Proceedings of the E-MRS 2006 Spring Meeting: Symposium N on Nuclear Materials and Materials for Fusion

| | | | |
|---|-----|-----|--|
| Contents | v | | |
| Editorial Note | vii | | |
| Materials for fusion: Simulations | | | |
| Effect of self-interstitial cluster migration on helium diffusion in iron, <i>M.J. Caturla and C.J. Ortiz</i> | 141 | | |
| The influence of non-equilibrium fluctuations on radiation damage and recovery of metals under irradiation, <i>V.I. Dubinko and V.F. Klepikov</i> | 146 | | |
| Effect of helium on irradiation-induced hardening of iron: A simulation point of view, <i>R. Schäublin and Y.L. Chiu</i> | 152 | | |
| Diffusion coefficients and thermal stability of small helium–vacancy clusters in iron, <i>V.A. Borodin and P.V. Vladimirov</i> | 161 | | |
| Characterization of dislocation loops and chromium-rich precipitates in ferritic iron–chromium alloys as means of void swelling suppression, <i>D. Terentyev, P. Olsson, L. Malerba and A.V. Barashev</i> | 167 | | |
| Materials for fusion: Experimentation | | | |
| Actively cooled plasma facing components in Tore Supra: From material and design to operation, <i>Ph. Magaud, P. Monier-Garbet, J.M. Travère and A. Grosman</i> | 174 | | |
| Helium behaviour and vacancy defect distribution in helium implanted tungsten, <i>A. Debelle, M.F. Barthe, T. Sauvage, R. Belamhawal, A. Chelgoum, P. Desgardin and H. Labrim</i> | 181 | | |
| Application of laser assisted technologies for fabrication of functionally graded coatings and objects for the International Thermonuclear Experimental Reactor components, <i>I. Yadroitsev, Ph. Bertrand, B. Laget and I. Smurov</i> | 189 | | |
| Interface reactions between silicon carbide and interlayers in silicon carbide–copper metal–matrix composites, <i>T. Köck, A. Brendel and H. Bolt</i> | 197 | | |
| Silicon displacement threshold energy determined by electron paramagnetic resonance and positron annihilation spectroscopy in cubic and hexagonal poly- | | | |
| types of silicon carbide, <i>X. Kerbiriou, M.-F. Barthe, S. Esnouf, P. Desgardin, G. Blondiaux and G. Petite</i> | | 202 | |
| Development of multifilamentary niobium–titanium and niobium–tin strands for the International Thermonuclear Experimental Reactor project, <i>L. Zhou, P.X. Zhang, X.D. Tang, X.H. Liu, Y.F. Lu, P.D. Weng, G. Grunblatt, G.K. Hoang and C. Verwaerde</i> | | 208 | |
| Nuclear reaction analysis with ion microbeam of cross sections of surface layers deposited in a tokamak divertor, <i>H. Bergsäker, B. Emmoth, P. Petersson, G. Possnert, J.P. Coad, J. Likonen and T. Renvall</i> | | 215 | |
| Radiation-optical characteristics of quartz glass and sapphire, <i>A.Kh. Islamov, E.M. Ibragimova and I. Nuritdinov</i> | | 222 | |
| Materials for spallation | | | |
| Critical parameters and equation of state for heavy liquid metals, <i>K. Morita, V. Sobolev and M. Flad</i> | | 227 | |
| Thermophysical properties of lead and lead–bismuth eutectic, <i>V. Sobolev</i> | | 235 | |
| Gen IV materials | | | |
| High temperature corrosion of a nickel base alloy by helium impurities, <i>F. Rouillard, C. Cabet, K. Wolski, A. Terlain, M. Tabarant, M. Pijolat and F. Valdivieso</i> | | 248 | |
| An X-ray absorption spectroscopy study of an oxide dispersion strengthened steel, <i>M.A. Pouchon, A.J. Kropf, A. Froideval, C. Degueldre and W. Hoffelner</i> | | 253 | |
| Microstructural analysis of candidate steels pre-selected for new advanced reactor systems, <i>A. Zeman, L. Debarberis, J. Kočík, V. Slugeň and E. Keilová</i> | | 259 | |
| Effects of ion beam mixing of silicon carbide film deposited onto metallic materials for application to nuclear hydrogen production, <i>J.-W. Park, Y. Chun and J. Chang</i> | | 268 | |

Gen II & III materials

- Local atomic structure in iron copper binary alloys: An extended X-ray absorption fine structure study, *G. Kuri, C. Degueldre, J. Bertsch and J. Rothe* 274
- Tensile properties and internal friction study of dislocation movement in iron–copper system as a function of copper precipitation, *M.J. Konstantinović, A. Almazouzi, M. Scibetta and E. van Walle* 283
- Mechanical properties–microstructure correlation in neutron irradiated heat-affected zones of austenitic stainless steels, *R. Stoenescu, R. Schaeublin, D. Gavillet and N. Baluc* 287
- Influence of self-interstitial mobility on damage accumulation in zirconium under fission irradiation conditions, *C. Arevalo, M.J. Caturla and J.M. Perlado* 293
- The irradiation effects on zirconium alloys, *Gh. Negut, M. Ancuta, V. Radu, S. Ionescu, V. Stefan, O. Uta, I. Priscearu and N. Danila* 300
- High temperature creep properties of zirconium and Zircaloy-4 in vacuum and oxygen environments, *G. Moulin, R. El Tahhan, J. Favergeon, M. Bigerelle and M. Viennot* 309
- Variable incidence angle – X-ray absorption spectroscopy for the study of Zircaloy corrosion layers, *C. Degueldre, M. Kastoryano and K. Dardenne* 316

