

# *Additions and Corrections*

---

Vol. 67, 2002

**Ronald R. Sauers.** Inversion vs Retention of Configuration in Gas-Phase Ammonium Ion/Alcohol Reactions.

Page 1226. The last sentence of the first paragraph should read, "...the retention process was favored by ca. 0.3 kcal/mol (B3LYP/6-31+G\*) with  $\Delta(\Delta G^\ddagger) = 1.2$  kcal/mol.
