction and erosion mechanisms of carbon-based materials during plasma instabilities, T. Burtseva, A. Hassanein, I. Ovchinnikov and V. Titov 290–293 (2001) 1059
- CCD camera**
- Impurity transport experiments in the edge plasma of Alcator C-Mod using gas injection plumes, S. Gangadhara, B. La-Bombard and C. MacLathy 290–293 (2001) 598
- CCD camera Tomography**
- Observation of detachment in the JET MkIIIGB divertor using CCD camera tomography, K. Itami, P. Coad, W. Fundamenski, C. Ingesson, J. Lingertat, G.F. Matthews and A. Tabasso 290–293 (2001) 633
- Charge exchange**
- Studies of tungsten erosion at the inner and outer main chamber wall of the ASDEX Upgrade tokamak, A. Tabasso, H. Maier, J. Roth, K. Krieger and ASDEX Upgrade Team 290–293 (2001) 326
- Charge exchange neutral**
- Anisotropic radiation damage by charge exchange neutrals under tokamak discharges in TRIAM-1M, T. Hirai, T. Fujiwara, K. Tokunaga, N. Yoshida, S. Itoh and TRIAM Group 290–293 (2001) 94
- Chemical erosion**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Mechanism of the chemical erosion of SiC under hydrogen irradiation, M. Balden, S. Picarle and J. Roth 290–293 (2001) 47
- Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. Garcia-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52
- Methane formation in graphite and boron-doped graphite under simultaneous  $O^+$  and  $H^+$  irradiation, A.Y.K. Chen, J.W. Davis and A.A. Haasz 290–293 (2001) 61
- Chemical erosion of boronized films from DIII-D tiles, J.W. Davis, P.B. Wright, R.G. Macaulay-Newcombe, A.A. Haasz and C.G. Hamilton 290–293 (2001) 66
- Energy distributions of  $CD_4$  and  $CD_3$  chemically released from graphite by  $D^+$  and  $D^9Ne^+$  impact, E. Vietzke 290–293 (2001) 158
- Measurements of erosion mechanisms from solid and liquid materials in PISCES-B, R.P. Doerner, M.J. Baldwin, R.W. Conn, A.A. Grossman, S.C. Luckhardt, R. Seraydarian, G.R. Tynan and D.G. Whyte 290–293 (2001) 166

- Chemical erosion of doped graphites for fusion devices, C. García-Rosales and M. Balden 290–293 (2001) 173
- Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby 290–293 (2001) 224
- Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter 290–293 (2001) 238
- Chemical erosion yields and photon efficiency measurements in the JET gas box divertor, M.F. Stamp, S.K. Erents, W. Fundamenski, G.F. Matthews and R.D. Monk 290–293 (2001) 321
- Reduction of divertor carbon sources in DIII-D, D.G. Whyte, W.P. West, R. Doerner, N.H. Brooks, R.C. Isler, G.L. Jackson, G. Porter, M.R. Wade and C.P.C. Wong 290–293 (2001) 356
- Impurity release and recycling behaviour in TEXTOR-94 with siliconised walls, V. Philipps, A. Huber, H.G. Esser, A. Pospieszczyk, B. Schweer, J. von Seggern, W. Biel, J. Rapp and U. Samm 290–293 (2001) 1190
- Chemical sputtering**
- Extinction of CD band emission in the divertor of ASDEX Upgrade, U. Wenzel, M. Laux, R. Pugno and K. Schmidtman 290–293 (2001) 352
- Co-deposition**
- Chemical erosion of boronized films from DIII-D tiles, J.W. Davis, P.B. Wright, R.G. Macaulay-Newcombe, A.A. Haasz and C.G. Hamilton 290–293 (2001) 66
- Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu 290–293 (2001) 260
- Coating**
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda 290–293 (2001) 947
- Operational limits under different wall conditions on TEXTOR-94, J. Rapp, W. Biel, H. Gerhauser, A. Huber, H.R. Koslowski, M. Lehnen, V. Philipps, A. Pospieszczyk, D. Reiser, U. Samm, G. Sergienko, M.Z. Tokar and R. Zagórski 290–293 (2001) 1148
- Co-deposition**
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42
- Hydrogen inventories in nuclear fusion devices, M. Mayer, V. Philipps, P. Wienhold, H.G. Esser, J. von Seggern and M. Rubel 290–293 (2001) 381
- Peculiarity of deuterium ions interaction with tungsten surface in the condition imitating combination of normal operation with plasma disruption in ITER, M.I. Guseva, V.I. Vasiliev, V.M. Gureev, L.S. Danelyan, B.I. Khirpunov, S.N. Korshunov, V.S. Kulikauskas, Y.V. Martylenko, V.B. Petrov, V.N. Strunnikov, V.G. Stolyarova, V.V. Zatekin and A.M. Litnovsky 290–293 (2001) 1069
- Collisional-radiative model**
- Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367
- Vibrational population of the ground state of H<sub>2</sub> and D<sub>2</sub> in the divertor of ASDEX Upgrade, B. Heger, U. Fantz, K. Behringer and ASDEX Upgrade Team 290–293 (2001) 413
- Explorative studies for the development of fast He beam plasma diagnostics, S. Menhart, M. Proschek, H.-D. Falter, H. Anderson, H. Summers, A. Staebler, P. Franzen, H. Meister, J. Schweinzer, T.T.C. Jones, S. Cox, N. Hawkes, F. Aumayr and H.P. Winter 290–293 (2001) 673
- Compact toroid**
- Compact toroid injection as fueling in the JFT-2M tokamak, T. Ogawa, H. Ogawa, Y. Miura, H. Niimi, H. Kimura, Y. Kashiwa, T. Shibata, M. Yamamoto, N. Fukumoto, M. Nagata and T. Uyama 290–293 (2001) 454
- Composite materials**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Computer simulation**
- Self-consistent description of the core and boundary plasma in the high-field ignition experiment, R. Stankiewicz and R. Zagórski 290–293 (2001) 738
- Condensable impurity**
- Effects of condensable impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura 290–293 (2001) 299
- Conditioning**
- Characterization and conditioning of SSPX plasma facing surfaces, D.A. Buchenauer, B.E. Mills, R. Wood, S. Woodruff, D.N. Hill, E.B. Hooper, D.F. Cowgill, M.W. Clift and N.Y. Yang 290–293 (2001) 1165
- D $\alpha$  line**
- Observation of detachment in the JET MkIIIGB divertor using CCD camera tomography, K. Itami, P. Coad, W. Funda-

- menski, C. Ingesson, J. Lingertat, G.F. Matthews and A. Tabasso 290–293 (2001) 633
- Damage**  
Anisotropic radiation damage by charge exchange neutrals under tokamak discharges in TRIAM-1M, T. Hirai, T. Fujiwara, K. Tokunaga, N. Yoshida, S. Itoh and TRIAM Group 290–293 (2001) 94
- Data analysis**  
Investigation of the hydrogen fluxes in the plasma edge of W7-AS during H-mode discharges, U. Langer, E. Taglauer, R. Fischer and W7-AS Team 290–293 (2001) 658
- Defects**  
Effect of helium irradiation on trapping and thermal release of deuterium implanted in tungsten, S. Nagata and K. Takahiro 290–293 (2001) 135  
Deuterium retention and lattice damage in tungsten irradiated with D ions, V.Kh. Alimov, K. Ertl and J. Roth 290–293 (2001) 389
- DEGAS code**  
Modeling of Alcator C-Mod divertor baffling experiments, D.P. Stotler, C.S. Pitcher, C.J. Boswell, T.K. Chung, B. LaBombard, B. Lipschultz, J.L. Terry and R.J. Kanzleiter 290–293 (2001) 967
- Degree of detachment**  
Analysis of energy flux deposition and sheath transmission factors during ergodic divertor operation on Tore Supra, L. Costanzo, J.P. Gunn, T. Loarer, L. Colas, Y. Corre, Ph. Ghendrih, C. Grisolia, A. Grosman, D. Guilhem, P. Monier-Garbet, R. Reichle, H. Roche and J.C. Vallet 290–293 (2001) 840
- Density control**  
Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina 290–293 (2001) 748
- Density limit**  
Feedback control on edge plasma parameters with ergodic divertor in Tore Supra, J. Bucalossi, J.P. Gunn, A. Gérard, Ph. Ghendrih, C. Grisolia, A. Grosman, G. Martin, D. Moulin, J.-Y. Pascal and F. Saint-Laurent 290–293 (2001) 566  
Gas puff fueled H-mode discharges with good energy confinement above the Greenwald density limit on DIII-D, T.H. Osborne, M.A. Mahdavi, M. Chu, M.E. Fenstermacher, R. La Haye, A.W. Leonard, G. McKee, T.W. Petrie, C. Rettig, M. Wade, J. Watkins and DIII-D Team 290–293 (2001) 1013
- Deposit layer**  
Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe 290–293 (2001) 295
- Deposition**  
Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25  
Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121  
Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby 290–293 (2001) 224  
Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter 290–293 (2001) 238  
Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda 290–293 (2001) 303  
Some problems arising due to plasma–surface interaction for operation of the in-vessel mirrors in a fusion reactor, V.S. Voitsenya, A.F. Bardamid, V.N. Bondarenko, W. Jacob, V.G. Kononov, S. Masuzaki, O. Motojima, D.V. Orlinskij, V.L. Popereenko, I.V. Ryzhkov, A. Sagara, A.F. Shtan, S.I. Solodovchenko and M.V. Vinnichenko 290–293 (2001) 336  
Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341  
Investigation of carbon transport in the scrape-off layer of TEXTOR-94, P. Wienhold, H.G. Esser, D. Hildebrandt, A. Kirschner, M. Mayer, V. Philipps and M. Rubel 290–293 (2001) 362
- Detached plasma**  
Suppression of net erosion in the DIII-D divertor with detached plasmas, W.R. Wampler, D.G. Whyte, C.P.C. Wong and W.P. West 290–293 (2001) 346  
Extinction of CD band emission in the divertor of ASDEX Upgrade, U. Wenzel, M. Laux, R. Pugno and K. Schmidtman 290–293 (2001) 352  
Study of the relation between density and temperature fall-off lengths in a detached divertor plasma, K. Borrass 290–293 (2001) 551  
Particle simulation of detached plasma in the presence of diffusive particle loss and radiative energy loss, T. Takizuka, M. Hosokawa and K. Shimizu 290–293 (2001) 753
- Detachment**  
Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A.

- Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura  
290–293 (2001) 407
- Feedback control on edge plasma parameters with ergodic divertor in Tore Supra, J. Bucalossi, J.P. Gunn, A. Géraud, Ph. Ghendrih, C. Grisolia, A. Grosman, G. Martin, D. Moulin, J.-Y. Pascal and F. Saint-Laurent  
290–293 (2001) 566
- A 2D fluid model of the scrape-off layer (SOL) using adaptive unstructured finite volumes, F. Subba and R. Zanino  
290–293 (2001) 743
- Deuterium**
- Effect of helium irradiation on trapping and thermal release of deuterium implanted in tungsten, S. Nagata and K. Takahiro  
290–293 (2001) 135
- Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps  
290–293 (2001) 341
- Deuterium retention and lattice damage in tungsten irradiated with D ions, V.Kh. Alimov, K. Ertl and J. Roth  
290–293 (2001) 389
- Peculiarity of deuterium ions interaction with tungsten surface in the condition imitating combination of normal operation with plasma disruption in ITER, M.I. Guseva, V.I. Vasiliev, V.M. Gureev, L.S. Danelyan, B.I. Khirpunov, S.N. Korshunov, V.S. Kulikauskas, Y.V. Martynenko, V.B. Petrov, V.N. Strunnikov, V.G. Stolyarova, V.V. Zatekin and A.M. Litnovsky  
290–293 (2001) 1069
- Deuterium depth profiling**
- Deuterium retention and lattice damage in tungsten irradiated with D ions, V.Kh. Alimov, K. Ertl and J. Roth  
290–293 (2001) 389
- Deuterium emission**
- Spectroscopic studies of stationary MARFEs in TEXTOR-94, G. Sergienko, A. Pospieszczyk, M. Lehnen, M. Brix, J. Rapp, B. Schweer and P.T. Greenland  
290–293 (2001) 720
- Spectral profile analysis of the D $\alpha$  line in the divertor region of Tore-Supra, A. Escarguel, R. Guirlet, A. Azéroual, B. Pégourié, J. Gunn, T. Loarer, H. Capes, Y. Corre, C. De Michelis, L. Godbert-Mouret, M. Koubiti, M. Mattioli and R. Stamm  
290–293 (2001) 854
- Deuterium inventory**
- Deuterium retention in single crystal tungsten, A.A. Haasz, M. Poon, R.G. Macaulay-Newcombe and J.W. Davis  
290–293 (2001) 85
- Deuterium retention of V-4Cr-4Ti alloy exposed to the JFT-2M tokamak environment, Y. Hirohata, T. Oda, T. Hino and S. Sengoku  
290–293 (2001) 196
- Hydrogen inventories in nuclear fusion devices, M. Mayer, V. Philipps, P. Wienhold, H.G. Esser, J. von Seggern and M. Rubel  
290–293 (2001) 381
- Deuterium retention**
- Deuterium retention and lattice damage in tungsten irradiated with D ions, V.Kh. Alimov, K. Ertl and J. Roth  
290–293 (2001) 389
- Hydrogen isotope depth profiling in carbon samples from the erosion dominated inner vessel walls of JET, C. Stan-Sion, R. Behrisch, J.P. Coad, U. Kreißig, F. Kubo, V. Lazarev, S. Lindig, M. Mayer, E. Nolte, A. Peacock, L. Rohrer and J. Roth  
290–293 (2001) 491
- Diagnostic He beam**
- Explorative studies for the development of fast He beam plasma diagnostics, S. Menhart, M. Proschek, H.-D. Falter, H. Anderson, H. Summers, A. Staebler, P. Franzen, H. Meister, J. Schweinzer, T.T.C. Jones, S. Cox, N. Hawkes, F. Aumayr and H.P. Winter  
290–293 (2001) 673
- Diffusion**
- Silicon diffusion in amorphous carbon films, E. Vainonen-Ahlgren, T. Ahlgren, L. Khriachtchev, J. Likonen, S. Lehto, J. Keinonen and C.H. Wu  
290–293 (2001) 216
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß  
290–293 (2001) 25
- Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider  
290–293 (2001) 89
- DIII-D**
- Chemical erosion of boronized films from DIII-D tiles, J.W. Davis, P.B. Wright, R.G. Macaulay-Newcombe, A.A. Haasz and C.G. Hamilton  
290–293 (2001) 66
- Suppression of net erosion in the DIII-D divertor with detached plasmas, W.R. Wampler, D.G. Whyte, C.P.C. Wong and W.P. West  
290–293 (2001) 346
- Characteristics of ELM activity and fueling efficiency of pellet injection from different locations on DIII-D, L.R. Baylor, T.C. Jernigan, R.J. Colchin, J.R. Ferron and M.R. Wade  
290–293 (2001) 398
- Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner  
290–293 (2001) 464
- Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte  
290–293 (2001) 733
- Modeling of carbon transport in the divertor and SOL of DIII-D during high performance plasma operation, W.P. West, G.D. Porter, T.E. Evans, P. Stangeby, N.H. Brooks, M.E. Fenstermacher, R.C. Isler, T.D. Rognlien, M.R. Wade, D.G. Whyte and N.S. Wolf  
290–293 (2001) 783
- Multi-machine modelling of divertor geometry effects, A. Loarte  
290–293 (2001) 805

- Initial performance results of the DIII-D Divertor 2001, M.A. Mahdavi, M.R. Wade, J.G. Watkins, C.J. Lasnier, T. Luce, S.L. Allen, A.W. Hyatt, C. Baxi, J.A. Boedo, A.S. Bozek, N.H. Brooks, R.J. Colchin, T.E. Evans, M.E. Fenstermacher, M.E. Friend, R.C. O'Neill, R.C. Isler, A.G. Kellman, A.W. Leonard, R. Maingi, R.A. Moyer, T.W. Petrie, G.D. Porter, M.J. Schaffer, S. Skinner, R.D. Stambaugh, P.C. Stangeby, W.P. West, D.G. Whyte and N.S. Wolf 290–293 (2001) 905
- Experiments and computational modeling focused on divertor and SOL optimization for advanced tokamak operation on DIII-D, S.L. Allen, J.A. Boedo, A.S. Bozek, N.H. Brooks, T.N. Carlstrom, T.A. Casper, R.J. Colchin, T.E. Evans, M.E. Fenstermacher, M.E. Friend, R.C. Isler, R. Jayakumar, C.J. Lasnier, A.W. Leonard, M.A. Mahdavi, R. Maingi, G.R. McKee, R.A. Moyer, M. Murakami, T.H. Osborne, R.C. O'Neill, T.W. Petrie, G.D. Porter, A.T. Ramsey, M.J. Schaffer, P.C. Stangeby, R.D. Stambaugh, M.R. Wade, J.G. Watking, W.P. West, D.G. Whyte and N.S. Wolf 290–293 (2001) 995
- Gas puff fueled H-mode discharges with good energy confinement above the Greenwald density limit on DIII-D, T.H. Osborne, M.A. Mahdavi, M. Chu, M.E. Fenstermacher, R. La Haye, A.W. Leonard, G. McKee, T.W. Petrie, C. Rettig, M. Wade, J. Watkins and DIII-D Team 290–293 (2001) 1013
- Tolerable ELMs at high density in DIII-D, A.W. Leonard, T.H. Osborne, M.E. Fenstermacher, C.J. Lasnier and M.A. Mahdavi 290–293 (2001) 1097
- DiMES**
- Suppression of net erosion in the DIII-D divertor with detached plasmas, W.R. Wampler, D.G. Whyte, C.P.C. Wong and W.P. West 290–293 (2001) 346
- Disruption**
- Study of brittle destruction and erosion mechanisms of carbon-based materials during plasma instabilities, T. Burtseva, A. Hassanein, I. Ovchinnikov and V. Titov 290–293 (2001) 1059
- Thermal load distribution on the ALT-II limiter of TEXTOR-94 during disruptions, K.H. Finken, A. Krämer-Flecken, G. Mank and S.S. Abdullaev 290–293 (2001) 1064
- Peculiarity of deuterium ions interaction with tungsten surface in the condition imitating combination of normal operation with plasma disruption in ITER, M.I. Guseva, V.I. Vasiliev, V.M. Gureev, L.S. Danelyan, B.I. Khirpunov, S.N. Korshunov, V.S. Kulikauskas, Y.V. Martynenko, V.B. Petrov, V.N. Strunnikov, V.G. Stolyarova, V.V. Zatekin and A.M. Litnovsky 290–293 (2001) 1069
- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov 290–293 (2001) 1079
- Modeling of particulate production in the SIRENS plasma disruption simulator, J.P. Sharpe, B.J. Merrill, D.A. Petti, M.A. Bourham and J.G. Gilligan 290–293 (2001) 1128
- Vertical target and FW erosion during off-normal events and impurity production and transport during ELMs typical for ITER-FEAT, H. Würz, S. Pestchanyi, B. Bazylev, I. Landman and F. Kappler 290–293 (2001) 1138
- Dissociation**
- Numerical simulation of hydrogen molecular dissociation and the effects to  $H\alpha$  profiles in low temperature plasmas, B. Xiao, S. Kado, K. Kobayashi and S. Tanaka 290–293 (2001) 793
- Divertor asymmetry**
- Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura 290–293 (2001) 407
- The effect of divertor magnetic balance on H-mode performance in DIII-D, T.W. Petrie, C.M. Greenfield, R.J. Grobener, A.W. Hyatt, R.J. La Haye, A.W. Leonard, M.A. Mahdavi, T.H. Osborne, M.J. Schaffer, D.M. Thomas, W.P. West, DIII-D Team, S.L. Allen, M.E. Fenstermacher, C.J. Lasnier, G.D. Porter, N.S. Wolf, J.G. Watkins and T.L. Rhodes 290–293 (2001) 935
- Divertor detachment**
- Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367
- Vibrational population of the ground state of  $H_2$  and  $D_2$  in the divertor of ASDEX Upgrade, B. Heger, U. Fantz, K. Behringer and ASDEX Upgrade Team 290–293 (2001) 413
- Observation of detachment in the JET MkIIIGB divertor using CCD camera tomography, K. Itami, P. Coad, W. Fundamenski, C. Ingesson, J. Lingertat, G.F. Matthews and A. Tabasso 290–293 (2001) 633
- Divertor geometry effects on detachment in TCV, R.A. Pitts, B.P. Duval, A. Loarte, J.-M. Moret, J.A. Boedo, D. Coster, I. Furno, J. Horacek, A.S. Kukushkin, D. Reiter, J. Rommers and TCV Team 290–293 (2001) 940
- Dynamic behavior of detached recombining plasmas during ELM-like plasma heat pulses in the divertor plasma simulator NAGDIS-II, Y. Uesugi, N. Hattori, D. Nishijima, N. Ohno and S. Takamura 290–293 (2001) 1134
- Divertor erosion**
- Suppression of net erosion in the DIII-D divertor with detached plasmas, W.R. Wampler, D.G. Whyte, C.P.C. Wong and W.P. West 290–293 (2001) 346
- Divertor geometry**
- Impurity behavior before and during the x-point MARFE in JT-60U, S. Higashijima, H. Kubo, T. Sugie, T. Nakano, S.

