

SUBJECT INDEX

Aluminium

- Alkylidene-bridged heterobimetallic complexes, activation toward electrophilic attack (S.M. Clift, J. Schwartz), C5
- Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohydrates (Y. Yamamoto, T. Komatsi, K. Murayama), 31
- Organoaluminium and organotitanium reagents used in nucleophilic cleavage of acetals (A. Mori, J. Fujiwara, K. Maruoka, H. Yamamoto), 83
- Organoaluminium compounds, synthesis of vinyl- and di-allenes assisted by (G.A. Tolstikov, T.Yu. Romanova, A.V. Kuchin), 71
- Palladium-catalysed cyclisation via intramolecular allylation of alkenyl-metals (S. Chatterjee, E.-I. Negishi), C1
- Sulphonyl- and silyl-substituted hydrocarbons as versatile carbanion precursors in organic synthesis (J.J. Eisch, M. Behrooz, S.K. Dua), 121
- Transition-metal catalysed stannyl-metalation of acetylenes and conversion of enol triflates and vinyl iodides into vinylstannanes (S. Matsubara, J.-I. Hibino, Y. Morizawa, K. Oshima, H. Nozaki), 163
- Zirconium and titanium, complexes as catalysts in olefin carbometallation assisted by alkyl-magnesium and -aluminium derivatives (U.M. Dzhe-milev, O.S. Vostrikova), 43

Beryllium

- Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Boron

- Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohydrates (Y. Yamamoto, T. Komatsi, K. Murayama), 31

- Lithium tris(phenylthio)methane for homologation of trialkylboranes, convenient syntheses of ketones and t-carbinols (A. Pelter, J.M. Rao), 65
- Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Caesium

- Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Cerium

- Organocerium(III) reagents, selective 1,2-addition to α,β -unsaturated carbonyl compounds of (T. Imamoto, Y. Sugiura), C21

Chromium

- Hexacarbonylchromium as catalyst precursor in homogeneous hydrogenation of ketones in the presence of bases (L. Markó, Z. Nagy-Magos), 193
- Pentacarbonylchromium complexes, reactions with 1-alkynols of (K.H. Dötz, W. Sturn), 205

Cobalt

- Cobalt-catalysed carbonylation of aryl halides (M. Foà, F. Francalanci, E. Bencini, A. Gardano), 293
- η^5 -CpCo(CO)(maleoyl) and η^5 -CpCo(CO)-(phthaloyl) complexes, chemistry of (L.S. Liebeskind, C.F. Jewell), 305
- Terminal epoxides, selective catalysed rearrangement to methyl ketones (J. Prandi, J.L. Namy, G. Menoret, H.B. Kagan), 449
- (\pm)-3-*p*-Toluenesulphinyl-2-pyrone, organometallic route to (G.H. Posner, W. Harrison), C27

Copper

Cyanocuprates " $R_t(2\text{-thienyl})Cu(CN)Li_2$ ", efficient reagents promoting selective ligand transfer (B.H. Lipshutz, J.A. Kozlowski, D.A. Parker, S. Nguyen, K.E. McCarthy), 437

Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Sulphonyl- and silyl-substituted hydrocarbons as versatile carbanion precursors in organic synthesis (J.J. Eisch, M. Behrooz, S.K. Dua), 121

Iridium

Bis(1,4-diphenylphosphino)butane-rhodium and pyridine(tricyclohexylphosphine)iridium, stereochemical control by carboxylate groups in homogeneous hydrogenation catalysed by (J.M. Brown, S.A. Hall), 333

Iron

π -Allyltricarbonyliron lactone, complexes, synthesis of parasorbic acid, the carpenter bee pheromone and malyn-golide via (A.M. Horton, S.V. Levy), C17

Carbonylation of an optically active organopalladium, asymmetric induction during (L.L. Trotskaya, V.I. Sokolov), 389

Chiral acetate enolate equivalent for the synthesis of β -hydroxy acids and esters; X-ray crystal structure of RR,SS - $[(\eta^5\text{-C}_5\text{H}_5)_2\text{Fe}(\text{CO})(\text{PPh}_3)_2(\text{COCH}_2\text{CH}(\text{OH})\text{CH}_2\text{CH}_3)]$ (S.G. Davies, I.M. Dordor-Hedgecock, P. Warner, R.H. Jones, K. Prout), 213

Desulphurisation of benzylic mercaptans by dodecacarbonyltriiron under acidic and biphasic conditions (H. Alper, F. Sibtain), 225

Iron-catalysed allylic alkylation (S.J. Ladoulis, K.M. Nicholas), C13

Organoiron, complexes used in the synthesis of sterically crowded spirocyclic compounds; approach to acorane and cedrol synthesis (A.J. Pearson, T.R. Perrior), 253

