Proceedings of the Eighth International Workshop on Spallation Materials Technology (IWSMT-8)

Preface	ix	Rudimentary investigation of the HIP process for tungsten target, <i>Y. Xu, J. Zhang and H. Li</i>	97
Spallation sources - Operation and development		Behavior of ferritic/martensitic steels after n-irradiation at 200 and 300 °C, <i>M. Matijasevic, E. Lucon and A. Almazouzi</i>	101
Overview of the SNS target system testing and initial beam operation experience, <i>T. McManamy, A. Crabtree, D. Lousteau, J. DeVore, L. Jacobs and M. Rennich</i>	1	Tensile properties of EC316LN irradiated in SINQ to 20 dpa, <i>Y. Dai, G.W. Egeland and B. Long</i>	109
MEGAPIE at SINQ – The first liquid metal target driven by a megawatt class proton beam, <i>W. Wagner, F. Gröschel, K. Thomsen and H. Heyck</i>	12	Tensile properties of ferritic/martensitic steels irradiated in STIP-I, <i>Y. Dai, B. Long and Z.F. Tong</i>	115
The materials test station: A fast-spectrum irradiation facility, <i>E.J. Pitcher</i>	17	Metallography studies and hardness measurements on ferritic/ martensitic steels irradiated in STIP, <i>H. Zhang, B. Long and Y. Dai</i>	122
Present status of study on development of materials resistant to radiation and beam impact, <i>M. Kawai, H. Kokawa, M. Michiuchi, H. Kurishita, T. Goto, M. Futakawa, T. Yoshiie, A. Hasegawa, S. Watanabe, T. Yamamura, N. Hara, A. Kawasaki and K. Kikuchi</i>	21	Modeling and simulation of radiation damage in materials	
The present status of R&D for the muon target at J-PARC: The development of silver-brazing method for graphite, <i>S. Makimura, H. Ozaki, H. Okamura, M. Futakawa, T. Naoe, Y. Miyake, N. Kawamura, K. Nishiyama and M. Kawai</i>	28	Reaction kinetics analysis of damage evolution in accelerator driven system beam windows, <i>T. Yoshiie, Q. Xu, K. Sato, K. Kikuchi and M. Kawai</i>	132
Radiation damage and He effects		Modeling and simulation of irradiation hardening in structural ferritic steels for advanced nuclear reactors, <i>C. Deo, C. Tomé, R. Lebensohn and S. Maloy</i>	136
Development of ultra-fine grained W-(0.25–0.8)wt%TiC and its superior resistance to neutron and 3 MeV He-ion irradiations, <i>H. Kurishita, S. Kobayashi, K. Nakai, T. Ogawa, A. Hasegawa, K. Abe, H. Arakawa, S. Matsuo, T. Takida, K. Takebe, M. Kawai and N. Yoshida</i>	34	Interaction of $\langle 1\ 0\ 0 \rangle$ and $\frac{1}{2}\langle 1\ 1\ 1 \rangle$ dislocation loops with point defects in ferritic alloys, <i>D. Terentyev and L. Malerba</i>	141
Irradiation damage studies of high power accelerator materials, <i>N. Simos, H.G. Kirk, P. Thieberger, H. Ludewig, J.O. Connor, L. Mausner, P.-T. Trung, K.T. McDonald, K. Yoshimura and J.R.J. Bennett</i>	41	Effect of Cr on the mechanical properties and microstructure of Fe–Cr model alloys after n-irradiation, <i>M. Matijasevic and A. Almazouzi</i>	147
Low cycle fatigue of Eurofer 97, <i>P. Marmy and T. Kruml</i>	42	Cavitation erosion and pitting	
Thermal stability of nano-structured ferritic alloy, <i>P. Miao, G.R. Odette, T. Yamamoto, M. Alinger and D. Klingensmith</i>	49	Development of a gas layer to mitigate cavitation damage in liquid mercury spallation targets, <i>D. Felde, B. Riemer and M. Wendel</i>	155
The small ball punch test at FZJ, <i>D. Finarelli, F. Carsughi and P. Jung</i>	65	Cavitation damage experiments for mercury spallation targets at the LANSCE – WNR in 2005, <i>B. Riemer, J. Haines, M. Wendel, G. Bauer, M. Futakawa, S. Hasegawa and H. Kogawa</i>	162
Dose dependence of mechanical properties in tantalum and tantalum alloys after low temperature irradiation, <i>T.S. Byun and S.A. Maloy</i>	72	Cavitation-erosion resistance of 316LN stainless steel in mercury containing metallic solutes, <i>S.J. Pawel and L.K. Mansur</i>	174
Tensile behaviour of 9Cr–1Mo tempered martensitic steels irra- diated up to 20 dpa in a spallation environment, <i>J. Henry, X. Averty, Y. Dai and J.P. Pizzanelli</i>	80	Cavitation damage prediction for spallation target vessels by assessment of acoustic vibration, <i>M. Futakawa, H. Kogawa, S. Hasegawa, Y. Ikeda, B. Riemer, M. Wendel, J. Haines, G. Bauer, T. Naoe, K. Okita, A. Fujiwara, Y. Matsumoto and N. Tanaka</i>	182
Status of materials handbooks for particle accelerator and nuclear reactor applications, <i>S. Maloy, B. Rogers, W. Ren and P. Rittenhouse</i>	94	Effect of wettability on bubble formation at gas nozzle under stagnant condition, <i>H. Kogawa, T. Shobu, M. Futakawa, A. Bucheeri, K. Haga and T. Naoe</i>	189
		Numerical study on pressure wave propagation in a mercury loop, <i>H. Kogawa, S. Hasegawa, M. Futakawa, B. Riemer, M. Wendel and J. Haines</i>	195