- Konoshima, H. Tamai, K. Shimizu, A. Sakasai, N. Asakura, S. Sakurai and K. Itami 290–293 (2001) 623
- Divertor leakage**
- Noble gas enrichment studies at JET, M. Groth, P. Andrew, W. Fundamenski, H.Y. Guo, D.L. Hillis, J.T. Hogan, L.D. Horton, G.F. Matthews, A.G. Meigs, P.M. Morgan, M.F. Stamp and M. von Hellermann 290–293 (2001) 867
- Divertor material**
- Deuterium retention in W, W1%La, C-coated W and W<sub>2</sub>C, R.A. Anderl, R.J. Pawelko and S.T. Schuetz 290–293 (2001) 38
- Surface tension enhancement of TRIM sputtering yields for liquid metal targets, A. Grossman, R.P. Doerner and S. Luckhardt 290–293 (2001) 80
- Spectroscopic study of neon emission and retention in the Tore Supra ergodic divertor, R. Guirlet, J. Hogan, Y. Corre, C. De Michelis, A. Escarguel, W. Hess, P. Monier-Garbet and B. Schunke 290–293 (2001) 872
- The effect of divertor tile material on radiation profiles in LHD, B.J. Peterson, S. Masuzaki, R. Sakamoto, K. Sato, S. Inagaki, A. Sagara, S. Ohdachi, Y. Nakamura, N. Noda, Y. Xu, J.E. Rice, N. Ashikawa, S. Yamamoto, M. Takechi, K. Toi, S. Morita, M. Goto, K. Narihara, N. Inoue, Y. Takeiri, M. Sato, M. Osakabe, K. Tanaka, T. Tokuzawa, S. Sakakibara, M. Shoji, K. Kawahata, O. Kaneko, N. Ohyabu, H. Yamada, A. Komori, K. Yamazaki, S. Sudo and O. Motojima 290–293 (2001) 930
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov 290–293 (2001) 1079
- Divertor modelling**
- Interpretation of SOL flows and target asymmetries in JET using EDGE2D code calculations, A.V. Chankin, G. Corrigan, S.K. Erements, G.F. Matthews, J. Spence and P.C. Stangeby 290–293 (2001) 518
- Analysis of SOL behaviour in JET MkIIGB using an advanced onion-skin solver (OSM2), W. Fundamenski, S.K. Erements, G.F. Matthews, A.V. Chankin, V. Riccardo, P.C. Stangeby and J.D. Elder 290–293 (2001) 593
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognlien, S. Sabbagh and X. Xu 290–293 (2001) 706
- Divertor physics**
- Analysis of SOL behaviour in JET MkIIGB using an advanced onion-skin solver (OSM2), W. Fundamenski, S.K. Erements, G.F. Matthews, A.V. Chankin, V. Riccardo, P.C. Stangeby and J.D. Elder 290–293 (2001) 593
- Divertor plasma**
- Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura 290–293 (2001) 407
- Density fluctuations at high density in the ergodic divertor configuration of Tore Supra, P. Devynck, J. Gunn, Ph. Ghendrih, X. Garbet, G. Antar, P. Beyer, C. Boucher, C. Honore, F. Gervais, P. Hennequin, A. Quémeneur and A. Truc 290–293 (2001) 584
- Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte 290–293 (2001) 733
- Particle simulation of detached plasma in the presence of diffusive particle loss and radiative energy loss, T. Takizuka, M. Hosokawa and K. Shimizu 290–293 (2001) 753
- Resonance radiation and high excitation of neutrals in plasma–gas interactions, A.M. Litnovsky, B.I. Khripunov, G.V. Sholin, V.B. Petrov, V.V. Shapkin and N.V. Antonov 290–293 (2001) 1107
- Dynamic behavior of detached recombining plasmas during ELM-like plasma heat pulses in the divertor plasma simulator NAGDIS-II, Y. Uesugi, N. Hattori, D. Nishijima, N. Ohno and S. Takamura 290–293 (2001) 1134
- Divertor pumping**
- The effect of baffling on divertor leakage in Alcator C-Mod, C.S. Pitcher, C.J. Boswell, T. Chung, J.A. Goetz, B. Labombard, B. Lipschultz, J.E. Rice, D.P. Stotler and J.L. Terry 290–293 (2001) 812
- Pumping effect on the divertor plasma and detachment in the JT-60U W-shaped divertor, N. Asakura, S. Sakurai, H. Tamai, Y. Koide, Y. Sakamoto, O. Naito, H. Kubo, K. Itami and K. Masaki 290–293 (2001) 825
- Helium exhaust in divertor–closure configuration with W-shaped divertor of JT-60U, A. Sakasai, H. Takenaga, H. Kubo, N. Akino, S. Higashijima, S. Sakurai, H. Tamai, K. Itami and N. Asakura 290–293 (2001) 957
- Divertor radiation**
- Impurity radiation modulations in an ergodic divertor, F. Laugier, M. Bécoulet, C. De Michelis, Ph. Ghendrih, J.P. Gunn, P. Monier-Garbet, R. Reichle and J.C. Vallet 290–293 (2001) 892
- High radiation from intrinsic and injected impurities in Tore Supra ergodic divertor plasmas, P. Monier-Garbet, C. De Michelis, Ph. Ghendrih, C. Grisolia, A. Grosman, R. Guirlet, J. Gunn, T. Loarer, C.E. Bush, C. Clement, Y. Corre, L. Costanzo, B. Schunke and J.C. Vallet 290–293 (2001) 925
- Divertor simulation**
- Resonance radiation and high excitation of neutrals in plasma–gas interactions, A.M. Litnovsky, B.I. Khripunov, G.V. Sholin, V.B. Petrov, V.V. Shapkin and N.V. Antonov 290–293 (2001) 1107

**Divertor spectroscopy**

- Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367
- Vibrational population of the ground state of H<sub>2</sub> and D<sub>2</sub> in the divertor of ASDEX Upgrade, B. Heger, U. Fantz, K. Behringer and ASDEX Upgrade Team 290–293 (2001) 413
- Observations of cold, high density plasma in the private flux region of the Alcator C-Mod divertor, C.J. Boswell, J.L. Terry, B. LaBombard, B. Lipschultz and J.A. Goetz 290–293 (2001) 556

**Divertor target**

- Lateral deflection of the SOL plasma during a giant ELM, I.S. Landman and H. Würz 290–293 (2001) 1088

**Divertor**

- Plasma-wall interaction issues in ITER, G. Janeschitz, ITER JCT and HTs 290–293 (2001) 1
- Review of initial experimental results of the PSI studies in the large helical device, S. Masuzaki, K. Akaishi, H. Funaba, M. Goto, K. Ida, S. Inagaki, N. Inoue, K. Kawahata, A. Komori, Y. Kubota, T. Morisaki, S. Morita, Y. Nakamura, K. Narihara, K. Nishimura, N. Noda, N. Ohyabu, B.J. Peterson, A. Sagara, R. Sakamoto, K. Sato, M. Shoji, H. Suzuki, Y. Takeiri, K. Tanaka, T. Tokuzawa, T. Watanabe, K. Tsuzuki, T. Hino, Y. Matsumoto, S. Kado, O. Motojima and LHD Experimental Group 290–293 (2001) 12
- Carbon layers in the divertor of ASDEX Upgrade, V. Rohde, H. Maier, K. Krieger, R. Neu, J. Perchermaier and ASDEX Upgrade Team 290–293 (2001) 317
- Extinction of CD band emission in the divertor of ASDEX Upgrade, U. Wenzel, M. Laux, R. Pugno and K. Schmidtman 290–293 (2001) 352
- Reduction of divertor carbon sources in DIII-D, D.G. Whyte, W.P. West, R. Doerner, N.H. Brooks, R.C. Isler, G.L. Jackson, G. Porter, M.R. Wade and C.P.C. Wong 290–293 (2001) 356
- Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann 290–293 (2001) 418
- Radiation distribution and power balance in the ASDEX Upgrade LYRA divertor, J.C. Fuchs, D. Coster, A. Herrmann, A. Kallenbach, K.F. Mast and ASDEX Upgrade Team 290–293 (2001) 525
- Plasma profiles in the inner divertor of ASDEX Upgrade, A. Carlson, D. Coster, A. Herrmann, R. Pugno U. Wenzel and ASDEX Upgrade Team 290–293 (2001) 575
- Performance of high triangularity plasmas as the volume of the secondary divertor is varied in DIII-D, M.E. Fenstermacher, T.H. Osborne, T.W. Petrie, R.J. Groebner, C.J. Lasnier, R.J. La Haye, A.W. Leonard, G.D. Porter, J.G. Watkins and DIII-D Team 290–293 (2001) 588

- Turbulent transport studies in JET edge plasmas in X-point configurations, I. García-Cortés, A. Loarte, R. Balbín, J. Bleuel, A. Chankin, S.J. Davies, M. Endler, S.K. Erents, C. Hidalgo, G.F. Matthews, H. Thomsen 290–293 (2001) 604
- Heat flux decay length in the midplane of ASDEX Upgrade, A. Herrmann, A. Carlson, J.C. Fuchs, O. Gruber, M. Laux, J. Neuhauser, R. Pugno, A. Sips, W. Treutterer, W. Schneider and ASDEX Upgrade Team 290–293 (2001) 619
- Impurity behavior before and during the x-point MARFE in JT-60U, S. Higashijima, H. Kubo, T. Sugie, T. Nakano, S. Konoshima, H. Tamai, K. Shimizu, A. Sakasai, N. Asakura, S. Sakurai and K. Itami 290–293 (2001) 623
- Divertor energy distribution in JET H-modes, G.F. Matthews, S.K. Erents, W. Fundamenski, C. Ingesson, R.D. Monk and V. Riccardo 290–293 (2001) 668
- Island divertor in a helical-axis heliotron device (Heliotron J), T. Mizuuchi, M. Nakasuga, F. Sano, Y. Nakamura, K. Nagasaki, H. Okada, K. Kondo and T. Obiki 290–293 (2001) 678
- Control of divertor geometry and performance of the ergodic divertor of Tore Supra, Ph. Ghendrih, M. Bécoulet, L. Costanzo, Y. Corre, C. Grisolia, A. Grosman, R. Guirlet, J. Gunn, T. Loarer, P. Monier-Garbet, G. Mank, R. Reichle, J.-C. Vallet, M. Zabiégo, A. Azéroual, J. Bucalossi, P. Devynck, C. De Michelis, K.H. Finken, J. Hogan, F. Laugier, F. Nguyen, B. Pégourié, F. Saint-Laurent, B. Schunke and Tore Supra Team 290–293 (2001) 798
- Multi-machine modelling of divertor geometry effects, A. Loarte 290–293 (2001) 805
- Experimental investigations of the SOL plasma in the MAST tokamak, J.-W. Ahn and G.F. Counsell 290–293 (2001) 820
- Helium transport and exhaust with an ITER-like divertor in ASDEX Upgrade, H.-S. Bosch, W. Ullrich, D. Coster, O. Gruber, G. Haas, J. Neuhauser, R. Schneider, R. Wolf and ASDEX Upgrade Team 290–293 (2001) 836
- Tore Supra divertor screening efficiency during density regime experiments, C. Grisolia, Ph. Ghendrih, J. Gunn, T. Loarer, P. Monier-Garbet, C. De Michelis, L. Costanzo and J.Y. Pascal 290–293 (2001) 863
- Critical issues in divertor optimisation for ITER-FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider 290–293 (2001) 887
- Narrow power deposition profiles on the JET divertor target, J. Lingertat, M. Laux and R. Monk 290–293 (2001) 896
- Initial performance results of the DIII-D Divertor 2000, M.A. Mahdavi, M.R. Wade, J.G. Watkins, C.J. Lasnier, T. Luce, S.L. Allen, A.W. Hyatt, C. Baxi, J.A. Boedo, A.S. Bozek, N.H. Brooks, R.J. Colchin, T.E. Evans, M.E. Fenstermacher, M.E. Friend, R.C. O'Neill, R.C. Isler, A.G. Kellman, A.W. Leonard, R. Maingi, R.A. Moyer, T.W. Petrie, G.D. Porter, M.J. Schaffer, S. Skinner, R.D. Stambaugh, P.C. Stangeby, W.P. West, D.G. Whyte and N.S. Wolf 290–293 (2001) 905
- Experiments and computational modeling focused on divertor and SOL optimization for advanced tokamak operation on DIII-D, S.L. Allen, J.A. Boedo, A.S. Bozek, N.H. Brooks, T.N. Carlstrom, T.A. Casper, R.J. Colchin, T.E. Evans,

- M.E. Fenstermacher, M.E. Friend, R.C. Isler, R. Jayakumar, C.J. Lasnier, A.W. Leonard, M.A. Mahdavi, R. Maingi, G.R. McKee, R.A. Moyer, M. Murakami, T.H. Osborne, R.C. O'Neill, T.W. Petrie, G.D. Porter, A.T. Ramsey, M.J. Schaffer, P.C. Stangeby, R.D. Stambaugh, M.R. Wade, J.G. Watking, W.P. West, D.G. Whyte and N.S. Wolf 290–293 (2001) 995
- Study of brittle destruction and erosion mechanisms of carbon-based materials during plasma instabilities, T. Burtseva, A. Hassanein, I. Ovchinnikov and V. Titov 290–293 (2001) 1059
- Effect of magnetic geometry on ELM heat flux profiles, C.J. Lasnier, A.W. Leonard, T.W. Petrie and J.G. Watkins 290–293 (2001) 1093
- Doped carbon**
- Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. García-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52
- Chemical erosion of doped graphites for fusion devices, C. García-Rosales and M. Balden 290–293 (2001) 173
- Doppler broadening**
- Spectral profile analysis of the D $\alpha$  line in the divertor region of Tore-Supra, A. Escarguel, R. Guirlet, A. Azéroual, B. Pégourié, J. Gunn, T. Loarer, H. Capes, Y. Corre, C. De Michelis, L. Godbert-Mouret, M. Koubiti, M. Mattioli and R. Stamm 290–293 (2001) 854
- Drift**
- Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski 290–293 (2001) 663
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognien, S. Sabbagh and X. Xu 290–293 (2001) 706
- Dust**
- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young 290–293 (2001) 486
- Radioactive dust levitation and its consequences for fusion devices, J. Winter, V.E. Fortov and A.P. Nefedov 290–293 (2001) 509
- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau 290–293 (2001) 701
- E  $\times$  B drift**
- Large **E  $\times$  B** convection near the divertor X-point, M.J. Schaffer, J.A. Boedo, R.A. Moyer, T.N. Carlstrom and J.G. Watkins 290–293 (2001) 530
- Observations of cold, high density plasma in the private flux region of the Alcator C-Mod divertor, C.J. Boswell, J.L. Terry, B. LaBombard, B. Lipschultz and J.A. Goetz 290–293 (2001) 556
- Lateral deflection of the SOL plasma during a giant ELM, I.S. Landman and H. Würz 290–293 (2001) 1088
- ECR**
- Wall conditioning by microwave generated plasmas in a toroidal magnetic field, J. Ihde, H.B. Störk, J. Winter, M. Rubel, H.G. Esser and H. Toyoda 290–293 (2001) 1180
- ECRH**
- Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina 290–293 (2001) 748
- Edge field topology**
- Island divertor in a helical-axis heliotron device (Heliotron J), T. Mizuuchi, M. Nakasuga, F. Sano, Y. Nakamura, K. Nagasaki, H. Okada, K. Kondo and T. Obiki 290–293 (2001) 678
- Edge modelling**
- Towards an improved understanding of the relationship between plasma edge and materials issues in a next-step fusion device, G.F. Counsell, J.P. Coad, G. Federici, K. Krieger, V. Philipps, C.H. Skinner and D.G. Whyte 290–293 (2001) 255
- W7-X edge modelling with the 3D SOL fluid code BoRiS, M. Borchardt, J. Riemann, R. Schneider and X. Bonnin 290–293 (2001) 546
- Self-consistent description of the core and boundary plasma in the high-field ignition experiment, R. Stankiewicz and R. Zagórski 290–293 (2001) 738
- Electric fields and currents in an island divertor configuration, X. Bonnin, R. Schneider, D. Coster, V. Rozhansky and S. Voskoboinikov 290–293 (2001) 829
- Transport modelling of TEXTOR-DED laminar zone, Th. Eich, D. Reiser and K.H. Finken 290–293 (2001) 849
- Edge plasma**
- Review of initial experimental results of the PSI studies in the large helical device, S. Masuzaki, K. Akaishi, H. Funaba, M. Goto, K. Ida, S. Inagaki, N. Inoue, K. Kawahata, A. Komori, Y. Kubota, T. Morisaki, S. Morita, Y. Nakamura, K. Narihara, K. Nishimura, N. Noda, N. Ohyabu, B.J. Peterson, A. Sagara, R. Sakamoto, K. Sato, M. Shoji, H. Suzuki, Y. Takeiri, K. Tanaka, T. Tokuzawa, T. Watanabe, K. Tsuzuki, T. Hino, Y. Matsumoto, S. Kado, O. Motojima and LHD Experimental Group 290–293 (2001) 12
- Attenuation of secondary electron emission from divertor plates due to magnetic field inclination, Yu. Igitkhanov and G. Janeschitz 290–293 (2001) 99

- Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski 290–293 (2001) 663
- Studies of edge plasmas in an anchor minimum-B region of the GAMMA 10 tandem mirror, Y. Nakashima, K.M. Islam, A. Wada, D. Sato, S. Kobayashi, Y. Ishimoto, Y. Kawasaki, I. Katanuma, T. Saito, M. Yoshikawa, R. Baba, H. Aminaka, E. Ishinuki and K. Yatsu 290–293 (2001) 683
- Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina 290–293 (2001) 748
- Divertor geometry effects on detachment in TCV, R.A. Pitts, B.P. Duval, A. Loarte, J.-M. Moret, J.A. Boedo, D. Coster, I. Furno, J. Horacek, A.S. Kukushkin, D. Reiter, J. Rommers and TCV Team 290–293 (2001) 940
- Gas puff fueled H-mode discharges with good energy confinement above the Greenwald density limit on DIII-D, T.H. Osborne, M.A. Mahdavi, M. Chu, M.E. Fenstermacher, R. La Haye, A.W. Leonard, G. McKee, T.W. Petrie, C. Rettig, M. Wade, J. Watkins and DIII-D Team 290–293 (2001) 1013
- Edge transport**
- Heat flux decay length in the midplane of ASDEX Upgrade, A. Herrmann, A. Carlson, J.C. Fuchs, O. Gruber, M. Laux, J. Neuhauser, R. Pugno, A. Sips, W. Treutterer, W. Schneider and ASDEX Upgrade Team 290–293 (2001) 619
- e-folding length**
- Self-shadowing, gaps and leading edges on Tore Supra's inner first wall, R. Mitteau, P. Chappuis, Ph. Ghendrih, A. Grosman, D. Guilhem, J. Gunn, J. Hogan, M. Lipa, G. Martin, J. Schlosser and E. Tsitroni 290–293 (2001) 1036
- EIRENE**
- Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann 290–293 (2001) 418
- Electric field**
- Large  $\mathbf{E} \times \mathbf{B}$  convection near the divertor X-point, M.J. Schaffer, J.A. Boedo, R.A. Moyer, T.N. Carlstrom and J.G. Watkins 290–293 (2001) 530
- Plasma rotation and structure of the radial electric field in RFX, M.E. Puiatti, L. Tramontin, V. Antoni, R. Bartirromo, L. Carraro, D. Desideri, E. Martines, F. Sattin, P. Scarin, G. Serianni, M. Spolaore, M. Valisa and B. Zanoni 290–293 (2001) 696
- The influence of the poloidal variation of the density on the locally measured velocities induced by biasing experiments, M. van Schoor, H. van Goubergen and R. Weynants 290–293 (2001) 962
- Spectroscopic measurement of biasing effect on sheath electric field distribution in front of a metal plate inserted in a plasma flow, K. Takiyama, T. Oda and K. Sato 290–293 (2001) 976
- Cloud drifts over eroding surfaces in magnetic field configurations with three field components, P. Lalouis, R. Schneider and L.L. Lengyel 290–293 (2001) 1084
- Electric potential**
- Large  $\mathbf{E} \times \mathbf{B}$  convection near the divertor X-point, M.J. Schaffer, J.A. Boedo, R.A. Moyer, T.N. Carlstrom and J.G. Watkins 290–293 (2001) 530
- Electron density**
- Compact toroid injection as fueling in the JFT-2M tokamak, T. Ogawa, H. Ogawa, Y. Miura, H. Niimi, H. Kimura, Y. Kashiwa, T. Shibata, M. Yamamoto, N. Fukumoto, M. Nagata and T. Uyama 290–293 (2001) 454
- Electron diffraction**
- Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe 290–293 (2001) 295
- Electron energy loss spectroscopy**
- Non-destructive structural analysis of surface blistering by TEM and EELS in a reflection configuration, S. Muto, T. Matsui and T. Tanabe 290–293 (2001) 131
- Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe 290–293 (2001) 295
- Electron energy thermalization**
- Heat load on the first wall materials and interaction of emitted neutrals with plasma, K. Kobayashi, S. Kado, B. Xiao and S. Tanaka 290–293 (2001) 648
- Electron microscopy**
- Non-destructive structural analysis of surface blistering by TEM and EELS in a reflection configuration, S. Muto, T. Matsui and T. Tanabe 290–293 (2001) 131
- ELM**
- High-density H-mode operation achieved using efficient plasma refueling by inboard pellet launch, P.T. Lang, O. Gruber, L.D. Horton, T.T.C. Jones, M. Kaufmann, A. Lorenz, M. Maraschek, V. Mertens, J. Neuhauser, G. Saibene, H. Zohm, ASDEX Upgrade Team and JET Team 290–293 (2001) 374
- Characteristics of ELM activity and fueling efficiency of pellet injection from different locations on DIII-D, L.R. Baylor, T.C. Jernigan, R.J. Colchin, J.R. Ferron and M.R. Wade 290–293 (2001) 398

