

Subject index

Adsorption

- Iodine sorption by microwave irradiated hydrotalcites, S.P. Paredes, G. Fetter, P. Bosch and S. Bulbulian 359 (2006) 155

Amorphization and Amorphous Materials

- Structural aspects of barium borosilicate glasses containing thorium and uranium oxides, R.K. Mishra, V. Sudarsan, C.P. Kaushik, K. Raj, S.K. Kulshreshtha and A.K. Tyagi 359 (2006) 132

Analytical Instruments and Methods (not listed elsewhere)

- Experimental partial phase diagram of the Zr–Sn–Fe system, N. Nieva and D. Arias 359 (2006) 29

Breeding Materials for Fusion

- On the radiation damage characterization of candidate first wall materials in a fusion reactor using various molten salts, M. Übeyli 359 (2006) 192

Carbon

- Laser annealing in combination with mass spectroscopy, a technique to study deuterium on tokamak carbon samples, a tool for detritiation, T. Åkermark, B. Emmoth and H. Bergsaker 359 (2006) 220

Chemical Reactions (includes Electrochemical and Thermochemical Reactions)

- Electrochemical reduction of (U–40Pu–5Np)O₂ in molten LiCl electrolyte, M. Iizuka, Y. Sakamura and T. Inoue 359 (2006) 102
Iodine sorption by microwave irradiated hydrotalcites, S.P. Paredes, G. Fetter, P. Bosch and S. Bulbulian 359 (2006) 155

Cladding Materials

- Experimental partial phase diagram of the Zr–Sn–Fe system, N. Nieva and D. Arias 359 (2006) 29

- Corrosion behavior and oxide properties of Zr–1.1 wt%Nb–0.05 wt%Cu alloy, J.-Y. Park, B.-K. Choi, S.J. Yoo and Y.H. Jeong 359 (2006) 59

Compatibility and Corrosion (includes Stress Corrosion Cracking)

- Microstructural examination of oxide layers formed on an oxide dispersion strengthened ferritic steel exposed to supercritical water, Y. Chen, K. Sridharan, T.R. Allen and S. Ukai 359 (2006) 50
Corrosion behavior and oxide properties of Zr–1.1 wt%Nb–0.05 wt%Cu alloy, J.-Y. Park, B.-K. Choi, S.J. Yoo and Y.H. Jeong 359 (2006) 59

Creep and Stress Relaxation

- Effect of alloying elements (Cu, Fe, and Nb) on the creep properties of Zr alloys, H.-G. Kim, Y.-H. Kim, B.-K. Choi and Y.-H. Jeong 359 (2006) 268

Crystallographic Properties

- Reversible expansion of gallium-stabilized δ -plutonium, W.G. Wolfer, B. Oudot and N. Baclet 359 (2006) 185

Defects and Defect Structures (excludes by Irradiation)

- Positron lifetime calculations of defects in chromium containing hydrogen or helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93

Diffusion

- Modeling of constituent redistribution in U–Pu–Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout 359 (2006) 17
Simulations of heat and oxygen diffusion in UO₂ nuclear fuel rods, J.C. Ramirez, M. Stan and P. Cristea 359 (2006) 174
Reversible expansion of gallium-stabilized δ -plutonium, W.G. Wolfer, B. Oudot and N. Baclet 359 (2006) 185

