Proceedings of the Symposium on Radiation Effects, Deformation and Phase Transformations in Metals and Ceramics, organized in honor of Prof. Monroe S. Wechsler

Contents	v	Analysis of notch strengthening of 316L stainless steel with and without irradiation-induced hardening using EBSD and FEM, <i>X. Wu, X. Pan and J.F. Stubbins</i>	228
Preface	vii	Dose dependence of true stress parameters in irradiated bcc, fcc, and hcp metals, <i>T.S. Byun</i>	239
Forword	xi	APT characterization of irradiated high nickel RPV steels, <i>M.K. Miller, K.F. Russell, M.A. Sokolov and R.K. Nanstad</i>	248
Kinetic Monte Carlo modeling of cascade aging and damage accumulation in Fe–Cu alloys, <i>P.R. Monasterio, B.D. Wirth and G.R. Odette</i>	127	Synergistic effects of interstitial impurities and radiation defects on mechanical characteristics of ferritic steels, <i>I. Charit, C.S. Seok and K.L. Murty</i>	262
Helium bubble nucleation in bcc iron studied by kinetic Monte Carlo simulations, <i>C.S. Deo, M.A. Okuniewski, S.G. Srivilliputhur, S.A. Maloy, M.I. Baskes, M.R. James and J.F. Stubbins</i>	141	Materials irradiation facilities at the high-power Swiss proton accelerator complex, <i>W. Wagner, Y. Dai, H. Glasbrenner and H.-U. Aebersold</i>	274
Kinetics of coarsening of helium bubbles during implantation and post-implantation annealing, <i>S.I. Golubov, R.E. Stoller, S.J. Zinkle and A.M. Ovcharenko</i>	149	The radiation damage database: Section on helium cross section, <i>W. Lu and M.S. Wechsler</i>	282
Role of grain boundary engineering in the SCC behavior of ferritic–martensitic alloy HT-9, <i>G. Gupta, P. Ampornrat, X. Ren, K. Sridharan, T.R. Allen and G.S. Was</i>	160	Monte Carlo simulations of stray neutron radiation exposures in proton therapy, <i>Y. Zheng, W. Newhauser, J. Fontenot, N. Koch and R. Mohan</i>	289
Thermal and radiation-induced segregation in model Ni-base alloys, <i>T.R. Allen, L. Tan, G.S. Was and E.A. Kenik</i>	174	Effect of severe ausforming via equal channel angular extrusion on the shape memory response of a NiTi alloy, <i>B. Kockar, I. Karaman, A. Kulkarni, Y. Chumlyakov and I.V. Kireeva</i>	298
Effect of radiation on bulk swelling of plutonium alloys, <i>C. Thiebaut, N. Baclet, B. Ravat, P. Giraud and P. Julia</i>	184	An in situ study of the martensitic transformation in shape memory alloys using photoemission electron microscopy, <i>M. Cai, S.C. Langford, J.T. Dickinson, G. Xiong, T.C. Droubay, A.G. Joly, K.M. Beck and W.P. Hess</i>	306
Fracture mechanism maps in unirradiated and irradiated metals and alloys, <i>M. Li and S.J. Zinkle</i>	192	Parent–martensite interface structure in ferrous systems, <i>X. Ma and R.C. Pond</i>	313
Molecular dynamics study of the interactions between dislocation and imperfect stacking fault tetrahedron in Cu, <i>L. Saintoyant, H.-J. Lee and B.D. Wirth</i>	206		
Deformation microstructure of proton-irradiated stainless steels, <i>Z. Jiao, J.T. Busby and G.S. Was</i>	218