Organoiron ethylidene reagent used as transfer reagent in direct conversions of alkenes into methyl-substituted cyclopropanes (K.A.M. Kremer, P. Helquist), 231

Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Phosphine-nickel and -palladium complexes, regio- and stereo-chemistry in allylation of aryl-Grignard reagents catalysed by (T. Hayashi, M. Konishi, K.-I. Yokota, M. Kumada), 359

Tricarbonylmethoxycyclohex-diene- and -dienyl-iron complexes, preparation, properties and applications of (*Review*) (A.J. Birch, L.F. Kelly), 267

Lithium

Cyanocuprates " $R_t(2\text{-thienyl})Cu(CN)Li_2$ ", efficient reagents promoting selective ligand transfer (B.H. Lipshutz, J.A. Kozlowski, D.A. Parker, S. Nguyen, K.E. McCarthy), 437

α -Ethoxybutenyltributyltins, precursors of α -ethoxybutenyllithiums, application to the synthesis of enones via homoallylic α -glycolic ethers (J.-P. Quintard, B. Elisondo, T. Hattich, M. Pereyre), 149

1-Lithio- and 1-magnesium-2-pivaloyl-1,2,3,4-tetrahydroisoquinoline, steric course of addition to aldehydes and ketones of; X-ray structure of the organomagnesium reagent (D. Seebach, J. Hansen, P. Seiler, J.M. Gromek), 1

Lithium tris(phenylthio)methane for homologation of trialkylboranes, convenient synthesis of ketones and *t*-carbinols (A. Pelter, J.M. Rao), 65

Organocerium(III) reagents, selective 1,2-addition to α,β -unsaturated carbonyl compounds of (T. Imamoto, Y. Sugiura), C21

Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15

Sulphonyl- and silyl-substituted hydrocarbons as versatile carbanion precursors in organic synthesis (J.J. Eisch, M. Behrooz, S.K. Dua), 121

(\pm)-3-*p*-Toluenesulphonyl-2-pyrone, organometallic route to (G.H. Posner, W. Harrison), C27

Magnesium

Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohy-

- drates (Y. Yamamoto, T. Komatsi, K. Murayama), 31
- Hydromagnesation reaction, preparation of Grignard reagents from and their uses in organic synthesis (F. Sato), 53
- 1-Lithio- and 1-magnesium-2-pivaloyl-1,2,3,4-tetrahydroisoquinoline, steric course of addition to aldehydes and ketones of; X-ray structure of the organomagnesium reagent (D. Seebach, J. Hansen, P. Seiler, J.M. Gromek), 1
- Organocerium(III) reagents, selective 1,2-addition to α,β -unsaturated carbonyl compounds of (T. Imamoto, Y. Sugiura), C21
- Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15
- Phosphine-nickel and -palladium complexes, regio- and stereo-chemistry in allylation of aryl-Grignard reagents catalysed by (T. Hayashi, M. Konishi, K.-I. Yokota, M. Kumada), 359
- Transition-metal catalysed stannylmetalation of acetylenes and conversion of enol triflates and vinyl iodides into vinylstannanes (S. Matsubara, J.-I. Hibino, Y. Morizawa, K. Oshima, H. Nozaki), 163
- Zirconium and titanium complexes as catalysts in olefin carbometallation assisted by alkyl-magnesium and -aluminium derivatives (U.M. Dzhemilev, O.S. Vostrikova), 43
- Manganese**
- Terminal epoxides, selective catalysed rearrangement to methyl ketones (J. Prandi, J.L. Namy, G. Menoret, H.B. Kagan), 449
- Metalloenes**
- Carbonylation of an optically active organopalladium, asymmetric induction during (L.L. Trotskaya, V.I. Sokolov), 389
- Phosphine-nickel and -palladium complexes, regio- and stereo-chemistry in allylation of aryl-Grignard reagents, catalysed by (T. Hayashi, M. Konishi, K.-I. Yokota, M. Kumada), 359
- Nickel**
- Nickel-catalysed hydrocyanation of silylalkynes, regio- and stereo-chemical control in (N.J. Fitzmaurice, W.R. Jackson, P. Perlmutter), 375
- Nickel-catalysed oligomerisation of functionalised conjugated dienes (A. Tenaglia, P. Brun, B. Waegell), 343
- Phosphine-nickel and -palladium complexes, regio- and stereo-chemistry in allylation of aryl-Grignard reagents catalysed by (T. Hayashi, M. Konishi, K.-I. Yokota, M. Kumada), 359
- Sulphonyl- and silyl-substituted hydrocarbons as versatile carbanion precursors in organic synthesis (J.J. Eisch, M. Behrooz, S.K. Dua), 121
- Transition-metal catalysed stannylmetalation of acetylenes and conversion of enol triflates and vinyl iodides into vinylstannanes (S. Matsubara, J.-I. Hibino, Y. Morizawa, K. Oshima, H. Nozaki), 163
- Palladium**
- π -Allylpalladium complexes, catalysed regioselective substitution of carbanions and ligands in primary and tertiary terpene derivatives by (T. Cuvigny, M. Julia, C. Rolando), 395
- Aromatic acid derivatives, palladium-catalysed synthesis by carbonylation of aryl iodides and Alk_3SnNu (Nu = MeO, Et, N, PhS, EtS) (N.A. Bumagin, Yu.V. Gulevich, I.P. Beletskaya), 415
- Carbonylation of an optically active organopalladium, asymmetric induction during (L.L. Trotskaya, V.I. Sokolov), 389
- Palladium-catalysed cyclisation via intramolecular allylation of alkenylmetals (S. Chatterjee, E.-I. Negishi), C1
- Palladium(0) catalysed (3 + 2) cycloaddition used in synthesis of a precursor to pentalene (R. Baker, R.B. Keen), 419
- Palladium-catalysed cyclocarbonylation reaction leading to synthons for cyclopentanoid chemistry (E. Amari, M. Catellani, G.P. Chiusoli), 383
- Palladium-catalysed reactions of allylic substrates, stereocontrol in (R.E. Nordberg, J.-E. Bäckvall), C24
- Phosphine-nickel and -palladium complexes, regio- and stereo-chemistry in allylation of aryl-Grignard reagents catalysed by (T. Hayashi, M. Konishi, K.-I. Yokota, M. Kumada), 359