- Ab initio calculations of self-interstitial interaction and migration with solute atoms in bcc Fe, E. Vincent, C.S. Beccart and C. Domain 359 (2006) 227
- Dislocations**
Effect of alloying elements (Cu, Fe, and Nb) on the creep properties of Zr alloys, H.-G. Kim, Y.-H. Kim, B.-K. Choi and Y.-H. Jeong 359 (2006) 268
- Electron Microscopy**
Microstructural examination of oxide layers formed on an oxide dispersion strengthened ferritic steel exposed to supercritical water, Y. Chen, K. Sridharan, T.R. Allen and S. Ukai 359 (2006) 50
- Fabrication**
Preparation of (U,Pu)O₂ pellets through sol-gel microsphere pelletization technique, N. Kumar, R.V. Pai, J.K. Joshi, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 69
Effect of feed solution composition and heat treatment conditions on the morphology of uranium oxide microspheres prepared by sol-gel process, N. Kumar, Y.R. Bamankar, K.T. Pillai, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 80
- Fast Reactor Materials**
Modeling of constituent redistribution in U-Pu-Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout 359 (2006) 17
Electrochemical reduction of (U-40Pu-5Np)O₂ in molten LiCl electrolyte, M. Iizuka, Y. Sakamura and T. Inoue 359 (2006) 102
Chemical states of fission products in irradiated (U_{0.3}Pu_{0.7})C_{1+x} fuel at high burn-ups, R. Agarwal and V. Venugopal 359 (2006) 122
Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Fission Products**
Chemical states of fission products in irradiated (U_{0.3}Pu_{0.7})C_{1+x} fuel at high burn-ups, R. Agarwal and V. Venugopal 359 (2006) 122
Iodine sorption by microwave irradiated hydrotalcites, S.P. Paredes, G. Fetter, P. Bosch and S. Bulbulian 359 (2006) 155
- Fracture and Fracture Toughness**
Strain rate dependence of impact properties of sintered 316L stainless steel, W.-S. Lee, C.-F. Lin and T.-J. Liu 359 (2006) 247
- Fuels and Fuel Elements**
Geometrical α - and β -dose distributions and production rates of radiolysis products in water in contact with spent nuclear fuel, F. Nielsen and M. Jonsson 359 (2006) 1
Modeling of constituent redistribution in U-Pu-Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout 359 (2006) 17
Preparation of (U,Pu)O₂ pellets through sol-gel microsphere pelletization technique, N. Kumar, R.V. Pai, J.K. Joshi, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 69
Effect of feed solution composition and heat treatment conditions on the morphology of uranium oxide microspheres prepared by sol-gel process, N. Kumar, Y.R. Bamankar, K.T. Pillai, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 80
Chemical states of fission products in irradiated (U_{0.3}Pu_{0.7})C_{1+x} fuel at high burn-ups, R. Agarwal and V. Venugopal 359 (2006) 122
A two-zone method with an enhanced accuracy for a numerical solution of the diffusion equation, J.-S. Cheon, Y.-H. Koo, B.-H. Lee, J.-Y. Oh and D.-S. Sohn 359 (2006) 139
Simulations of heat and oxygen diffusion in UO₂ nuclear fuel rods, J.C. Ramirez, M. Stan and P. Cristea 359 (2006) 174
- Fusion Reactor Materials**
On the radiation damage characterization of candidate first wall materials in a fusion reactor using various molten salts, M. Übeyli 359 (2006) 192
Laser annealing in combination with mass spectroscopy, a technique to study deuterium on tokamak carbon samples, a tool for detritiation, T. Åkermark, B. Emmoth and H. Bergsäker 359 (2006) 220
- Gases in Materials** (*excludes Hydrogen, Helium and Tritium*)
A two-zone method with an enhanced accuracy for a numerical solution of the diffusion equation, J.-S. Cheon, Y.-H. Koo, B.-H. Lee, J.-Y. Oh and D.-S. Sohn 359 (2006) 139
- Heat Treatment**
Preparation of (U,Pu)O₂ pellets through sol-gel microsphere pelletization technique, N. Kumar, R.V. Pai, J.K. Joshi, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 69

