

Subject index

Absorber Materials

- Dysprosium hafnate as absorbing material for control rods, V.D. Risovany, A.V. Zakharov, E.M. Muraleva, V.M. Kosenkov and R.N. Latypov 355 (2006) 163

Actinides (*minor, excludes Plutonium, Thorium and Uranium*)

- Thermal diffusivity of Americium mononitride from 373 to 1473 K, T. Nishi, M. Takano, A. Itoh, M. Akabori, K. Minato and M. Kizaki 355 (2006) 114

Amorphization and Amorphous Materials

- Water diffusion in the simulated French nuclear waste glass SON 68 contacting silica rich solutions: Experimental and modeling, K. Ferrand, A. Abdelouas and B. Grambow 355 (2006) 54

Cavities (*includes Voids, Holes*)

- Volume changes in δ -plutonium from helium and other decay products, W.G. Wolfer, P. Söderlind and A. Landa 355 (2006) 21
- Swelling and microstructure of pure Fe and Fe–Cr alloys after neutron irradiation to ~26 dpa at 400 °C, Yu.V. Konobeev, A.M. Dvoriashin, S.I. Porollo and F.A. Garner 355 (2006) 124

Ceramics (*not listed elsewhere*)

- Effect of composition on helium diffusion in fluoroapatites investigated with nuclear reaction analysis, S. Miro, F. Studer, J.-M. Costantini, J. Haussy, P. Trouslard and J.-J. Grob 355 (2006) 1
- Characterisation of stainless steel–synroc interactions under hot isostatic pressing (HIPing) conditions, H. Li, Y. Zhang, P.J. McGlenn, S. Moricca, B.D. Begg and E.R. Vance 355 (2006) 136
- Dysprosium hafnate as absorbing material for control rods, V.D. Risovany,

- A.V. Zakharov, E.M. Muraleva, V.M. Kosenkov and R.N. Latypov 355 (2006) 163

Chemical Reactions (*includes Electrochemical and Thermochemical Reactions*)

- A detailed study of UO₂ to U₃O₈ oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Nièpce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10

Cladding Materials

- Effect of transient thermal cycles in a supercritical water-cooled reactor on the microstructure and properties of ferritic–martensitic steels, T.C. Totemeier and D.E. Clark 355 (2006) 104

Coatings and Coated Particles

- An evaluation of the effects of SiC layer thinning on failure of TRISO-coated fuel particles, G.K. Miller, D.A. Petti, J.T. Maki and D.L. Knudson 355 (2006) 150

Compatibility and Corrosion (*includes Stress Corrosion Cracking*)

- An evaluation of the effects of SiC layer thinning on failure of TRISO-coated fuel particles, G.K. Miller, D.A. Petti, J.T. Maki and D.L. Knudson 355 (2006) 150

Creep and Stress Relaxation

- Effect of transient thermal cycles in a supercritical water-cooled reactor on the microstructure and properties of ferritic–martensitic steels, T.C. Totemeier and D.E. Clark 355 (2006) 104

Diffusion

- Effect of composition on helium diffusion in fluoroapatites investigated with nuclear reaction analysis, S. Miro, F. Studer, J.-M. Costantini, J. Haussy, P. Trouslard and J.-J. Grob 355 (2006) 1

Dislocations

Dynamic strain ageing in prior cold worked 15Cr–15Ni titanium modified stainless steel (Alloy D9), K.G. Samuel, S.K. Ray and G. Sasikala 355 (2006) 30

Electron Microscopy

Characterisation of stainless steel–synroc interactions under hot isostatic pressing (HIPing) conditions, H. Li, Y. Zhang, P.J. McGlenn, S. Moricca, B.D. Begg and E.R. Vance 355 (2006) 136

Embrittlement

High-dose neutron irradiation embrittlement of RAFM steels, E. Gaganidze, H.-C. Schneider, B. Dafferner and J. Aktaa 355 (2006) 83

Experimental Techniques

Thermal diffusivity of Americium mononitride from 373 to 1473 K, T. Nishi, M. Takano, A. Itoh, M. Akabori, K. Minato and M. Kizaki 355 (2006) 114

