J. Org. Chem. **2008**, *73*, 5206–5209. DOI: 10.1021/jo800898k.

Upon further investigation of the platinum- and gold-catalyzed hydroamidation of alkynylamides described in this paper, we found that the reactions shown in Schemes 2 and 4 only afford 7-endo products, rather than the 6-exo isomers we originally reported.
