## INSTRUCTIONS TO CONTRIBUTORS

*Contributions* must be written in English and should be submitted in *duplicate* to one of the Editors, either directly or through a member of the Advisory Editorial Board. The submission of a contribution will be taken to imply that the author has satisfied himself that no copyright will thereby be infringed. Submission of a paper to any of the Editors will be taken to imply that permission to publish has been given by the appropriate authorities. Neither the Editors nor the Publisher can accept any responsibility in this respect. After correspondence with the Editor on the results of the review of the manuscript, the author should submit the final version of the manuscript to the Editor in duplicate hardcopy and in electronic format on disk (preferable) or by e-mail. The hardcopy and electronic versions must be identical.

*Abstracts* should be written in English. The abstract should be on a separate sheet (complete with the title and names of the authors). Abstracts should not exceed a total length of 150 words. Longer abstracts will be shortened by the Editors if necessary, without consulting the authors.

*Manuscripts* should be typewritten on one side of the paper only, with double spacings and wide margins. Only first copies and clear xerographic prints thereof are acceptable to the printers. Manuscript title should be concise and, where possible, should occupy a single line in the published article.

*Headings and subheadings* should be typed in lower case except for the initial capital letter, proper names and acronyms.

*Displayed formulae* should be numbered and typed or *clearly* written by hand. Vectors will be printed in *boldface italics* (heavy, slanting type), and should be indicated by a wavy underlining in the typescript. Otherwise no symbols should be underlined. Special attention should be paid to the clear distinction of characters which can easily be misread such as i (lower case), I (cap.), l (el), 1 (one), ' (prime); o (lower case), O (cap.), 0 (zero); u, v (lower case),  $\nu$  (greek nu), V (cap.); s, S; x, X,  $\times$ ; p, P,  $\rho$  (Greek rho); etc. If necessary, unusual symbols should be explained in pencil in the margin.

*Units and symbols:* the use of metric units in the SI (Système Internationale) form is *obligatory*. Potential contributors are referred to complete and modern descriptions such as: (1) ASTM E-380-93, Standard Practice for Use of the International System of Units (SI) (The Modernized Metric System) published by The American Society for Testing and Materials, Philadelphia, PA, 1993 – updated annually; (2) Quantities, Units and Symbols in Physical Chemistry, edited by I. Mills et al., published by Blackwell Scientific Publications, Oxford, UK, 1993 – published on behalf of the International Union of Pure and Applied Chemistry.

*Tables* should be typed on separate sheets and should have a title in addition to their serial number; their desired location should be indicated in the margin of the text.

*Figures:* line drawings should be computer plots, glossy prints of good quality or original drawings in black India ink. Xerox copies are *not* acceptable. Figures should be drawn in such a way that they can be reduced to a final width of 76 mm (i.e. the column width); in exceptional cases a reduction to a width of 160 mm (two columns) will be allowed. All the lettering (numerical scales, scale and curve legends, etc.) as well as the details (e.g. graph symbols) should be such that a height of 1.5–1.8 mm results after reduction. The lettering should be done with high quality computer graphics software or by hand using a lettering guide (stencil) or using stripleters (Letraset, etc.). Each figure should have a number and a caption. The captions should be typed on a separate sheet. The desired location of figures should be indicated in the margin of the text. Photographs must be either glossy prints or high quality scanned computer prints and should be unmounted, unless they form part of a composite figure, and be richer in contrast than is desired in the printed version. Micrographs must have proper scale markers located within the print. The original figures will be returned after publication of the paper only if specifically requested by the author(s) at the time of submission.

For specific enquiries on the preparation of electronic artwork, consult <http://www.elsevier.com/locate/authorartwork>.

*Colour plates:* Illustrations can be printed in colour when they are judged by the Editor to be essential to the presentation. The Publisher and the author will each bear part of the extra costs involved. Further information concerning colour illustrations and the cost to the author is available from the Publisher.

*References* to published literatures should be quoted in the text by the name of the author followed by a number in square brackets in the sequence of citation. The references should be listed at the end of the typescript as in the following examples: [1] for a paper in a journal, [2] for a book, [3] for a paper in a Conference Proceedings, [4] for a paper in a contributed volume, [5] for a report of a laboratory:

[1] Y. Etoh, S. Shimada, *J. Nucl. Mater.* 200 (1993) 59.

[2] B.D. Smith and R. Srivastava, *Thermodynamic Data for Pure Compounds*, Elsevier, Amsterdam, 1993.

[3] D. Reiter, in: *Proc. 10th Int. Conf. on Plasma–Surface Interactions in Controlled Fusion Devices*, Monterey, CA, USA, Mar. 30–Apr. 3, 1992, Elsevier, Amsterdam, 1992.

[4] S. Holloway, in: V. Bortolani, N.H. March and M.P. Tosi (Eds), *Interaction of Atoms and Molecules with Solid Surfaces*, Plenum, New York, 1990, p. 567.

[5] R.F. Mattes, *ITER Divertor Plate Performance and Lifetime Considerations*, Argonne National Laboratory Report ANL/FPP/TM-246 (1990).

*Rapid publication*: short manuscripts (not exceeding a total length of 2000 words) which have been entitled: ‘Letter to the Editors’ by the author(s) will be published directly. Abstracts may be included with Letters; however, their length should be limited to 75 words.

*Corrections in the proofs* should be limited to printer’s errors; owing to the time-consuming and expensive work involved, any other changes in the proofs may be charged to the authors. They should therefore check their manuscript carefully for typographical errors and small inconsistencies. The submitted paper should be in final form. Alterations in abstracts are not acceptable at proof stage and will be ignored unless approved by one of the Editors.

*Page charge and reprints*: there will be no page charge. Reprints may be ordered from the publisher. An order form will be sent to contributors together with the proofs. 50 reprints of each article will be supplied free of charge.

*Books for review* should be offered or sent to one of the Editors. *News or announcements* should be submitted in duplicate to one of the Editors.

Upon acceptance of an article the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the materials herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.
