

ing a better appreciation of the inter-related interests of medicine and pharmacy.

The program was well calculated to stimulate the interest of the retail druggist in the question of handling vaccines, and the frequency with which the speakers referred to the druggist's responsibility as a distributor emphasized the need for some thought along this line.

In evidence of the fact that druggists uniformly do not appreciate the importance of carefully storing these products the statement was made that the Board of Health in one community had found it necessary to establish distributing depots provided with proper facilities for preserving the potency of vaccines because the retail druggists of that particular section had failed to do so.

That such discreditable conditions need not become general was made clear in Mr. Cliffe's excellent paper (which is published in full) wherein he describes a simple method whereby the retail druggist may meet his obligations in this matter with a minimum of expense and a maximum of credit to himself.

Not the least interesting feature of the meeting was the announcement that future programs will be printed in the Roster of the Philadelphia County Medical Society. This move is in response to the frequently expressed desire of physicians to attend such pharmaceutical meetings as are of interest to the medical practitioner if the programs were brought to their attention. The courtesies extended by the representatives of the Medical Society during the program negotiations were acknowledged by a vote of thanks to Dr. J. Torrance Rugh, Chairman Publication Committee, and to Dr. A. Bern Hirsh, Editor of the Roster.

The program below was the result of the combined efforts of Presidents Stewart and Kimberly, the meeting being a joint one of the Branch and Scientific Section:

"The Production of Smallpox Vaccine," (illustrated with lantern slides), by W. F. Elgin, M. D.

"The Production of Bacterial Vaccines," (illustrated with lantern slides), by A. Parker Hitchens, M. D.

"Precautions to be Observed in Storing Vaccines for Distribution," by Wm. L. Cliffe, Ph. G.

"The Arguments of the Antivaccinists and the Measure of Truth and Error Contained Therein," by Jay F. Schamberg, M. D.

The discussion was participated in by Drs. McFarland, Wadsworth and Royer, of the Coroner's Office and the Pennsylvania Board of Health and by members of the Branch.
