

Valerije Vrčak, Martin Saunders, and Olga Kronja*
Rearrangement Pathways of Five-Membered Ring Enlargement
in Carbocations: Quantum Chemical Calculations and Deuterium
Kinetic Isotope Effects.

Page 1859. In the first paragraph, the sentence “Enlargement of the C ring is accompanied...” should read as follows: “Enlargement of the C ring leads to the protosteryl cation (Scheme 1), which is a common intermediate for all steroid hormones.”

Page 1859, Scheme 1. The structure of the tricyclic carbocation should be changed to