Fission Products

An evaluation of the effects of SiC layer thinning on failure of TRISO-coated fuel particles, G.K. Miller, D.A. Petti, J.T. Maki and D.L. Knudson 355 (2006) 150

Fuels and Fuel Elements

A detailed study of UO₂ to U₃O₈ oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Nièpce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10

The relative impact of radiolysis products in radiation induced oxidative dissolution of UO₂, E. Ekeröth, O. Roth and M. Jonsson 355 (2006) 38

Thermal diffusivity of Americium mononitride from 373 to 1473 K, T. Nishi, M. Takano, A. Itoh, M. Akabori, K. Minato and M. Kizaki 355 (2006) 114

An evaluation of the effects of SiC layer thinning on failure of TRISO-coated fuel particles, G.K. Miller, D.A. Petti, J.T. Maki and D.L. Knudson 355 (2006) 150

Fusion Reactor Materials

Mechanical properties of weldments using irradiated stainless steel welded by the

laser method for ITER blanket replacement, H. Yamada, H. Kawamura, Y. Nagao, F. Takada and W. Kohno 355 (2006) 119

Gases in Materials (*excludes Hydrogen, Helium and Tritium*)

Xenon versus helium behavior in UO₂ single crystals: A TEM investigation, G. Sattonnay, L. Vincent, F. Garrido and L. Thomé 355 (2006) 131

Heat Treatment

Characterisation of stainless steel–synroc interactions under hot isostatic pressing (HIPing) conditions, H. Li, Y. Zhang, P.J. McGlenn, S. Moricca, B.D. Begg and E.R. Vance 355 (2006) 136

Helium

Effect of composition on helium diffusion in fluoroapatites investigated with nuclear reaction analysis, S. Miro, F. Studer, J.-M. Costantini, J. Haussy, P. Trouslard and J.-J. Grob 355 (2006) 1

Volume changes in δ -plutonium from helium and other decay products, W.G. Wolfer, P. Söderlind and A. Landa 355 (2006) 21

Mechanical properties of weldments using irradiated stainless steel welded by the laser method for ITER blanket replacement, H. Yamada, H. Kawamura, Y. Nagao, F. Takada and W. Kohno 355 (2006) 119

Xenon versus helium behavior in UO₂ single crystals: A TEM investigation, G. Sattonnay, L. Vincent, F. Garrido and L. Thomé 355 (2006) 131

Density changes in plutonium observed from accelerated aging using Pu-238 enrichment, B.W. Chung, S.R. Thompson, C.H. Woods, D.J. Hopkins, W.H. Gourdin and B.B. Ebbinghaus 355 (2006) 142

Hydrogen and Hydrides (*includes Deuterium and Deuterides*)

Hydrogen isotope separation by permeation through palladium membranes, M. Glugla, I.R. Cristescu, I. Cristescu and D. Demange 355 (2006) 47

Ion Irradiation

Effect of composition on helium diffusion in fluoroapatites investigated with nuclear reaction analysis, S. Miro, F. Studer, J.-M. Costantini, J. Haussy, P. Trouslard and J.-J. Grob 355 (2006) 1