- Effect of feed solution composition and heat treatment conditions on the morphology of uranium oxide microspheres prepared by sol-gel process, N. Kumar, Y.R. Bamankar, K.T. Pillai, S.K. Mukerjee, V.N. Vaidya and V. Venugopal 359 (2006) 80
- Helium**
- Positron lifetime calculations of defects in chromium containing hydrogen or helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93
- Hydrogen and Hydrides (includes Deuterium and Deuterides)**
- Effect of post-D⁺-irradiation time delay and pre-TDS heating on D retention in single crystal tungsten, A.D. Quastel, J.W. Davis, A.A. Haasz and R.G. Macaulay-Newcombe 359 (2006) 8
- Positron lifetime calculations of defects in chromium containing hydrogen or helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93
- Influence of hydrogen on the toughness of irradiated reactor pressure vessel steels, G. Müller, M. Uhlemann, A. Ulbricht and J. Böhmert 359 (2006) 114
- Laser annealing in combination with mass spectroscopy, a technique to study deuterium on tokamak carbon samples, a tool for detritiation, T. Åkermark, B. Emmoth and H. Bergsäker 359 (2006) 220
- Trapping of radiolytic hydrogen by amorphous cobalt oxysulfide, C. Loussot, C. Pichon, P. Afanasiev, M. Vrinat, M. Pijolat, F. Valdivieso, A. Chevarier, N. Millard-Pinard and P.C. Leverd 359 (2006) 238
- Ion Irradiation**
- Effect of post-D⁺-irradiation time delay and pre-TDS heating on D retention in single crystal tungsten, A.D. Quastel, J.W. Davis, A.A. Haasz and R.G. Macaulay-Newcombe 359 (2006) 8
- Iron, Iron alloys and Compounds (excludes Steels)**
- Experimental partial phase diagram of the Zr-Sn-Fe system, N. Nieva and D. Arias 359 (2006) 29
- Ab initio calculations of self-interstitial interaction and migration with solute atoms in bcc Fe, E. Vincent, C.S. Bequart and C. Domain 359 (2006) 227
- Joining (includes Welding, Brazing, Soldering)**
- Residual stress measurements on a stress relieved Zircaloy-4 weld by neutron diffraction, D.G. Carr, M.I. Ripley, D.W. Brown, S.C. Vogel and T.M. Holden 359 (2006) 202
- Mathematical and Computational Methods**
- Modeling of constituent redistribution in U-Pu-Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout 359 (2006) 17
- A two-zone method with an enhanced accuracy for a numerical solution of the diffusion equation, J.-S. Cheon, Y.-H. Koo, B.-H. Lee, J.-Y. Oh and D.-S. Sohn 359 (2006) 139
- Simulations of heat and oxygen diffusion in UO₂ nuclear fuel rods, J.C. Ramirez, M. Stan and P. Cristea 359 (2006) 174
- On the radiation damage characterization of candidate first wall materials in a fusion reactor using various molten salts, M. Übeyli 359 (2006) 192
- Bootstrap calculation of ultimate strength temperature maxima for neutron irradiated ferritic/martensitic steels, S.M. Obraztsov, Yu.V. Konobeev, G.A. Birzhevov and V.I. Rachkov 359 (2006) 263
- Mechanical Properties (not listed elsewhere)**
- Influence of hydrogen on the toughness of irradiated reactor pressure vessel steels, G. Müller, M. Uhlemann, A. Ulbricht and J. Böhmert 359 (2006) 114
- Deterioration of EUROFER plates by severe bending, A. von der Weth, H. Kempe and B. Dafferner 359 (2006) 150
- Strain rate dependence of impact properties of sintered 316L stainless steel, W.-S. Lee, C.-F. Lin and T.-J. Liu 359 (2006) 247
- Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Neutron Irradiation**
- Microstructure and mechanical properties of austenitic stainless steel 12X18H9T after neutron irradiation in the pressure vessel of BR-10 fast reactor at very low dose rates, S.I. Porollo, A.M. Dvorishin, Yu.V. Konobeev, A.A. Ivanov, S.V. Shulepin and F.A. Garner 359 (2006) 41
- Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Neutron Scattering**
- Residual stress measurements on a stress relieved Zircaloy-4 weld by neutron diffraction, D.G. Carr, M.I. Ripley, D.W. Brown, S.C. Vogel and T.M. Holden 359 (2006) 202

Nuclear Properties

On the radiation damage characterization of candidate first wall materials in a fusion reactor using various molten salts, M. Übeyli 359 (2006) 192

Oxides

Corrosion behavior and oxide properties of Zr-1.1 wt%Nb-0.05 wt%Cu alloy, J.-Y. Park, B.-K. Choi, S.J. Yoo and Y.H. Jeong 359 (2006) 59

Phase Equilibria (includes Constitution, Phase Stability, Phase Instability)

Experimental partial phase diagram of the Zr-Sn-Fe system, N. Nieva and D. Arias 359 (2006) 29