Transition-metal catalysed stannylmetal-
lation of acetylenes and conversion of
enol triflates and vinyl iodides into
vinylstannanes (S. Matsubara, J.-I.
Hibino, Y. Morizawa, K. Oshima,
H. Nozaki), 163

Phosphorus

Bis(1,4-diphenylphosphino)butane-
rhodium and pyridine(tricyclohexyl-
phosphine) iridium, stereochemical
control by carboxylate groups in
homogeneous hydrogenation catalysed
by (J.M. Brown, S.A. Hall), 333

Bis(di-tertiary-phosphine)rhodium chiral
complexes, catalytic decarbonylation,
hydroacylation and resolution of
racemic pent-4-enals by (B.R. James,
C.G. Young), 321

Phosphine-nickel and -palladium com-
plexes, regio- and stereo-chemistry
in allylation of aryl-Grignard reagents
catalysed by (T. Hayashi, M. Konishi,
K.-I. Yokota, M. Kumada), 359

Phosphine-substituted carbonylruthenium
carboxylates, asymmetric hydrogenation
of tiglic acid in the presence of
(U. Matteoli, G. Menchi, P. Frediani,
M. Bianchi, F. Piacenti), 281

Platinum

Cyclopropane transformation into rigid
hydrocarbon systems catalysed by
platinum(II) (P.W. Jennings, R.E.
Ekeland, M.D. Waddington, T.W.
Hanks), 429

Potassium

Pentadienyl compounds, structural analysis
and applications in organic synthesis
of (H. Yasuda, A. Nakamura), 15

Rhodium

Bis(1,4-diphenylphosphino)butane-
rhodium and pyridine(tricyclohexyl-
phosphine) iridium, stereochemical
control by carboxylate groups in
homogeneous hydrogenation catalysed
by (J.M. Brown, S.A. Hall), 333

Bis(di-tertiary-phosphine)rhodium
chiral complexes, catalytic decarbonylation,
hydroacylation and resolution
of racemic pent-4-enals by (B.R.
James, C.G. Young), 321

Rubidium

Pentadienylmetal compounds, structural
analysis and applications in organic
synthesis of (H. Yasuda, A. Nakamura),
15

Ruthenium

Phosphine-substituted carbonylruthenium
carboxylates, asymmetric hydrogenation
of tiglic acid in the presence of
(U. Matteoli, G. Menchi, P. Frediani,
M. Bianchi, F. Piacenti), 281

Silicon

Allylic organometallic way to control
acyclic stereochemistry and its applica-
tion to the synthesis of carbohydrates
(Y. Yamamoto, T. Komatsi, K.
Murayama), 31

Allylsilanes and allylstannanes, allyl
coupling reactions with allylic halides,
ethers and acetates of (A. Hosomi,
T. Imai, M. Endo, H. Sakurai), 95