- A 2D fluid model of the scrape-off layer (SOL) using adaptive unstructured finite volumes, F. Subba and R. Zanino  
290–293 (2001) 743
- Impurity behavior in high performance radiative discharges of JT-60U, S. Sakurai, H. Kubo, A. Takenaga, N. Asakura, H. Tamai, T. Ishijima, S. Konoshima, K. Itami, A. Sakasai, S. Higashijima, T. Sugie and JT-60 Team  
290–293 (2001) 1002
- Lateral deflection of the SOL plasma during a giant ELM, I.S. Landman and H. Würz  
290–293 (2001) 1088
- Effect of magnetic geometry on ELM heat flux profiles, C.J. Lasnier, A.W. Leonard, T.W. Petrie and J.G. Watkins  
290–293 (2001) 1093
- Tolerable ELMs at high density in DIII-D, A.W. Leonard, T.H. Osborne, M.E. Fenstermacher, C.J. Lasnier and M.A. Mahdavi  
290–293 (2001) 1097
- Dynamic behavior of detached recombining plasmas during ELM-like plasma heat pulses in the divertor plasma simulator NAGDIS-II, Y. Uesugi, N. Hattori, D. Nishijima, N. Ohno and S. Takamura  
290–293 (2001) 1134
- Vertical target and FW erosion during off-normal events and impurity production and transport during ELMs typical for ITER-FEAT, H. Würz, S. Pestchanyi, B. Bazylev, I. Landman and F. Kappler  
290–293 (2001) 1138
- Emission asymmetry**
- Mitigation of plasma-wall interaction during quasi-single helicity states in RFX, G. Spizzo, P. Franz, L. Marrelli, P. Martin, A. Murari, T. Bolzonella, D. Terranova and P. Zanca  
290–293 (2001) 1018
- Endothermic hydrogen occluders**
- Hydrogen recycling study by Balmer lines emissions in linear plasma machine TPE, K. Shimada, T. Tanabe, R. Causey, T. Venhaus and K. Okuno  
290–293 (2001) 478
- Energy balance**
- Divertor energy distribution in JET H-modes, G.F. Matthews, S.K. Erements, W. Fundamenski, C. Ingesson, R.D. Monk and V. Riccardo  
290–293 (2001) 668
- Active cooling, calorimetry and energy balance in Tore Supra, J.C. Vallet, R. Reichle, M. Chantant, V. Basiuk and R. Mitteau  
290–293 (2001) 1023
- Energy distribution**
- Numerical simulation of hydrogen molecular dissociation and the effects to  $H\alpha$  profiles in low temperature plasmas, B. Xiao, S. Kado, K. Kobayashi and S. Tanaka  
290–293 (2001) 793
- Ergodic divertor**
- Flow measurements in the edge plasma of Tore Supra, C. Boucher, L.-G. Thibault, J.P. Gunn, J.-Y. Pascal, P. Devynck and Tore Supra Team  
290–293 (2001) 561
- Control of divertor geometry and performance of the ergodic divertor of Tore Supra, Ph. Ghendrih, M. Bécoulet, L. Costanzo, Y. Corre, C. Grisolia, A. Grosman, R. Guirlet, J. Gunn, T. Loarer, P. Monier-Garbet, G. Mank, R. Reichle, J.-C. Vallet, M. Zabiégo, A. Azéroual, J. Bucalossi, P. Devynck, C. De Michelis, K.H. Finken, J. Hogan, F. Laugier, F. Nguyen, B. Pégourié, F. Saint-Laurent, B. Schunke and Tore Supra Team  
290–293 (2001) 798
- Analysis of energy flux deposition and sheath transmission factors during ergodic divertor operation on Tore Supra, L. Costanzo, J.P. Gunn, T. Loarer, L. Colas, Y. Corre, Ph. Ghendrih, C. Grisolia, A. Grosman, D. Guilhem, P. Monier-Garbet, R. Reichle, H. Roche and J.C. Vallet  
290–293 (2001) 840
- Transport modelling of TEXTOR-DED laminar zone, Th. Eich, D. Reiser and K.H. Finken  
290–293 (2001) 849
- Spectral profile analysis of the  $D\alpha$  line in the divertor region of Tore-Supra, A. Escarguel, R. Guirlet, A. Azéroual, B. Pégourié, J. Gunn, T. Loarer, H. Capes, Y. Corre, C. De Michelis, L. Godbert-Mouret, M. Koubiti, M. Mattioli and R. Stamm  
290–293 (2001) 854
- Tore Supra divertor screening efficiency during density regime experiments, C. Grisolia, Ph. Ghendrih, J. Gunn, T. Loarer, P. Monier-Garbet, C. De Michelis, L. Costanzo and J.Y. Pascal  
290–293 (2001) 863
- Measurement and simulation of edge flows induced by ergodization in Tore Supra, J.P. Gunn, C. Boucher, Y. Corre, P. Devynck, Ph. Ghendrih and J.-Y. Pascal  
290–293 (2001) 877
- Alternative schemes of power deposition with the ergodic divertor on Tore Supra, G. Mank, Ph. Ghendrih, C. Grisolia, J. Gunn, T. Loarer, P. Monier-Garbet, L. Costanzo, K.H. Finken, C. De Michelis and R. Reichle  
290–293 (2001) 910
- Characterisation of the separatrix position in the ergodic divertor discharges of the Tore Supra tokamak, M. Zabiégo, Ph. Ghendrih, M. Bécoulet, L. Costanzo, C. De Michelis, C. Friant and J. Gunn  
290–293 (2001) 985
- Erosion/deposition**
- Suppression of net erosion in the DIII-D divertor with detached plasmas, W.R. Wampler, D.G. Whyte, C.P.C. Wong and W.P. West  
290–293 (2001) 346
- Erosion**
- Plasma-surface interactions on liquids, R. Bastasz and W. Eckstein  
290–293 (2001) 19
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß  
290–293 (2001) 25
- Formation of mixed layers and compounds on beryllium due to  $C^+$  and  $CO^+$  bombardment, P. Goldstrass and Ch. Linsmeier  
290–293 (2001) 71
- Surface tension enhancement of TRIM sputtering yields for liquid metal targets, A. Grossman, R.P. Doerner and S. Luckhardt  
290–293 (2001) 80
- Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider  
290–293 (2001) 89
- Synergistic effects by simultaneous bombardment of tungsten with hydrogen and carbon, K. Krieger and J. Roth  
290–293 (2001) 107

- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Influence of diffusion on W sputtering by carbon, K. Schmid, J. Roth and W. Eckstein 290–293 (2001) 148
- Implantation, erosion, and retention of tungsten in carbon, R.A. Zuhr, J. Roth, W. Eckstein, U. von Toussaint and J. Luthin 290–293 (2001) 162
- Erosion/redeposition analysis of lithium-based liquid surface divertors, J.N. Brooks, T.D. Rognlien, D.N. Ruzic and J.P. Allain 290–293 (2001) 185
- The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V. Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko 290–293 (2001) 220
- Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby 290–293 (2001) 224
- Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter 290–293 (2001) 238
- Dust characterization and analysis in Tore-Supra, P. Chappuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245
- Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu 290–293 (2001) 260
- Effects of condensable impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura 290–293 (2001) 299
- Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda 290–293 (2001) 303
- Studies of tungsten erosion at the inner and outer main chamber wall of the ASDEX Upgrade tokamak, A. Tabasso, H. Maier, J. Roth, K. Krieger and ASDEX Upgrade Team 290–293 (2001) 326
- Net erosion measurements on plasma facing components of Tore Supra, E. Tsitrone, P. Chappuis, Y. Corre, E. Gauthier, A. Grosman and J.Y. Pascal 290–293 (2001) 331
- Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341
- Fuel accumulation in co-deposited layers on plasma facing components, M. Rubel, P. Wienhold and D. Hildebrandt 290–293 (2001) 473
- Hydrogen isotope depth profiling in carbon samples from the erosion dominated inner vessel walls of JET, C. Stan-Sion, R. Behrisch, J.P. Coad, U. Kreißig, F. Kubo, V. Lazarev, S. Lindig, M. Mayer, E. Nolte, A. Peacock, L. Rohrer and J. Roth 290–293 (2001) 491
- Material erosion and erosion products under plasma heat loads typical for ITER hard disruptions, V. Safronov, N. Arkhipov, V. Bakhtin, S. Kurkin, F. Scaffidi-Argentina, D. Toporkov, S. Vasenin, H. Würz and A. Zhitlukhin 290–293 (2001) 1052
- Study of brittle destruction and erosion mechanisms of carbon-based materials during plasma instabilities, T. Burtseva, A. Hassanein, I. Ovchinnikov and V. Titov 290–293 (2001) 1059
- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074
- Combined sheath and thermal analysis of overheated surfaces in fusion devices, D. Naujoks and J.N. Brooks 290–293 (2001) 1123
- Vertical target and FW erosion during off-normal events and impurity production and transport during ELMs typical for ITER-FEAT, H. Würz, S. Pestchanyi, B. Bazylev, I. Landman and F. Kappler 290–293 (2001) 1138
- ERO-TEXTOR code**
- Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter 290–293 (2001) 238
- Exothermic hydrogen occluders**
- Hydrogen recycling study by Balmer lines emissions in linear plasma machine TPE, K. Shimada, T. Tanabe, R. Causey, T. Venhaus and K. Okuno 290–293 (2001) 478
- Experimental techniques**
- Consistency check of  $Z_{\text{eff}}$  measurements in ergodic divertor plasmas on Tore Supra, B. Schunke, C. De Michelis, R. Guirlet, P. Monier-Garbet, M. Mattioli, E. Chareyre and O. Meyer 290–293 (2001) 715
- Comparison of Langmuir probe and Thomson scattering measurements in DIII-D, J.G. Watkins, P. Stangeby, J.A. Boedo, T.N. Carlstrom, C.J. Lasnier, R.A. Moyer, D.L. Rudakov and D.G. Whyte 290–293 (2001) 778
- Fast ions**
- Narrow power deposition profiles on the JET divertor target, J. Lingertat, M. Laux and R. Monk 290–293 (2001) 896
- FCFRKR code**
- Numerical simulation of hydrogen molecular dissociation and the effects to  $H\alpha$  profiles in low temperature plasmas, B. Xiao, S. Kado, K. Kobayashi and S. Tanaka 290–293 (2001) 793
- Feedback control**
- Feedback control on edge plasma parameters with ergodic divertor in Tore Supra, J. Bucalossi, J.P. Gunn, A. Géraud, Ph. Ghendrih, C. Grisolia, A. Grosman, G. Martin, D. Moulin, J.-Y. Pascal and F. Saint-Laurent 290–293 (2001) 566

**First wall**

Local recycling coefficients and wall equilibration in tokamaks, P.K. Mioduszewski and L.W. Owen 290–293 (2001) 443

**First wall materials**

Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25

Synergistic effects by simultaneous bombardment of tungsten with hydrogen and carbon, K. Krieger and J. Roth 290–293 (2001) 107

Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121

Plasma operation with tungsten tiles at the central column of ASDEX Upgrade, R. Neu, V. Rohde, A. Geier, K. Krieger, H. Maier, D. Bolshukhin, A. Kallenbach, R. Pugno, K. Schmidtman, M. Zarrabian and ASDEX Upgrade Team 290–293 (2001) 206

Dust characterization and analysis in Tore-Supra, Ph. Chapuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245

Interactions between liquid-wall vapor and edge plasmas, T.D. Rognlien and M.E. Rensink 290–293 (2001) 312

**Flakes**

Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau 290–293 (2001) 701

**Flow**

Flow measurements in the edge plasma of Tore Supra, C. Boucher, L.-G. Thibault, J.P. Gunn, J.-Y. Pascal, P. Devynck and Tore Supra Team 290–293 (2001) 561

Impurity transport experiments in the edge plasma of Alcator C-Mod using gas injection plumes, S. Gangadhara, B. LaBombard and C. MacLatchy 290–293 (2001) 598

Measurement and simulation of edge flows induced by ergodization in Tore Supra, J.P. Gunn, C. Boucher, Y. Corre, P. Devynck, Ph. Ghendrih and J.-Y. Pascal 290–293 (2001) 877

**Fluctuations**

Visible imaging of turbulence in the SOL of the Alcator C-Mod tokamak, J.L. Terry, R. Maqueda, C.S. Pitcher, S.J. Zweben, B. LaBombard, E.S. Marmor, A.Y. Pigarov and G. Wurden 290–293 (2001) 757

**Fluid code**

Extension of the B2 code towards the plasma core for a self-consistent simulation of ASDEX upgrade scenarios, H. Bürbaumer, R. Neu, R. Schneider, D. Coster, J. Stober, F. Aumayr and H.P. Winter 290–293 (2001) 571

**Fluid modeling**

A 2D fluid model of the scrape-off layer (SOL) using adaptive unstructured finite volumes, F. Subba and R. Zanino 290–293 (2001) 743

Modeling of carbon transport in the divertor and SOL of DIII-D during high performance plasma operation, W.P. West, G.D. Porter, T.E. Evans, P. Stangeby, N.H. Brooks, M.E. Fenstermacher, R.C. Isler, T.D. Rognlien, M.R. Wade, D.G. Whyte and N.S. Wolf 290–293 (2001) 783

**Fluid simulation**

Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte 290–293 (2001) 733

**Flux dependence**

Chemical erosion yields and photon efficiency measurements in the JET gas box divertor, M.F. Stamp, S.K. Erents, W. Fundamenski, G.F. Matthews and R.D. Monk 290–293 (2001) 321

**Flux measurement**

Characterisation of radiation and flux measurements on a neutraliser plate of the Tore Supra ergodic divertor, Y. Corre, R. Giannella, C. De Michelis, R. Guirlet, A. Azéroual, E. Chareyre, L. Costanzo, A. Escarguel, E. Gauthier, Ph. Ghendrih, J. Gunn, J. Hogan, P. Monier-Garbet, B. Pégourié, A. Pospieszczyk and E. Tsitrone 290–293 (2001) 250

**Flux plasma**

Energy flux measurements in a steady-state discharge at PSI-2, B. Koch, W. Bohmeyer, G. Fussmann, P. Kornejew and H.-D. Reiner 290–293 (2001) 653

**Fuelling**

High-density H-mode operation achieved using efficient plasma refueling by inboard pellet launch, P.T. Lang, O. Gruber, L.D. Horton, T.T.C. Jones, M. Kaufmann, A. Lorenz, M. Maraschek, V. Mertens, J. Neuhauser, G. Saibene, H. Zohm, ASDEX Upgrade Team and JET Team 290–293 (2001) 374

Particle collection and exhaust in ergodic divertor experiments on Tore Supra, T. Loarer, Ph. Ghendrih, J. Gunn, A. Azéroual, L. Costanzo, C. Grisolia, R. Guirlet, G. Mank, P. Monier-Garbet and B. Pégourié 290–293 (2001) 900

**Fusion reactor**

Transport of and deposition from hydrocarbon radicals in a flow tube downstream from a CH<sub>4</sub> RF discharge, A.E. Gorodetsky, I.I. Arkhipov, R.Kh. Zalavutdinov, A.P. Zakharov, Yu.N. Tolmachev, S.P. Vnukov and V.L. Bukhovets 290–293 (2001) 271

Laboratory study of the transport and condensation of hydrocarbon radicals and its consequences for mitigating the tritium inventory in the ITER-FEAT divertor, I.I. Arkhipov, G. Federici, A.E. Gorodetsky, C. Ibbott, D.A. Ko-

- marov, A.N. Makhankov, A.V. Markin, I.V. Mazul, R. Tivey, A.P. Zakharov and R.Kh. Zalavutdinov  
290–293 (2001) 394
- Future fusion devices**  
Wall conditioning by microwave generated plasmas in a toroidal magnetic field, J. Ihde, H.B. Störk, J. Winter, M. Rubel, H.G. Esser and H. Toyoda 290–293 (2001) 1180
- Gamma 10**  
Studies of edge plasmas in an anchor minimum-B region of the GAMMA 10 tandem mirror, Y. Nakashima, K.M. Islam, A. Wada, D. Sato, S. Kobayashi, Y. Ishimoto, Y. Kawasaki, I. Katanuma, T. Saito, M. Yoshikawa, R. Baba, H. Aminaka, E. Ishinuki and K. Yatsu 290–293 (2001) 683
- Gas injection**  
Impurity transport experiments in the edge plasma of Alcator C-Mod using gas injection plumes, S. Gangadhara, B. LaBombard and C. MacLachy 290–293 (2001) 598
- Gas target divertor**  
Resonance radiation and high excitation of neutrals in plasma–gas interactions, A.M. Litnovsky, B.I. Khripunov, G.V. Sholin, V.B. Petrov, V.V. Shapkin and N.V. Antonov  
290–293 (2001) 1107
- Geometry effect**  
Critical issues in divertor optimisation for ITER–FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider 290–293 (2001) 887  
The effect of divertor magnetic balance on H-mode performance in DIII-D, T.W. Petrie, C.M. Greenfield, R.J. Grobener, A.W. Hyatt, R.J. La Haye, A.W. Leonard, M.A. Mahdavi, T.H. Osborne, M.J. Schaffer, D.M. Thomas, W.P. West, DIII-D Team, S.L. Allen, M.E. Fenstermacher, C.J. Lasnier, G.D. Porter, N.S. Wolf, J.G. Watkins and T.L. Rhodes 290–293 (2001) 935  
Divertor geometry effects on detachment in TCV, R.A. Pitts, B.P. Duval, A. Loarte, J.-M. Moret, J.A. Boedo, D. Coster, I. Furno, J. Horacek, A.S. Kukushkin, D. Reiter, J. Rommers and TCV Team 290–293 (2001) 940  
Self-shadowing, gaps and leading edges on Tore Supra’s inner first wall, R. Mitteau, P. Chappuis, Ph. Ghendrih, A. Grosman, D. Guilhem, J. Gunn, J. Hogan, M. Lipa, G. Martin, J. Schlosser and E. Tsitrone 290–293 (2001) 1036
- Glow discharge cleaning**  
Overview of impurity control and wall conditioning in NSTX, H.W. Kugel, R. Maingi, W. Wampler, R.E. Barry, M. Bell, W. Blanchard, D. Gates, D. Johnson, R. Kaita, S. Kaye, R. Maqueda, J. Menard, M.M. Menon, D. Mueller, M. Ono, S. Paul, Y.-K.M. Peng, R. Raman, A. Roquemore, C.H. Skinner, S. Sabbagh, B. Stratton, D. Stutman, J.R. Wilson, S. Zweben and NSTX National Research Team  
290–293 (2001) 1185
- Grain boundaries**  
Role of grain boundaries and carbon deposition in deuterium retention behavior of deuterium plasma exposed tungsten, D.A. Komarov, A.V. Markin, S.Yu. Rybakov and A.P. Zakharov 290–293 (2001) 433
- Graphite belt limiter**  
Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe 290–293 (2001) 295
- Graphite**  
Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. Garcia-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52  
Chemical erosion of doped graphites for fusion devices, C. García-Rosales and M. Balden 290–293 (2001) 173
- Graphite materials**  
Nondestructive measurement of surface tritium by  $\beta$ -ray induced X-ray spectrometry (BIXS), M. Matsuyama, T. Tanabe, N. Noda, V. Philipps, K.H. Finken and K. Watanabe 290–293 (2001) 437
- Growth**  
Transport of and deposition from hydrocarbon radicals in a flow tube downstream from a CH<sub>4</sub> RF discharge, A.E. Gorodetsky, I.I. Arkhipov, R.Kh. Zalavutdinov, A.P. Zakharov, Yu.N. Tolmachev, S.P. Vnukov and V.L. Bukhovets 290–293 (2001) 271  
Laboratory study of the transport and condensation of hydrocarbon radicals and its consequences for mitigating the tritium inventory in the ITER-FEAT divertor, I.I. Arkhipov, G. Federici, A.E. Gorodetsky, C. Ibbott, D.A. Komarov, A.N. Makhankov, A.V. Markin, I.V. Mazul, R. Tivey, A.P. Zakharov and R.Kh. Zalavutdinov  
290–293 (2001) 394
- Heat deposition**  
Alternative schemes of power deposition with the ergodic divertor on Tore Supra, G. Mank, Ph. Ghendrih, C. Grisolia, J. Gunn, T. Loarer, P. Monier-Garbet, L. Costanzo, K.H. Finken, C. De Michelis and R. Reichle  
290–293 (2001) 910
- Heat flux**  
Radiation distribution and power balance in the ASDEX Upgrade LYRA divertor, J.C. Fuchs, D. Coster, A. Herrmann, A. Kallenbach, K.F. Mast and ASDEX Upgrade Team  
290–293 (2001) 525  
Heat flux decay length in the midplane of ASDEX Upgrade, A. Herrmann, A. Carlson, J.C. Fuchs, O. Gruber, M. Laux, J. Neuhauser, R. Pugno, A. Sips, W. Treutterer, W. Schneider and ASDEX Upgrade Team  
290–293 (2001) 619