Plasma-Materials Interaction

Laser annealing in combination with mass spectroscopy, a technique to study deuterium on tokamak carbon samples, a tool for detritiation, T. Åkermark, B. Emmoth and H. Bergsäter 359 (2006) 220

Plutonium, Plutonium Alloys and Compounds

Modeling of constituent redistribution in U-Pu-Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout 359 (2006) 17

Electrochemical reduction of (U-40Pu-5Np)O₂ in molten LiCl electrolyte, M. Iizuka, Y. Sakamura and T. Inoue 359 (2006) 102

Chemical states of fission products in irradiated (U_{0.3}Pu_{0.7})C_{1+x} fuel at high burn-ups, R. Agarwal and V. Venugopal 359 (2006) 122

Reversible expansion of gallium-stabilized δ-plutonium, W.G. Wolfer, B. Oudot and N. Baclet 359 (2006) 185

Polymers

Cementation of ILW ion exchange resins: Impact of sulfate ions released by radiolysis on hydrated matrix, F. Frizon and C. Cau-dit-Coumes 359 (2006) 162

Positron Annihilation

Positron lifetime calculations of defects in chromium containing hydrogen or helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93

Powder Processes and Products

Strain rate dependence of impact properties of sintered 316L stainless steel, W.-S. Lee, C.-F. Lin and T.-J. Liu 359 (2006) 247

Precipitates and Precipitation

Corrosion behavior and oxide properties of Zr-1.1 wt%Nb-0.05 wt%Cu alloy, J.-Y. Park, B.-K. Choi, S.J. Yoo and Y.H. Jeong 359 (2006) 59

Reversible expansion of gallium-stabilized δ-plutonium, W.G. Wolfer, B. Oudot and N. Baclet 359 (2006) 185

Pressure Vessel Materials

Microstructure and mechanical properties of austenitic stainless steel 12X18H9T after neutron irradiation in the pressure vessel of BR-10 fast reactor at very low dose rates, S.I. Porollo, A.M. Dvoria-shin, Yu.V. Konobeev, A.A. Ivanov, S.V. Shulepin and F.A. Garner 359 (2006) 41

Influence of hydrogen on the toughness of irradiated reactor pressure vessel steels, G. Müller, M. Uhlemann, A. Ulbricht and J. Böhmert 359 (2006) 114

Ab initio calculations of self-interstitial interaction and migration with solute atoms in bcc Fe, E. Vincent, C.S. Béquart and C. Domain 359 (2006) 227

Processing

Iodine sorption by microwave irradiated hydrotalcites, S.P. Paredes, G. Fetter, P. Bosch and S. Bulbulian 359 (2006) 155

Residual stress measurements on a stress relieved Zircaloy-4 weld by neutron diffraction, D.G. Carr, M.I. Ripley, D.W. Brown, S.C. Vogel and T.M. Holden 359 (2006) 202

Radiation Effects: Atomic Defects

Effect of post-D⁺-irradiation time delay and pre-TDS heating on D retention in single crystal tungsten, A.D. Quastel, J.W. Davis, A.A. Haasz and R.G. Macaulay-Newcombe 359 (2006) 8

Ab initio calculations of self-interstitial interaction and migration with solute atoms in bcc Fe, E. Vincent, C.S. Béquart and C. Domain 359 (2006) 227

Radiation Effects: Extended Defects, Microstructures

Microstructure and mechanical properties of austenitic stainless steel 12X18H9T after neutron irradiation in the pressure vessel of BR-10 fast reactor at very low dose rates, S.I. Porollo, A.M. Dvoria-shin, Yu.V. Konobeev, A.A. Ivanov, S.V. Shulepin and F.A. Garner 359 (2006) 41

