

BIBLIOGRAPHY OF PHARMACEUTICAL RESEARCH

Conducted by H. V. Army, Reporter on the Progress of Pharmacy, Chairman of the Committee on Research.

On these pages, each month, will be found a list of articles on pharmaceutical research that appear in the pharmaceutical and other scientific journals of the world. Whenever possible, the list appearing a certain month will record articles appearing in American journals of the preceding month and articles appearing in foreign journals will be recorded as quickly as possible after the journals reach the Reporter.

All articles appearing in these lists will be presented in abstract form in the bound volumes of the YEAR BOOK, which will be issued as soon after the end of the year represented as editing and printing conditions permit. Those desiring abstracts immediately can obtain same for a fee of one dollar each by communicating with H. V. Army, 115 West 68th St., New York, and arrangements can also be made for securing photographic reproduction of entire articles at moderate prices when such are desired.

OVENS OF DEATH IN ST. ROCH CEMETERY, NEW ORLEANS, LA.

Scene showing the long rows of vaults, wherein lie many dead. The coffins are placed in these "death ovens," and the outer wall is sealed. The large edifice at the left is St. Roch's Chapel, a shrine which is believed by many to have produced miracles in the cure of the sick. Before it can be seen an array of thank offerings and burning tapers are placed before it by those who attributed miraculous cures to the shrine, and by those who were seeking help. The floor of the chapel is of white marble, and the side walls contain tiers of burial vaults. Above an altar is the shrine of St. Roch, the patron saint of health.

The American Pharmaceutical Association will meet in New Orleans during the week of September 5, 1921.
