

Announcement

METALS IN OLEFIN POLYMERIZATION SYMPOSIUM,
to be held in Denver, CO (U.S.A.) on April 5-10, 1987 at the 193rd American
Chemical Society National Meeting

For further information or to submit contributions, contact:

Dr. STEVEN D. ITTEL or ANDREW H. JANOWICZ

*Central Research & Development Department, E. I. du Pont de Nemours & Company,
Inc. Experimental Station, E328 Wilmington, Delaware 19898 (U.S.A.)*

The symposium will focus on catalyst preparation, catalytic and stoichiometric reactions, mechanistic aspects, and novel applications of:

- Coordination polymerization by late transition metals
- Effect of transition metals in free radical polymerizations
- Group transfer polymerization
- Ziegler-Natta catalysis
- Polymerizations by organolanthanides
- Main Group metals in polymerizations
- Other appropriate applications of metals in polymer chemistry
