The Dental Practice Accountant

This software package has been designed by Nick Montague of Kidsons Impey and is a modified version of the Pegasus Capital Gold accounting software. It provides dentists with a variety of accounting functions including direct access to experts, compilation of end of year accounts and tax returns, as well as an appointment diary and patient database. The package aims to enable dentists to compile end of year accounts quickly, with minimal hassle. It includes a dental advice centre and dedicated help line which will provide advice including queries on pension planning, information technology and personal tax planning.

The software has been launched by accountants and

business advisers Kidsons Impey along with Henry Schein Technologies and Pegasus business software.

For further details please contact the Dental Practice Advice Centre, Tel: 0845 603 0424 or Nick Montague, Kidsons Impey, Tel: 01244 327171.

DentalEye imaging system

This imaging system will be of interest to any dentist and orthodontist who wishes to store and utilize photographs, radiographs, and patient documentation in one location. Data can be entered from a variety of sources including intra-oral cameras, digital X-ray systems, scanners, and files. DentalEye can also be used to control the camera or

X-ray system, thus facilitating the capture of images. Images can then be displayed side by side on the screen, manipulated, printed, exported, and/or e-mailed as required (see Figures 1 and 2).

DentalEye is Windows based and is year 2000 compliant. The system is designed to be simple to use and makes extensive use of graphical illustrations. It is also an open

work platform, which means that the purchaser is not limited to one manufacturer of equipment.

Dental Eye has been developed by Dragonfly, a software firm based in Glasgow. Dragonfly also market a Dental Management system and the TeliCam Intra-oral camera.

For further details and a demonstration disc, please contact Ian Logan, Tel: 0141 775 3388.