Positron lifetime calculations of defects in chromium containing hydrogen or

- helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93
- Radiation Effects: Mechanical Properties**
- Microstructure and mechanical properties of austenitic stainless steel 12X18H9T after neutron irradiation in the pressure vessel of BR-10 fast reactor at very low dose rates, S.I. Porollo, A.M. Dvorishin, Yu.V. Konobeev, A.A. Ivanov, S.V. Shulepin and F.A. Garner 359 (2006) 41
- Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Bootstrap calculation of ultimate strength temperature maxima for neutron irradiated ferritic/martensitic steels, S.M. Obraztsov, Yu.V. Konobeev, G.A. Birzhevoy and V.I. Rachkov 359 (2006) 263
- Radiation Effects: Physical Properties**
- Reversible expansion of gallium-stabilized δ -plutonium, W.G. Wolfer, B. Oudot and N. Baclet 359 (2006) 185
- Radiolysis**
- Cementation of ILW ion exchange resins: Impact of sulfate ions released by radiolysis on hydrated matrix, F. Frizon and C. Cau-dit-Coumes 359 (2006) 162
- Trapping of radiolytic hydrogen by amorphous cobalt oxysulfide, C. Loussot, C. Pichon, P. Afanasiev, M. Vrinat, M. Pijolat, F. Valdivieso, A. Chevarier, N. Millard-Pinard and P.C. Leverd 359 (2006) 238
- Reprocessing**
- Electrochemical reduction of (U-40Pu-5Np)O₂ in molten LiCl electrolyte, M. Iizuka, Y. Sakamura and T. Inoue 359 (2006) 102
- Segregation**
- Microstructural examination of oxide layers formed on an oxide dispersion strengthened ferritic steel exposed to supercritical water, Y. Chen, K. Sridharan, T.R. Allen and S. Ukai 359 (2006) 50
- Steels, Austenitic**
- Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Steels, Austenitic, Low C/N**
- Strain rate dependence of impact properties of sintered 316L stainless steel, W.-S. Lee, C.-F. Lin and T.-J. Liu 359 (2006) 247
- Steels, Austenitic, Stabilized**
- Microstructure and mechanical properties of austenitic stainless steel 12X18H9T after neutron irradiation in the pressure vessel of BR-10 fast reactor at very low dose rates, S.I. Porollo, A.M. Dvorishin, Yu.V. Konobeev, A.A. Ivanov, S.V. Shulepin and F.A. Garner 359 (2006) 41
- Correlation of yield stress and microhardness in 08Cr16Ni11Mo3 stainless steel irradiated to high dose in the BN-350 fast reactor, M.N. Gusev, O.P. Maksimkin, O.V. Tivanova, N.S. Silnaygina and F.A. Garner 359 (2006) 258
- Steels, Ferritic/Martensitic**
- Microstructural examination of oxide layers formed on an oxide dispersion strengthened ferritic steel exposed to supercritical water, Y. Chen, K. Sridharan, T.R. Allen and S. Ukai 359 (2006) 50
- Bootstrap calculation of ultimate strength temperature maxima for neutron irradiated ferritic/martensitic steels, S.M. Obraztsov, Yu.V. Konobeev, G.A. Birzhevoy and V.I. Rachkov 359 (2006) 263
- Steels, Ferritic/Martensitic, Low Activation**
- Deterioration of EUROFER plates by severe bending, A. von der Weth, H. Kempe and B. Dafferner 359 (2006) 150
- Theory and Modelling**
- Positron lifetime calculations of defects in chromium containing hydrogen or helium, T. Troev, A. Markovski, S. Peneva and T. Yoshiie 359 (2006) 93
- Ab initio calculations of self-interstitial interaction and migration with solute atoms in bcc Fe, E. Vincent, C.S. Bequart and C. Domain 359 (2006) 227
- Thermal Reactor Materials**
- Residual stress measurements on a stress relieved Zircaloy-4 weld by neutron diffraction, D.G. Carr, M.I. Ripley,