Lead–bismuth eutectic corrosion and embrittlement

Nano-indentation measurement of oxide layers formed in LBE on F/M steels, <i>P. Hosemann, J.G. Swadener, J. Welch and N. Li</i>	201
Twin Astir: An irradiation experiment in liquid Pb–Bi eutectic environment, <i>J. Van den Bosch, A. Al Mazouzi, Ph. Benoit, R.W. Bosch, W. Claes, B. Smolders, P. Schuurmans and H. Ait Abderrahim</i>	206
SIMS investigation of the spallation and transmutation products production in lead, <i>D. Gavillet, M. Martin and Y. Dai</i>	213
Liquid Pb–Bi embrittlement effects on the T91 steel after different heat treatments, <i>B. Long, Z. Tong, F. Gröschel and Y. Dai</i>	219
Stressed capsules of austenitic and martensitic steels irradiated in SINQ Target-4 in contact with liquid lead–bismuth eutectic, <i>Y. Dai, D. Gavillet and R. Restani</i>	225
Corrosion rate of parent and weld materials of F82H and JPCA steels under LBE flow with active oxygen control at 450 and 500 °C, <i>K. Kikuchi, K. Kamata, M. Ono, T. Kitano, K. Hayashi and H. Oigawa</i>	232
The electrical impedance response of steel surface oxide layers in molten lead–bismuth eutectic, <i>J.F. Stubbins, A.M. Bolind and X. Chen</i>	243
Liquid metal embrittlement of T91 and 316L steels by heavy liquid metals: A fracture mechanics assessment, <i>T. Auger, Z. Hamouche, L. Medina-Almazán and D. Gorse</i>	253

Low cycle fatigue tests of surface modified T91 steel in 10^{-6} wt% oxygen containing $Pb_{45}Bi_{55}$ at 550 °C, <i>A. Weisenburger, A. Heinzel, C. Fazio, G. Müller, V.G. Markow and A.D. Kastanov</i>	261
---	-----

Neutronics assessment and target design

Moderator poison design and burn-up calculations at the SNS, <i>W. Lu, P.D. Ferguson, E.B. Iverson, F.X. Gallmeier and I. Popova</i>	268
Radiation flux and damage at accelerator-driven spallation neutron sources, <i>M.S. Wechsler and W. Lu</i>	275
Thermal shock measurements and modelling for solid high-power targets at high temperatures, <i>J.R.J. Bennett, G.P. Skoro, C. Booth, S.J. Brooks, R.A. Brownsword, T.R. Edgecock, C.J. Densham, S.A. Gray, A.J. McFarland, N. Simos and D. Wilkins</i>	285
An innovative target for the RACE HP experiment, <i>P. Agostini, M. Ciotti, C. Krakowiak, C. Petrovich, G. Benamati, A. Bergeron, N. Elmi, G. Granget, L. Sansone and M. Schikorr</i>	290
Irradiation damage to the beam window in the 800MWth accelerator-driven system, <i>K. Nishihara and K. Kikuchi</i>	298