Xenon versus helium behavior in UO₂ single crystals: A TEM investigation,

- G. Sattonnay, L. Vincent, F. Garrido and L. Thomé 355 (2006) 131
- Iron, Iron alloys and Compounds** (*excludes Steels*)
Swelling and microstructure of pure Fe and Fe–Cr alloys after neutron irradiation to ~26 dpa at 400 °C, Yu.V. Konobeev, A.M. Dvoriashin, S.I. Porollo and F.A. Garner 355 (2006) 124
- Irradiation** (*not listed elsewhere, includes Irradiation History or Schedule*)
Density changes in plutonium observed from accelerated aging using Pu-238 enrichment, B.W. Chung, S.R. Thompson, C.H. Woods, D.J. Hopkins, W.H. Gourdin and B.B. Ebbinghaus 355 (2006) 142
- Joining** (*includes Welding, Brazing, Soldering*)
Mechanical properties of weldments using irradiated stainless steel welded by the laser method for ITER blanket replacement, H. Yamada, H. Kawamura, Y. Nagao, F. Takada and W. Kohno 355 (2006) 119
- Kinetics**
A detailed study of UO₂ to U₃O₈ oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Nièpce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10
- Mathematical and Computational Methods**
Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Becquart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89
- Mechanical Properties** (*not listed elsewhere*)
Dynamic strain ageing in prior cold worked 15Cr–15Ni titanium modified stainless steel (Alloy D9), K.G. Samuel, S.K. Ray and G. Sasikala 355 (2006) 30
Mechanical properties of weldments using irradiated stainless steel welded by the laser method for ITER blanket replacement, H. Yamada, H. Kawamura, Y. Nagao, F. Takada and W. Kohno 355 (2006) 119
- Metals, Alloys and Compounds** (*not listed elsewhere*)
Hydrogen isotope separation by permeation through palladium membranes, M. Glugla, I.R. Cristescu, I. Cristescu and D. Demange 355 (2006) 47
- Neutron Irradiation**
Swelling and microstructure of pure Fe and Fe–Cr alloys after neutron irradiation to ~26 dpa at 400 °C, Yu.V. Konobeev, A.M. Dvoriashin, S.I. Porollo and F.A. Garner 355 (2006) 124
- Permeation**
Hydrogen isotope separation by permeation through palladium membranes, M. Glugla, I.R. Cristescu, I. Cristescu and D. Demange 355 (2006) 47
- Phase Transformation** (*includes Evaporation, Sublimation*)
A detailed study of UO₂ to U₃O₈ oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Nièpce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10
- Plutonium, Plutonium Alloys and Compounds**
Volume changes in δ-plutonium from helium and other decay products, W.G. Wolfer, P. Söderlind and A. Landa 355 (2006) 21
Density changes in plutonium observed from accelerated aging using Pu-238 enrichment, B.W. Chung, S.R. Thompson, C.H. Woods, D.J. Hopkins, W.H. Gourdin and B.B. Ebbinghaus 355 (2006) 142
- Pressure Vessel Materials**
Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Becquart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89
- Processing**
Dynamic strain ageing in prior cold worked 15Cr–15Ni titanium modified stainless steel (Alloy D9), K.G. Samuel, S.K. Ray and G. Sasikala 355 (2006) 30
- Radiation Effects: Atomic Defects**
Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Becquart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89
Density changes in plutonium observed from accelerated aging using Pu-238 enrichment, B.W. Chung, S.R. Thompson, C.H. Woods, D.J. Hopkins, W.H. Gourdin and B.B. Ebbinghaus 355 (2006) 142

Radiation Effects: Extended Defects, Microstructures

- Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Beccuart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89
- Swelling and microstructure of pure Fe and Fe–Cr alloys after neutron irradiation to ~26 dpa at 400 °C, Yu.V. Konobeev, A.M. Dvoriashin, S.I. Porollo and F.A. Garner 355 (2006) 124

Radiation Effects: Mechanical Properties

- High-dose neutron irradiation embrittlement of RAFM steels, E. Gaganidze, H.-C. Schneider, B. Dafferner and J. Aktaa 355 (2006) 83

Steels, Austenitic

- Sensitization behaviour of modified 316N and 316L stainless steel weld metals after complex annealing and stress relieving cycles, N. Parvathavarthini, R.K. Dayal, H.S. Khatak, V. Shankar and V. Shanmugam 355 (2006) 68
- Characterisation of stainless steel–synroc interactions under hot isostatic pressing (HIPing) conditions, H. Li, Y. Zhang, P.J. McGlenn, S. Moricca, B.D. Begg and E.R. Vance 355 (2006) 136

Steels, Austenitic, Low C/N

- Mechanical properties of weldments using irradiated stainless steel welded by the laser method for ITER blanket replacement, H. Yamada, H. Kawamura, Y. Nagao, F. Takada and W. Kohno 355 (2006) 119

Steels, Austenitic, Stabilized

- Dynamic strain ageing in prior cold worked 15Cr–15Ni titanium modified stainless steel (Alloy D9), K.G. Samuel, S.K. Ray and G. Sasikala 355 (2006) 30

Steels, Ferritic, Pressure Vessel

- Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Beccuart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89

