

# JOC *Additions and Corrections*

**Efficient Total Synthesis of (–)-*cis*-Clavicipitic Acid** [*J. Org. Chem.* **2009**, *74*, 6859]. Zhengren Xu, Qingjiang Li, Lihe Zhang, and Yanxing Jia\*

Pages 6859–6862. The configurations of clavicipitic acids and their derivatives are misassigned by simply comparison of the NMR data with those reported previously. Thus, the assignment of *cis*- and *trans*-configurations (**1a**, **1b**, **9a**, **9b**, **10a**, **10b**) should be interchanged throughout the paper. Our detailed reassignments will be reported elsewhere.