- Energy flux measurements in a steady-state discharge at PSI-2, B. Koch, W. Bohmeyer, G. Fussmann, P. Kornejew and H.-D. Reiner 290–293 (2001) 653
- Self-shadowing, gaps and leading edges on Tore Supra's inner first wall, R. Mitteau, P. Chappuis, Ph. Ghendrih, A. Grosman, D. Guilhem, J. Gunn, J. Hogan, M. Lipa, G. Martin, J. Schlosser and E. Tsitrone 290–293 (2001) 1036
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov 290–293 (2001) 1079
- Effect of magnetic geometry on ELM heat flux profiles, C.J. Lasnier, A.W. Leonard, T.W. Petrie and J.G. Watkins 290–293 (2001) 1093
- Heat flux to divertor**
- The effect of divertor magnetic balance on H-mode performance in DIII-D, T.W. Petrie, C.M. Greenfield, R.J. Grobener, A.W. Hyatt, R.J. La Haye, A.W. Leonard, M.A. Mahdavi, T.H. Osborne, M.J. Schaffer, D.M. Thomas, W.P. West, DIII-D Team, S.L. Allen, M.E. Fenstermacher, C.J. Lasnier, G.D. Porter, N.S. Wolf, J.G. Watkins and T.L. Rhodes 290–293 (2001) 935
- Heat load**
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42
- Heat load on the first wall materials and interaction of emitted neutrals with plasma, K. Kobayashi, S. Kado, B. Xiao and S. Tanaka 290–293 (2001) 648
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda 290–293 (2001) 947
- HEIGHTS package**
- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov 290–293 (2001) 1079
- Heliotron J**
- Island divertor in a helical-axis heliotron device (Heliotron J), T. Mizuuchi, M. Nakasuga, F. Sano, Y. Nakamura, K. Nagasaki, H. Okada, K. Kondo and T. Obiki 290–293 (2001) 678
- Helium**
- Effect of helium irradiation on trapping and thermal release of deuterium implanted in tungsten, S. Nagata and K. Takahiro 290–293 (2001) 135
- Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski 290–293 (2001) 663
- Study of edge plasma properties comparing operation in hydrogen and helium in RFX, M. Spolaore, V. Antoni, M. Bagatin, D. Desideri, L. Fattorini, E. Martines, G. Serianni, L. Tramontin and N. Vianello 290–293 (2001) 729
- Visible imaging of turbulence in the SOL of the Alcator C-Mod tokamak, J.L. Terry, R. Maqueda, C.S. Pitcher, S.J. Zweben, B. LaBombard, E.S. Marmor, A.Y. Pigarov and G. Wurden 290–293 (2001) 757
- Helium beam**
- Helium exhaust in divertor-closure configuration with W-shaped divertor of JT-60U, A. Sakasai, H. Takenaga, H. Kubo, N. Akino, S. Higashijima, S. Sakurai, H. Tamai, K. Itami and N. Asakura 290–293 (2001) 957
- Helium exhaust**
- B2-EIRENE modelling of He compression and enrichment, D.P. Coster, H.-S. Bosch, W. Ullrich and ASDEX Upgrade Team 290–293 (2001) 845
- Helium exhaust in divertor-closure configuration with W-shaped divertor of JT-60U, A. Sakasai, H. Takenaga, H. Kubo, N. Akino, S. Higashijima, S. Sakurai, H. Tamai, K. Itami and N. Asakura 290–293 (2001) 957
- Helium retention**
- Simulation study on retention and reflection from tungsten carbide under high fluence of helium ions, T. Ono, T. Kawamura, T. Kenmotsu and Y. Yamamura 290–293 (2001) 140
- High heat plasma irradiation**
- Experimental study of radiation power flux on the target surface during high heat plasma irradiation, V.N. Litunovsky, I.B. Ovchinnikov and V.A. Titov 290–293 (2001) 1112
- High-Z material**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Molybdenum sources and transport in Alcator C-Mod, B. Lipschultz, D.A. Pappas, B. LaBombard, J.E. Rice, D. Smith and S. Wukitch 290–293 (2001) 286
- Local emission and core concentration of tungsten in TEXTOR-94 plasmas operated with tungsten test and poloidal limiters, M. Wada, T. Ohgo, A. Pospieszczyk, A. Huber, G. Sergienko, T. Tanabe, W. Biel, K. Kondo, K. Ohya, V. Philipps, G. Bertschinger, J. Rapp, B. Schweer and N. Noda 290–293 (2001) 768
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda 290–293 (2001) 947

**H-mode**

- High-density H-mode operation achieved using efficient plasma refueling by inboard pellet launch, P.T. Lang, O. Gruber, L.D. Horton, T.T.C. Jones, M. Kaufmann, A. Lorenz, M. Maraschek, V. Mertens, J. Neuhauser, G. Saibene, H. Zohm, ASDEX Upgrade Team and JET Team 290–293 (2001) 374
- Investigation of the hydrogen fluxes in the plasma edge of W7-AS during H-mode discharges, U. Langer, E. Taglauer, R. Fischer and W7-AS Team 290–293 (2001) 658
- The influence of the poloidal variation of the density on the locally measured velocities induced by biasing experiments, M. van Schoor, H. van Goubergen and R. Weynants 290–293 (2001) 962
- Edge transport barrier formation and ELM phenomenology in the W7-AS stellarator, P. Grigull, M. Hirsch, J. Baldzuhn, H. Ehmler, F. Gadelmeier, L. Giannone, H.-J. Hartfuss, D. Hildebrandt, R. Jaenicke, J. Kisslinger, R. Koenig, K. McCormick, F. Wagner, A. Weller, Ch. Wendland and W7-AS Team 290–293 (2001) 1009
- Lateral deflection of the SOL plasma during a giant ELM, I.S. Landman and H. Würz 290–293 (2001) 1088

**Hydrides**

- Role of grain boundaries and carbon deposition in deuterium retention behavior of deuterium plasma exposed tungsten, D.A. Komarov, A.V. Markin, S.Yu. Rybakov and A.P. Zakharov 290–293 (2001) 433
- Island divertor investigations on the W7-AS stellarator, R.W.T. König, K. McCormick, Y. Feng, S. Fiedler, P. Grigull, D. Hildebrandt, J. Kisslinger, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, S. Sardei, F. Wagner, A. Werner and W7-AS Team 290–293 (2001) 882
- Plasma–surface interaction effects during high ion temperature long pulse experiments in TRIAM-1M, N. Yoshida, T. Hirai, K. Tokunaga, S. Itoh and TRIAM group 290–293 (2001) 1030

**Hydrogen**

- Deuterium retention in W, W1%La, C-coated W and W<sub>2</sub>C, R.A. Anderl, R.J. Pawelko and S.T. Schuetz 290–293 (2001) 38
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42
- Deuterium retention of V–4Cr–4Ti alloy exposed to the JFT-2M tokamak environment, Y. Hirohata, T. Oda, T. Hino and S. Sengoku 290–293 (2001) 196
- Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341
- Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster 290–293 (2001) 367
- Role of grain boundaries and carbon deposition in deuterium retention behavior of deuterium plasma exposed tungsten,

- D.A. Komarov, A.V. Markin, S.Yu. Rybakov and A.P. Zakharov 290–293 (2001) 433
- In situ measurement of hydrogen retention in JET carbon tiles, D.D.R. Summers, M.N.A. Beurskens, J.P. Coad, G. Counsell, W. Fundamenski, G.F. Matthews and M.F. Stamp 290–293 (2001) 496
- Island divertor investigations on the W7-AS stellarator, R.W.T. König, K. McCormick, Y. Feng, S. Fiedler, P. Grigull, D. Hildebrandt, J. Kisslinger, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, S. Sardei, F. Wagner, A. Werner and W7-AS Team 290–293 (2001) 882
- Plasma–surface interaction effects during high ion temperature long pulse experiments in TRIAM-1M, N. Yoshida, T. Hirai, K. Tokunaga, S. Itoh and TRIAM group 290–293 (2001) 1030

**Hydrogen atoms**

- Influence of hydrogen surface coverage on atomic particle reflection, I. Takagi, Y. Koga, H. Fujita and K. Higashi 290–293 (2001) 501

**Hydrogen density**

- Spectral profile analysis of the D $\alpha$  line in the divertor region of Tore-Supra, A. Escarguel, R. Guirlet, A. Azéroual, B. Pégourié, J. Gunn, T. Loarer, H. Capes, Y. Corre, C. De Michelis, L. Godbert-Mouret, M. Koubiti, M. Mattioli and R. Stamm 290–293 (2001) 854

**Hydrogen inventory**

- Fuel accumulation in co-deposited layers on plasma facing components, M. Rubel, P. Wienhold and D. Hildebrandt 290–293 (2001) 473

**Hydrogen molecules**

- Numerical simulation of hydrogen molecular dissociation and the effects to H $\alpha$  profiles in low temperature plasmas, B. Xiao, S. Kado, K. Kobayashi and S. Tanaka 290–293 (2001) 793
- Vibrational population of the ground state of H<sub>2</sub> and D<sub>2</sub> in the divertor of ASDEX Upgrade, B. Heger, U. Fantz, K. Behringer and ASDEX Upgrade Team 290–293 (2001) 413

**Hydrogen recycling**

- Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura 290–293 (2001) 423
- Isotope effects in thermal release of H and D implanted into WC layers on graphite, T. Horikawa, K. Morita and B. Tsuchiya 290–293 (2001) 428
- Hydrogen recycling study by Balmer lines emissions in linear plasma machine TPE, K. Shimada, T. Tanabe, R. Causey, T. Venhaus and K. Okuno 290–293 (2001) 478

**Hydrogen reflection**

- Influence of hydrogen surface coverage on atomic particle reflection, I. Takagi, Y. Koga, H. Fujita and K. Higashi 290–293 (2001) 501

**Hydrogen retention**

Deuterium retention in single crystal tungsten, A.A. Haasz, M. Poon, R.G. Macaulay-Newcombe and J.W. Davis  
290–293 (2001) 85

Surface reactions of hydrocarbon radicals: suppression of the re-deposition in fusion experiments via a divertor liner, A. von Keudell, T. Schwarz-Selinger, W. Jacob and A. Stevens  
290–293 (2001) 231

Hydrogen inventories in nuclear fusion devices, M. Mayer, V. Philipps, P. Wienhold, H.G. Esser, J. von Seggern and M. Rubel  
290–293 (2001) 381

Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann  
290–293 (2001) 418

Hydrogen isotope depth profiling in carbon samples from the erosion dominated inner vessel walls of JET, C. Stan-Sion, R. Behrisch, J.P. Coad, U. Kreißig, F. Kubo, V. Lazarev, S. Lindig, M. Mayer, E. Nolte, A. Peacock, L. Rohrer and J. Roth  
290–293 (2001) 491

**Hydrogen trapping**

Particle trapping in carbon walls during ICRH heating in Tore Supra, C. Grisolia, J. Hogan, Ph. Ghendrih, T. Loarer, J. Gunn, P. Monier-Garbet, M. Becoulet and Th. Hutter  
290–293 (2001) 402

Local recycling coefficients and wall equilibration in tokamaks, P.K. Mioduszewski and L.W. Owen  
290–293 (2001) 443

**ICRF**

ICRF wall conditioning experiments in the W7-AS stellarator, R. Brakel, D. Hartmann, P. Grigull and W7-AS Team  
290–293 (2001) 1160

**Imaging plate**

Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Fincken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze  
290–293 (2001) 448

**Implantation**

Implantation, erosion, and retention of tungsten in carbon, R.A. Zuhr, J. Roth, W. Eckstein, U. von Toussaint and J. Luthin  
290–293 (2001) 162

**Impurities**

JET methane screening experiments, J.D. Strachan, K. Erents, W. Fundamenski, M. von Hellermann, L. Horton, K. Lawson, G. McCracken, J. Spence, M. Stamp and K.-D. Zastrow  
290–293 (2001) 972

**Impurity control**

Particle control in the sustained spheromak physics experiment, R.D. Wood, D.N. Hill, E.B. Hooper, D. Buchenauer, H. McLean, Z. Wang, S. Woodruff and G. Wurden  
290–293 (2001) 513

Overview of impurity control and wall conditioning in NSTX, H.W. Kugel, R. Maingi, W. Wampler, R.E. Barry, M. Bell, W. Blanchard, D. Gates, D. Johnson, R. Kaita, S. Kaye, R. Maqueda, J. Menard, M.M. Menon, D. Mueller, M. Ono, S. Paul, Y.-K.M. Peng, R. Raman, A. Roquemore, C.H. Skinner, S. Sabbagh, B. Stratton, D. Stutman, J.R. Wilson, S. Zweben and NSTX National Research Team  
290–293 (2001) 1185

**Impurity effects**

Low-Z impurity transport in DIII-D – observations and implications, M.R. Wade, W.A. Houlberg, L.R. Baylor, W.P. West and D.R. Baker  
290–293 (2001) 773

**Impurity enrichment**

Noble gas enrichment studies at JET, M. Groth, P. Andrew, W. Fundamenski, H.Y. Guo, D.L. Hillis, J.T. Hogan, L.D. Horton, G.F. Matthews, A.G. Meigs, P.M. Morgan, M.F. Stamp and M. von Hellermann  
290–293 (2001) 867

**Impurity radiation**

The effect of divertor tile material on radiation profiles in LHD, B.J. Peterson, S. Masuzaki, R. Sakamoto, K. Sato, S. Inagaki, A. Sagara, S. Ohdachi, Y. Nakamura, N. Noda, Y. Xu, J.E. Rice, N. Ashikawa, S. Yamamoto, M. Takechi, K. Toi, S. Morita, M. Goto, K. Narihara, N. Inoue, Y. Takeiri, M. Sato, M. Osakabe, K. Tanaka, T. Tokuzawa, S. Sakakibara, M. Shoji, K. Kawahata, O. Kaneko, N. Ohyabu, H. Yamada, A. Komori, K. Yamazaki, S. Sudo and O. Motojima  
290–293 (2001) 930

**Impurity screening**

Molybdenum sources and transport in Alcator C-Mod, B. Lipschultz, D.A. Pappas, B. LaBombard, J.E. Rice, D. Smith and S. Wukitch  
290–293 (2001) 286

Impurity behavior before and during the x-point MARFE in JT-60U, S. Higashijima, H. Kubo, T. Sugie, T. Nakano, S. Konoshima, H. Tamai, K. Shimizu, A. Sakasai, N. Asakura, S. Sakurai and K. Itami  
290–293 (2001) 623

High radiation from intrinsic and injected impurities in Tore Supra ergodic divertor plasmas, P. Monier-Garbet, C. De Michelis, Ph. Ghendrih, C. Grisolia, A. Grosman, R. Guirlet, J. Gunn, T. Loarer, C.E. Bush, C. Clement, Y. Corre, L. Costanzo, B. Schunke and J.C. Vallet  
290–293 (2001) 925

Issues in the plasma wall interactions in RFX, M. Valisa, R. Bartiromo, D. Bettella, L. Carraro, S. Costa, P. Martin, S. Martini, R. Pasqualotto, M.E. Puiatti, P. Scarin, F. Sattin, G. Telesca, P. Zanica, B. Zaniol and RFX Team  
290–293 (2001) 980

**Impurity source**

Molybdenum sources and transport in Alcator C-Mod, B. Lipschultz, D.A. Pappas, B. LaBombard, J.E. Rice, D. Smith and S. Wukitch  
290–293 (2001) 286

Modeling of carbon transport in the divertor and SOL of DIII-D during high performance plasma operation, W.P. West,

- G.D. Porter, T.E. Evans, P. Stangeby, N.H. Brooks, M.E. Fenstermacher, R.C. Isler, T.D. Rognlien, M.R. Wade, D.G. Whyte and N.S. Wolf 290–293 (2001) 783
- Impurity transport**
- Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter 290–293 (2001) 238
- Impurity transport experiments in the edge plasma of Alcator C-Mod using gas injection plumes, S. Gangadhara, B. La-Bombard and C. MacLachy 290–293 (2001) 598
- Effect of limiter recycling on measured poloidal impurity emission profiles in Tore Supra, J. Hogan, C. De Michelis, P. Monier-Garbet, M. Becoulet, C. Bush, Ph. Ghendrih, R. Guirlet, W. Hess, M. Mattioli and J.C. Vallet 290–293 (2001) 628
- Low-Z impurity transport in DIII-D – observations and implications, M.R. Wade, W.A. Houlberg, L.R. Baylor, W.P. West and D.R. Baker 290–293 (2001) 773
- Modeling of carbon transport in the divertor and SOL of DIII-D during high performance plasma operation, W.P. West, G.D. Porter, T.E. Evans, P. Stangeby, N.H. Brooks, M.E. Fenstermacher, R.C. Isler, T.D. Rognlien, M.R. Wade, D.G. Whyte and N.S. Wolf 290–293 (2001) 783
- Impurity behavior in high performance radiative discharges of JT-60U, S. Sakurai, H. Kubo, A. Takenaga, N. Asakura, H. Tamai, T. Ishijima, S. Konoshima, K. Itami, A. Sakasai, S. Higashijima, T. Sugie and JT-60 Team 290–293 (2001) 1002
- Vertical target and FW erosion during off-normal events and impurity production and transport during ELMs typical for ITER-FEAT, H. Würz, S. Pestchanyi, B. Bazylev, I. Landman and F. Kappler 290–293 (2001) 1138
- Impurity**
- Deuterium retention of V-4Cr-4Ti alloy exposed to the JFT-2M tokamak environment, Y. Hirohata, T. Oda, T. Hino and S. Sengoku 290–293 (2001) 196
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Interactions between liquid-wall vapor and edge plasmas, T.D. Rognlien and M.E. Rensink 290–293 (2001) 312
- Particle flows in pumped DIII-D discharges, G.D. Porter, T.D. Rognlien, M.E. Rensink, N.S. Wolf and W.P. West 290–293 (2001) 692
- Consistency check of  $Z_{\text{eff}}$  measurements in ergodic divertor plasmas on Tore Supra, B. Schunke, C. De Michelis, R. Guirlet, P. Monier-Garbet, M. Mattioli, E. Chareyre and O. Meyer 290–293 (2001) 715
- Spectroscopic study of neon emission and retention in the Tore Supra ergodic divertor, R. Guirlet, J. Hogan, Y. Corre, C. De Michelis, A. Escarguel, W. Hess, P. Monier-Garbet and B. Schunke 290–293 (2001) 872
- Operational limits under different wall conditions on TEXTOR-94, J. Rapp, W. Biel, H. Gerhauser, A. Huber, H.R. Koslowski, M. Lehnen, V. Philipps, A. Pospieszczyk, D. Reiser, U. Samm, G. Sergienko, M.Z. Tokar and R. Zagórski 290–293 (2001) 1148
- Conditionings for plasma facing walls of large helical device, T. Hino, T. Ohuchi, M. Hashiba, Y. Yamauchi, Y. Hirohata, N. Inoue, A. Sagara, N. Noda and O. Motojima 290–293 (2001) 1176
- Ion beam analysis**
- Mechanism of the chemical erosion of SiC under hydrogen irradiation, M. Balden, S. Picarle and J. Roth 290–293 (2001) 47
- Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. Garcia-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52
- Ion bombardment**
- Methane formation in graphite and boron-doped graphite under simultaneous  $O^+$  and  $H^+$  irradiation, A.Y.K. Chen, J.W. Davis and A.A. Haasz 290–293 (2001) 61
- Ion implantation**
- Deuterium retention in single crystal tungsten, A.A. Haasz, M. Poon, R.G. Macaulay-Newcombe and J.W. Davis 290–293 (2001) 85
- Ion irradiation**
- Work function change of first wall candidate metals due to ion beam irradiation, G.-N. Luo, K. Yamaguchi, T. Terai and M. Yamawaki 290–293 (2001) 116
- Non-destructive structural analysis of surface blistering by TEM and EELS in a reflection configuration, S. Muto, T. Matsui and T. Tanabe 290–293 (2001) 131
- Energy distributions of  $CD_4$  and  $CD_3$  chemically released from graphite by  $D^+$  and  $D^0/Ne^+$  impact, E. Vietzke 290–293 (2001) 158
- Deuterium retention in W, W1%La, C-coated W and  $W_2C$ , R.A. Anderl, R.J. Pawelko and S.T. Schuetz 290–293 (2001) 38
- Mechanism of the chemical erosion of SiC under hydrogen irradiation, M. Balden, S. Picarle and J. Roth 290–293 (2001) 47
- Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. Garcia-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria 290–293 (2001) 52
- Formation of mixed layers and compounds on beryllium due to  $C^+$  and  $CO^+$  bombardment, P. Goldstrass and Ch. Linsmeier 290–293 (2001) 71
- Ionization**
- Detection of sputtered and evaporated carbon aggregates: relative and absolute electron ionization fragmentation yields, C. Mair, H. Deutsch, K. Becker, T.D. Märk and E. Vietzke 290–293 (2001) 291

