This monograph is certainly a unique volume in American pharmaceutical and medical literature. Every one who knows its author and the vast store of historical information at his command, will understand how much special study and painstaking care have been put into the volume. That so unique a book should have demanded a fourth edition should prove to the skeptic that information, commonly designated as being of a general cultural value, can be and is being appreciated by technical and professional students.

To those to whom the carlier editions are not already familiar, the title will impart sufficient information as to the contents. The reviewer, therefore, avails himself of the opportunity to point out that it would be well for other authors to give to their technical treatises a broader aspect. This can, no doubt, best be done by making most of the historical development of the subject treated. In attempting such a treatment it will not suffice to prepare a brief historical statement somewhere in the book. The spirit of historical development, in other words, of the evolution of the subject, should possibly dominate. The scientist, above all others, should know that a mere dogmatic statement of the facts, commonly recognized at the time. does not afford the correct viewpoint. Indeed, the scientist should avoid as much as possible such a presentation. Unfortunately, however, he is among the most guilty in this respect.

That the technical information imparted by Wall's "The Prescription" is proving valuable to students and practitioners is clearly shown by the new editions demanded. Who will deny that, as a stimulus to the study of the historical development of our calling and all that pertains thereto, it is not rendering an even greater service? E. K.

Plant Materials of Decorative Gardening; The Woody Plants. By William Trelease. One vol., pp. 204. Published by the author, Urbana, 1917. (Price, \$1.00.)

As Director of the Wisconsin Pharmaceutical Experiment Station, the writer has had innumerable inquiries about medicinal plants, wild as well as cultivated. The first report of the station contains a list of native Wisconsin plants, that have been used medicinally, with page references to the three standard dispensatories. A copy of this report was sent to every drug store of the state. Whenever practicable, the writer has referred persons seeking information about native medicinal plants to their local druggist. It is to be hoped that the druggists thus approached will be glad to avail themselves of the opportunity to impart to old or prospective customers professional information along these lines.

Occasionally one finds a druggist who enjoys the cultivation of medicinal plants in his flower garden. Others seem to prefer to leave everything that reminds them of drugs in their store and to cultivate plants that do not suggest what they regard as their drudgery. Occasionally a druggist's wife takes an interest in plants whether pharmaceutical or not. Whether the druggist himself or his wife be interested in a garden, the pocket volume just published by Professor Trelease will be very welcome to many a lover of our friends of the vegetable kingdom. For many years Director of the Missouri Botanical Garden, the author has had an unusual opportunity to acquaint himself not only with cultivated plants, but also with the general public that loves plants, and hence to appreciate their needs. This pocket guide that is to introduce us to our summer friends of our lawns, gardens and parks, will unquestionably stimulate us to a better acquaintance and thus prove exceedingly helpful. That Professor Trelease has rendered a real service to many of us there can be no doubt.

E. K.

PUBLICATIONS RECEIVED.

Proceedings of the American Drug Manufacturers' Association, 1917 (formerly National of Medicinal Products). The Association volume contains the stenographic report of the convention at the Waldorf-Astoria, February 6-7, 1917, with the exception of the address on "Vocational Selection," by Professor Walter Dill Scott, later published in book form by the author, and the report of the meeting of the Biological Section, where all the business transacted was executive and of which no record was made. The book is bound in buckram and has 275 pages.

Proceedings of the Thirty-Ninth Annual meeting of the Missouri Pharmaceutical Association held at Excelsior Springs, June 12–15, 1917.

Proceedings of the Thirty-Eighth Annual Meeting of the North Carolina Pharmacentical Association held at Ashville, June 19–21, 1917. Proceedings of the Thirty-Eighth Annual Meeting of Texas Pharmaceutical Association held in San Antonio May 15–17, 1917.

Proceedings of the Thirty-Third Annual Meeting of the Minnesota Pharmaceutical Association and Minutes of the Northwestern Branch A. Ph. A. Wulling Testimonial held at St. Paul, February 13–15, 1917.

Announcements of various Schools of Pharmacy for the scholastic year 1917-1918.

JOURNAL ANNOUNCEMENTS.

Subscriptions: Annual subscriptions in advance, including postage: United States and Mexico, \$4.00; Canada, \$4.35; foreign countries, \$4.50. Single copies, 35 cents. Remittances should be made payable to Treasurer H. M. Whelpley, but mailed to JOURNAL, OF THE AMERICAN PHARMACEUTICAL ASSO-CIATION, Easton, Pa., or 253 Bourse Building, Philadelphia, Pa. Under the rules of the Post Office the JOURNAL can be regularly mailed only to bona-fide paid subscribers.

Requests for Back and Missing Numbers: Requests for back and missing numbers should be sent to the Editor. Claims will not be allowed if sufficient notice has not been given of change of address, and in no case if received later than sixty days from date of issue. Notice of change of address should give old and new address.

Contributions: The JOURNAL accepts no responsibility for the opinion of its contributors. Contributions should be sent to the Editor; use only one side of the sheet for writing, and double-space the lines. Articles are accepted for publication on condition that they are contributed solely to this JOURNAL; and "all papers presented to the Association and its Branches shall become the property of the Association, with the understanding that they are not to be published in any other publications than those of the Association, except by consent of the Committee on Publication." (By-Laws, Chapter X, Article 11.)

Reprints: Authors may obtain reprints of the Eschenbach Printing Company, Easton, Pa., at the prices attached to the proof sent them, provided the order is received with the returned proof. The prices are also given on this page. Otherwise type is distributed as soon as the JOURNAL is printed.

Advertisements: Communications relating to advertising should be sent to the Editor. Forms close on the first of each month, and copy should be in by the fifteenth of the month preceding date of issue, to receive proof. Date of issue—the fifteenth of the month. Advertising rates sent on request.

Membership: Applications for membership in the American Pharmaceutical Association may be made of any of the officials. The annual payment of five dollars covers the annual dues and subscription to the JOURNAL. Members receive, also, the publications of the Association that are distributed free of charge.

Further information will gladly be furnished by any of the officers of the Association and members.

Cost of Reprints: Reprints will be furnished at the following prices:

SCHEDULE OF RATES FOR REPRINTS, INCLUDING POSTAGE.

No. copies.	4 pp.	8 pp.	12 pp.	16 pp.	Covers.
50	I.54	3.08	4.62	6.16	1.27
100	1.76	3.52	5.28	7.04	I.54
150	1.98	3.96	5.94	7.92	1.82
200	2,20	4.40	6.60	8.80	2.09

Orders may be sent to Eschenbach Printing Company, Easton, Pa., or JOURNAL OF THE AMERICAN PHARMACEUTICAL ASSOCIATION, Easton, Pa., or 253 Bourse Building, Philadelphia, Pa.

I AM NO PESSIMIST.

I know druggists can make money. Lots of them are making money right now and all the time. But they are not doing it by defying conditions as they are. They are making money, in most cases, because they have kept abreast of the times, do business in a live manner and meet every condition that appears face to face.

The druggist who makes money knows that good-will is his strongest asset and this can never be gained by a system of arbitrary prices in the face of live, cut-rate competition.—*Pitts*burgh Druggist.