- D.W. Brown, S.C. Vogel and T.M. Holden
Effect of alloying elements (Cu, Fe, and Nb) on the creep properties of Zr alloys, H.-G. Kim, Y.-H. Kim, B.-K. Choi and Y.-H. Jeong
359 (2006) 202
359 (2006) 268
- Thermomechanical Treatment**
Laser annealing in combination with mass spectroscopy, a technique to study deuterium on tokamak carbon samples, a tool for detritiation, T. Åkermark, B. Emmoth and H. Bergsäter
359 (2006) 220
- Thorium, Thorium Alloys and Compounds**
Structural aspects of barium borosilicate glasses containing thorium and uranium oxides, R.K. Mishra, V. Sudarsan, C.P. Kaushik, K. Raj, S.K. Kulshreshtha and A.K. Tyagi
359 (2006) 132
- Tungsten, Tungsten Alloys and Compounds**
Effect of post-D⁺-irradiation time delay and pre-TDS heating on D retention in single crystal tungsten, A.D. Quastel, J.W. Davis, A.A. Haasz and R.G. Macaulay-Newcombe
359 (2006) 8
- Uranium Oxides and Compounds**
Geometrical α - and β -dose distributions and production rates of radiolysis products in water in contact with spent nuclear fuel, F. Nielsen and M. Jonsson
359 (2006) 1
Preparation of (U,Pu)O₂ pellets through sol-gel microsphere pelletization technique, N. Kumar, R.V. Pai, J.K. Joshi, S.K. Mukerjee, V.N. Vaidya and V. Venugopal
359 (2006) 69
Effect of feed solution composition and heat treatment conditions on the morphology of uranium oxide microspheres prepared by sol-gel process, N. Kumar, Y.R. Bamankar, K.T. Pillai, S.K. Mukerjee, V.N. Vaidya and V. Venugopal
359 (2006) 80
Electrochemical reduction of (U-40Pu-5Np)O₂ in molten LiCl electrolyte, M. Iizuka, Y. Sakamura and T. Inoue
359 (2006) 102
Chemical states of fission products in irradiated (U_{0.3}Pu_{0.7})C_{1+x} fuel at high burn-ups, R. Agarwal and V. Venugopal
359 (2006) 122
Structural aspects of barium borosilicate glasses containing thorium and uranium oxides, R.K. Mishra, V. Sudarsan, C.P. Kaushik, K. Raj, S.K. Kulshreshtha and A.K. Tyagi
359 (2006) 132
- Simulations of heat and oxygen diffusion in UO₂ nuclear fuel rods, J.C. Ramirez, M. Stan and P. Cristea
359 (2006) 174
- Uranium, Uranium Alloys**
Modeling of constituent redistribution in U-Pu-Zr metallic fuel, Y.S. Kim, S.L. Hayes, G.L. Hofman and A.M. Yacout
359 (2006) 17
- Waste Materials**
Structural aspects of barium borosilicate glasses containing thorium and uranium oxides, R.K. Mishra, V. Sudarsan, C.P. Kaushik, K. Raj, S.K. Kulshreshtha and A.K. Tyagi
359 (2006) 132
- Waste: Behavior in Storage**
Geometrical α - and β -dose distributions and production rates of radiolysis products in water in contact with spent nuclear fuel, F. Nielsen and M. Jonsson
359 (2006) 1
Cementation of ILW ion exchange resins: Impact of sulfate ions released by radiolysis on hydrated matrix, F. Frizon and C. Cau-dit-Coumes
359 (2006) 162
- Zirconium Hydrides and Compounds**
Influence of temperature on threshold stress for reorientation of hydrides and residual stress variation across thickness of Zr-2.5Nb alloy pressure tube, R.N. Singh, Lala Mikin R., G.K. Dey, D.N. Sah, I.S. Batra and P. Ståhle
359 (2006) 208
- Zirconium, Zirconium Alloys**
Experimental partial phase diagram of the Zr-Sn-Fe system, N. Nieva and D. Arias
359 (2006) 29
Corrosion behavior and oxide properties of Zr-1.1 wt%Nb-0.05 wt%Cu alloy, J.-Y. Park, B.-K. Choi, S.J. Yoo and Y.H. Jeong
359 (2006) 59
Residual stress measurements on a stress relieved Zircaloy-4 weld by neutron diffraction, D.G. Carr, M.I. Ripley, D.W. Brown, S.C. Vogel and T.M. Holden
359 (2006) 202
Influence of temperature on threshold stress for reorientation of hydrides and residual stress variation across thickness of Zr-2.5Nb alloy pressure tube, R.N. Singh, Lala Mikin R., G.K. Dey, D.N. Sah, I.S. Batra and P. Ståhle
359 (2006) 208
Effect of alloying elements (Cu, Fe, and Nb) on the creep properties of Zr alloys, H.-G. Kim, Y.-H. Kim, B.-K. Choi and Y.-H. Jeong
359 (2006) 268