- High resolution measurements of neutral density and ionization rate in the main chamber of the Alcator C-Mod tokamak, R.L. Boivin, J. Goetz, A. Hubbard, J.W. Hughes, J. Irby, B. LaBombard, E. Marmor, D. Mossessian and J.L. Terry  
290–293 (2001) 542
- Heat load on the first wall materials and interaction of emitted neutrals with plasma, K. Kobayashi, S. Kado, B. Xiao and S. Tanaka  
290–293 (2001) 648
- Ionization mean free path**
- Noble gas enrichment studies at JET, M. Groth, P. Andrew, W. Fundamenski, H.Y. Guo, D.L. Hillis, J.T. Hogan, L.D. Horton, G.F. Matthews, A.G. Meigs, P.M. Morgan, M.F. Stamp and M. von Hellermann  
290–293 (2001) 867
- Island divertor**
- W7-X edge modelling with the 3D SOL fluid code BoRiS, M. Borchardt, J. Riemann, R. Schneider and X. Bonnin  
290–293 (2001) 546
- Electric fields and currents in an island divertor configuration, X. Bonnin, R. Schneider, D. Coster, V. Rozhansky and S. Voskoboinikov  
290–293 (2001) 829
- ITER**
- Plasma-wall interaction issues in ITER, G. Janeschitz and ITER JCT and HTs  
290–293 (2001) 1
- Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu  
290–293 (2001) 260
- Critical issues in divertor optimisation for ITER-FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887
- JET**
- Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby  
290–293 (2001) 224
- Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann  
290–293 (2001) 418
- Hydrogen isotope depth profiling in carbon samples from the erosion dominated inner vessel walls of JET, C. Stan-Sion, R. Behrisch, J.P. Coad, U. Kreißig, F. Kubo, V. Lazarev, S. Lindig, M. Mayer, E. Nolte, A. Peacock, L. Rohrer and J. Roth  
290–293 (2001) 491
- In situ measurement of hydrogen retention in JET carbon tiles, D.D.R. Summers, M.N.A. Beurskens, J.P. Coad, G. Counsell, W. Fundamenski, G.F. Matthews and M.F. Stamp  
290–293 (2001) 496
- Multi-machine modelling of divertor geometry effects, A. Loarte  
290–293 (2001) 805
- Narrow power deposition profiles on the JET divertor target, J. Lingertat, M. Laux and R. Monk  
290–293 (2001) 896
- Lateral deflection of the SOL plasma during a giant ELM, I.S. Landman and H. Würz  
290–293 (2001) 1088
- JFT-2M**
- Deuterium retention of V-4Cr-4Ti alloy exposed to the JFT-2M tokamak environment, Y. Hirohata, T. Oda, T. Hino and S. Sengoku  
290–293 (2001) 196
- JT-60U**
- Reversal of in-out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura  
290–293 (2001) 407
- Impurity behavior before and during the x-point MARFE in JT-60U, S. Higashijima, H. Kubo, T. Sugie, T. Nakano, S. Konoshima, H. Tamai, K. Shimizu, A. Sakasai, N. Asakura, S. Sakurai and K. Itami  
290–293 (2001) 623
- Multi-machine modelling of divertor geometry effects, A. Loarte  
290–293 (2001) 805
- Pumping effect on the divertor plasma and detachment in the JT-60U W-shaped divertor, N. Asakura, S. Sakurai, H. Tamai, Y. Koide, Y. Sakamoto, O. Naito, H. Kubo, K. Itami and K. Masaki  
290–293 (2001) 825
- Helium exhaust in divertor-closure configuration with W-shaped divertor of JT-60U, A. Sakasai, H. Takenaga, H. Kubo, N. Akino, S. Higashijima, S. Sakurai, H. Tamai, K. Itami and N. Asakura  
290–293 (2001) 957
- Impurity behavior in high performance radiative discharges of JT-60U, S. Sakurai, H. Kubo, A. Takenaga, N. Asakura, H. Tamai, T. Ishijima, S. Konoshima, K. Itami, A. Sakasai, S. Higashijima, T. Sugie and JT-60 Team  
290–293 (2001) 1002
- Langmuir probe**
- Flow measurements in the edge plasma of Tore Supra, C. Boucher, L.-G. Thibault, J.P. Gunn, J.-Y. Pascal, P. Devynck and Tore Supra Team  
290–293 (2001) 561
- Plasma profiles in the inner divertor of ASDEX Upgrade, A. Carlson, D. Coster, A. Herrmann, R. Pugno, U. Wenzel and ASDEX Upgrade Team  
290–293 (2001) 575
- Density fluctuations at high density in the ergodic divertor configuration of Tore Supra, P. Devynck, J. Gunn, Ph. Ghendrih, X. Garbet, G. Antar, P. Beyer, C. Boucher, C. Honore, F. Gervais, P. Hennequin, A. Quémeneur and A. Truc  
290–293 (2001) 584
- Experimental investigations of the SOL plasma in the MAST tokamak, J.-W. Ahn and G.F. Counsell  
290–293 (2001) 820
- Narrow power deposition profiles on the JET divertor target, J. Lingertat, M. Laux and R. Monk  
290–293 (2001) 896
- Divertor geometry effects on detachment in TCV, R.A. Pitts, B.P. Duval, A. Loarte, J.-M. Moret, J.A. Boedo, D. Coster, I. Furno, J. Horacek, A.S. Kukushkin, D. Reiter, J. Rommers and TCV Team  
290–293 (2001) 940

**Laser-induced fluorescence**

- Spectroscopic measurement of biasing effect on sheath electric field distribution in front of a metal plate inserted in a plasma flow, K. Takiyama, T. Oda and K. Sato  
290–293 (2001) 976

**LHD**

- Review of initial experimental results of the PSI studies in the large helical device, S. Masuzaki, K. Akaishi, H. Funaba, M. Goto, K. Ida, S. Inagaki, N. Inoue, K. Kawahata, A. Komori, Y. Kubota, T. Morisaki, S. Morita, Y. Nakamura, K. Narihara, K. Nishimura, N. Noda, N. Ohyabu, B.J. Peterson, A. Sagara, R. Sakamoto, K. Sato, M. Shoji, H. Suzuki, Y. Takeiri, K. Tanaka, T. Tokuzawa, T. Watanabe, K. Tsuzuki, T. Hino, Y. Matsumoto, S. Kado, O. Motojima and LHD Experimental Group  
290–293 (2001) 12

- Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura  
290–293 (2001) 423

- The effect of divertor tile material on radiation profiles in LHD, B.J. Peterson, S. Masuzaki, R. Sakamoto, K. Sato, S. Inagaki, A. Sagara, S. Ohdachi, Y. Nakamura, N. Noda, Y. Xu, J.E. Rice, N. Ashikawa, S. Yamamoto, M. Takechi, K. Toi, S. Morita, M. Goto, K. Narihara, N. Inoue, Y. Takeiri, M. Sato, M. Osakabe, K. Tanaka, T. Tokuzawa, S. Sakakibara, M. Shoji, K. Kawahata, O. Kaneko, N. Ohyabu, H. Yamada, A. Komori, K. Yamazaki, S. Sudo and O. Motojima  
290–293 (2001) 930

- Conditionings for plasma facing walls of large helical device, T. Hino, T. Ohuchi, M. Hashiba, Y. Yamauchi, Y. Hirohata, N. Inoue, A. Sagara, N. Noda and O. Motojima  
290–293 (2001) 1176

**Lifetime**

- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev  
290–293 (2001) 1074

**Limiter**

- The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V. Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko  
290–293 (2001) 220

- Plasma edge fluid models for recycling at near tangential surfaces, M. Baelmans, D. Reiter, B. Küppers and P. Börner  
290–293 (2001) 537

- Plasma boundary and SOL studies of ECH-plasmas in TJ-II stellarator with diagnosed mobile poloidal limiters, E. de la Cal, B. Brañas, F.L. Tabarés, D. Tafalla, A.L. Fraguas, M.A. Pedrosa, V. Tribaldos, E. Ascasibar, J. Herranz, I. Pastor and TJ-II Team  
290–293 (2001) 579

**Limiter materials**

- Surface tension enhancement of TRIM sputtering yields for liquid metal targets, A. Grossman, R.P. Doerner and S. Luckhardt  
290–293 (2001) 80

- Erosion and outgassing behavior of TiN-coated plasma facing components of the Uranus-3M torsatron, G.P. Glazunov, E.D. Volkov, V.P. Veremeyenko, N.A. Kosik, A.A. Kutsyn, J. Langner, E. Langner, Yu.K. Mironov, N.I. Nazarov, J. Piekoszewski, M. Sadowski, J. Stanislawski and V.I. Tere-shin  
290–293 (2001) 266

- Local emission and core concentration of tungsten in TEXTOR-94 plasmas operated with tungsten test and poloidal limiters, M. Wada, T. Ohgo, A. Pospieszczyk, A. Huber, G. Sergienko, T. Tanabe, W. Biel, K. Kondo, K. Ohya, V. Philipps, G. Bertschinger, J. Rapp, B. Schweer and N. Noda  
290–293 (2001) 768

- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda  
290–293 (2001) 947

**Line radiation**

- Spectroscopic studies of stationary MARFEs in TEXTOR-94, G. Sergienko, A. Pospieszczyk, M. Lehnen, M. Brix, J. Rapp, B. Schweer and P.T. Greenland  
290–293 (2001) 720

**Liquid metal**

- D, He and Li sputtering of liquid eutectic Sn–Li, J.P. Allain, D.N. Ruzic and M.R. Hendricks  
290–293 (2001) 33

- Surface tension enhancement of TRIM sputtering yields for liquid metal targets, A. Grossman, R.P. Doerner and S. Luckhardt  
290–293 (2001) 80

- Measurements and modeling of D, He and Li sputtering of liquid lithium, J.P. Allain, D.N. Ruzic and M.R. Hendricks  
290–293 (2001) 180

- Interactions between liquid-wall vapor and edge plasmas, T.D. Rognlien and M.E. Rensink  
290–293 (2001) 312

**Lithium**

- Reactivity of lithium-containing amorphous carbon (a-C) films, M. Töwe, P. Reinke and P. Oelhafen  
290–293 (2001) 153

- Measurements of erosion mechanisms from solid and liquid materials in PISCES-B, R.P. Doerner, M.J. Baldwin, R.W. Conn, A.A. Grossman, S.C. Luckhardt, R. Seraydarian, G.R. Tynan and D.G. Whyte  
290–293 (2001) 166

- Erosion/redeposition analysis of lithium-based liquid surface divertors, J.N. Brooks, T.D. Rognlien, D.N. Ruzic and J.P. Allain  
290–293 (2001) 185

- Experimental study of lithium target under high power load, B.I. Khripunov, V.B. Petrov, V.V. Shapkin, A.S. Pleshakov, A.S. Rupyshev, N.V. Antonov, A.M. Litnovsky, P.V. Romanov, Y.S. Shpansky, V.A. Evtikhin, I.E. Lyublinsky and A.V. Vertkov  
290–293 (2001) 201

- The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V.

- Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko 290–293 (2001) 220
- Rapid diffusion of lithium into bulk graphite in lithium conditioning, N. Itou, H. Toyoda, K. Morita and H. Sugai 290–293 (2001) 281
- Lithium coating**
- Rapid diffusion of lithium into bulk graphite in lithium conditioning, N. Itou, H. Toyoda, K. Morita and H. Sugai 290–293 (2001) 281
- Lithium oxide**
- Reactivity of lithium-containing amorphous carbon (a-C) films, M. Töwe, P. Reinke and P. Oelhafen 290–293 (2001) 153
- Locked mode**
- Measurement of thermal wall-load distribution caused by the locked mode in a reversed-field pinch plasma, Y. Yagi, S. Sekine, H. Koguchi, T. Bolzonella and H. Sakakita 290–293 (2001) 1144
- Long pulse**
- Local recycling coefficients and wall equilibration in tokamaks, P.K. Mioduszewski and L.W. Owen 290–293 (2001) 443
- Long pulse discharge**
- Particle balance in NBI heated long pulse discharges on LHD, Y. Nakamura, H. Suzuki, Y. Oka, M. Osakabe, B.J. Peterson, S. Masuzaki, T. Morisaki, J. Miyazawa, Y. Takeiri, M. Sato, T. Shimozuma, T. Mutoh, N. Noda, K. Kawahata, N. Ohyabu, O. Motojima and LHD Experimental Groups 290–293 (2001) 1040
- Low recycling**
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov 290–293 (2001) 1079
- Magnetic sheath**
- Numerical study of plasma–wall transition in an oblique magnetic field, F. Valsaque and G. Manfredi 290–293 (2001) 763
- MARFE**
- Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura 290–293 (2001) 407
- Impurity behavior before and during the x-point MARFE in JT-60U, S. Higashijima, H. Kubo, T. Sugie, T. Nakano, S. Konoshima, H. Tamai, K. Shimizu, A. Sakasai, N. Asakura, S. Sakurai and K. Itami 290–293 (2001) 623
- Spectroscopic studies of stationary MARFEs in TEXTOR-94, G. Sergienko, A. Pospieszczyk, M. Lehnen, M. Brix, J. Rapp, B. Schweer and P.T. Greenland 290–293 (2001) 720
- Mass spectrometry**
- Investigation of the hydrogen fluxes in the plasma edge of W7-AS during H-mode discharges, U. Langer, E. Taglauer, R. Fischer and W7-AS Team 290–293 (2001) 658
- MAST**
- Experimental investigations of the SOL plasma in the MAST tokamak, J.-W. Ahn and G.F. Counsell 290–293 (2001) 820
- Material mixing**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Surface reactions on beryllium after carbon vapour deposition and thermal treatment, P. Goldstrass, K.U. Klages and Ch. Linsmeier 290–293 (2001) 76
- Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider 290–293 (2001) 89
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- The primary results for the mixed carbon material used for high flux steady-state tokamak operation in China, Q.G. Guo, J.G. Li, G.T. Zhai, L. Liu, J.R. Song, L.F. Zhang, Y.X. He and J.L. Chen 290–293 (2001) 191
- MHD**
- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074
- Mirrors**
- Some problems arising due to plasma–surface interaction for operation of the in-vessel mirrors in a fusion reactor, V.S. Voitsenya, A.F. Bardamid, V.N. Bondarenko, W. Jacob, V.G. Kononov, S. Masuzaki, O. Motojima, D.V. Orlinskij, V.L. Poperenko, I.V. Ryzhkov, A. Sagara, A.F. Shtan, S.I. Solodovchenko and M.V. Vinnichenko 290–293 (2001) 336
- Modeling**
- Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda 290–293 (2001) 303
- Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura 290–293 (2001) 423
- Extension of the B2 code towards the plasma core for a self-consistent simulation of ASDEX upgrade scenarios, H. Bürbaumer, R. Neu, R. Schneider, D. Coster, J. Stober, F. Aumayr and H.P. Winter 290–293 (2001) 571
- Turbulent transport studies in JET edge plasmas in X-point configurations, I. García-Cortés, A. Loarte, R. Balbín, J. Bleuel, A. Chankin, S.J. Davies, M. Endler, S.K. Erents, C. Hidalgo, G.F. Matthews, H. Thomsen 290–293 (2001) 604

- Calculation of 2D profiles for the plasma and electric field in the boundary layer of the TEXTOR-94 Tokamak, H. Gerhauser, R. Zagórski, H.A. Claaßen and M. Lehnen  
290–293 (2001) 609
- Particle flows in pumped DIII-D discharges, G.D. Porter, T.D. Rognlien, M.E. Rensink, N.S. Wolf and W.P. West  
290–293 (2001) 692
- Comparison of Langmuir probe and Thomson scattering measurements in DIII-D, J.G. Watkins, P. Stangeby, J.A. Boedo, T.N. Carlstrom, C.J. Lasnier, R.A. Moyer, D.L. Rudakov and D.G. Whyte  
290–293 (2001) 778
- Helium compression analysis for ASDEX Upgrade with fluid and kinetic codes, D. Reiser, R. Schneider, D. Coster, W. Ullrich and H.S. Bosch  
290–293 (2001) 953
- Modeling of particulate production in the SIRENS plasma disruption simulator, J.P. Sharpe, B.J. Merrill, D.A. Petti, M.A. Bourham and J.G. Gilligan  
290–293 (2001) 1128
- Molecular dynamics**
- Carbon erosion mechanisms in tokamak divertor materials: insight from molecular dynamics simulations, E. Salonen, K. Nordlund, J. Keinonen and C.H. Wu  
290–293 (2001) 144
- Monte Carlo simulation**
- Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner  
290–293 (2001) 464
- NAGDIS-II**
- Evaluation of electron temperature in detached recombining plasmas, D. Nishijima, U. Wenzel, M. Motoyama, N. Ohno, S. Takamura and S.I. Krasheninnikov  
290–293 (2001) 688
- Near infrared**
- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau  
290–293 (2001) 701
- Neutral gas modeling**
- Modeling of Alcator C-Mod divertor baffling experiments, D.P. Stotler, C.S. Pitcher, C.J. Boswell, T.K. Chung, B. LaBombard, B. Lipschultz, J.L. Terry and R.J. Kanzleiter  
290–293 (2001) 967
- Neutral particle detection**
- TOF analysis of reflection of low-energy light ions from solid targets using coaxial impact collision ion scattering spectroscopy (CAICISS), K. Morita, N. Kishi, A. Grigoriev, S. Masuzaki and T. Muroga  
290–293 (2001) 126
- Neutral particle**
- High resolution measurements of neutral density and ionization rate in the main chamber of the Alcator C-Mod tokamak, R.L. Boivin, J. Goetz, A. Hubbard, J.W. Hughes, J. Irby, B. LaBombard, E. Marmor, D. Mossessian and J.L. Terry  
290–293 (2001) 542
- Helium transport and exhaust with an ITER-like divertor in ASDEX Upgrade, H.-S. Bosch, W. Ullrich, D. Coster, O. Gruber, G. Haas, J. Neuhauser, R. Schneider, R. Wolf and ASDEX Upgrade Team  
290–293 (2001) 836
- Neutron irradiation**
- Tritium retention in neutron-irradiated low-Z materials for use as plasma facing materials, F. Scaffidi-Argentina, C. Sand and C.H. Wu  
290–293 (2001) 211
- Next-step device**
- Plasma-wall interaction issues in ITER, G. Janeschitz and ITER JCT and HTS  
290–293 (2001) 1
- Nickel**
- Work function change of first wall candidate metals due to ion beam irradiation, G.-N. Luo, K. Yamaguchi, T. Terai and M. Yamawaki  
290–293 (2001) 116
- Niobium**
- Trapping of eV deuterium ions by niobium at glancing incidence, V.A. Kurnaev, A.V. Golubeva, A.A. Evanov, D.V. Levchuk, A.A. Pisarev and N.N. Trifonov  
290–293 (2001) 112
- Membrane bias effects on plasma-driven permeation of hydrogen through niobium membrane, A. Busnyuk, Y. Nakamura, Y. Nakahara, H. Suzuki, N. Ohyabu and A. Livshits  
290–293 (2001) 57
- NSTX**
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognlien, S. Sabbagh and X. Xu  
290–293 (2001) 706
- Nuclear fusion**
- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young  
290–293 (2001) 486
- Nuclear reaction analysis**
- Influence of hydrogen surface coverage on atomic particle reflection, I. Takagi, Y. Koga, H. Fujita and K. Higashi  
290–293 (2001) 501
- Nuclear-induced plasma**
- Radioactive dust levitation and its consequences for fusion devices, J. Winter, V.E. Fortov and A.P. Nefedov  
290–293 (2001) 509

**Optical fiber**

Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau  
290–293 (2001) 701

**OSM model**

Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte  
290–293 (2001) 733

**Outgassing**

Conditionings for plasma facing walls of large helical device, T. Hino, T. Ohuchi, M. Hashiba, Y. Yamauchi, Y. Hirohata, N. Inoue, A. Sagara, N. Noda and O. Motojima  
290–293 (2001) 1176

**Oxidation**

Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier  
290–293 (2001) 121

**Oxygen**

Methane formation in graphite and boron-doped graphite under simultaneous  $O^+$  and  $H^+$  irradiation, A.Y.K. Chen, J.W. Davis and A.A. Haasz  
290–293 (2001) 61

**Oxygen gettering**

Reactivity of lithium-containing amorphous carbon (a-C) films, M. Töwe, P. Reinke and P. Oelhafen  
290–293 (2001) 153

**Parallel heat flux**

Analysis of energy flux deposition and sheath transmission factors during ergodic divertor operation on Tore Supra, L. Costanzo, J.P. Gunn, T. Loarer, L. Colas, Y. Corre, Ph. Ghendrih, C. Grisolia, A. Grosman, D. Guilhem, P. Monier-Garbet, R. Reichle, H. Roche and J.C. Vallet  
290–293 (2001) 840

**Particle balance**

Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura  
290–293 (2001) 423

Particle collection and exhaust in ergodic divertor experiments on Tore Supra, T. Loarer, Ph. Ghendrih, J. Gunn, A. Azéroual, L. Costanzo, C. Grisolia, R. Guirlet, G. Mank, P. Monier-Garbet and B. Pégourié  
290–293 (2001) 900

Particle balance in NBI heated long pulse discharges on LHD, Y. Nakamura, H. Suzuki, Y. Oka, M. Osakabe, B.J. Peterson, S. Masuzaki, T. Morisaki, J. Miyazawa, Y. Takeiri, M. Sato, T. Shimozuma, T. Mutoh, N. Noda, K. Kawahata, N. Ohyabu, O. Motojima and LHD Experimental Groups  
290–293 (2001) 1040

**Particle compression**

Noble gas enrichment studies at JET, M. Groth, P. Andrew, W. Fundamenski, H.Y. Guo, D.L. Hillis, J.T. Hogan, L.D. Horton, G.F. Matthews, A.G. Meigs, P.M. Morgan, M.F. Stamp and M. von Hellermann  
290–293 (2001) 867

**Particle confinement time**

Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner  
290–293 (2001) 464

**Particle control**

Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura  
290–293 (2001) 423

Critical issues in divertor optimisation for ITER–FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887

**Particle exhaust**

Particle collection and exhaust in ergodic divertor experiments on Tore Supra, T. Loarer, Ph. Ghendrih, J. Gunn, A. Azéroual, L. Costanzo, C. Grisolia, R. Guirlet, G. Mank, P. Monier-Garbet and B. Pégourié  
290–293 (2001) 900

**Particle flux**

Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura  
290–293 (2001) 407

**Particle recycling**

Reversal of in–out asymmetry of the particle-recycling associated with X-point MARFE and plasma detachment, A. Hatayama, H. Segawa, N. Komatsu, R. Schneider, D.P. Coster, N. Hayashi, S. Sakurai and N. Asakura  
290–293 (2001) 407

Particle control in the sustained spheromak physics experiment, R.D. Wood, D.N. Hill, E.B. Hooper, D. Buchenauer, H. McLean, Z. Wang, S. Woodruff and G. Wurden  
290–293 (2001) 513

**Particles**

Detection of sputtered and evaporated carbon aggregates: relative and absolute electron ionization fragmentation yields, C. Mair, H. Deutsch, K. Becker, T.D. Märk and E. Vietzke  
290–293 (2001) 291

**Passive bolometer**

Impurity radiation modulations in an ergodic divertor, F. Laugier, M. Bécoulet, C. De Michelis, Ph. Ghendrih, J.P. Gunn, P. Monier-Garbet, R. Reichle and J.C. Vallet  
290–293 (2001) 892

**Pellet**

High-density H-mode operation achieved using efficient plasma refueling by inboard pellet launch, P.T. Lang, O. Gruber, L.D. Horton, T.T.C. Jones, M. Kaufmann, A. Lorenz, M. Maraschek, V. Mertens, J. Neuhauser, G. Saibene, H. Zohm, ASDEX Upgrade Team and JET Team  
290–293 (2001) 374

**Pellet injection**

Characteristics of ELM activity and fueling efficiency of pellet injection from different locations on DIII-D, L.R. Baylor, T.C. Jernigan, R.J. Colchin, J.R. Ferron and M.R. Wade  
290–293 (2001) 398

**Permeation**

Erosion and outgassing behavior of TiN-coated plasma facing components of the Uragan-3M torsatron, G.P. Glazunov, E.D. Volkov, V.P. Veremeyenko, N.A. Kosik, A.A. Kutsyn, J. Langner, E. Langner, Y.K. Mironov, N.I. Nazarov, J. Piekoszewski, M. Sadowski, J. Stanislawski and V.I. Terezhin  
290–293 (2001) 266

