* Denotes Subject Reviews Editor

Aims and Scope

The *Journal of Organometallic Chemistry* has a long-standing tradition for publishing original papers dealing with theoretical aspects, structural chemistry, synthesis, physical and chemical properties including reaction mechanisms, and practical applications of organometallic compounds.

Because of the growing importance of organometallic complexes in bioorganometallic chemistry and material sciences, on one hand, and of heavier main group elements in organometallic chemistry, on the other hand, the scope of the Journal has been enlarged, and work covering these fields is also considered.

Besides original papers, the *Journal of Organometallic Chemistry* publishes review articles, communications and notes.

Publication information: *Journal of Organometallic Chemistry* (ISSN 0022-328X). For 2006, Volume 691 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (<http://www.elsevier.com/jorganchem>). Further information is available on this journal and other Elsevier products through Elsevier's website: (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

Orders, Claims, and Journal Enquiries

(no manuscript enquiries)