Steels, Ferritic/Martensitic

- Effect of transient thermal cycles in a supercritical water-cooled reactor on the microstructure and properties of ferri-

- tic–martensitic steels, T.C. Totemeier and D.E. Clark 355 (2006) 104

Steels, Ferritic/Martensitic, Low Activation

- High-dose neutron irradiation embrittlement of RAFM steels, E. Gaganidze, H.-C. Schneider, B. Dafferner and J. Aktaa 355 (2006) 83

Swelling: Ceramics, Other Materials

- Xenon versus helium behavior in UO₂ single crystals: A TEM investigation, G. Sattonnay, L. Vincent, F. Garrido and L. Thomé 355 (2006) 131

Swelling: Metals and Alloys

- Volume changes in δ -plutonium from helium and other decay products, W.G. Wolfer, P. Söderlind and A. Landa 355 (2006) 21
- Swelling and microstructure of pure Fe and Fe–Cr alloys after neutron irradiation to ~26 dpa at 400 °C, Yu.V. Konobeev, A.M. Dvoriashin, S.I. Porollo and F.A. Garner 355 (2006) 124
- Density changes in plutonium observed from accelerated aging using Pu-238 enrichment, B.W. Chung, S.R. Thompson, C.H. Woods, D.J. Hopkins, W.H. Gourdin and B.B. Ebbinghaus 355 (2006) 142

Theory and Modelling

- A detailed study of UO₂ to U₃O₈ oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Nièpce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10
- Volume changes in δ -plutonium from helium and other decay products, W.G. Wolfer, P. Söderlind and A. Landa 355 (2006) 21
- Dependence of radiation damage accumulation in iron on underlying models of displacement cascades and subsequent defect migration, A. Souidi, C.S. Beccuart, C. Domain, D. Terentyev, L. Malerba, A.F. Calder, D.J. Bacon, R.E. Stoller, Y.N. Osetsky and M. Hou 355 (2006) 89
- An evaluation of the effects of SiC layer thinning on failure of TRISO-coated fuel particles, G.K. Miller, D.A. Petti, J.T. Maki and D.L. Knudson 355 (2006) 150

Thermal Shock

- Effect of transient thermal cycles in a supercritical water-cooled reactor on the

- microstructure and properties of ferritic-martensitic steels, T.C. Totemeier and D.E. Clark 355 (2006) 104
- Thermophysical Properties**
- Thermal diffusivity of Americium mononitride from 373 to 1473 K, T. Nishi, M. Takano, A. Itoh, M. Akabori, K. Minato and M. Kizaki 355 (2006) 114
- Tritium and Tritides**
- Hydrogen isotope separation by permeation through palladium membranes, M. Glugla, I.R. Cristescu, I. Cristescu and D. Demange 355 (2006) 47
- Uranium Oxides and Compounds**
- A detailed study of UO_2 to U_3O_8 oxidation phases and the associated rate-limiting steps, G. Rousseau, L. Desgranges, F. Charlot, N. Millot, J.C. Niépce, M. Pijolat, F. Valdivieso, G. Baldinozzi and J.F. Bézar 355 (2006) 10
- The relative impact of radiolysis products in radiation induced oxidative dissolution of UO_2 , E. Ekeröth, O. Roth and M. Jonsson 355 (2006) 38
- Xenon versus helium behavior in UO_2 single crystals: A TEM investigation, G. Sattonnay, L. Vincent, F. Garrido and L. Thomé 355 (2006) 131
- Waste Materials**
- Effect of composition on helium diffusion in fluoroapatites investigated with nuclear reaction analysis, S. Miro, F. Studer, J.-M. Costantini, J. Haussy, P. Trouslard and J.-J. Grob 355 (2006) 1
- Water diffusion in the simulated French nuclear waste glass SON 68 contacting silica rich solutions: Experimental and modeling, K. Ferrand, A. Abdelouas and B. Grambow 355 (2006) 54
- Waste: Behavior in Storage**
- The relative impact of radiolysis products in radiation induced oxidative dissolution of UO_2 , E. Ekeröth, O. Roth and M. Jonsson 355 (2006) 38