Surface effects on plasma-driven tritium permeation through metals, O.V. Ogorodnikova  
290–293 (2001) 459

**Photoelectron spectroscopy**

Reactivity of lithium-containing amorphous carbon (a-C) films, M. Töwe, P. Reinke and P. Oelhafen  
290–293 (2001) 153

**PISCES B**

Measurements of erosion mechanisms from solid and liquid materials in PISCES-B, R.P. Doerner, M.J. Baldwin, R.W. Conn, A.A. Grossman, S.C. Luckhardt, R. Seraydarian, G.R. Tynan and D.G. Whyte  
290–293 (2001) 166

**Plasma disruption**

Material erosion and erosion products under plasma heat loads typical for ITER hard disruptions, V. Safronov, N. Arkhipov, V. Bakhtin, S. Kurkin, F. Scaffidi-Argentina, D. Toporkov, S. Vasenin, H. Würz and A. Zhitlukhin  
290–293 (2001) 1052

Experimental study of radiation power flux on the target surface during high heat plasma irradiation, V.N. Litunovsky, I.B. Ovchinnikov and V.A. Titov  
290–293 (2001) 1112

**Plasma driven permeation**

Membrane bias effects on plasma-driven permeation of hydrogen through niobium membrane, A. Busnyuk, Y. Nakamura, Y. Nakahara, H. Suzuki, N. Ohyabu and A. Livshits  
290–293 (2001) 57

**Plasma edge**

Calculation of 2D profiles for the plasma and electric field in the boundary layer of the TEXTOR-94 Tokamak, H. Gerhauser, R. Zagórski, H.A. Claaßen and M. Lehnen  
290–293 (2001) 609

Electric currents in the scrape-off layer in ASDEX Upgrade, A. Kallenbach, A. Carlson, G. Pautasso, A. Peeters, U. Seidel, H.-P. Zehrfeld and ASDEX Upgrade Team  
290–293 (2001) 639

Study of edge plasma properties comparing operation in hydrogen and helium in RFX, M. Spolaore, V. Antoni, M. Bagatin, D. Desideri, L. Fattorini, E. Martines, G. Serrianni, L. Tramontin and N. Vianello  
290–293 (2001) 729

Transport modelling of TEXTOR-DED laminar zone, Th. Eich, D. Reiser and K.H. Finken  
290–293 (2001) 849

On the way to divertor detachment in the W7-AS stellarator, K. McCormick, P. Grigull, R. König, R. Burhenn, H. Ehmler, Y. Feng, S. Fiedler, L. Giannone, D. Hildebrandt, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, Ch. Wendland and W7-AS Team  
290–293 (2001) 920

Tolerable ELMs at high density in DIII-D, A.W. Leonard, T.H. Osborne, M.E. Fenstermacher, C.J. Lasnier and M.A. Mahdavi  
290–293 (2001) 1097

**Plasma facing components**

Review of initial experimental results of the PSI studies in the large helical device, S. Masuzaki, K. Akaishi, H. Funaba, M. Goto, K. Ida, S. Inagaki, N. Inoue, K. Kawahata, A. Komori, Y. Kubota, T. Morisaki, S. Morita, Y. Nakamura, K. Narihara, K. Nishimura, N. Noda, N. Ohyabu, B.J. Peterson, A. Sagara, R. Sakamoto, K. Sato, M. Shoji, H. Suzuki, Y. Takeiri, K. Tanaka, T. Tokuzawa, T. Watanabe, K. Tsuzuki, T. Hino, Y. Matsumoto, S. Kado, O. Motojima and LHD Experimental Group  
290–293 (2001) 12

Spectroscopic investigation on the impurity influxes of carbon and silicon in the ASDEX upgrade experiment, R. Pugno, A. Kallenbach, D. Bolshukhin, R. Dux, J. Gafert, R. Neu, V. Rohde, K. Schmidtman, W. Ullrich, U. Wenzel and ASDEX Upgrade Team  
290–293 (2001) 308

Fuel accumulation in co-deposited layers on plasma facing components, M. Rubel, P. Wienhold and D. Hildebrandt  
290–293 (2001) 473

In situ measurement of hydrogen retention in JET carbon tiles, D.D.R. Summers, M.N.A. Beurskens, J.P. Coad, G. Counsell, W. Fundamenski, G.F. Matthews and M.F. Stamp  
290–293 (2001) 496

**Plasma facing materials**

Mechanism of the chemical erosion of SiC under hydrogen irradiation, M. Balden, S. Picarle and J. Roth  
290–293 (2001) 47

Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier  
290–293 (2001) 121

Towards an improved understanding of the relationship between plasma edge and materials issues in a next-step fusion device, G.F. Counsell, J.P. Coad, G. Federici, K. Krieger, V. Philipps, C.H. Skinner and D.G. Whyte  
290–293 (2001) 255

Effects of condensible impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura  
290–293 (2001) 299

Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps  
290–293 (2001) 341

- Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Fincken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze  
290–293 (2001) 448
- Combined sheath and thermal analysis of overheated surfaces in fusion devices, D. Naujoks and J.N. Brooks  
290–293 (2001) 1123
- Plasma flow**
- Plasma rotation and structure of the radial electric field in RFX, M.E. Puiatti, L. Tramontin, V. Antoni, R. Bartirromo, L. Carraro, D. Desideri, E. Martines, F. Sattin, P. Scarin, G. Serianni, M. Spolaore, M. Valisa and B. Zaniol  
290–293 (2001) 696
- Pumping effect on the divertor plasma and detachment in the JT-60U W-shaped divertor, N. Asakura, S. Sakurai, H. Tamai, Y. Koide, Y. Sakamoto, O. Naito, H. Kubo, K. Itami and K. Masaki  
290–293 (2001) 825
- Plasma material interaction**
- Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu  
290–293 (2001) 260
- Plasma modelling**
- Explorative studies for the development of fast He beam plasma diagnostics, S. Menhart, M. Proschek, H.-D. Falter, H. Anderson, H. Summers, A. Staebler, P. Franzen, H. Meister, J. Schweinzer, T.T.C. Jones, S. Cox, N. Hawkes, F. Aumayr and H.P. Winter  
290–293 (2001) 673
- Critical issues in divertor optimisation for ITER-FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887
- Plasma properties**
- Interactions between liquid-wall vapor and edge plasmas, T.D. Rognlien and M.E. Rensink  
290–293 (2001) 312
- Performance of high triangularity plasmas as the volume of the secondary divertor is varied in DIII-D, M.E. Fenstermacher, T.H. Osborne, T.W. Petrie, R.J. Groebner, C.J. Lasnier, R.J. La Haye, A.W. Leonard, G.D. Porter, J.G. Watkins and DIII-D Team  
290–293 (2001) 588
- Consistency check of  $Z_{\text{eff}}$  measurements in ergodic divertor plasmas on Tore Supra, B. Schunke, C. De Michelis, R. Guirlet, P. Monier-Garbet, M. Mattioli, E. Chareyre and O. Meyer  
290–293 (2001) 715
- Comparison of Langmuir probe and Thomson scattering measurements in DIII-D, J.G. Watkins, P. Stangeby, J.A. Boedo, T.N. Carlstrom, C.J. Lasnier, R.A. Moyer, D.L. Rudakov and D.G. Whyte  
290–293 (2001) 778
- Effect of biasing on divertors in low and high ionization states, H. Matsuura, T. Yamamoto and M. Numano  
290–293 (2001) 915
- JET methane screening experiments, J.D. Strachan, K. Erents, W. Fundamenski, M. von Hellermann, L. Horton, K. Lawson, G. McCracken, J. Spence, M. Stamp and K.-D. Zastrow  
290–293 (2001) 972
- Prediction and mitigation of disruptions in ASDEX Upgrade, G. Pautasso, S. Egorov, C. Tichmann, J.C. Fuchs, A. Herrmann, M. Maraschek, F. Mast, V. Mertens, I. Perchermeier, C.G. Windsor, T. Zehetbauer and ASDEX Upgrade Team  
290–293 (2001) 1045
- Operational limits under different wall conditions on TEXTOR-94, J. Rapp, W. Biel, H. Gerhauser, A. Huber, H.R. Koslowski, M. Lehnen, V. Philipps, A. Pospieszczyk, D. Reiser, U. Samm, G. Sergienko, M.Z. Tokar and R. Zagórski  
290–293 (2001) 1148
- Plasma sheath**
- Spectroscopic measurement of biasing effect on sheath electric field distribution in front of a metal plate inserted in a plasma flow, K. Takiyama, T. Oda and K. Sato  
290–293 (2001) 976
- Combined sheath and thermal analysis of overheated surfaces in fusion devices, D. Naujoks and J.N. Brooks  
290–293 (2001) 1123
- Plasma sheath heat transmission factor**
- Analysis of energy flux deposition and sheath transmission factors during ergodic divertor operation on Tore Supra, L. Costanzo, J.P. Gunn, T. Loarer, L. Colas, Y. Corre, Ph. Ghendrih, C. Grisolia, A. Grosman, D. Guillhem, P. Monier-Garbet, R. Reichle, H. Roche and J.C. Vallet  
290–293 (2001) 840
- Plasma shield**
- Vertical target and FW erosion during off-normal events and impurity production and transport during ELMs typical for ITER-FEAT, H. Würz, S. Pestchanyi, B. Bazylev, I. Landman and F. Kappler  
290–293 (2001) 1138
- Plasma-material interaction**
- Review of initial experimental results of the PSI studies in the large helical device, S. Masuzaki, K. Akaishi, H. Funaba, M. Goto, K. Ida, S. Inagaki, N. Inoue, K. Kawahata, A. Komori, Y. Kubota, T. Morisaki, S. Morita, Y. Nakamura, K. Narihara, K. Nishimura, N. Noda, N. Ohyabu, B.J. Peterson, A. Sagara, R. Sakamoto, K. Sato, M. Shoji, H. Suzuki, Y. Takeiri, K. Tanaka, T. Tokuzawa, T. Watanabe, K. Tsuzuki, T. Hino, Y. Matsumoto, S. Kado, O. Motojima and LHD Experimental Group  
290–293 (2001) 12
- D, He and Li sputtering of liquid eutectic Sn–Li, J.P. Allain, D.N. Ruzic and M.R. Hendricks  
290–293 (2001) 33
- TOF analysis of reflection of low-energy light ions from solid targets using coaxial impact collision ion scattering spectroscopy (CAICISS), K. Morita, N. Kishi, A. Grigoriev, S. Masuzaki and T. Muroga  
290–293 (2001) 126
- Measurements and modeling of D, He and Li sputtering of liquid lithium, J.P. Allain, D.N. Ruzic and M.R. Hendricks  
290–293 (2001) 180
- The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V.

- Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko  
290–293 (2001) 220
- Modelling of erosion and deposition at limiter surfaces and divertor target plates, A. Kirschner, A. Huber, V. Philipps, A. Pospieszczyk, P. Wienhold and J. Winter  
290–293 (2001) 238
- Erosion and outgassing behavior of TiN-coated plasma facing components of the Uragan-3M torsatron, G.P. Glazunov, E.D. Volkov, V.P. Veremeyenko, N.A. Kosik, A.A. Kutsyn, J. Langner, E. Langner, Y.K. Mironov, N.I. Nazarov, J. Piekoszewski, M. Sadowski, J. Stanislawski and V.I. Tere-shin  
290–293 (2001) 266
- Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda  
290–293 (2001) 303
- Hydrogen recycling study by Balmer lines emissions in linear plasma machine TPE, K. Shimada, T. Tanabe, R. Causey, T. Venhaus and K. Okuno  
290–293 (2001) 478
- Isotope effects in thermal release of H and D implanted into WC layers on graphite, T. Horikawa, K. Morita and B. Tsuchiya  
290–293 (2001) 428
- Spectroscopic study of neon emission and retention in the Tore Supra ergodic divertor, R. Guirlet, J. Hogan, Y. Corre, C. De Michelis, A. Escarguel, W. Hess, P. Monier-Garbet and B. Schunke  
290–293 (2001) 872
- Island divertor investigations on the W7-AS stellarator, R.W.T. König, K. McCormick, Y. Feng, S. Fiedler, P. Grigull, D. Hildebrandt, J. Kisslinger, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, S. Sardei, F. Wagner, A. Werner and W7-AS Team  
290–293 (2001) 882
- Cloud drifts over eroding surfaces in magnetic field configurations with three field components, P. Lalouis, R. Schneider and L.L. Lengyel  
290–293 (2001) 1084
- Plasma–surface interaction effects during high ion temperature long pulse experiments in TRIAM-1M, N. Yoshida, T. Hirai, K. Tokunaga, S. Itoh and TRIAM group  
290–293 (2001) 1030
- Plasma–surface interaction**
- Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Finken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze  
290–293 (2001) 448
- Characterization and conditioning of SSPX plasma facing surfaces, D.A. Buchenauer, B.E. Mills, R. Wood, S. Woodruff, D.N. Hill, E.B. Hooper, D.F. Cowgill, M.W. Clift and N.Y. Yang  
290–293 (2001) 1165
- Plasma–wall interaction**
- Plasma–wall interaction issues in ITER, G. Janeschitz and ITER JCT and HTs  
290–293 (2001) 1
- Attenuation of secondary electron emission from divertor plates due to magnetic field inclination, Yu. Igitkhanov and G. Janeschitz  
290–293 (2001) 99
- Towards an improved understanding of the relationship between plasma edge and materials issues in a next-step fusion device, G.F. Counsell, J.P. Coad, G. Federici, K. Krieger, V. Philipps, C.H. Skinner and D.G. Whyte  
290–293 (2001) 255
- Kinetic simulation of a source dominated plasma–wall interaction in an oblique magnetic field, D. Sharma and H. Ramachandran  
290–293 (2001) 725
- Poloidal limiter**
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda  
290–293 (2001) 947
- Power balance**
- Active cooling, calorimetry and energy balance in Tore Supra, J.C. Vallet, R. Reichle, M. Chantant, V. Basiuk and R. Mitteau  
290–293 (2001) 1023
- Power density**
- Experimental investigations of the SOL plasma in the MAST tokamak, J.-W. Ahn and G.F. Counsell  
290–293 (2001) 820
- Power deposition**
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada  
290–293 (2001) 276
- Tolerable ELMs at high density in DIII-D, A.W. Leonard, T.H. Osborne, M.E. Fenstermacher, C.J. Lasnier and M.A. Mahdavi  
290–293 (2001) 1097
- Power disruption**
- Thermal load distribution on the ALT-II limiter of TEXTOR-94 during disruptions, K.H. Finken, A. Krämer-Flecken, G. Mank and S.S. Abdullaev  
290–293 (2001) 1064
- Power exhaust**
- Critical issues in divertor optimisation for ITER–FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887
- Power flux**
- Narrow power deposition profiles on the JET divertor target, J. Lingertat, M. Laux and R. Monk  
290–293 (2001) 896
- Power loading**
- High radiation from intrinsic and injected impurities in Tore Supra ergodic divertor plasmas, P. Monier-Garbet, C. De Michelis, Ph. Ghendrih, C. Grisolia, A. Grosman, R. Guirlet, J. Gunn, T. Loarer, C.E. Bush, C. Clement, Y. Corre, L. Costanzo, B. Schunke and J.C. Vallet  
290–293 (2001) 925

**Pumping**

Particle collection and exhaust in ergodic divertor experiments on Tore Supra, T. Loarer, Ph. Ghendrih, J. Gunn, A. Az  roual, L. Costanzo, C. Grisolia, R. Guirlet, G. Mank, P. Monier-Garbet and B. P  gouri   290–293 (2001) 900

**Quasi-single helicity states**

Mitigation of plasma–wall interaction during quasi-single helicity states in RFX, G. Spizzo, P. Franz, L. Marrelli, P. Martin, A. Murari, T. Bolzonella, D. Terranova and P. Zanca 290–293 (2001) 1018

**Radial electric field**

Calculation of 2D profiles for the plasma and electric field in the boundary layer of the TEXTOR-94 Tokamak, H. Gerhauser, R. Zag  rski, H.A. Claa  en and M. Lehnen 290–293 (2001) 609

**Radiation**

Mitigation of plasma–wall interaction during quasi-single helicity states in RFX, G. Spizzo, P. Franz, L. Marrelli, P. Martin, A. Murari, T. Bolzonella, D. Terranova and P. Zanca 290–293 (2001) 1018

**Radiation flux**

Experimental study of radiation power flux on the target surface during high heat plasma irradiation, V.N. Litunovsky, I.B. Ovchinnikov and V.A. Titov 290–293 (2001) 1112

**Radiation loss**

Radiation distribution and power balance in the ASDEX Upgrade LYRA divertor, J.C. Fuchs, D. Coster, A. Herrmann, A. Kallenbach, K.F. Mast and ASDEX Upgrade Team 290–293 (2001) 525

**Radioactivity**

Radioactive dust levitation and its consequences for fusion devices, J. Winter, V.E. Fortov and A.P. Nefedov 290–293 (2001) 509

**Recombination**

Observations of cold, high density plasma in the private flux region of the Alcator C-Mod divertor, C.J. Boswell, J.L. Terry, B. LaBombard, B. Lipschultz and J.A. Goetz 290–293 (2001) 556

Resonance radiation and high excitation of neutrals in plasma–gas interactions, A.M. Litnovsky, B.I. Khripunov, G.V. Sholin, V.B. Petrov, V.V. Shapkin and N.V. Antonov 290–293 (2001) 1107

**Recycling**

TOF analysis of reflection of low-energy light ions from solid targets using coaxial impact collision ion scattering spectroscopy (CAICISS), K. Morita, N. Kishi, A. Grigoriev, S. Masuzaki and T. Muroga 290–293 (2001) 126

Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94,

A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276

Local recycling coefficients and wall equilibration in tokamaks, P.K. Mioduszewski and L.W. Owen 290–293 (2001) 443

Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner 290–293 (2001) 464

Particle balance in NBI heated long pulse discharges on LHD, Y. Nakamura, H. Suzuki, Y. Oka, M. Osakabe, B.J. Peterson, S. Masuzaki, T. Morisaki, J. Miyazawa, Y. Takeiri, M. Sato, T. Shimosuma, T. Mutoh, N. Noda, K. Kawahata, N. Ohyabu, O. Motojima and LHD Experimental Groups 290–293 (2001) 1040

**Redeposition**

Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider 290–293 (2001) 89

Erosion/redeposition analysis of lithium-based liquid surface divertors, J.N. Brooks, T.D. Rognlien, D.N. Ruzic and J.P. Allain 290–293 (2001) 185

Surface reactions of hydrocarbon radicals: suppression of the re-deposition in fusion experiments via a divertor liner, A. von Keudell, T. Schwarz-Selinger, W. Jacob and A. Stevens 290–293 (2001) 231

Transport of and deposition from hydrocarbon radicals in a flow tube downstream from a CH<sub>4</sub> RF discharge, A.E. Gorodetsky, I.I. Arkhipov, R.Kh. Zalavutdinov, A.P. Zakharov, Yu.N. Tolmachev, S.P. Vnukov and V.L. Bukhovets 290–293 (2001) 271

Carbon layers in the divertor of ASDEX Upgrade, V. Rohde, H. Maier, K. Krieger, R. Neu, J. Perchermaier and ASDEX Upgrade Team 290–293 (2001) 317

Net erosion measurements on plasma facing components of Tore Supra, E. Tsitrone, P. Chappuis, Y. Corre, E. Gauthier, A. Grosman and J.Y. Pascal 290–293 (2001) 331

Laboratory study of the transport and condensation of hydrocarbon radicals and its consequences for mitigating the tritium inventory in the ITER-FEAT divertor, I.I. Arkhipov, G. Federici, A.E. Gorodetsky, C. Ibbott, D.A. Komarov, A.N. Makhankov, A.V. Markin, I.V. Mazul, R. Tivey, A.P. Zakharov and R.Kh. Zalavutdinov 290–293 (2001) 394

Fuel accumulation in co-deposited layers on plasma facing components, M. Rubel, P. Wienhold and D. Hildebrandt 290–293 (2001) 473

Plasma–surface interaction effects during high ion temperature long pulse experiments in TRIAM-1M, N. Yoshida, T. Hirai, K. Tokunaga, S. Itoh and TRIAM group 290–293 (2001) 1030

Combined sheath and thermal analysis of overheated surfaces in fusion devices, D. Naujoks and J.N. Brooks 290–293 (2001) 1123

**Reflectivity**

- Some problems arising due to plasma–surface interaction for operation of the in-vessel mirrors in a fusion reactor, V.S. Voitsenya, A.F. Bardamid, V.N. Bondarenko, W. Jacob, V.G. Konovalov, S. Masuzaki, O. Motojima, D.V. Orlinskij, V.L. Poperenko, I.V. Ryzhkov, A. Sagara, A.F. Shtan, S.I. Solodovchenko and M.V. Vinnichenko  
290–293 (2001) 336

**Retention**

- Plasma–surface interactions on liquids, R. Bastasz and W. Eckstein  
290–293 (2001) 19
- Effect of helium irradiation on trapping and thermal release of deuterium implanted in tungsten, S. Nagata and K. Takahiro  
290–293 (2001) 135
- Implantation, erosion, and retention of tungsten in carbon, R.A. Zuhr, J. Roth, W. Eckstein, U. von Toussaint and J. Luthin  
290–293 (2001) 162
- In situ measurement of hydrogen retention in JET carbon tiles, D.D.R. Summers, M.N.A. Beurskens, J.P. Coad, G. Counsell, W. Fundamenski, G.F. Matthews and M.F. Stamp  
290–293 (2001) 496

**Reversed field pinch**

- Mitigation of plasma–wall interaction during quasi-single helicity states in RFX, G. Spizzo, P. Franz, L. Marrelli, P. Martin, A. Murari, T. Bolzonella, D. Terranova and P. Zanca  
290–293 (2001) 1018
- Measurement of thermal wall-load distribution caused by the locked mode in a reversed-field pinch plasma, Y. Yagi, S. Sekine, H. Koguchi, T. Bolzonella and H. Sakakita  
290–293 (2001) 1144

