J. W. ENGLAND, *Secretary.*

415 N. 33RD STREET.

#### WAR VETERANS.

Every pharmacist who served in any capacity in the Army, Navy or Marine Corps or who did his, or her, bit in welfare work during the war, is eligible to membership in the War Veterans' Section of the American Pharmaceutical Association and *in the association itself* this year without payment of dues.

There are approximately ten thousand pharmaceutically trained men who were connected in various capacities with the Army and Navy and more than three thousand of them have already been offered an opportunity to join the A. Ph. A. in its efforts to place pharmacy—and military pharmacy in particular—on a higher plane.

Before any really worth-while results can be obtained it is necessary that the great majority of these ten thousand men unite in a single organization and that organization can well be the War Veterans' Section of the A. Ph. A.

There is no red tape connected with "joining up." Just address a postal card to the secretary, W. D. Walters, Post Hospital, Fort Leavenworth, Kansas, and we will do the rest. Or, better yet, write him a letter and tell him something concerning your "Service record." An effort is being made to compile a history of pharmaceutical service during the war and there is no better way of getting the facts than to have them furnished by the men themselves. Let's go!