Fuel

- Mechanistic modelling of uranium fuel evolution and fission product migration during irradiation and heating, *M.S. Veshchunov, R. Dubourg, V.D. Ozrin, V.E. Shestak and V.I. Tarasov* 327
- Processing of magnesia–pyrochlore composites for inert matrix materials, *S.J. Yates, P. Xu, J. Wang, J.S. Tulenko and J.C. Nino* 336
- Structural investigation on an aged americium transmutation fuel, *M. Walter, J. Somers, A. Fernandez, D. Haas, K. Dardenne and M.A. Denecke* 343
- Granulation and infiltration processes for the fabrication of minor actinide fuels, targets and conditioning matrices, *C. Nästren, A. Fernandez, D. Haas, J. Somers and M. Walter* 350
- Dispersion type zirconium matrix fuels fabricated by capillary impregnation method, *A. Savchenko, I. Kononov, A. Vatulin, A. Morozov, V. Orlov, O. Uferov, S. Ershov, A. Laushkin, G. Kulakov, S. Maranchak and Z. Petrova* 356
- Xenon migration behaviour in titanium nitride, *S. Gavarini, N. Toulhoat, C. Peaucelle, P. Martin, J. Mende, Y. Pipon and H. Jaffrezic* 364
- Prediction of oxygen potential in americium thorium oxides phase of a cermet fuel, *M. Osaka, K. Kurosaki and S. Yamanaka* 374

Waste forms I

- Perspectives on the closed fuel cycle – Implications for high-level waste matrices, *J.-M. Gras, R.D. Quang,*

- H. Masson, T. Lieven, C. Ferry, C. Poinssot, M. Debes and J.-M. Delbecq* 383
- A science-based approach to understanding waste form durability in open and closed nuclear fuel cycles, *M.T. Peters and R.C. Ewing* 395
- An improved model to evaluate the oxidation kinetics of uranium dioxide during dry storage, *A. Poulesquen, L. Desgranges and C. Ferry* 402
- Gap and grain boundaries inventories from pressurized water reactor spent fuels, *D. Roudil, C. Jégou, V. Broudic, B. Muzeau, S. Peugeot and X. Deschanel* 411
- Thermal diffusion of chlorine in uranium dioxide studied by secondary ion mass spectrometry and X-ray absorption spectroscopy, *Y. Pipon, N. Toulhoat, N. Moncoffre, L. Raimbault, A.M. Scheidegger, F. Farges and G. Carlot* 416
- Neptunium interaction with uranium dioxide in aqueous solution, *O.N. Batuk, St.N. Kalmykov, V.G. Petrov, E.V. Zakharova, Yu.A. Teterin, A.Yu. Teterin, V.I. Shapovalov and M.J. Haire* 426
- Helium release from plutonium and curium-doped zirconolite, *T. Wiss, X. Deschanel, J.-P. Hiernaut, D. Roudil, S. Peugeot and V.V. Rondinella* 431
- Ion beam irradiation of lanthanum and thorium-doped yttrium titanates, *J. Lian, F.X. Zhang, M.T. Peters, L.M. Wang and R.C. Ewing* 438
- Effect of gold ion irradiation on helium migration in fluoroapatites investigated with nuclear reaction analysis, *S. Miro, F. Studer, J.-M. Costantini, P. Berger, J. Haussy, P. Trouslard and J.-J. Grob* 445
- Actinide solubility-controlling phases during the dissolution of phosphate ceramics, *E. Du Fou de Kerdaniel, N. Clavier, N. Dacheux, O. Terra and R. Podor* 451
- Irradiation effects on thorium phosphate diphosphate: Chemical durability and thermodynamic study, *C. Tamain, N. Dacheux, F. Garrido and L. Thomé* 459

Waste forms II

- Solid state diffusion during nuclear glass residual alteration in solution, *T. Chave, P. Frugier, A. Ayrat and S. Gin* 466
- Effect of alpha radiation on the leaching behaviour of nuclear glass, *S. Peugeot, V. Broudic, C. Jégou, P. Frugier, D. Roudil, X. Deschanel, H. Rabiller and P.Y. Noel* 474
- Behaviour of simplified nuclear waste glasses under gold ions implantation: A microluminescence study, *J. de Bonfils, G. Panczer, D. de Ligny, S. Peugeot and B. Champagnon* 480
- Corrosion of iron: A study for radioactive waste canisters, *S. B. Lagha, D. Crusset, I. Mabile, M. Tran, M.C. Bernard and E. Sutter* 485
- Modelling glass alteration in an altered argillaceous environment, *O. Bildstein, L. Trotignon, C. Pozo and M. Jullien* 493
- Effect of cobalt hydroxo-sulphide on organic material radiolysis, *C. Pichon, N. Millard-Pinard, F. Valdivieso, A. Chevarier, M. Pijolat and P.C. Leverd* 502