**RF discharge**

- RF wall conditioning – a new technique for future large superconducting tokamak, J.K. Xie, Y.P. Zhao, J. Li, B.N. Wan, X.Z. Gong, J.S. Hu, X. Gao, X.M. Gu, S.D. Zhang, X.M. Wang, Y.Z. Mao, X.K. Yang, M. Zhen, S.Y. Zhang and HT-7 team  
290–293 (2001) 1155

**RFX**

- Plasma rotation and structure of the radial electric field in RFX, M.E. Puiatti, L. Tramontin, V. Antoni, R. Bartiromo, L. Carraro, D. Desideri, E. Martines, F. Sattin, P. Scarin, G. Serianni, M. Spolaore, M. Valisa and B. Zaniol  
290–293 (2001) 696
- Study of edge plasma properties comparing operation in hydrogen and helium in RFX, M. Spolaore, V. Antoni, M. Bagatin, D. Desideri, L. Fattorini, E. Martines, G. Serianni, L. Tramontin and N. Vianello  
290–293 (2001) 729
- Issues in the plasma wall interactions in RFX, M. Valisa, R. Bartiromo, D. Bettella, L. Carraro, S. Costa, P. Martin, S. Martini, R. Pasqualotto, M.E. Puiatti, P. Scarin, F. Sattin, G. Telesca, P. Zanca, B. Zaniol and RFX Team  
290–293 (2001) 980

- Non-axisymmetric perturbation of the plasma surface in RFX: analysis of magnetic data versus CCD images of plasma–wall interaction, P. Zanca, D. Bettella, S. Martini and M. Valisa  
290–293 (2001) 990
- Mitigation of plasma–wall interaction during quasi-single helicity states in RFX, G. Spizzo, P. Franz, L. Marrelli, P. Martin, A. Murari, T. Bolzonella, D. Terranova and P. Zanca  
290–293 (2001) 1018

**Ripple loss**

- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau  
290–293 (2001) 701

**Scrape-off layer**

- Plasma profiles in the inner divertor of ASDEX Upgrade, A. Carlson, D. Coster, A. Herrmann, R. Pugno, U. Wenzel and ASDEX Upgrade Team  
290–293 (2001) 575
- Electric currents in the scrape-off layer in ASDEX Upgrade, A. Kallenbach, A. Carlson, G. Pautasso, A. Peeters, U. Seidel, H.-P. Zehrfeld and ASDEX Upgrade Team  
290–293 (2001) 639
- Visible imaging of turbulence in the SOL of the Alcator C-Mod tokamak, J.L. Terry, R. Maqueda, C.S. Pitcher, S.J. Zweben, B. LaBombard, E.S. Marmor, A.Y. Pigarov and G. Wurden  
290–293 (2001) 757
- Effects of flush-mounted probe bias on local turbulent fluctuations, D.L. Winslow and B. LaBombard  
290–293 (2001) 788
- Heat and particle fluxes from collisionless scrape-off-layer during tokamak plasma disruptions, A. Hassanein, I. Konkashbaev and L. Nikandrov  
290–293 (2001) 1079

**Scrape-off layer (SOL)**

- Analysis of SOL behaviour in JET MkIIIGB using an advanced onion-skin solver (OSM2), W. Fundamenski, S.K. Erents, G.F. Matthews, A.V. Chankin, V. Riccardo, P.C. Stangeby and J.D. Elder  
290–293 (2001) 593

**Screening**

- Tore Supra divertor screening efficiency during density regime experiments, C. Grisolia, Ph. Ghendrih, J. Gunn, T. Loarer, P. Monier-Garbet, C. De Michelis, L. Costanzo and J.Y. Pascal  
290–293 (2001) 863
- Particle collection and exhaust in ergodic divertor experiments on Tore Supra, T. Loarer, Ph. Ghendrih, J. Gunn, A. Azéroual, L. Costanzo, C. Grisolia, R. Guirlet, G. Mank, P. Monier-Garbet and B. Pégourie  
290–293 (2001) 900

**Sheath**

- Electric currents in the scrape-off layer in ASDEX Upgrade, A. Kallenbach, A. Carlson, G. Pautasso, A. Peeters, U. Seidel, H.-P. Zehrfeld and ASDEX Upgrade Team  
290–293 (2001) 639

**Sheath potential**

Attenuation of secondary electron emission from divertor plates due to magnetic field inclination, Yu. Igitkhanov and G. Janeschitz 290–293 (2001) 99

**Shielding**

Material erosion and erosion products under plasma heat loads typical for ITER hard disruptions, V. Safronov, N. Arkhipov, V. Bakhtin, S. Kurkin, F. Scaffidi-Argentina, D. Toporkov, S. Vasenin, H. Würz and A. Zhitlukhin 290–293 (2001) 1052

Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074

**Shielding layer**

Experimental study of radiation power flux on the target surface during high heat plasma irradiation, V.N. Litunovsky, I.B. Ovchinnikov and V.A. Titov 290–293 (2001) 1112

**Silicon**

Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25

Silicon diffusion in amorphous carbon films, E. Vainonen-Ahlgren, T. Ahlgren, L. Khriachtchev, J. Likonen, S. Lehto, J. Keinonen and C.H. Wu 290–293 (2001) 216

Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341

**Silicon carbide**

Mechanism of the chemical erosion of SiC under hydrogen irradiation, M. Balden, S. Picarle and J. Roth 290–293 (2001) 47

**Siliconization**

Spectroscopic investigation on the impurity influxes of carbon and silicon in the ASDEX upgrade experiment, R. Pugno, A. Kallenbach, D. Bolshukhin, R. Dux, J. Gafert, R. Neu, V. Rohde, K. Schmidtman, W. Ullrich, U. Wenzel and ASDEX Upgrade Team 290–293 (2001) 308

ICRF siliconization in HT-7 superconducting tokamak, X. Gong, J. Li, B. Wan, Y. Zhao, X. Zhang, X. Gu, C. Li, M. Zhen, Y. Jie, S. Zhang, Z. Wu and HT-7 Team 290–293 (2001) 1171

Impurity release and recycling behaviour in TEXTOR-94 with siliconised walls, V. Philipps, A. Huber, H.G. Esser, A. Pospieszczyk, B. Schweer, J. von Seggern, W. Biel, J. Rapp and U. Samm 290–293 (2001) 1190

**Simulation**

Investigation of carbon transport in the scrape-off layer of TEXTOR-94, P. Wienhold, H.G. Esser, D. Hildebrandt, A. Kirschner, M. Mayer, V. Philipps and M. Rubel 290–293 (2001) 362

Kinetic simulation of a source dominated plasma-wall interaction in an oblique magnetic field, D. Sharma and H. Ramachandran 290–293 (2001) 725

Numerical study of plasma-wall transition in an oblique magnetic field, F. Valsaque and G. Manfredi 290–293 (2001) 763

**Sol modeling**

Modeling of tokamak edge plasma for discharges with neutral beam injection, V. Rozhansky, S. Voskoboinikov, E. Kovaltsova, D. Coster and R. Schneider 290–293 (2001) 710

**SOL**

Plasma boundary and SOL studies of ECH-plasmas in TJ-II stellarator with diagnosed mobile poloidal limiters, E. de la Cal, B. Brañas, F.L. Tabarés, D. Tafalla, A.L. Fraguas, M.A. Pedrosa, V. Tribaldos, E. Ascasibar, J. Heranz, I. Pastor and TJ-II Team 290–293 (2001) 579

Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski 290–293 (2001) 663

Experimental investigations of the SOL plasma in the MAST tokamak, J.-W. Ahn and G.F. Counsell 290–293 (2001) 820

On the way to divertor detachment in the W7-AS stellarator, K. McCormick, P. Grigull, R. König, R. Burhenn, H. Ehmler, Y. Feng, S. Fiedler, L. Giannone, D. Hildebrandt, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, Ch. Wendland and W7-AS Team 290–293 (2001) 920

Experiments and computational modeling focused on divertor and SOL optimization for advanced tokamak operation on DIII-D, S.L. Allen, J.A. Boedo, A.S. Bozek, N.H. Brooks, T.N. Carlstrom, T.A. Casper, R.J. Colchin, T.E. Evans, M.E. Fenstermacher, M.E. Friend, R.C. Isler, R. Jayakumar, C.J. Lasnier, A.W. Leonard, M.A. Mahdavi, R. Maingi, G.R. McKee, R.A. Moyer, M. Murakami, T.H. Osborne, R.C. O'Neill, T.W. Petrie, G.D. Porter, A.T. Ramsey, M.J. Schaffer, P.C. Stangeby, R.D. Stambaugh, M.R. Wade, J.G. Watking, W.P. West, D.G. Whyte and N.S. Wolf 290–293 (2001) 995

**SOL plasma**

Interpretation of SOL flows and target asymmetries in JET using EDGE2D code calculations, A.V. Chankin, G. Corrigan, S.K. Erents, G.F. Matthews, J. Spence and P.C. Stangeby 290–293 (2001) 518

Study of the relation between density and temperature fall-off lengths in a detached divertor plasma, K. Borrass 290–293 (2001) 551

Onion-skin method (OSM) analysis of DIII-D edge measurements, P.C. Stangeby, J.G. Watkins, G.D. Porter, J.D. Elder, S. Lisgo, D. Reiter, W.P. West and D.G. Whyte 290–293 (2001) 733

Particle simulation of detached plasma in the presence of diffusive particle loss and radiative energy loss, T. Takizuka, M. Hosokawa and K. Shimizu 290–293 (2001) 753

- Divertor target heat load reduction by electrical biasing, and application to COMPASS-D, S.J. Fielding, R.H. Cohen, P. Helander and D.D. Ryutov 290–293 (2001) 859
- SOL transport**
- Origins and spatial distributions of core fueling in the DIII-D tokamak, L.W. Owen, R.J. Colchin, R. Maingi, M.E. Fenstermacher, T.N. Carlstrom and R.J. Groebner 290–293 (2001) 464
- Solid-state reaction**
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42
- Spectroscopy**
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Spectroscopic investigation on the impurity influxes of carbon and silicon in the ASDEX upgrade experiment, R. Pugno, A. Kallenbach, D. Bolshukhin, R. Dux, J. Gafert, R. Neu, V. Rohde, K. Schmidtman, W. Ullrich, U. Wenzel and ASDEX Upgrade Team 290–293 (2001) 308
- Evaluation of electron temperature in detached recombining plasmas, D. Nishijima, U. Wenzel, M. Motoyama, N. Ohno, S. Takamura and S.I. Krashenninikov 290–293 (2001) 688
- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau 290–293 (2001) 701
- Spectroscopic studies of stationary MARFEs in TEXTOR-94, G. Sergienko, A. Pospieszczyk, M. Lehnen, M. Brix, J. Rapp, B. Schweer and P.T. Greenland 290–293 (2001) 720
- Splashing**
- Macroscopic erosion of plasma facing and nearby components during plasma instabilities: the droplet shielding phenomenon, A. Hassanein and I. Konkashbaev 290–293 (2001) 1074
- Sputtering yield**
- Unified analytic representation of physical sputtering yield, R.K. Janev, Yu.V. Ralchenko, T. Kenmotsu and K. Hosaka 290–293 (2001) 104
- Peculiarity of deuterium ions interaction with tungsten surface in the condition imitating combination of normal operation with plasma disruption in ITER, M.I. Guseva, V.I. Vasiliev, V.M. Gureev, L.S. Danelyan, B.I. Khirpunov, S.N. Korshunov, V.S. Kulikauskas, Y.V. Martynenko, V.B. Petrov, V.N. Strunnikov, V.G. Stolyarova, V.V. Zatekin and A.M. Litnovsky 290–293 (2001) 1069
- Sputtering**
- Plasma–surface interactions on liquids, R. Bastasz and W. Eckstein 290–293 (2001) 19
- D, He and Li sputtering of liquid eutectic Sn–Li, J.P. Allain, D.N. Ruzic and M.R. Hendricks 290–293 (2001) 33
- Membrane bias effects on plasma-driven permeation of hydrogen through niobium membrane, A. Busnyuk, Y. Nakamura, Y. Nakahara, H. Suzuki, N. Ohyabu and A. Livshits 290–293 (2001) 57
- Surface tension enhancement of TRIM sputtering yields for liquid metal targets, A. Grossman, R.P. Doerner and S. Luckhardt 290–293 (2001) 80
- Carbon erosion mechanisms in tokamak divertor materials: insight from molecular dynamics simulations, E. Salonen, K. Nordlund, J. Keinonen and C.H. Wu 290–293 (2001) 144
- Measurements and modeling of D, He and Li sputtering of liquid lithium, J.P. Allain, D.N. Ruzic and M.R. Hendricks 290–293 (2001) 180
- Characterisation of radiation and flux measurements on a neutraliser plate of the Tore Supra ergodic divertor, Y. Corre, R. Giannella, C. De Michelis, R. Guirlet, A. Azéroual, E. Chareyre, L. Costanzo, A. Escarguel, E. Gauthier, Ph. Ghendrih, J. Gunn, J. Hogan, P. Monier-Garbet, B. Pégourié, A. Pospieszczyk and E. Tsitrone 290–293 (2001) 250
- Detection of sputtered and evaporated carbon aggregates: relative and absolute electron ionization fragmentation yields, C. Mair, H. Deutsch, K. Becker, T.D. Märk and E. Vietzke 290–293 (2001) 291
- Effects of condensible impurities on the erosion behavior of the plasma-facing materials, N. Ohno, S. Uno, Y. Hirooka and S. Takamura 290–293 (2001) 299
- Some problems arising due to plasma–surface interaction for operation of the in-vessel mirrors in a fusion reactor, V.S. Voitsenya, A.F. Bardamid, V.N. Bondarenko, W. Jacob, V.G. Konovalov, S. Masuzaki, O. Motojima, D.V. Orlinskij, V.L. Poperenko, I.V. Ryzhkov, A. Sagara, A.F. Shtan, S.I. Solodovchenko and M.V. Vinnichenko 290–293 (2001) 336
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognlien, S. Sabbagh and X. Xu 290–293 (2001) 706
- Impurity release and recycling behaviour in TEXTOR-94 with siliconised walls, V. Philipps, A. Huber, H.G. Esser, A. Pospieszczyk, B. Schweer, J. von Seggern, W. Biel, J. Rapp and U. Samm 290–293 (2001) 1190
- Stellarator**
- W7-X edge modelling with the 3D SOL fluid code BoRiS, M. Borchardt, J. Riemann, R. Schneider and X. Bonnin 290–293 (2001) 546
- Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D.

- Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina  
290–293 (2001) 748
- Electric fields and currents in an island divertor configuration, X. Bonnin, R. Schneider, D. Coster, V. Rozhansky and S. Voskoboynikov  
290–293 (2001) 829
- On the way to divertor detachment in the W7-AS stellarator, K. McCormick, P. Grigull, R. König, R. Burhenn, H. Ehmler, Y. Feng, S. Fiedler, L. Giannone, D. Hildebrandt, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, Ch. Wendland and W7-AS Team  
290–293 (2001) 920
- ICRF wall conditioning experiments in the W7-AS stellarator, R. Brakel, D. Hartmann, P. Grigull and W7-AS Team  
290–293 (2001) 1160
- Wall conditioning and density control in the TJ-II stellarator, D. Tafalla and F.L. Tabarés  
290–293 (2001) 1195
- Sticking coefficient**  
Surface effects on plasma-driven tritium permeation through metals, O.V. Ogorodnikova  
290–293 (2001) 459
- Stochastic boundary**  
Characterisation of the separatrix position in the ergodic divertor discharges of the Tore Supra tokamak, M. Zabiégo, Ph. Ghendrih, M. Bécoulet, L. Costanzo, C. De Michelis, C. Friant and J. Gunn  
290–293 (2001) 985
- Surface analysis**  
Non-destructive structural analysis of surface blistering by TEM and EELS in a reflection configuration, S. Muto, T. Matsui and T. Tanabe  
290–293 (2001) 131
- Conditionings for plasma facing walls of large helical device, T. Hino, T. Ohuchi, M. Hashiba, Y. Yamauchi, Y. Hirohata, N. Inoue, A. Sagara, N. Noda and O. Motojima  
290–293 (2001) 1176
- Surface composition and topography**  
Chemical erosion of carbon doped with different fine-grain carbides, M. Balden, C. García-Rosales, R. Behrisch, J. Roth, P. Paz and J. Etxeberria  
290–293 (2001) 52
- Surface effects**  
Work function change of first wall candidate metals due to ion beam irradiation, G.-N. Luo, K. Yamaguchi, T. Terai and M. Yamawaki  
290–293 (2001) 116
- Energy distributions of CD<sub>4</sub> and CD<sub>3</sub> chemically released from graphite by D<sup>+</sup> and D<sup>0</sup>/Ne<sup>+</sup> impact, E. Vietzke  
290–293 (2001) 158
- Surface segregation**  
Membrane bias effects on plasma-driven permeation of hydrogen through niobium membrane, A. Busnyuk, Y. Nakamura, Y. Nakahara, H. Suzuki, N. Ohyabu and A. Livshits  
290–293 (2001) 57
- Surface tritium measurement**  
Nondestructive measurement of surface tritium by  $\beta$ -ray induced X-ray spectrometry (BIXS), M. Matsuyama, T. Tanabe, N. Noda, V. Philipps, K.H. Finken and K. Watanabe  
290–293 (2001) 437
- Tandem mirror**  
Studies of edge plasmas in an anchor minimum-B region of the GAMMA 10 tandem mirror, Y. Nakashima, K.M. Islam, A. Wada, D. Sato, S. Kobayashi, Y. Ishimoto, Y. Kawasaki, I. Katanuma, T. Saito, M. Yoshikawa, R. Baba, H. Aminaka, E. Ishinuki and K. Yatsu  
290–293 (2001) 683
- Target plate**  
Critical issues in divertor optimisation for ITER–FEAT, A.S. Kukushkin, G. Janeschitz, A. Loarte, H.D. Pacher, D. Coster, D. Reiter and R. Schneider  
290–293 (2001) 887
- Target profiles**  
Divertor energy distribution in JET H-modes, G.F. Matthews, S.K. Erements, W. Fundamenski, C. Ingesson, R.D. Monk and V. Riccardo  
290–293 (2001) 668
- TCV**  
Divertor geometry effects on detachment in TCV, R.A. Pitts, B.P. Duval, A. Loarte, J.-M. Moret, J.A. Boedo, D. Coster, I. Furno, J. Horacek, A.S. Kukushkin, D. Reiter, J. Rommers and TCV Team  
290–293 (2001) 940
- Temperature profile**  
Impurity radiation modulations in an ergodic divertor, F. Laugier, M. Bécoulet, C. De Michelis, Ph. Ghendrih, J.P. Gunn, P. Monier-Garbet, R. Reichle and J.C. Vallet  
290–293 (2001) 892
- TEXTOR**  
The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V. Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko  
290–293 (2001) 220
- Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe  
290–293 (2001) 295
- Fuel accumulation in co-deposited layers on plasma facing components, M. Rubel, P. Wienhold and D. Hildebrandt  
290–293 (2001) 473
- Calculation of 2D profiles for the plasma and electric field in the boundary layer of the TEXTOR-94 Tokamak, H. Gerhauser, R. Zagórski, H.A. Claaßen and M. Lehnen  
290–293 (2001) 609
- Investigations on density and temperature asymmetries due to drift motions in the boundary layer of TEXTOR-94, M. Lehnen, M. Brix, H. Gerhauser, B. Schweer and R. Zagórski  
290–293 (2001) 663
- Spectroscopic studies of stationary MARFes in TEXTOR-94, G. Sergienko, A. Pospieszczyk, M. Lehnen, M. Brix, J. Rapp, B. Schweer and P.T. Greenland  
290–293 (2001) 720

- Local emission and core concentration of tungsten in TEXTOR-94 plasmas operated with tungsten test and poloidal limiters, M. Wada, T. Ohgo, A. Pospieszczyk, A. Huber, G. Sergienko, T. Tanabe, W. Biel, K. Kondo, K. Ohya, V. Philipps, G. Bertschinger, J. Rapp, B. Schweer and N. Noda 290–293 (2001) 768
- Impurity release and recycling behaviour in TEXTOR-94 with siliconised walls, V. Philipps, A. Huber, H.G. Esser, A. Pospieszczyk, B. Schweer, J. von Seggern, W. Biel, J. Rapp and U. Samm 290–293 (2001) 1190
- TEXTOR 94**
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Erosion and deposition effects on the vessel wall of TEXTOR-94, J. von Seggern, M. Mayer, D. Reiser, M. Rubel and V. Philipps 290–293 (2001) 341
- Investigation of carbon transport in the scrape-off layer of TEXTOR-94, P. Wienhold, H.G. Esser, D. Hildebrandt, A. Kirschner, M. Mayer, V. Philipps and M. Rubel 290–293 (2001) 362
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda 290–293 (2001) 947
- TEXTOR-DED**
- Transport modelling of TEXTOR-DED laminar zone, Th. Eich, D. Reiser and K.H. Finken 290–293 (2001) 849
- TFTR**
- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young 290–293 (2001) 486
- Theoretical modelling**
- Interactions between liquid-wall vapor and edge plasmas, T.D. Rognlien and M.E. Rensink 290–293 (2001) 312
- On the validity of collisional–radiative models, P.T. Greenland 290–293 (2001) 615
- Thermal conductivity**
- Chemical erosion of doped graphites for fusion devices, C. García-Rosales and M. Balden 290–293 (2001) 173
- Thermal desorption**
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Deuterium retention in single crystal tungsten, A.A. Haasz, M. Poon, R.G. Macaulay-Newcombe and J.W. Davis 290–293 (2001) 85
- Thermal load**
- Material degradation and particle formation under transient thermal loads, J. Linke, M. Akiba, R. Duwe, A. Lodato, H.-J. Penkalla, M. Rödiger and K. Schöpflin 290–293 (2001) 1102
- Performance of the different tungsten grades under fusion relevant power loads, A. Makhankov, V. Barabash, I. Mazul and D. Youchison 290–293 (2001) 1117
- Measurement of thermal wall-load distribution caused by the locked mode in a reversed-field pinch plasma, Y. Yagi, S. Sekine, H. Koguchi, T. Bolzonella and H. Sakakita 290–293 (2001) 1144
- Thermal release**
- Isotope effects in thermal release of H and D implanted into WC layers on graphite, T. Horikawa, K. Morita and B. Tsuchiya 290–293 (2001) 428
- Thermography**
- Thermography of target plates with near-infrared optical fibres at Tore Supra, R. Reichle, V. Basiuk, V. Bergeaud, A. Cambe, M. Chantant, E. Delchambre, M. Druetta, E. Gauthier, W. Hess and C. Pocheau 290–293 (2001) 701
- Thermal load distribution on the ALT-II limiter of TEXTOR-94 during disruptions, K.H. Finken, A. Krämer-Flecken, G. Mank and S.S. Abdullaev 290–293 (2001) 1064
- Effect of magnetic geometry on ELM heat flux profiles, C.J. Lasnier, A.W. Leonard, T.W. Petrie and J.G. Watkins 290–293 (2001) 1093
- Titanium**
- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- TJ-II**
- Plasma boundary and SOL studies of ECH-plasmas in TJ-II stellarator with diagnosed mobile poloidal limiters, E. de la Cal, B. Brañas, F.L. Tabarés, D. Tafalla, A.L. Fraguas, M.A. Pedrosa, V. Tribaldos, E. Ascasibar, J. Herranz, I. Pastor and TJ-II Team 290–293 (2001) 579
- Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina 290–293 (2001) 748
- Tokamak fuelling**
- Compact toroid injection as fuelling in the JFT-2M tokamak, T. Ogawa, H. Ogawa, Y. Miura, H. Niimi, H. Kimura, Y. Kashiwa, T. Shibata, M. Yamamoto, N. Fukumoto, M. Nagata and T. Uyama 290–293 (2001) 454

