(Seal)

STANLEY B. SIMPSON,  
 Notary Public, City of St. Louis, Mo.

My term expires June 11, 1917.

REPORT OF THE COMMITTEE ON THE WILLIAM PROCTER, JR.  
 MONUMENT FUND.

The Committee on the William Procter, Jr. Monument Fund is pleased to report that sufficient money has now been subscribed for the erection of the proposed monument, and the amount that has been collected will be reported by the Treasurer of the American Pharmaceutical Association at the proper time.

The membership of the Association can well appreciate the pleasure and the relief to your committee in having attained this condition after ten years of patient

THE PROCTER MEMORIAL.  
(MODEL BY EDWARD BERGE.)

and persistent effort. At first we felt disappointed in this project because of a certain lack of interest. A small subscription from each pharmacist would have secured the required sum in the first year of our work, but on reflection we realized that this lack of interest was due to the fact that the character and the history of William Procter, Jr., and the services that he rendered to Pharmacy were naturally not a matter of common knowledge to the pharmacist of this day and generation. He was so conspicuously the early leader of that important period in the development of Pharmacy in this country. Our appeals have been in keeping with his character and the proposition to venerate the memory of the Father of American Pharmacy has been without intention of annoying or embarrassing anyone, and no scheme or other device has been adopted by your committee which was undignified or unprofessional.

Mr. Edward Berge has been selected by your committee as the sculptor for the work, and during the past year we have devoted much time to the details of the monument and can now report a model that is surprisingly exact. On May 3rd a meeting was held at the Philadelphia College of Pharmacy and particular pains were taken to have in attendance those friends and former students of Prof. Procter, who had known him in life. The object of this meeting was to give those intimates of William Procter, Jr. an opportunity to inspect and criticize the model which Mr. Berge had developed from photographs of him and the expressions of approval were very gratifying.

The following resolution was unanimously adopted by that meeting:

*Resolved*, That the work of Mr. John F. Hancock in connection with the Procter Memorial be approved, and that the model and design of Mr. Edward Berge, of Baltimore, for the statue be accepted.

Personal contact with Mr. Berge has been of material advantage in the evolution of this monument and it is the opinion of all who have seen the model that the likeness to Prof. Procter is more than is usual for work of this kind.

We have every assurance that we can obtain a selected site in the Smithsonian Grounds for this statue, but the time of Congress has been so taken up by special legislation, this year, that it was thought advisable by your committee to postpone our efforts in that body until the next session.

With these details attended to, the American Pharmaceutical Association can make its preparation for the unveiling of this monument in Washington in 1917—the Centennial of the birth of William Procter, Jr.

In furtherance of which is appended the following:

*Resolved*, That the Committee on the William Procter, Jr. Monument Fund be authorized and empowered to contract for the monument in all of its details of completion, dedication and transference to the National Government with the power to draw on the Treasurer of the American Pharmaceutical Association from the moneys belonging to the William Procter, Jr. Monument Fund to pay for all resulting expenses.
