Publisher's note

We are delighted to be able to inform you about an important development for the benefit of authors and readers of the *Journal of Nuclear Materials*. This journal has been selected for inclusion in a pilot programme for a new 'Colourful e-Products' workflow.

This 'Colourful e-Products' solution provides a welcome step forward now that scientists increasingly access information online. Scientists in many disciplines need to be able to publish their work in colour, but the cost of colour printing can be prohibitive and we realise that not all scientists have appropriate funds to cover these charges.

Authors wishing to make use of this facility should ensure that:

1. The artwork is in an acceptable format (TIFF, EPS or MS Office files) and at the correct resolution.
2. RGB colour space is used.
3. For colour online and black & white in print, both colour and black & white artwork (file and/or hardcopy) is provided.

There is no extra charge for authors who participate in this new facility. Further information on electronic artwork can be found at <http://authors.elsevier.com/artwork>.

To view articles online please access the journal from the ScienceDirect website: <http://www.sciencedirect.com>.

Your feedback and comments are welcome.
