

# BIBLIOGRAPHY OF PHARMACEUTICAL RESEARCH

Compiled by A. G. DuMez, Reporter on the Progress of Pharmacy.

All articles in these lists will be presented in abstract form in the bound volumes of the YEAR BOOK, which is issued annually. Those desiring abstracts immediately can obtain them for a fee of one dollar each by communicating with A. G. DuMez, University of Maryland, School of Pharmacy, N. W. cor. Lombard and Greene Sts., Baltimore, Maryland.

DETERMINATION OF THE REASONABLE OR PERMISSIBLE  
 MARGIN OF ERROR IN DISPENSING. III. SUPPOSITORIES.\*

BY MARVIN J. ANDREWS.<sup>1</sup>

INTRODUCTION.

This, the third of a series of papers reporting the results of investigations made to determine what may be taken as the permissible margin of error in dispensing,<sup>2</sup> deals with suppositories.

Suppositories called for on prescriptions are usually prepared by mixing the active ingredients with the base in the solid state, then dividing and shaping