Nickel-catalysed hydrocyanation of
silylalkynes, regio- and stereo-chemical
control in (N.J. Fitzmaurice, W.R.
Jackson, P. Perlmutter), 375

Pentadienylmetal compounds, structural
analysis and applications in organic
synthesis of (H. Yasuda, A. Nakamura),
15

Silyl group rearrangement, synthetic
organic reactions by means of reactive
nucleophiles generated through
(I. Kuwajima), 137

Sulphonyl- and silyl-substituted hydro-
carbons as versatile carbanion pre-
cursors in organic synthesis (J.J. Eisch,
M. Behrooz, S.K. Dua), 121

Trialkylsilylallyl anion, alkylation applied
to stereoselective synthesis of some
insect sex pheromones of (T.H. Chan,
K. Koumaglo), 109

Sulphur

Cyanocuprates " $R_4(2\text{-thienyl})Cu(CN)Li_2$ ",
efficient reagents promoting selective
ligand transfer (B.H. Lipshutz, J.A.
Kozlowski, D.A. Parker, S. Nguyen,
K.E. McCarthy), 437

Desulphurisation of benzylic mercaptans
by dodecacarbonyltriiron under acidic
and biphasic conditions (H. Alper,
F. Sibtain), 225

- Lithium tris(phenylthio)methane for homologation of trialkylboranes, convenient syntheses of ketones and t-carbinols (A. Pelter, J.M. Rao), 65
- Sulphonyl- and silyl-substituted hydrocarbons as versatile carbanion precursors in organic synthesis (J.J. Eisch, M. Behrooz, S.K. Dua), 121

Thallium

- Electrophilic thallation of electron-rich arenes, (E.C. Taylor, A.H. Katz, S.I. Alvarado, A. McKillop), C9

Tin

- Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohydrates (Y. Yamamoto, T. Komatsi, K. Murayama), 31
- Allylsilanes and allylstannanes, allyl coupling reactions with allylic halides, ethers and acetates of (A. Hosomi, T. Imai, M. Endo, H. Sakurai), 95
- Aromatic acid derivatives, palladium-catalysed synthesis by carbonylation of aryl iodides and Alk_3SnNu (Nu = MeO, Et₂N, PhS, EtS) (N.A. Bumagin, Yu.V. Gulevich, I.P. Beletskaya), 415
- α -Ethoxybutenyltributyltins, precursors of α -ethoxybutenyllithiums, application to the synthesis of enones via homoallylic α -glycolic ethers (J.-P. Quintard, B. Elissondo, T. Hattich, M. Pereyre), 149
- γ -Stannyl alcohols, stereospecific cyclopropane synthesis from (I. Fleming, C.J. Urch), 173
- Terminal epoxides, selective catalysed rearrangement to methyl ketones (J. Prandi, J.L. Namy, G. Menoret, H.B. Kagan), 449
- Transition-metal catalyzed stannylmetalation of acetylenes and conversion of enol triflates and vinyl iodides into vinylstannanes (S. Matsubara, J.-I. Hibino, Y. Morizawa, K. Oshima, H. Nozaki), 163

Titanium

- Alkylidene-bridged heterobimetallic complexes, activation toward electrophilic attack (S.M. Clift, J. Schwartz), C5
- Organoaluminium and organotitanium reagents used in nucleophilic cleavage of acetals (A. Mori, J. Fujiwara, K. Maruoka, H. Yamamoto), 83
- Zirconium and titanium complexes as catalysts in olefin carbometallation assisted by alkyl-magnesium and -aluminium derivatives (U.M. Dzhemilev, O.S. Vostrikova), 43

Zinc

- Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohydrates (Y. Yamamoto, T. Komatsi, K. Murayama), 31
- Palladium-catalysed cyclisation via intramolecular allylation of alkenylmetals (S. Chatterjee, E.-I. Negishi), C1
- Transition-metal catalysed stannylmetalation of acetylenes and conversion of enol triflates and vinyl iodides into vinylstannanes (S. Matsubara, J.-I. Hibino, Y. Morizawa, K. Oshima, H. Nozaki), 163

Zirconium

- Alkylidene-bridged heterobimetallic complexes, activation toward electrophilic attack (S.M. Clift, J. Schwartz), C5
- Allylic organometallic way to control acyclic stereochemistry and its application to the synthesis of carbohydrates (Y. Yamamoto, T. Komatsi, K. Murayama), 31
- Pentadienylmetal compounds, structural analysis and applications in organic synthesis of (H. Yasuda, A. Nakamura), 15
- Zirconium and titanium complexes as catalysts in olefin carbometallation assisted by alkyl-magnesium and -aluminium derivatives (U.M. Dzhemilev, O.S. Vostrikova), 43