**Tokamak**

- Carbon erosion mechanisms in tokamak divertor materials: insight from molecular dynamics simulations, E. Salonen, K. Nordlund, J. Keinonen and C.H. Wu 290–293 (2001) 144
- Studies of tungsten erosion at the inner and outer main chamber wall of the ASDEX Upgrade tokamak, A. Tabasso, H. Maier, J. Roth, K. Krieger and ASDEX Upgrade Team 290–293 (2001) 326
- Self-consistent description of the core and boundary plasma in the high-field ignition experiment, R. Stankiewicz and R. Zagórski 290–293 (2001) 738
- A 2D fluid model of the scrape-off layer (SOL) using adaptive unstructured finite volumes, F. Subba and R. Zanino 290–293 (2001) 743
- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda 290–293 (2001) 947

**Tore Supra**

- Dust characterization and analysis in Tore-Supra, P. Chappuis, E. Tsitrone, M. Mayne, X. Armand, H. Linke, H. Bolt, D. Petti and J.P. Sharpe 290–293 (2001) 245
- Net erosion measurements on plasma facing components of Tore Supra, E. Tsitrone, P. Chappuis, Y. Corre, E. Gauthier, A. Grosman and J.Y. Pascal 290–293 (2001) 331
- Particle trapping in carbon walls during ICRH heating in Tore Supra, C. Grisolia, J. Hogan, Ph. Ghendrih, T. Loarer, J. Gunn, P. Monier-Garbet, M. Becoulet and Th. Hutter 290–293 (2001) 402
- Effect of limiter recycling on measured poloidal impurity emission profiles in Tore Supra, J. Hogan, C. De Michelis, P. Monier-Garbet, M. Becoulet, C. Bush, Ph. Ghendrih, R. Guirlet, W. Hess, M. Mattioli and J.C. Vallet 290–293 (2001) 628
- Tore Supra divertor screening efficiency during density regime experiments, C. Grisolia, Ph. Ghendrih, J. Gunn, T. Loarer, P. Monier-Garbet, C. De Michelis, L. Costanzo and J.Y. Pascal 290–293 (2001) 863
- Alternative schemes of power deposition with the ergodic divertor on Tore Supra, G. Mank, Ph. Ghendrih, C. Grisolia, J. Gunn, T. Loarer, P. Monier-Garbet, L. Costanzo, K.H. Finken, C. De Michelis and R. Reichle 290–293 (2001) 910
- Characterisation of the separatrix position in the ergodic divertor discharges of the Tore Supra tokamak, M. Zabiégo, Ph. Ghendrih, M. Bécoulet, L. Costanzo, C. De Michelis, C. Friant and J. Gunn 290–293 (2001) 985
- Self-shadowing, gaps and leading edges on Tore Supra's inner first wall, R. Mitteau, P. Chappuis, Ph. Ghendrih, A. Grosman, D. Guilhem, J. Gunn, J. Hogan, M. Lipa, G. Martin, J. Schlosser and E. Tsitrone 290–293 (2001) 1036

**Transmission electron microscopy**

- Detailed structure analysis of deposit layer in TEXTOR by means of TEM techniques, S. Muto, N. Yokoya and T. Tanabe 290–293 (2001) 295

**Transport**

- Investigation of carbon transport in the scrape-off layer of TEXTOR-94, P. Wienhold, H.G. Esser, D. Hildebrandt, A. Kirschner, M. Mayer, V. Philipps and M. Rubel 290–293 (2001) 362
- Helium transport and exhaust with an ITER-like divertor in ASDEX Upgrade, H.-S. Bosch, W. Ullrich, D. Coster, O. Gruber, G. Haas, J. Neuhauser, R. Schneider, R. Wolf and ASDEX Upgrade Team 290–293 (2001) 836
- Helium compression analysis for ASDEX Upgrade with fluid and kinetic codes, D. Reiser, R. Schneider, D. Coster, W. Ullrich and H.S. Bosch 290–293 (2001) 953

**Transport barriers**

- The influence of the poloidal variation of the density on the locally measured velocities induced by biasing experiments, M. van Schoor, H. van Goubergen and R. Weynants 290–293 (2001) 962

**Transverse transport**

- Divertor target heat load reduction by electrical biasing, and application to COMPASS-D, S.J. Fielding, R.H. Cohen, P. Helander and D.D. Ryutov 290–293 (2001) 859

**TRIAM-1M**

- Anisotropic radiation damage by charge exchange neutrals under tokamak discharges in TRIAM-1M, T. Hirai, T. Fujiwara, K. Tokunaga, N. Yoshida, S. Itoh and TRIAM Group 290–293 (2001) 94

**Tritium areal distribution**

- Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Finken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze 290–293 (2001) 448

**Tritium co-deposition**

- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young 290–293 (2001) 486

**Tritium inventory**

- Assessment of erosion and tritium codeposition in ITER-FEAT, G. Federici, J.N. Brooks, D.P. Coster, G. Janeschitz, A. Kukushkin, A. Loarte, H.D. Pacher, J. Stober and C.H. Wu 290–293 (2001) 260
- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young 290–293 (2001) 486
- Behavior of tungsten exposed to high fluences of low energy hydrogen isotopes, T. Venhaus, R. Causey, R. Doerner and T. Abeln 290–293 (2001) 505

**Tritium mapping**

- Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Finken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze 290–293 (2001) 448

**Tritium retention**

- Erosion/deposition issues at JET, J.P. Coad, N. Bekris, J.D. Elder, S.K. Erents, D.E. Hole, K.D. Lawson, G.F. Matthews, R.-D. Penzhorn and P.C. Stangeby 290–293 (2001) 224
- Nondestructive measurement of surface tritium by  $\beta$ -ray induced X-ray spectrometry (BIXS), M. Matsuyama, T. Tanabe, N. Noda, V. Philipps, K.H. Finken and K. Watanabe 290–293 (2001) 437
- Tritium detection in plasma facing component by imaging plate technique, K. Miyasaka, T. Tanabe, G. Mank, K.H. Finken, V. Philipps, D.S. Walsh, K. Nishizawa and T. Saze 290–293 (2001) 448
- Studies of tritiated co-deposited layers in TFTR, C.H. Skinner, C.A. Gentile, G. Ascione, A. Carpe, R.A. Causey, T. Hayashi, J. Hogan, S. Langish, M. Nishi, W.M. Shu, W.R. Wampler and K.M. Young 290–293 (2001) 486
- Hydrogen isotope depth profiling in carbon samples from the erosion dominated inner vessel walls of JET, C. Stan-Sion, R. Behrisch, J.P. Coad, U. Kreißig, F. Kubo, V. Lazarev, S. Lindig, M. Mayer, E. Nolte, A. Peacock, L. Rohrer and J. Roth 290–293 (2001) 491

**Tritium**

- Tritium retention in neutron-irradiated low-Z materials for use as plasma facing materials, F. Scaffidi-Argentina, C. Sand and C.H. Wu 290–293 (2001) 211
- Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann 290–293 (2001) 418
- Surface effects on plasma-driven tritium permeation through metals, O.V. Ogorodnikova 290–293 (2001) 459
- A study of tritium decontamination of deposits by UV irradiation, Y. Oya, W. Shu, S. O'hira, T. Hayashi, H. Nakamura, T. Sakai, T. Tadokoro, K. Kobayashi, T. Suzuki and M. Nishi 290–293 (2001) 469
- Tritium decontamination of TFTR carbon tiles employing ultra violet light, W.M. Shu, S. Ohira, C.A. Gentile, Y. Oya, H. Nakamura, T. Hayashi, Y. Iwai, Y. Kawamura, S. Konishi, M.F. Nishi and K.M. Young 290–293 (2001) 482

**Tungsten**

- Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß 290–293 (2001) 25
- Deuterium retention in W, W1%La, C-coated W and W<sub>2</sub>C, R.A. Anderl, R.J. Pawelko and S.T. Schuetz 290–293 (2001) 38
- Solid-state reaction between tungsten and hydrogen-containing carbon film at elevated temperature, K. Ashida, K. Fujino, T. Okabe, M. Matsuyama and K. Watanabe 290–293 (2001) 42

- Deuterium retention in single crystal tungsten, A.A. Haasz, M. Poon, R.G. Macaulay-Newcombe and J.W. Davis 290–293 (2001) 85
- Mixed-material coating formation on tungsten surfaces during plasma exposure in TEXTOR-94, D. Hildebrandt, P. Wienhold and W. Schneider 290–293 (2001) 89
- Synergistic effects by simultaneous bombardment of tungsten with hydrogen and carbon, K. Krieger and J. Roth 290–293 (2001) 107
- Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier 290–293 (2001) 121
- Effect of helium irradiation on trapping and thermal release of deuterium implanted in tungsten, S. Nagata and K. Takahiro 290–293 (2001) 135
- Influence of diffusion on W sputtering by carbon, K. Schmid, J. Roth and W. Eckstein 290–293 (2001) 148
- Implantation, erosion, and retention of tungsten in carbon, R.A. Zuhr, J. Roth, W. Eckstein, U. von Toussaint and J. Luthin 290–293 (2001) 162
- Measurements of erosion mechanisms from solid and liquid materials in PISCES-B, R.P. Doerner, M.J. Baldwin, R.W. Conn, A.A. Grossman, S.C. Luckhardt, R. Seraydarian, G.R. Tynan and D.G. Whyte 290–293 (2001) 166
- Plasma operation with tungsten tiles at the central column of ASDEX Upgrade, R. Neu, V. Rohde, A. Geier, K. Krieger, H. Maier, D. Bolshukhin, A. Kallenbach, R. Pugno, K. Schmidtman, M. Zarrabian and ASDEX Upgrade Team 290–293 (2001) 206
- Comparison of impurity production, recycling and power deposition on carbon and tungsten limiters in TEXTOR-94, A. Huber, V. Philipps, A. Pospieszczyk, A. Kirschner, M. Lehnen, T. Ohgo, K. Ohya, M. Rubel, B. Schweer, J. von Seggern, G. Sergienko, T. Tanabe and M. Wada 290–293 (2001) 276
- Simulation calculations of mutual contamination between tungsten and carbon and its impact on plasma surface interactions, K. Ohya, R. Kawakami, T. Tanabe, M. Wada, T. Ohgo, V. Philipps, A. Pospieszczyk, A. Huber, M. Rubel, G. Sergienko and N. Noda 290–293 (2001) 303
- Deuterium retention and lattice damage in tungsten irradiated with D ions, V.Kh. Alimov, K. Ertl and J. Roth 290–293 (2001) 389
- Role of grain boundaries and carbon deposition in deuterium retention behavior of deuterium plasma exposed tungsten, D.A. Komarov, A.V. Markin, S.Yu. Rybakov and A.P. Zakharov 290–293 (2001) 433
- Behavior of tungsten exposed to high fluences of low energy hydrogen isotopes, T. Venhaus, R. Causey, R. Doerner and T. Abeln 290–293 (2001) 505
- Local emission and core concentration of tungsten in TEXTOR-94 plasmas operated with tungsten test and poloidal limiters, M. Wada, T. Ohgo, A. Pospieszczyk, A. Huber, G. Sergienko, T. Tanabe, W. Biel, K. Kondo, K. Ohya, V. Philipps, G. Bertschinger, J. Rapp, B. Schweer and N. Noda 290–293 (2001) 768

- Operation of TEXTOR-94 with tungsten poloidal main limiters, A. Pospieszczyk, T. Tanabe, V. Philipps, G. Sergienko, T. Ohgo, K. Kondo, M. Wada, M. Rubel, W. Biel, A. Huber, A. Kirschner, J. Rapp and N. Noda  
290–293 (2001) 947
- Peculiarity of deuterium ions interaction with tungsten surface in the condition imitating combination of normal operation with plasma disruption in ITER, M.I. Guseva, V.I. Vasiliev, V.M. Gureev, L.S. Danelyan, B.I. Khirpunov, S.N. Korshunov, V.S. Kulikauskas, Y.V. Martynenko, V.B. Petrov, V.N. Strunnikov, V.G. Stolyarova, V.V. Zatekin and A.M. Litnovsky  
290–293 (2001) 1069
- Performance of the different tungsten grades under fusion relevant power loads, A. Makhankov, V. Barabash, I. Mazul and D. Youchison  
290–293 (2001) 1117
- Characterization and conditioning of SSPX plasma facing surfaces, D.A. Buchenauer, B.E. Mills, R. Wood, S. Woodruff, D.N. Hill, E.B. Hooper, D.F. Cowgill, M.W. Clift and N.Y. Yang  
290–293 (2001) 1165
- Turbulence**
- Density fluctuations at high density in the ergodic divertor configuration of Tore Supra, P. Devynck, J. Gunn, Ph. Ghendrih, X. Garbet, G. Antar, P. Beyer, C. Boucher, C. Honore, F. Gervais, P. Hennequin, A. Quémeneur and A. Truc  
290–293 (2001) 584
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognlien, S. Sabbagh and X. Xu  
290–293 (2001) 706
- Visible imaging of turbulence in the SOL of the Alcator C-Mod tokamak, J.L. Terry, R. Maqueda, C.S. Pitcher, S.J. Zweben, B. LaBombard, E.S. Marmor, A.Y. Pigarov and G. Wurden  
290–293 (2001) 757
- UEDGE**
- Particle flows in pumped DIII-D discharges, G.D. Porter, T.D. Rognlien, M.E. Rensink, N.S. Wolf and W.P. West  
290–293 (2001) 692
- Simulation of power and particle flows in the NSTX edge plasma, M.E. Rensink, H. Kugel, R. Maingi, F. Paoletti, G.D. Porter, T.D. Rognlien, S. Sabbagh and X. Xu  
290–293 (2001) 706
- Vanadium**
- Deuterium retention of V-4Cr-4Ti alloy exposed to the JFT-2M tokamak environment, Y. Hirohata, T. Oda, T. Hino and S. Sengoku  
290–293 (2001) 196
- The porous vanadium as a plasma facing material for the fusion devices, A.V. Zhmendak, A. Huber, V.A. Kvitcinskiy, E.V. Mudretskaya, A.V. Nedospasov, V.V. Panechkina, S.N. Pavlov, A. Pospieszczyk, G.V. Sergienko and V.F. Virko  
290–293 (2001) 220
- Vibrational excitation**
- Numerical simulation of hydrogen molecular dissociation and the effects to H $\alpha$  profiles in low temperature plasmas, B. Xiao, S. Kado, K. Kobayashi and S. Tanaka  
290–293 (2001) 793
- Vlasov equation**
- Numerical study of plasma–wall transition in an oblique magnetic field, F. Valsaque and G. Manfredi  
290–293 (2001) 763
- Volume recombination**
- Hydrogen molecules in the divertor of ASDEX Upgrade, U. Fantz, D. Reiter, B. Heger and D. Coster  
290–293 (2001) 367
- Evaluation of electron temperature in detached recombining plasmas, D. Nishijima, U. Wenzel, M. Motoyama, N. Ohno, S. Takamura and S.I. Krashenninnikov  
290–293 (2001) 688
- W7-AS**
- Investigation of the hydrogen fluxes in the plasma edge of W7-AS during H-mode discharges, U. Langer, E. Taglauer, R. Fischer and W7-AS Team  
290–293 (2001) 658
- On the way to divertor detachment in the W7-AS stellarator, K. McCormick, P. Grigull, R. König, R. Burhenn, H. Ehmler, Y. Feng, S. Fiedler, L. Giannone, D. Hildebrandt, J.P. Knauer, G. Kühner, D. Naujoks, J. Sallander, Ch. Wendland and W7-AS Team  
290–293 (2001) 920
- Edge transport barrier formation and ELM phenomenology in the W7-AS stellarator, P. Grigull, M. Hirsch, J. Baldzuhn, H. Ehmler, F. Gadelmeier, L. Giannone, H.-J. Hartfuss, D. Hildebrandt, R. Jaenicke, J. Kisslinger, R. Koenig, K. McCormick, F. Wagner, A. Weller, Ch. Wendland and W7-AS Team  
290–293 (2001) 1009
- ICRF wall conditioning experiments in the W7-AS stellarator, R. Brakel, D. Hartmann, P. Grigull and W7-AS Team  
290–293 (2001) 1160
- Wall coating**
- Wall conditioning by microwave generated plasmas in a toroidal magnetic field, J. Ihde, H.B. Störk, J. Winter, M. Rubel, H.G. Esser and H. Toyoda  
290–293 (2001) 1180
- Wall conditioning**
- Density control and plasma edge characterisation of ECRH heated plasmas in the TJ-II stellarator, F.L. Tabarés, D. Tafalla, B. Brañas, E. de la Cal, I. García-Cortés, T. Estrada, I. Pastor, J. Herranz, E. de la Luna and F. Medina  
290–293 (2001) 748
- RF wall conditioning – a new technique for future large superconducting tokamak, J.K. Xie, Y.P. Zhao, J. Li, B.N. Wan, X.Z. Gong, J.S. Hu, X. Gao, X.M. Gu, S.D. Zhang, X.M. Wang, Y.Z. Mao, X.K. Yang, M. Zhen, S.Y. Zhang and HT-7 team  
290–293 (2001) 1155
- ICRF wall conditioning experiments in the W7-AS stellarator, R. Brakel, D. Hartmann, P. Grigull and W7-AS Team  
290–293 (2001) 1160
- Conditionings for plasma facing walls of large helical device, T. Hino, T. Ohuchi, M. Hashiba, Y. Yamauchi, Y. Hirohata, N. Inoue, A. Sagara, N. Noda and O. Motojima  
290–293 (2001) 1176

Overview of impurity control and wall conditioning in NSTX, H.W. Kugel, R. Maingi, W. Wampler, R.E. Barry, M. Bell, W. Blanchard, D. Gates, D. Johnson, R. Kaita, S. Kaye, R. Maqueda, J. Menard, M.M. Menon, D. Mueller, M. Ono, S. Paul, Y.-K.M. Peng, R. Raman, A. Roquemore, C.H. Skinner, S. Sabbagh, B. Stratton, D. Stutman, J.R. Wilson, S. Zweben and NSTX National Research Team

290–293 (2001) 1185

Wall conditioning and density control in the TJ-II stellarator, D. Tafalla and F.L. Tabarés

290–293 (2001) 1195

### Wall pumping

Comparison of hydrogen and tritium uptake and retention in JET, D.L. Hillis, J. Hogan, J.P. Coad, G. Duxbury, M. Groth, H.Y. Guo, L. Horton, G. Matthews, A. Meigs, P. Morgan, M. Stamp and M. von Hellermann

290–293 (2001) 418

Modeling of wall recycling effects on the global particle balance in magnetic fusion devices, Y. Hirooka, S. Masuzaki, H. Suzuki, T. Kenmotsu and T. Kawamura

290–293 (2001) 423

Local recycling coefficients and wall equilibration in tokamaks, P.K. Mioduszewski and L.W. Owen

290–293 (2001) 443

### Wall pumping

Investigation of the hydrogen fluxes in the plasma edge of W7-AS during H-mode discharges, U. Langer, E. Taglauer, R. Fischer and W7-AS Team

290–293 (2001) 658

### Waste

A study of tritium decontamination of deposits by UV irradiation, Y. Oya, W. Shu, S. O'hira, T. Hayashi, H. Nakamura, T. Sakai, T. Tadokoro, K. Kobayashi, T. Suzuki and M. Nishi

290–293 (2001) 469

Tritium decontamination of TFTR carbon tiles employing ultra violet light, W.M. Shu, S. Ohira, C.A. Gentile, Y. Oya, H. Nakamura, T. Hayashi, Y. Iwai, Y. Kawamura, S. Konishi, M.F. Nishi and K.M. Young

290–293 (2001) 482

### XPS

Mixed material formation and erosion, Ch. Linsmeier, J. Luthin and P. Goldstraß

290–293 (2001) 25

Influence of oxygen on the carbide formation on tungsten, J. Luthin and Ch. Linsmeier

290–293 (2001) 121
